—Journal of Commerce—We learn from Peterborough that Mr. W. H. McWilliams, manager of the Canadian Elevator Company, of Winnipeg, who was East recently, gave out the statement that his company with which The American Cereal Company of Peterboro is associated will build at Port Arthur, one of the largest grain elevators in the world. Mr. McWilliams, with officials of the Northern Elevator Company of St. Paul, Minn., has just returned from a trip to Montreal where a conference was held with the C.P.R. and Canadian Northern Railway authorities, in which arrangements were made for increased facilities for the new elevator, which will, it is expected, be completed in time to receive the crop of 1904. The workhouse, which will be constructed first, will have a capacity of 1,250,000 bushels. This will be supplemented by immense storage warehouses to be built of tile or concrete.

This G. F. J's Open Door

It beats all how precise and formal some people are. The other day a genteel looking man peeked in at the front window of this great family journal, then knocked at the door, instead of walking right in. Later a lady stood outside shivering, refusing to pull the latch-string and come in after her lost bundle because she had never been introduced. Gentlemen and ladies, this office of this g. f. j. is a very democratic place. The latch-string is not made of red tape. If the door seems to have that cold, forbidding air, wearing frosty locks and a squeaky voice, give it a few raps with your feet.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporter on Their Rounds

—The Girls' Guild of St. John's church met last night.

—The Committee of the Whole Council met last night.

—How is this for a hard, old-fashioned winter?

—No doubt the intense cold kept many from patronizing the Hockey Club's excursion to Port Hope last night.

—A special meeting of St. Luke's congregation will be held this evening at eight o'clock to transact important business.

—Lindsay Post—Mr. R. R. Hall, barrister, Peterborough, is the unanimous of West Peterborough Liberals to contest the riding for the Commons. Mr. Hall is well known in Lindsay.

AN EXCELLENT PROGRAM

Presented to a Very Small Audience at the Opera House Last Night

The Bertha Cushing-Child company of artists presented a most excellent entertainment to a very small audience at Bradburn's Opera House last night. Those who were present were given a rare treat in the way of refined entertainment. Miss Leonard presented some very entertaining readings; Miss Turner was also at her best in the musical line, while Mrs. Cushing-Child received most hearty applause for her excellent singing.

The following program was presented;

Violin solo—"Gypsy Dances"—Georgie Turner.

Reading—"Stradivarius"—Mabel Stanley Leonard.

Aria—"Noel d' Irlande"—Bertha Cushing-Child.

Violin solo—"Nocturne"—Georgie Turner.

Reading—Scene from "Captain January"—Miss Leonard.

Songs—"Once at the Angelus," "The Herb Forgetfulness," "Were I a Gardener"—Bertha Cushing-Child.

Violin solos—"Serenade," "Canzonetta"—Georgie Turner.

Monologue—"How School Girls Study"—Miss Leonard.

Song—"Crossing the Bar"—Bertha Cushing Child.

God Save The King.

Accompanist and director—Mr. W. Spencer Jones.

THE WAY OUT

What to Do When Food Don't Agree

When food don't agree sensible folks make a change.

Where all others fail Grape-Nuts being predigested and all nourishment, succeeds, usually, from the first trial.

A lady of Washington says, "My baby 19 months old had never seen a well day in her life. She had suffered from indigestion from the time of her birth, and it seemed impossible to find any food to agree with her. She could keep almost nothing on her stomach and her bowels were in such a constipated condition she suffered a great deal.

"It was then that I tried Grape-Nuts for her, steeping it thoroughly and straining it, putting a small portion in each feeding and it worked like a charm. She began to improve immediately and gained half a pound the first week.

"Baby got her indigestion from me for my digestive organs have always been weak. I rely on Grape-Nuts for most of my food for there are times when I can eat nothing else at all but Grape-Nuts. I am steadily improving and know it will entirely cure me in time. I never have 'that tired feeling' anymore. I eat Grape-Nuts and I feel its effects in improved mental strength very forcibly." Name given by Postum Co., Battle Creek, Mich.

Look in each package for a copy of the famous little book, "The Road to Wellville."

FIRE IN DOURO

Residence of Mr. Thomas Nolan Completely Destroyed

On Saturday a fire broke out at the residence of Mr. Thos. Nolan, lot 11, con. 6, Douro, resulting in the house being totally destroyed, and but very little of its contents saved.

The fire, which is supposed to have started through a defect in a stove-pipe, had gained considerable headway before discovered. Notwithstanding the efforts of the inmates and numerous neighbors who quickly gathered, the building was completely gutted in a very short time. The timely aid of those who had hurried to the scene of conflagration saved the outbuildings. The house was partly covered by insurance.

THE LATE PROF. CAMPBELL

Demise of an Educationalist Well Known in Peterborough

Toronto World,—John Campbell, M.A., died from pneumonia on Saturday evening at about 8 o'clock, at his boarding house, 18 Maple Grove, Parkdale, following an illness of a little over a week. He was in his 9th year.

Mr. Campbell had a life long experience of the teaching profession, having been for over forty years associated with the staff of Victoria College, then for some thirty years classical master of the High Schools or Collegiate Institutes at Bradford, Newburg, Napanee, Peterborough and Guelph. His former scholars are in almost every country and business calling.

He was what may be called a teacher of the old school—a strict disciplinarian, faithful and exact in his duties, but with a loving kind heart for all.

He leaves surviving him his widow and four children, viz., W. A. F., barrister at Ridgetown, Ont.; J. M., general advertising manager of the Rock Island System, Chicago, J. G. formerly of the Bank of Commerce, now of New Ontario and Mrs. Day, wife of Prof. G. E. Day of the O.A.C., Guelph.

The funeral service will take place at 2.30 p.m., on Tuesday, at the house, and thence to Mount Pleasant cemetery.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. Walter Stocker is in Ottawa.

—Miss Vina Moncrief is the guest of Mrs. Leary during the winter months.

—Miss Winnie Macfarlane left yesterday to resume her studies at the Presbyterian Ladies College, Toronto, after spending a couple of weeks at home.

—Mrs. J. C. Grant, 65 Sorauren avenue, Toronto, returned home on Saturday after a few days visit with her parents, Mr. and Mrs. J. L. Hughes, Park Place.

—Globe;—Mrs. J. R. Stratton and her sister, who remained in town for a small tea, given in their honor by Mrs. Claude Fox, returned to Peterborough on Saturday.

Bargains in Pianos

There are some first class bargains to be had in some new and second hand pianos and organs, at W. G. Landrum's, 170 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

THINGS CHINESE.

Many Chinese temples have windows made from mother-of-pearl, found in oyster shells. The material is transparent and looks like opal glass.

The best quality of Chinese tea is very expensive and so little of it is grown that there is never any of it to export. The Chinaman knows good tea and keeps it all for his own consumption.

The Chinese think they occupy the middle of the earth, and that all other nations are merely dwelling on the edges. Their most respectful term to designate a foreigner is "the ocean men."

Millions have been spent in civilized countries in futile efforts to preserve grapes. The Chinese have known the secret for many centuries, and millions more have been vainly used in the effort to drag from them the recipe.

In northern China hot-water peddlers go about with a whistling kettle—the whistle announcing that the water is at a boiling point. When they hear the whistle the people run with their teapots and buy enough hot water for their day's tea.

A celebrated Chinese dancing master, Hung Foo-Choo, announces in a Chinese paper that he is to hold a religious service, to which he invites everybody, in honor of the 1000th anniversary of the death of his ancestor, who was the first of the family to take up the *profession*.

A curious industry in some of the provinces in China is the manufacture of mock money for offering to the dead. The pieces are only half the size of the real coins, but the dead are supposed not to know the difference. The dummy coins are made out of tin, hammered to the thinness of paper, and stamped out to the size required.

BACHELOR'S REFLECTIONS.

No man loves his baby at first; he has to get used to it like a baseball finger.

It always makes a girl mad to be scared by a mouse when there aren't any men around.

Any man can get any woman to marry him if he only proposes to her in enough different ways.

It is generally easiest to kiss a woman right after you have begged her to forgive you for something.

After a man has argued a certain time with a woman he is either convinced or else he is willing to admit he is.

A man judges a woman's heart by her face; a woman judges a man's face by his heart.

A woman who loves too much sometimes loses, but a woman who loves too little never gains anything worth losing.

The women have got up a new story now about a girl that was so sensitive that it made her seriously ill to be kissed.

Every girl has an idea that when she is telling a man she loves him he will see her whole soul looking at him in her eyes.

Whenever a woman sees a picture in a book of a woman kneeling at a man's feet she feels that she ought to read it herself before she lets her daughter.

As soon as a woman falls in love her complexion gets better.

If modesty was the fool-killer most women would die of old age.

WHEN LIFE'S AT STAKE

The most timid man will take any chance of escape. The slender rope dropped down the precipice, the slippery log over the abyss, anything that offers a chance of life, is eagerly snatched at. The end the man seeks is safety. He cares nothing for the means to that end.

There are thousands of men and women whose lives are at stake, who are hindered from accepting the one means of safety by foolish prejudice.

Doctor Pierce's Golden Medical Discovery has been the means of restoring health to many men and women whose hollow cough, bleeding lungs, emaciation and weakness seemed to warrant the statement of local physicians—"There is no cure possible." Why should prejudice against a put-up medicine hinder you from trying what has cured thousands of suffering men and women?

"Only for Dr. Pierce's Golden Medical Discovery I think I would be in my grave to-day," writes Mr. Moses Miles, of Hilliard, Uinta Co., Wyoming. "I had asthma so bad I could not sleep at night and was compelled to give up work. It affected my lungs so that I coughed all the time, both day and night. My friends all thought I had consumption. My wife had taken Dr. Pierce's Favorite Prescription and it had helped her so much she insisted on my trying his 'Golden Medical Discovery'—which I did. I have taken four bottles and am now a well man, weighing 165 pounds, thanks to Dr. Pierce's Golden Medical Discovery."

The sole motive for substitution is to permit the dealer to make the little more profit paid by the sale of less meritorious medicines. He gains; you lose.

There are probably a lot of women that will find heaven awfully old-fashioned.

A minister doesn't have to know the marriage ceremony by heart, for if he forgets a word the woman can always prompt him.

The only thing which would punish a woman worse than having to say what she believed would be having to believe what she said.

The main difference between a cat and a woman is that the cat has whiskers.

Any man can go into a room ful of woman and pick out the one that thinks she is "advanced."

As the women run things nowadays, nobody but an Emperor can go in good society without having to be a hypocrite.

A woman's club is a place where a woman can go and learn all about baby food, garbage and Rubinstein at the same time.

Whenever you hear a woman tell another she is sorry she read a certain book, you can make up your mind the other woman is going to read it.

Many a hero to the world at large sees a "no-account" every time he looks in the glass.

The man who talks business at home is in danger of getting well-meant but risky advice.

No man can stand on top because he is put there.

Jealousy is the flattery of love. Husband and wife should never cease to be jealous of each other.

In man's eyes disappointment in love is but a pretence for seeking amusements without love.

SOME IFS

If papa didn't have to go to work;
If mamma always could sit down and play;
If chocolates were used instead of bread;
If combs and sponges could be thrown away;
If toy stores didn't have a single clerk;
And any child could go in there and stay;
If we had Saturdays five times a week;
If Christmas came on every other day;
If grown folks loved to hear a lot of noise,
This world would be quite nice for little boys.

CONFLICT BETWEEN JAPAN AND RUSSIA LESS OMINOUS

Invention of an Acceptable Formula to Cover a Russian Retreat Alone Awaited

London, Jan. 20.—The greater part of the news bearing on the Russo-Japanese crisis this morning consists of reiterations of pacific statements from St. Petersburg and Berlin. Prominence is given to the Czar's reported reception of M. Kurino, the Japanese Minister, of which nothing is known, and which is variously alluded to as having occurred and as to occur. The correspondents at Berlin and St. Petersburg attribute to the Czar personally the movement in the direction of peace, and say that his attitude was indicated in his declaration at his New Year reception, where it is said to have declared that there would not be war if he could prevent it. The Russian newspapers containing full accounts of the Imperial reception do not mention the Czar's utterances. It is the opinion in Berlin that this is because his Majesty spoke on his own initiative without obtaining the previous assent of the Government and that the censor prohibited any reference being made to his remarks.

The Berlin correspondent of the Morning Post declares that official circles equally with German specialists in Russian affairs, now believe that the invention of an acceptable formula to cover a Russian retreat is alone awaited to ensure peace.

The St. Petersburg correspondent of the Daily Mail claims to have learned from an official source that the Czar in receiving the Ministers at Tsarskoe Selo, Sunday, said that the danger of a conflict is now ended. The correspondent adds that on every hand it is recognized that the tension has relaxed. Although the terms of the Japanese note have not been published, it is no secret that their acceptance is regarded as possible. There is general satisfaction at the prospect that an arrangement of the difficulties would prevent the possibility of disputes with the United States, with which country friendship is universally desired.

The correspondent does not refer to the Czarina's reported illness. He says that in St. Petersburg all is gaiety. The Czar and the court arrived yesterday to inaugurate the season's festivities with the ceremony of blessing the waters of the Neva. There is every promise of an unusually brilliant social season.

SCANDAL THAT SHAKES A THRONE

Duke of Orleans Wants a Divorce That He May Wed Again

IN LOVE WITH A PRINCESS

Austrian Court and Catholics Fight His Plans to Become Free

Vienna, Jan. 20—The Allegemeine Zeitung says that Duke Philip of Orleans is seeking a divorce from the Archduchess Marie Dorothea of Austria, and that he has petitioned the curia for a dispensation to enable him to marry the daughter of a great Austrian nobleman. The paper asserts that the duke, who is a claimant for the throne of France, consulted the leading members of the Royalist party last summer and informed them of his intentions, giving as a reason that his present union was childless and that he desired to continue the royal line.

The royalists endeavored to dissuade the duke from taking the action he proposed and pointed out to him that his divorce and remarriage would scandalize Catholic circles in France, the chief supporters of the royalist cause. It at first appeared that the duke acquiesced in the wishes of his followers, but he has renewed his request to the curia for the nullification of his marriage, on the ground that he was forced into the union.

Emperor Patches Up a Truce.

Investigation in well-informed circles develops that it was once the duke's intention to obtain a divorce from the archduchess, but that through the personal intervention of Emperor Francis Joseph the differences of the couple were adjusted, the duke withdrawing his petition to the curia.

The noblewoman whom the duke desires to marry is said to be the Princess Clementine, daughter of Pauline Princess de Metternich-Sandor. She is a brilliant violinist and one of the most fascinating figures in Viennese society.

The report of the duke's action has caused a sensation in court circles and the course attributed to him is severely condemned.

Wife Wants Him to Be King.

It is said the strong devotion of the archduchess to duty is displeasing to the duke. The archduchess has repeatedly tried to induce the duke to live as a more consistent claimant to the throne of France.

Duke Louis Philip Robert is the head of the Bourbon-Orleans house and was married in 1896 to the Archduchess Marie Dorothea of Austria.

Another Railroad

In last week's issue the Beaverton Express announced the arrival there of surveyors and assistants, who are to survey north and south of it for the location of the Toronto and James Bay Railroad. It will be remembered that a charter was granted the City of Toronto by the Dominion Parliament for the construction of the line some three years ago, but up to the last session, when $840,000 were placed in the estimates for this enterprise, nothing further was heard of it. It would now appear the firm of McKenzie and Mann had acquired the charter, and intend pushing the line along at once as an auxiliary to their transcontinental scheme. Surveyors are working from Toronto to Gravenhurst, surveys for which section are to be completed at an early date, when the work of construction will at once be begun. Passing through Beaverton the line will cross the river between the village and the lake, south of the town the line will follow a course as nearly straight as possible, from Beaverton to Richmond Hill, and will enter the city by way of the Don flats. This line when completed will be some 500 miles in length, crossing the great fertile belt of Northern Ontario and the proposed Grand Trunk Pacific.

EVERYBODY READS THE TIMES.

REV. W. L. ARMITAGE AT PICTON

What the Gazette Says Regarding His Preaching Last Sunday

Picton Gazette: The Rev. W. L. Armitage, lately appointed Vicar of Picton, assumed his duties on Sunday last for the first time, preaching in S. Magdalene's church in the morning and the Parish House in the evening. Notwithstanding the severity of the weather there was a very large attendance at both services, who were amply repaid by the eloquent discourse of the preacher. There was a celebration of the Holy Communion at the morning service, of which over one hundred partook. The congregation seemed to be delighted with the new Vicar and appear determined to give him their individual assistance to further the work of the Church of England in Picton. An informal reception is to be given to Mr. Armitage this evening in the school room of the Parish House from 8 to 10 o'clock, to enable every member of the congregation to meet him.

AN INHUMAN ACT

Boy Forced to Walk, on Snow in Bare Feet

Further particulars of a most inhuman act perpetrated upon a young boy, have just been received. At Stony Lake a boy, ten years of age, the son of Mr. H. A. Leamon, was returning to his home which is in the country, after dark, and was met about half a mile from his destination by a man, who was unknown to the lad, and demanded to take off his shoes and stockings. This he refused to do, whereupon the stranger threw the boy down and himself stripped his feet, carrying the shoes and stockings away with him.

The night was a bitter cold one, and the lad was compelled to walk the entire distance home through the snow, which was several feet deep. Upon his arrival home his feet were found to be frozen and he has since experienced great pain. His father, immediately on the boy's arrival in his pitiable condition, secured the help of neighbors and scoured the vicinity in search of the perpetrator of the dastardly deed, but he could not be found.

The boy did not see the man's face sufficiently to identify him as he was partially masked. The farmers in the vicinity are very much incensed over the affair, and should the man be found, will likely take the matter of his punishment into their own hands.

BILL POSTERS' ASSOCIATION

Waited on Government at Ottawa—President Walter Stocker Present

A quarterly meeting of the directors of the Canadian Bill Posters' and Distributers Association was in session at the Russell House, Ottawa, last week.

Some of the directors arrived on Sunday night, including President Walter Stocker of Peterborough; Alex. Jacques, Ottawa vice-president; J. Firstbrooke, Toronto, treasurer; A. Ware, Montreal, secretary; G. Stacey, St. Thomas, and G. H. Belton, of London, Ontario.

Early this afternoon they ratified the action of the Associated Bill Posters and Distributors Association of Canada and the United States with regard to circus bills and posting, and in reference to charges and rates.

The members maintain there is an increase of business and that there is over 100 per cent. more doings in their line than there was in September last.

They also say that big advertisers when making combined contracts for both bill posting and newspaper advertising prefer the daily papers to small weeklies.

A deputation of the bill posters waited on the Government to-day, asking that some uniformity be secured in the rulings of the customs authorities as to what posters come under the departments ban as depicting scenes of violence or crime. They have no complaint to make against the Government's decision to prevent the display of undesirable pictures, but they say that some of the rulings thus far given have been utterly ridiculous, and would like instructions issued to the various ports which will leave no room for mistakes.

A New Immigration.

Twenty factory girls from the east end of London leave for Montreal this week under the auspices of the British Womens Immigration Association. About 1,000 talloresses, the association says, will soon be discharged in the North of England, and it is likely that many of them will be sent to Canada. A Montreal correspondent says there is a great demand in Montreal for factory hands, some English girls making $12 weekly.

BELL DIES OF GANGRENE

It Was From Operating on Him Dr. Anglin was Poisoned

Kingston, January 20.—George Bell, of Marlbank, Ont., who had his leg badly broken a month ago from a runaway accident, died in the General Hospital this morning of gangrene and a complication of diseases. He was the man whose leg Dr. Anglin amputated, and from whom the doctor got his hand poisoned. Dr. Anglin, who was so critically ill, is now out of danger.

PROTECTION OF GAME FISH

Dominion and Ontario Governments Reach Understanding

Ottawa, January 20.—The Governments of Ottawa and the Dominion have come to an understanding in regard to the regulations to be enforced for the protection of fish in Ontario. After the judgment of the Privy Council in 1898 the province adopted certain regulations which, however, were pronounced ultra vires. Since that time the authority of the province on fishery matters has not been well defined, and resulted either in the overlapping of legal enactments or inaction on the part of both Governments with the result that the fisheries, especially as concerns black bass, maskinonge, trout and other varieties valued for food and for purposes of sport, have suffered severely.

DID NOT FIND RICHES

Nova Scotians Failed in their Search for Treasure

San Francisco, January 20.—M. McManus and C. Thompson, of Halifax, N.S., have returned here from an unsuccessful search for treasure in Terre Del Fuego. They sailed from Nova Scotia on March 17 last, with eight companions on the schooner Hattie L. M., to look for treasure in large quantities, which the captain of the vessel said was to be found there. When the schooner reached the coast of Terre Del Fuego she went aground in trying to land, and McManus and Thompson having had a misunderstanding with others of the party, took all their belongings from the vessel and started for the interior with a band of Patagonian Indians. Here they met with nothing but hardship and finally made the coast again, where they made a voyage of 125 miles in a canoe and reached a point whence they sailed for this port.

FOUND GUILTY OF MURDER

Charles Bonier Buffalo Murderer will be Electrocuted

Buffalo, N.Y., January 20.—Charles Bonier has been found guilty of murder in the first degree for killing Franz and Johanna Frehr, an old German couple, in their little home in Jefferson street on November 19, 1903. The verdict carries the death sentence with it. The jury was out a little less than six hours. Bonier, who is 24 years took his conviction coolly, looking calmly at the foreman, as he announced the result of the jury's deliberations.

Attorney Murphy, on behalf of Bonier, asked Justice Lambert to give him until today to make any motion that might be deemed necessary in the interest of his client. Justice Lambert granted his request. Bonier left the court room with a firm step, his giant form towering head and shoulders above the deputies at each side. The Frehrs were murdered for their money. The murderer buried the bodies in a shallow grave in their own yard, and proceeded to install himself and his housekeeper in their former home, within a few feet of the mutilated bodies of his victims.

EXPOSES INTERIOR OF MAN

New York Physician Makes Diagnosis of the Stomach

New York, Jan 20—Another important use of Dr. William J. Morton's fluorescent water cure was made today. Dr. Robert C. Kent has discovered that an almost perfect diagnosis of the stomach may be made by the use of the fluorescent liquid and a light that will cause it to fluoresce. The intestines are first flooded with the liquid and then the patient swallows a small lamp adapted for this experiment. In an experiment made by Dr. Kent he discovered that when the fluorescence took place the interior of the abdomen was plainly visible. This aid to diagnosis is almost as important as the discovery that Dr. Morton's solutions or liquid sunshine will cure cancer.

The fluids given to the patient are very dilute solutions of various fluorescent substances and they have never been in any way subjected to the radium or X-ray influences before ministration internally. In other words, the water thus administered is not radioactive, but is water capable of being rendered illumable by the agencies of radium when used from the exterior.

COULD NOT FAVOR UNIONS

Toronto, Jan. 20—The city of Toronto recently called bids for fireman's clothing and the lowest competitor was the Crown Tailoring Company. The contract, however, was awarded at a higher price to a concern using the union label. Thereupon the Crown Tailoring Company obtained an injunction. In rendering a judgment Chancellor Boyd declares that in issuing specifications the city could not demand the use of any particular union label and thus discriminate against certain classes of laborers who might be as capable as those entitled to use the label. The true test of ability, he held, is not membership in a union.

COL. LYNCH MAY GO FREE

London, January 20—The Weekly Despatch says that Col. Arthur Lynch, who commanded the Irish Brigade against the British forces in South Africa, and who was afterwards convicted of treason and sentenced to imprisonment for life, will be liberated soon.

PIERRE DESCHAMBEAULT DEAD

Winnipeg, January 19 — M. Pierre Deschambeault, eldest son of George Henry Deschambeault, direct lineal seignorial representative of Seignory Deschambeault, is dead at St. Boniface, aged 65 years. He was once chief factor for Hudson's Bay Company, and member of first scrip commission. Death was caused by typhoid.

THE LIBERAL CANDIDATE

Lindsay Posts Opinion of Mr. R. R. Hall

The Lindsay Post, referring to the nomination of Mr. R. R. Hall, says:

"The selection of Mr. Hall as the choice of the convention possesses more than a passing interest for the people of this town and County, because he is an ex-citizen of Lindsay and because his boyhood days were spent in Fenelon township. Mr. Hall is a son of Mr. Wm. Hall one of the most respected farmers of that township, and reeve of the municipality for several years. In 1853 his son, Robert R., came to Lindsay, and entered the law office of Mr. John A. Barron, Q.C., (now Judge of Perth County) where he remained till 1886. As a student Mr. Hall was noted for his untiring energy and unwavering attention to the interests of his employer. Feeling an irresistible desire for knowledge—one of the promptings of an ambitious spirit—he studied hard both late, and early and in other ways manifested in a marked degree that he possessed the ability, the unconquerable spirit and the unflinching devotion which commanded and merited the respect and admiration of all who appreciate application and self-denial in the young man who has his way to make in the world by his own unaided efforts. At the same time Mr. Hall found time to take an active part in the sports and beneficial amusements then popular and his many good qualities won him a number of devoted friends.

"Soon after passing a brilliant examination in 1891, and being admitted to the bar Mr. Hall removed to Peterborough, where he quickly attained prominence both in his profession and in public affairs. His influence was manifested in everything that tended to the good of the community and the upbuilding of the town. Taking an active interest in politics he threw himself into the various contests with an energy that proved infectious, and in his well-stored mind, and effective delivery, fitted him to render most effective service on the platform, while a spirit of broad toleration for the views of his opponents earned for him the respect of those whose arguments he tore to tatters."

WILL NOT GIVE THE KEY UP TO RUSSIA

To Surrender Corea Will Imperil National Existence of Japan

OPINIONS OF MR S. JENNER

An Old English Resident of Yokohama Tells of the Impending Struggle

Montreal, Jan. 20—"When I left Yokohama, there was a strong feeling even then that Japan had reached the end of her diplomatic tether, and that if Russia refused to back down, war would necessarily result. That was several weeks ago and there must have been some change in the attitude of Russia, not known to the general public, that has been the means of avoiding the clash that seemed imminent."

These were the words of Mr S. Jenner, of Yokohama, to a press representative at the Windsor. Mr. Jenner is en route to England, and he is naturally in touch with the events that have transpired during the past few months, leading up to the threatening situation in the Far East. Of one thing he is certain and that is that Japan will never consent to Russia occupying any corner of Corea, as such a course would practically imperil the existence of Japan as an independent nation and place her coast line in jeopardy.

"Corea is the key to Japan," said Mr. Jenner," and Japan would never consent to hand over that key to the safekeeping of Russia. Imagine what a position she would be placed in under those circumstances."

Of the naval and land strength of Japan Mr. Jenner knows much. The army is in a high state of perfection, and as soldiers they are in his estimation, equal to anything. After the war with China, when Japan showed she was a new power in the East, and considerably surprised the whole world by beating China badly, a bill was introduced by Marquis Ito, and speedily made law, known as the Army and Navy bill, which had for its main object the preparation and reconstruction of the forces on land and sea. That was ten years ago, and the time has just elapsed for the working of that bill, the result being that the forces of Japan on sea and land have been brought to a state of efficiency. Japan's grand old man, Marquis Ito, foresaw the present affair with Russia, and it is owing to his wise and enlightened policy, that the fighting force of the country has been placed on such a substantial and satisfactory footing.

Mr Jenner is of the opinion that the first rounds of the battle will be fought out on the sea and Japan should be able to effectively show her superiority over her antagonist in that method of warfare. Of the part that the Siberian railway will play in the event of war, Mr. Jenner is of the opinion that the advantages of that road from a point of view of transport have been greatly over-estimated, and Russia would not be able to pour the hundreds of thousands of troops she is boasting of by that means into Manchuria. The road is a very poorly constructed affair and would not stand the strain of continuous heavy transport.

When Mr. Jenner left Japan the whole country was prepared for the struggle and was prepared to fight to the last man for their rights. The people were backing up the Government in their demands and not a discordant note was heard regarding the air-tight policy of the rulers. The general impression was that the time had come when Russian aggression would have to be checked and unless that were done, and done speedily Japan would not be in so good a position as she was today to enforce her demands.

COMING TO CANADA

Many Immigrants in Montreal Awaiting Spring

Montreal, Jan. 20—Never in the history of immigration has Montreal in the winter months had within her gates so many immigrants. In former years the tide of immigration has dropped off almost entirely in the winter months, but this year each steamer to Halifax and St. John is crowded with men and women, chiefly from Great Britain, who intend to settle in Canada. The problem of employment until the spring opens and farm work can be obtained, is a serious one. The Star saw the manager of one of the leading employment bureaus of the city yesterday, and learned that a great number of young Englishmen are going up every week into the lumber camps, where there is a great demand for men this year. They will work until the spring at fair wages and will then go out to the West.

Numbers of these men have already gone out to the West, and have engaged as lumbermen in the Winnipeg river lumber districts. Large numbers of them, however, are still in Montreal, and the refuges and cheap boarding houses in the vicinity of the stations are crowded. The exceedingly cold weather is telling upon them, and the bitter days and nights are being severely felt by these intending Canadian citizens. Most of the employment bureaus are looking for men to work either on railway construction or in the various lumber camps, and there is plenty of work waiting for those who desire it. A great many of the new comers, however, prefer to stay round the city and wait for the breaking up of the winter when they will go west, either to Ontario or Manitoba.

ADJUDGED INSANE

Ogdensburg, January 19—Pearl Williams, of Carthage, aged 17 years, daughter of Mr. and Mrs. Edward G. Williams, was adjudged insane, and has been removed to the state hospital in this city. It is rumoured that her illness is due to overstudy.

GOING TO JAPAN TO SEE THE WAR

Three Correspondents on Their Way to Yokohama

THINK STRUGGLE IMMINENT

Most People in England are Inclined to Think That Japan will Win

Montreal, Jan. 20—War between Japan and Russia cannot be long delayed. That is the opinion of two well known English war correspondents who are now in the city on their way to the Far East.

Mr William Maxwell, of the London Standard and Mr. R. J. McHugh, of the London Telegraph, accompanied by Mr. C. L. Brownell, have left for Vancouver en route for Yokohama.

They will sail on the Empress of Japan on January 25th, along with Mr. Melton Prior, who has already left for the West.

Mr. Maxwell has been present at many important incidents during the past fifteen years. He was with Kitchener at Khartoum, was shut up in Ladysmith throughout the protracted siege of that place by the Boers, accompanied the Duke and Duchess of York throughout their Colonial tour, visited South Africa along with Mr. Chamberlain, and followed the King during the Sovereign's continental tour.

Mr McHugh has also had not a little war experience, having been through the Spanish-American and South African campaigns.

Mr. Brownell is an author of some repute who has lived for several years in Japan. One of his best known works is entitled "In the Heart of Japan." Mr. Brownell will also represent the London Standard at the front.

These three gentlemen, so a press representative was informed, are among the last of the London newspaper men to leave for the seat of the coming conflict. Most of the others left many weeks ago.

"There is at home an idea, very widespread, that hostilities cannot be much longer delayed," said Mr. Maxwell. "The Japanese will very shortly land troops in Corea, and then invite the Russians to come and turn them out. The day for the formal declaration of war is long since past. No nation does that now, and Japan will make no exception to the rule.

"Most people at home expect that the Japanese will win. Contiguity to their source of supply will tell largely in their favor. Contrawise, Russia will be placed at a great disadvantage owing to its possessing only a single line of communication which can easily be broken up. The British learned something of what that means during the campaign in South Africa.

"It is hoped in Great Britain that there will be no continental interference. However, if any nation comes to the assistance of Russia, Great Britain will be forced to assist Japan. All the nations of Europe understand just what are Britain's treaty obligations in that respect.

"But none of the nations of Continental Europe desire to see Russia obtain more territory. Hence none will stand by to see Japan dismembered. It is felt that Russia has in recent years been too grasping."

GOLD ASSAYS $180,000 A TON

Cripple Creek, Col., Jan. 18—The most important gold strike ever made in this district became known today. It was made on Beacon hill. A six-foot vein, through which streaks run which assay averaging $300 a ton, was uncovered, just high as $180,000 a ton.

BRITAIN WOULD KEEP ENGAGEMENTS WITH ALLIES

Has Strengthened the Belief That in the Event of a Japanese Defeat Russia would Derive No Tangible Benefit

According to the Times information from St. Petersburg, there is no doubt whatever of the peaceful disposition of the supreme authorities there. The correspondent dwells upon the extraordinary appearance in the newspapers of a telegram from New York, reporting the utterances of the Czar at his New Year reception. They say that such an announcement could only be published in Russia with special permission of the Government. It is the first time that a message of such importance from the Czar himself has been sent to America to be telegraphed back. The communication of this message by way of New York indicates an aspect of the situation that has a great deal more to do with Russia's present attitude than is generally understood. Nothing has surprised and affected the Russians so much, not even the stubborn insistence of Japan, as a great alteration has taken place, or at least has shown itself during the past twelve months in the sentiments of the people of the United States toward Russia, and nothing has been kept so closely in view as a possibility to be avoided at all hazards of serious complications with the American Republic. The recent ratification of the American treaty with China for the open door in Manchuria may be said to have cut the ground from under Russia's feet on this subject, and in the circumstances, Russia had nothing else to do but acquiesce.

The declaration of Mr Balfour, the English Prime Minister, that Great Britain would fully carry out her engagements with her allies is also fully appreciated. It appears to have strengthened the belief that in the event of a Japanese defeat, Russia probably would not be allowed to derive any actual, tangible benefit from her victories without having to encounter England after an exhausting and costly campaign. These two points coupled with the extreme uneasiness concerning internal affairs, are the chief considerations influencing Russian statesmen, and it is nowise improbable that Russia's response to the last Japanese note will indicate means of surmounting the difficulties. The dangers of the moment seem to lie more in Japan, where untoward events might be precipitated owing to the way Russia's long resistance of the Japanese claims has apparently stirred up the feelings of the Japanese.

The correspondent disclaims the intention to convey the idea that there is much opposition among the Czar's advisers to the conclusion reached last week that the present security for peace lies in the fact that the Czar finds no wisdom in a multitude of councillors and that his opinions and wishes so far agree with those of the majority, including, it is stated, Gen. Kouropatkin, Minister of War.

A despatch to the Daily Mail from Tien-Tsin says that China has asked for Russian consent to place 15,000 troops on the Chinese-Manchurian frontier to preserve order.

NURSE DEVELOPS SMALLPOX

Case is of Mild Type and Prompt Measures Taken to Contagion

Toronto, Jan. 20—There is a mild case of smallpox being treated at the Mimico Asylum, which is now under strict quarantine. The patient, according to a statement made by the asylum authorities, is a newly appointed nurse, whose illness was discovered in its beginning and measures forthwith taken to isolate her and prevent contagion to the inmates of the place. The name of the patient is withheld, but it is understood she comes from Lennox county.

On Friday afternoon Supt. Dr. Beemer's attention was called to a few small vesicles on the face of the nurse and although they were not mature enough to admit of a positive diagnosis, he called in Dr. Hodgetts, medical inspector of the Provincial Board of Health who determined the case one of mild smallpox, and for the next few weeks friends of patients at the asylum will not be able to make their usual visits.

The inmates are being rapidly vaccinated and no spread of the disease is feared. There are some 600 patients in the institution.

Dr. Bryce of the Provincial Board of Health is investigating the circumstances under which the nurse contracted the disease. She has been at Mimico for about a week, and evidently contracted the smallpox before going there.

WINTER LASTED ALL YEAR

There was no Summer Weather During the Twelve Months of 1816

While everyone is speaking of the present season as being remarkable in its characteristics I have gathered for your readers some reliable facts of the year 1816 known as "the year without a summer." Few persons now living can recollect it, but it was the coldest ever known throughout Europe and America. The following is a brief abstract of the weather during each month of the year.

January was mild, so much so as to render fires almost needless in parlors. December previously was very cold.

February was not very cold, with the exception of a few days it was mild, like its predecessor.

March was cold and boisterous during the first part of it, the remainder was mild. A great freshet on the Ohio and Kentucky rivers caused a great loss of property.

April began warmer, but grew colder, as the month advanced and ended with snow and ice and a temperature more like winter than spring.

May was more remarkable for frowns than smiles. Buds and fruits were frozen; ice formed half an inch thick; corn killed and the fields again and again replanted, until deemed too late.

June was the coldest ever known in this latitude. Frost, ice and snow were common. Almost every green thing killed. Fruit nearly all destroyed. Snow fell to the depth of ten inches in Vermont, several in Maine, three in the interior of New York and also in Massachusetts. Considerable damage was done at New Orleans in consequence of the rapid rise of the river. The suburbs were covered with water and roads were only passable with boats.

July was accompanied with frost and ice. On the 5th ice was formed of the thickness of a common window glass throughout New England, New York and some parts of Pennsylvania. Indian corn was nearly all destroyed; some favorably situated fields escaped. This was true of some of the hill farms of Massachusetts.

August was more cheerless, if possible than the summer months already passed. Ice was formed half an inch thick. Indian corn was so frozen that the greater part of it was cut down and dried for fodder. Almost every green thing was destroyed both in this country and in Europe. Papers received from England state "that it would be remembered by the present generation that the year 1816 was a year in which there was no summer." Very little corn ripened in the New England and middle states. Farmers supplied themselves from corn produced in 1816 for the need of the spring of 1817. It sold at from $4 to $5 a bushel.

September furnished about two weeks of the mildest weather of the season. Soon after the middle it became very cold and frosty; ice formed a quarter of an inch thick.

October produced more than its share of cold weather, frost and ice common.

November was cold and blustering. Snow fell so as to make good sleighing.

December was mild and comfortable.

Local Sporting News.

Cobourg juniors won at Belleville last night by 6—1.

One of the hottest games in the T.V.L. will be played tomorrow night when Peterborough 1's and the T.A.B. come together for the first time. The game should be stubbornly contested from the start to finish.

The Thos. Barrie hockey team organized last night with the following officers—Hon Pres Mr. Thos. Barrie, Pres Mr. E. Hilliard, Sec.-Treas. Miss M. Craig, Manager, Mr. A. E. Brundrette; Trainer, Mr. J. O. R. DeChevigny; mascot, E. Harris.

—The seniors will go to Belleville on Friday night to play one of the hardest matches of the season. The boys will have to play some to defeat the Belleville bunch, but they are capable of doing it.

The Peterborough juniors were defeated last night by the Port Hope juniors by a score of 4 to 3. The game was hotly contested. Mr. J. McCabe acted as referee.

Picton, Jan. 18—In the intermediate O.H.A. game here to-night between Belleville and Picton, the former won by 4 to 3. At half-time the score was 2, to 2. It was the roughest game ever witnessed here, very little clean hockey being played by either team. The game was fast and furious from the start. Belleville scored the first goal in one minute. It was a see-saw from this to the finish, Belleville scored the winning goal two minutes before full time. For Belleville McGuire and McMillan played a fine game while for Picton Strike and Rocque in goal put up a fine, steady game. The teams—

Belleville—Goal, Winchester; point McMillan, cover-point, Brown; rover; Burrows; centre, McGuire; left wing, Marks; right wing, Kennedy.

Picton—Goal, Rocque; point, Croft; cover-point, Powell; centre, Embury; rover Strike, left wing, Seale; right wing Gerow.

Referee—Hugh Rose.

Bannie Ledge 22 Feet Wide.

New York, Jan. 18— The strike in the property of the Bannie Gold Mining & Milling Co., near Prescott, Ariz., is on a ledge 22 feet wide. The ore averages $100 a ton and 10 tons are being shipped daily to the Val Verde smelter.

WANTS TO FIND MOTHER

Has Made a Fortune but Happiness is Incomplete

London, January 18.—A missionary at the Marlborough Police Court has received a letter from D. O'Connor, who twenty years ago was a London waif, and has now made a fortune in Canada, saying his happiness would be complete if he were able to find his mother.

Niagara Not In It.

Mr Rudyard Kipling says that South Africa will be able not only to feed the Motherland with corn, but the United States too. Victoria Falls, with its 35,000,000 horse-power, will, he says, be able to furnish electricity enough to make the Dark Continent a blaze of glory.

Seddon Stands Firm.

Premier Seddon, of New Zealand, speaking on Saturday, said that whatever the view taken by other Premiers of Great Britain, New Zealand would protest against Asiatic labor dominating the country (South Africa,) for which New Zealand's sons had bled and died. The appearance of Russia as a naval power in the China seas, he added, is a danger to the British colonies, involving increased imperial expenditure to meet altered conditions.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free —Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month, and to outside points at $3 per year strictly in advance.

PETERBOROUGH, JANUARY 20, 1904

THE DEMANDS OF JAPAN

On the eve of war, it will be useful to review what Japan has demanded and what Russia has refused. The moral judgment of the world is to be passed upon both. These demands and the reply of Russia constitute the record on which it is to be made up. Here is a condensed statement of the demands Japan sent to St. Petersburg some time ago and on which, it is understood, she insists in the last dispatch;

"First. A mutual agreement in respect to the independence and territorial integrity of the Chinese and Corean Empires.

"Second. Mutual recognition of the special interests of Japan in Corea and of Russia in Manchuria.

"Third. A mutual engagement in accordance with the principle of equal facilities for commerce of all nations, that neither Japan nor Russia shall interfere with the commercial rights acquired by the other by virtue of treaties with China, and Corea respectively."

The answer of Russia demanded a free hand for herself in Manchuria and the conversion of the northern third of Corea into a "neutral zone," which would be in effect almost wholly under Russian influence. It is stated in St. Petersburg that Russia has made some more concessions in her last reply to Japan, but it may be assumed fairly that the concessions do not affect the spirit and essence of her demand to have Manchuria now, and to put Corea on ice for future absorption. We may regard the case as fairly made upon both sides, and invite the judgment of civilization upon it as stated above.

As far as Corea is concerned, Japan is fighting for her own hands. Her interest there is superior to that of any other nation. Control and final control of the peninsula are vital to her continued national existence. No one can blame her for going very far to safeguard this, especially as the interests of world commerce in Corea would be far safer in her hands than in those of Russia.

In the demands relating to Manchuria and the Chinese government, Japan is fighting the battle of civilization. The interest of world commerce in these demands is ever superior to that of Japan. It is quite certain that they were drawn up after consultation with the governments of Great Britain and the United States. If Japan goes to war, she will spend blood and treasure for precisely the same objects for which Britain has been spending breath and ink in diplomacy for years. The independence and territorial integrity of China and Corea, with respect for the commercial privileges secured to all nations by existing treaties with them, is the whole spirit and essence of these demands.

Special interests of Russia in Manchuria and Japan in Corea are to be recognized; but these interests are not to warrant either alienation of territory, destruction of independence or tearing up treaties between China and the commercial nations. The weak point of this demand is that it does not recognize the established fact of Russian possession of Manchuria and accept Japanese possession of Corea in compensation, binding both countries to assume and carry out existing treaties. It has been reported that Japan offered this compromise later and it was refused.

Russia has answered the Japanese demand for the open door with acts as well as words. The new commercial treaty with the United States opens the two Manchurian ports of Mukden and Antung. Russia has occupied these ports with troops. Negotiations are pending between Japan, England, and the United States, acting together, and Corea, for opening the Yalu river and the northern part of the peninsula to the world's commerce. Russia has occupied the line of the Yalu river with troops, and demands a practical protectorate over North Corea.

The war is expected to begin at this point, where Japan will strike a blow in defence of the rights of world commerce against military monopoly. She will be fighting the battle of civilization.

HOW TO MAKE A CITY GROW

The Springfield, Mass., board of trade is favorably considering the plan adopted by Williamsport, Pennsylvania, for encouraging the establishment of new industries in the city. It appears that through the efforts of the board of trade at Williamsport a fund known as the "guaranty fund" was subscribed, amounting to $216,000, the subscriptions ranging from $5,000 to $500. No money was paid in, but the subscribers to the fund—about one hundred in number—chose from their own number, a board of trustees and and executive committee. When application is made for assistance from this fund, the enterprise for which assistance is asked is examined with great care. The most thorough investigation is made into the accounts and condition of the plant if the concern is already in existence, or into the prospects of a new enterprise, and if after such investigation the trustees are satisfied with all the conditions they are authorized, by the terms of the subscription agreement, to indorse the commercial paper of the applicants to such an amount as they shall deem proper. This indorsement carries with it the credit of all the subscribers to the guaranty fund, and they become bound thereby to respond in case of loss, each for himself and not for the others, for his proportionate part of the amount of the paper so indorsed.

It is not surprising to read that this well-constructed plan works well. It is stated that several enterprises of great value to Williamsport have been established, and so far not a dollar has been lost nor has a single subscriber been called upon to pay anything because of his signing the paper. The talk is that the plan is going to be tried in Springfield, and perhaps it might be considered in some of our progressive Canadian cities.

A TOUGH BUSINESS

There are several ways of making a living. For instance, in Texas, where a strong public sentiment antagonistic to railroads has grown up, and is backed by stringent legislative enactments and strict interpretation by the courts, a peculiar form of fraud has been brought to light. It is found that there is a gang of professional "victims" operating on the various railroads, going from one to another, meeting with accidents, and suing for damages. They travel in groups, so that there is never any trouble about getting the right kind of witnesses to the manner of accident, or to the extent of the injuries. Texas juries are known to be friendly to the suitor against railroads and so far the gang has had little trouble in securing verdicts for substantial sums. By the operations of this coterie of sharpers, damages on account of personal injuries received in Texas have increased, it is asserted, by railroad officials, from $96,000 in 1898 to $2,000,000 in 1903—an increase out of all proportion to the growth of population and the extension of railroad activity.

Being a professional victim is hard and dangerous work, but it doesn't seem to be entitled to the big pay earned. Doubtless, though, the professional victims think it is.

HUMAN HAND FOUND

Thought to Have Been Cut Off by Ghouls After Rings

Chicago, January 19.—A human hand and some money and jewelry have been found in the debris of the Iroquois theater. The hand was that of a man and apparently had been severed from the wrist in an attempt to get possession of rings. As nobody was found from which a hand had been taken, the supposition is that the body may have been consumed by the fire.

The police found $30 in bills encased in a chamois skin bag, and also a five-carat opal among the fragments of broken glass and charred wood.

Ayer's Cherry Pectoral quiets tickling throats. Doctors have known this for 60 years. Ask your own doctor about it. Do as he says. J. C. Ayer Co., Lowell, Mass.

WANTS TO FIND MOTHER

Has Made a Fortune but Happiness is Incomplete

London, January 18.—A missionary at the Marlborough Police Court has received a letter from D. O'Connor, who twenty years ago was a London waif, and has now made a fortune in Canada, saying his happiness would be complete if he were able to find his mother.

Niagara Not In It.

Mr. Rudyard Kipling says that South Africa will be able not only to feed the Motherland with corn, but the United States too. Victoria Falls, with its 35,000,000 horse-power, will, he says, be able to furnish electricity enough to make the Dark Continent a blaze of glory.

A New Immigration.

Twenty factory girls from the east end of London leave for Montreal this week under the auspices of the British Women's Immigration Association. About 1,000 tailoresses, the association says, will soon be discharged in the North of England, and it is likely that many of them will be sent to Canada. A Montreal correspondent says there is a great demand in Montreal for factory hands, some English girls making $12 weekly.

Seddon Stands Firm.

Premier Seddon, of New Zealand, speaking on Saturday, said that whatever the view taken by other Premiers of Great Britain, New Zealand would protest against Asiatic labor dominating the country (South Africa) for which New Zealand's sons had bled and died. The appearance of Russia as a naval power in the China seas, he added, is a danger to the British colonies involving increased imperial expenditure to meet altered conditions.

Free Trade In Canada.

Mr. Chamberlain, writing to a correspondent, says the so-called Canadian free traders know perfectly well that there is not the slightest indication of any desire on the part of the Canadian people to adopt their principles. A preferential tariff is the only way to increase commercial intercourse.

Spreading The Yarn.

The Chronicle's Ottawa correspondent wires that the dissolution of the Canadian Parliament was postponed owing to the health of Sir Wilfrid Laurier.

Following Canada.

The Anglo-South African Preferential Trade Association has been formed to revise the present preference to Britain of 2 1-2 per cent. as being too small, and make it the same as Canada's.

Replaced by Negroes.

Nearly 1,000 English navvies were landed at Plymouth on Saturday. They have returned from South Africa, and their work is being completed by colored labor. The experiment cost £40,000.

A Chamberlainite.

Lord Stanley, the Postmaster-General, speaking at Bolton on Saturday, said his support of Premier Balfour was whole-hearted, but if Mr. Chamberlain carried the field he would follow the party implicitly, though probably not as a Cabinet Minister.

BODILY WEAKNESS

A DISTRACTING CONDITION THAT IS PERMANENTLY CURED BY FERROZONE. A PLEASANT REMEDY IN TABLET FORM TO BE TAKEN AFTER EACH MEAL.

All fagged out ideas come as slow as molasses in January. You think of things just a minute or so too late. Snap is gone and the bouyancy and strength that makes life a pleasure, that's gone too.

The doctor would say that you are run down, and you don't eat or digest enough. Your stomach requires some aid, and probably your digestion needs a bracer. The blood should have phosphorus and iron to strengthen and purify it.

Now Ferrozone is a wonderful blood maker and nerve stimulant. It is really a food for the blood, nerves and vital energies and will improve your run down condition in a very short time.

Ferrozone will make you strong and capable of doing a heavy day's work without fatigue. It is a marvellous remedy and does marvellous things as the following testimonial proves.

"After my baby was born I was left in a weak, sickly condition, totally unfit for a mother's household duties. I was excitable and nervous, and trifling things bothered me very much. I somehow would not gain strength, although I took malt extracts and tonics all the time. A lady friend recommended Ferrozone which I used with splendid results. The first box helped quite a little, and when I had taken six boxes my former health, ruddy cheeks and good spirits, were fully restored."

You can't spend 50c. to a better advantage than on a box of Ferrozone and the sooner you get Ferrozone the sooner you will get well. Don't accept a substitute, but insist on your druggist supplying the genuine Ferrozone which sells for 50c. a box, or three boxes for $1.25. By mail from N. C. Polson & Co., Kingston, Ont.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

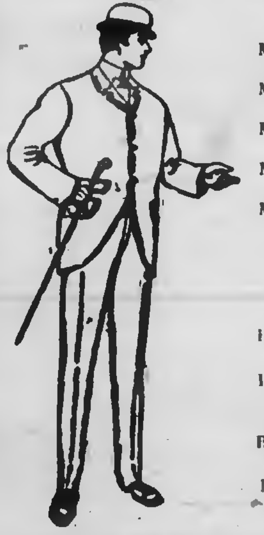
WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough —necessity knows no law — the stock can't be moved or kept for another season.



MEN'S SUIT SLAUGHTER

BLOOD DISEASED MEN

If you ever contracted any blood disease you are never safe unless the virus or poison has been eradicated from the system. Have you any of the following symptoms? Sore throat, ulcers on the tongue or in the mouth, hair falling out, aching pains, itchiness of the skin, sores or blotches on the body eyes red and smart, dyspeptic stomach, sexual weakness—indications of the secondary stage. Don't ruin your system with the old fogy treatment—mercury and potash—which only suppresses the symptoms for a time only to break out again when happy in domestic life. Don't let quacks experiment on you. Our **New Method Treatment** is guaranteed to cure you. Our guarantees are backed by bank bonds, that the disease will never return. Thousands of patients have been already cured by our **New Method Treatment** for over 20 years. No names used without written consent.

Mr. E. A. C. writes: "Your remedies have done me more good than Hot Springs and all the doctors and medicines I had previously tried. I have not felt any of those pains or seen any ulcers or blotches for over seven years and the outward symptoms of the loathsome disease have entirely disappeared. My hair has grown in fully again and I am married and happy."

IS THERE CERTAINTY IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.
2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.
3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.
4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.
5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.
6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.
7th—By being able to ease a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

Manager.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 16th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.82 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.82 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address.

NOTTINGHAM BUILDING, - SYRACUSE, N.Y.
PETERBOROUGH BROKERAGE CO., Local Fiscal Agents, Peterborough

Anecdotal.

General "Phil" Sheridan was at one time asked at what little incident did he laugh the most. "Well," he said, "I do not know, but I always laugh when I think of the Irishman and the army mule. I was riding down the line one day when I saw an Irishman mounted on a mule, which was kicking its legs rather freely. The mule finally got its hoof caught in the stirrup, when, in the excitement, the Irishman remarked, "Well, begorra, if you're goin' to get on, I'll get off."

While in England Henry Ward Beecher was entertained by a gentleman who believed in spiritualism and was himself a medium. One day he asked if Beecher would like to talk with the spirit of his father, Dr. Lyman Beecher. Mr. Beecher replied that it would please him immensely. After the seance was over he was asked how it had impressed him, at which, with the twinkle in his eye, Beecher responded: "All I have to say is that if I deteriorate as fast for the first ten years after I am dead as my father has, I shall be a stark naked fool."

It is related that when he first visited Ireland, Thackeray took a drive on a Dublin car some distance into the country. Milestones had recently been erected along the roads, and on each was printed the number of miles, with the letters "G. P. O.," distances being measured from the general post-office. Thackeray was unaware of this, and in his thirst for information asked the carman what the letters meant. The prompt reply was: "God preserve O'Connell." Thackeray believed what he was told, but the incident only appeared in the first edition of his book.

The Manila "American" has discovered "the champion circulation liar." He is acting as editor of the "Thundering Dawn," a Buddhist organ just started in Tokyo. Here is his greeting to the public: "This paper has come from eternity. It starts its circulation with millions and millions of numbers. The rays of the sun, the beams of the stars, the leaves of the trees, the blades of grass, the grains of sand, the hearts of tigers, elephants, lions, ants, men and women are its subscribers. This journal will henceforth flow in the universe as the rivers flow and the ocean's surge."

When a boy in Smyrna, Justice David J. Brewer of the United States Supreme Court, once paused to speak to Adjib, a scribe of Smyrna, on the highway. Adjib's robe was as white as snow, but there was a hole in it. "There is a hole in your robe, Adjib," Justice Brewer said. "I know it," Adjib replied. "If you know it why don't you darn it?" Brewer asked. "For the sake of appearances," Adjib answered; "a hole may be an accident of the most recent happening. A hole will pass upon a king, a noble, or the most rich and powerful person. But a darn is the sign of poverty. There is no getting around it, no misunderstanding it. I cannot afford to wear a darned robe."

A pair of frightened horses were dashing madly down the street. The coachman was sawing at the reins, and the carriage was swaying from side to side in a dangerous fashion. The occupants of the vehicle, an elderly woman, noted for her extreme parsimoniousness, and her pretty niece, gave no outward signs of fear; but just as the horses came to a standstill the younger woman unexpectedly fainted. "I wasn't frightened a bit," she explained afterward, "until, just as we rounded that last corner with three wheels in the air, Aunt Caroline exclaimed, 'I'd give a dollar to be out of this!' I knew the case must be serious if Aunt Caroline was beginning to risk dollars in that fashion."

A young couple with matrimonial intent, fresh from the green fields of their rural homes, went recently to the parsonage of a clergyman in Maryland. The nuptial knot was tied. In the pause which followed the newly-made Benedict looked embarrassed as he fished about in his trousers' pockets as if looking for something. "What's the price?" he finally blurted out. "The State allows me a dollar," said the clergyman, "but—" and paused. Some pauses are more eloquent than words. Evidently this was not. "Well," finally remarked the groom as he handed the astonished divine a quarter, "if the State allows you a dollar take this and the job will have netted you a dollar and a quarter. Good day."

It was the custom of a certain minister when dining at the home of one of his best friends to consume a glass of milk and then, without more ado, fall to and enjoy the spread, which was always elaborate when he was expected. One day when the minister was scheduled to appear, instead of the foamy glass of milk, delicious and creamy, his friend placed beside his plate a good, stout, rich glass of milk punch, so clearly and cleverly prepared that it resembled nature's concoction to a nicety. The dinner hour duly arrived, and after a short blessing the minister seized his glass and quaffed. Not a tremor, not a move, not an exclamation, did he make, until the beverage was consumed, and then he exclaimed, as he pushed the glass from him, closed his eyes and smacked his lips: "Ah! a glorious cow!"

In Arizona, when a man buys a thousand head of steers, it is customary to allow him a ten per cent. cut. Old Colonel Gray was selling a train load to a young Californian who knew his business, and, though nothing had been said about the cut, the buyer was making the accustomed selections, when the colonel happened along in an ill-humor, and forbade any further choice; whereupon the young man refused to take the cattle. The irate colonel swore a great oath, loaded his steers and started for Nevada; but finding no sale for them there, he swore some more and took his train to Colorado, then to Kansas, and then to Nebraska, until he had spent the worth of his cattle in transportation, and had loaded and unloaded until they looked like a famine in a dry land. At last in desperation he began selling a few at a time. An old farmer from the plains came in to buy a band. "Can you load 'em on the kears?" he asked. "Oh," said the exasperated colonel, "when those steers hear the toot of a locomotive you can't hold 'em. They'll run forty miles and climb aboard themselves."

Intelligence Personified.

Vicar of Country Parish (interviewing new verger)—Now, Mr. Jones, with regard to the collections. When there is a sermon, I shall want you to make the collection immediately after; and when

Mr. Jones (anxious to appear intelligent)—Yes, sir, I quite understand you, sir; and when there is not a sermon, sir, the collection takes place immediately before!

Bright Sayings of Elbert Hubbard.

Talk less and listen more.

Be gentle and keep your voice low.

The mouth indicates the flesh; the eye the soul.

A bird in the bush is worth two on a woman's bonnet.

It is only in prosperity that we throw our friends overboard.

Cultivate poise. Before you can influence others you must govern yourself.

Many a man's reputation would not know his character if they met on the street.

Strong people are not so much advertised by their loving friends as by their rabid enemies.

The heroic man does not pose; he leaves that for the man who wishes to be thought heroic.

Langtry & King Edward.

In commenting on that interesting and now historical episode in which she was said to have playfully sent a lump of ice tobogganing down the spinal column of the present Edward Rex, Lily Langtry said to Acton Davies the other day: "There is no reason in the world why I shouldn't tell the truth about that little matter, for the very good reason that it never occurred. When the King, then the Prince of Wales, heard the story, he asked me if I knew how on earth it could have been started. Of course I couldn't. However, my old friend, Mrs. Cornwallis-West, finally solved the mystery of how the story started, and her explanation, though a very weak one I admit, is the only peg on which any of us have been able to hang this story. An informal dinner was given one night at which Mr. and Mrs. Cornwallis-West and myself were guests. The Prince of Wales was not present. It was a very jolly little party; we all knew each other very well, and everyone was having a beautiful time, with the exception of Mr. Cornwallis-West, who was tired and wanted to go home. Several times he asked his wife to make a start, but she was enjoying herself and refused point blank. Finally he became quite angry and begged her to start. The ices were still on the table, and, taking a spoonful of hers, Mrs. Cornwallis-West laughingly slipped it under her husband's collar, with the remark: 'There, my dear boy, that will cool you off for a few moments.' This story must have been repeated by some of the guests, and enlarged upon until it was landed upon his Royal Highness and myself. That, I assure you, is all I know about the matter. Even my enemies must admit that I have always been noted for gentle manners, and that I or any other woman would ever have dared take such a liberty with the prince is too ridiculous. His Royal Highness was charming and most good-natured about the whole matter. In fact, only this past summer, when the King was talking to me at Newmarket about my last American tour, he remarked, with a twinkle in his eyes: 'I suppose they are still telling that lump of ice story on us in America,' and I answered, 'Yes, and I'm afraid their time prancing about like marionettes.'"

Kill or Cure.

A short time ago a veterinary surgeon summoned a man to the Winkletown County Court for two guineas for attendance on a dog, reports an English paper.

He swore that he had been called in and found the dog suffering from distemper, and that he had paid so many visits and had supplied such and such medicines, for which he claimed two pounds two shillings as per agreement. Then came the defendant's turn.

"You say that I agreed to pay you two guineas?" questioned the defendant.

"Certainly you did!" replied the plaintiff.

"Do you remember what our arrangement was?"

"Perfectly."

"Didn't I say that I was afraid of you running up a long bill, but that if you would agree to take two quid, 'kill or cure,' you might have the case?"

"Quite right; and I said that if you would make it guineas I would take it on," answered the plaintiff, with a gleam of triumph.

"Well, now, on your oath, did you kill my dog?" demanded the defendant, with a sudden energy that woke up the judge and made the usher jump again.

"Certainly not," replied the other, with a bluster that was perhaps justifiable in the circumstances.

"And you didn't cure him, cos he's dead; and as I promised to pay, and you agreed to accept, two guineas, 'kill or cure,' and you haven't done either, I wonder how you've got the nerve to ask for the money even, let alone bring me here."

At this point the learned judge intervened, and the case was remanded for further consideration.

An Engagement Extraordinary.

According to the Paris correspondent of the London "Telegraph," a determined suitor recently found a new way of using the motor-car for matrimonial purposes. The object of his affection was willing to wed him, but her parents were obdurate. He pretended to give up hope, and to be reconciled to the idea of being merely a friend of the family, and he took out the girl and her father for an automobile drive to Havre. At a dangerous part of the road he suddenly put on full speed, and the car sprang away at a terrific rate. The girl sat still and showed no fear, but her terrified father shouted to the man who wanted to be his son-in-law to stop. "Consent to my marriage with your daughter" was all the motorist replied. Still the car tore along, and if any obstacle had appeared in the road at least three fatalities would have occurred. "Stop! We shall all be killed!" the girl's father continued to cry. "Most certainly we shall," said the determined young man, grimly; if you don't consent at once I am going to send the machine into the ditch, and at this rate that means quick death." As he spoke he imparted violent lurches from side to side to the car. "I consent!" gasped the now vanquished parent. Immediately the car slowed down, and the rest of the journey was done at a steady touring pace. But during the motor's previous mad career a policeman had jotted down its number. When the girl's father, to whom the machine belongs, appeared in court to answer to the summons, his future son-in-law accompanied him, and looked exceedingly pleased with himself. When a fine of sixteen francs was imposed the younger man said he would pay it himself with pleasure. He confided to the magistrate that the day has been named.

Her Own Opinion.

Miss Askew—So your marriage is put off?

Miss Crummy—Yes, papa is not at all satisfied with his position; mamma doesn't like his family connections, auntie thinks he is too careless in his dress, and I think——

Miss Askew—Yes, what do you think?

Miss Crummy—I think I ought to wait till he asks me.—"Town and Country."

* * *

She—Do thoughts that came to you long ago ever return?

He (a poet)—Sure, if I enclose a stamped envelope.—Denver "Republican."

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 23th, 1902

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 11 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peake Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same pr $100 will be paid for any case that it w not permanently cure.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Ruby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.68 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will meet a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. F. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 205-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

far ahead of us, as He did nineteen centuries ago. He would certainly follow the same methods of establishing justice among men that He saw were best then. These methods are far richer in possibilities than any adopted by the trade unions. Nothing can supply the lack of a desire for justice among men, and He would again seek to install that desire into the hearts of men, keeping Himself above the petty squabbles which are the curse of the human life. It is probable, also, that for this very reason He would be received by men now in much the same way that He was received before, for mankind is not yet done with crucifying its Christs and enthroning its Caesars.

"Can we imagine Jesus as 'working under cover' or countenancing it by others? Can we think of Him as refusing to allow a man to work because he did not belong to the union? Can we conceive of Him as aiding in the establishment of a boycott or in other ways seeking revenge for any injury, no matter how great? Can we even think of Him as trying to compel a fellow-man to join a union? If we cannot imagine Him as doing these things, it is idle to imagine Him as a trade unionist. Instead He would be foremost in the attacks on those fundamental wrongs which force the trade union into existence and compel it to assume a semi-military discipline over its members and over its enemies as well, whenever possible.

"Among the stands I can imagine Jesus as taking were He to come among us and preach again, would be that of uncompromising hostility to all forms of slavery. Whether this was the slavery of men to the owners of the earth and its resources, the owners of the rain that falls upon the just and unjust, of the methods and processes of labor, the privilege of making and issuing money, the nation's highways and means of transportation and of transmitting intelligence, or of any other wrongful privilege conferred by law. I can only imagine Jesus as bending all energies to the complete overthrow of this slavery by preaching the truth that will make men free, without bowing His head in compromise with anything that conflicts therewith.

"Jesus would be a revolutionist of the most radical type, as He was before, standing for all the rights of man and against everything that violated them a hair's breadth. He would again be accused of turning the world upside down, and *perhaps* would be executed. But He would not be a *trade unionist as that term* is defined and understood to-day."

It was a *long* letter, but not uninteresting to him, and occasioned many pauses as he read it. At last he sat down and bowed his head on the table, and by *chance* (no, our chance is God's providence) his right hand rested upon the *open* Bible, and in his left hand he still held the letter.

After a moment's thinking, which was in reality prayer— what is prayer but the heart's desire after God and His will?— he raised his eyes, and *at the first glance he discovered that* not only were his hands resting upon *the sacred page*, but *that his index* finger pointed directly to the line, "I *have given you an example.*"

Almost unconsciously, he said "*Thank God for this light on my pathway.* Christ died to save man, and He *lived to show them* how to work out that salvation. It is atonement and example eternally united, and ought to enter into my ministry, and into every *workingman's life.* No man ought to do anything that Christ could not do, or belong to any organization that Christ could not join. He not only gave *the theory of life* but the pattern also. He is the only example for a labor union man, as well as a minister. This is the great mistake about religion and about Christ —that he could not do and be what other men under existing conditions can be and are compelled to do and be. The very essence of Christianity is that Jesus was a man as well as God, and His life in the carpenter shop was a part of His redemptive work as fully as was His death on Calvary His relation to the other carpenters of Nazareth and their organization, to the fisherman of Galilee and their union, was one of active service in behalf of honest labor."

Mr. Dowling then glanced down at the letter again, and thought: "Here is the fallacy—they make Christ an unreal factor to-day. 'He had, the boldest hostility to all forms of slavery.' Of course he had, and the labor union has no right to exist if that is not its righteous mission, too. Their work is His, their interests are His, their liberty and justice and salvation are His."

David Dowling paused in his rapid thought, and said to himself

"Now, let me get this right; is there any difference, except in degree, between Christ's life and mine? Could I belong to a labor union? Could any Christian man? If so, why not then Christ Himself? No reason in the world, or else there ought not to be a labor union. If some of the methods are wrong, Jesus would help make them right, and so will I, God help me.

"They make my Christ unreal, and His life different from that of other men. God did not intend it to be so. That makes Christianity heathenism. Christ would do exactly what any other man before God has the right to do. Oh, to teach men this, and the divine purpose concerning individual life and society. I must be more of a Christ myself to my fellowmen. I have taken His name. I am His representative today, and because the ministers stand such a distance from these men and their unions, they think that is what Christ would do, only to a greater degree. It is not true; it is not true! The workingmen are not all to blame. There is one preacher who will do better. If I have to learn a trade to get in the union and influence the men and show them Christ, I will do it. Perhaps a trade would be better for some of us than a theological seminary. We might reach men better if we handled a saw of steel than the saw of some old commentary.

"Paul was a tent maker. He touched men and saved them."

It was now time for David Dowling to make his Sunday sermon, but he was at more important business. In reality, he was making sermons by a new and better method. He was listening to conscience, studying men, thinking of Christ and His relation to the millions of workingmen. That was a sermon not to be written, but to be preached with sublimest eloquence— the oratory and rhetoric and elocution and logic of a concentrated life.

He was tearing the last rag of formalism and professionalism from his calling and just lifting up Christ, so that all the men should be drawn to *Him.*

It was beginning right, because he was in Gethsemane now with Jesus He knew how some of his people felt, and what some of his best supporters had said, and the conflict raged.

The tears rolled down his cheeks and they were touched with crimson, too.

"Oh, Lord Jesus," said he, "help me *to set my face to go steadfastly to my Jerusalem.* May I not go to *extremes.* May I not be deaf to duty's call or blind to the beckoning of *thy pierced hand!* I will come. I will do all in my power to show men *Thy sympathy and Thy willingness* to belong to any union whose purpose is worthy *and enters into the redemption* of human society. Show me the path, and if it is only one step at a time I'll take it."

If every *member* of the labor organizations could have been witnesses to that scene, and heard that holy prayer, and known the deeper desire in his soul, how differently they would look at the minister. Yes, even at the Saviour of men.

This was the beginning of a new day in one minister's life, and it found its closing in a new experience, and a very bright one for Mr. Dowling.

This was the night for his address in Union No. 10.

He tried so many times in the past days to decide upon what he should say on that occasion, and had torn up several abstracts and plans.

All day the same battle was on, and no good speech had come into his possession when night reached him, but he was not nervous.

There was a confidence in God which was his now, and always comes to the consecrated man.

According to the agreement when the invitation was given, Henry and *Richard called on him.*

There had been added another knot

(To be continued.)

THINGS CHINESE.

Many Chinese temples have windows made from mother-of-pearl, found in oyster shells. The material is transparent and looks like opal glass.

The best quality of Chinese tea is very expensive and so little of it is grown that there is never any of it to export. The Chinaman knows good tea and keeps it all for his own consumption.

The Chinese think they occupy the middle of the earth, and that all other nations are merely dwelling on the edges. Their most respectful term to designate a foreigner is "the ocean men."

Millions have been spent in civilized countries in futile efforts to preserve grapes. The Chinese have known the secret for many centuries, and millions more have been vainly used in the effort to drag from them the recipe.

In northern China hot-water peddlers go about with a whistling kettle —the whistle announcing that the water is at a boiling point. When they hear the whistle the people run with their teapots and buy enough hot water for their day's tea.

A celebrated Chinese dancing master, Hung Foo-Choo, announces in a Chinese paper that he is to hold a religious service, to which he invites everybody, in honor of the 1000th anniversary of the death of his ancestor, who was the first of the family to take up the profession.

A curious industry in some of the provinces in China is the manufacture of mock money for offering to the dead. The pieces are only half the size of the real coins, but the dead are supposed not to know the difference. The dummy coins are made out of tin, hammered to the thinness of paper, and stamped out to the size required.

BACHELOR'S REFLECTIONS.

No man loves his baby at first; he has to get used to it like a baseball finger.

It always makes a girl mad to be scared by a mouse when there aren't any men around.

Any man can get any woman to marry him if he only proposes to her in enough different ways.

It is generally easiest to kiss a woman right after you have begged her to forgive you for something.

After a man has argued a certain time with a woman he is either convinced or else he is willing to admit he is.

A man judges a woman's heart by her face; a woman judges a man's face by his heart.

A woman who loves too much sometimes loses, but a woman who loves too little never gains anything worth losing.

The women have got up a new story now about a girl that was so sensitive that it made her seriously ill to be kissed.

Every girl has an idea that when she is telling a man she loves him he will see her whole soul looking at him in her eyes.

Whenever a woman sees a picture in a book of a woman kneeling at a man's feet she feels that she ought to read it herself before she lets her daughter.

As soon as a woman falls in love her complexion gets better.

If modesty was the *fool-killer* most women would die of old age.

DEAD IN A CLOTHES CLOSET

Ogdensburg, January 19— The body of Fred Fawcett, who has been missing since January 2, was found in a closet in his rooms in the Judson Bank building here yesterday. Coroner Brown was notified, and after viewing the body said it appears as though death resulted from natural causes. An inquest will be held later. Fawcett was 60 years of age, and a pressman by occupation.

IT IS A PRODUCT
OF THE
WEALTHY WEST
"The Cracker Jack"

This is a year of plenty; It is a year that will go down in history as the beginning of a New Era. The WEST is the center of Tangible Wealth. It is proving the ONE means of salvation for the East

The Eastern markets are dull and the Western markets are active. There is more Money in the West than there has been before. Bank clearings show an increase savings accounts are over Two Billion Dollars. The crops have been greater than during any previous year in our "Fat" seven.

It is HIGH TIME NOW to put your money where the fluctuations incident to trade conditions and conditions that will be caused by the coming presidential year will not affect it.

Seek SAFETY for the time being; and liberal remuneration for the future.

Put your money where it will be secure and where it will be active.

Put it beyond the cavil and caprice of the human agencies behind the money markets.

Put it where it will produce a commodity of prime importance.

In other words, **Put your money in Cracker Jack Consolidated Gold Mines Company's Treasury Stock.**

THE
CRACKER JACK PROPOSITION
BOILED DOWN

The Cracker Jack is a mining property in the Cracker Creek District, Baker County, Oregon.

It is the adjacent Northern Neighbor of the Cracker-Oregon, the adjacent Eastern Neighbor of the North Pole, and the Northeast Neighbor of the Eureka and Excelsior.

It contains the continuation of the Cracker-Oregon veins and a split from the E. & E.

It has 120 acres of mineral land.

It has sufficient timber for all mining purposes.

Tunnels are being driven to the veins and ore bodies have already been uncovered.

Work will be continued all winter.

Stock is selling at one-fourth of par.

As soon as the large vein has been crosscut, stock will be worth at least par.

The company looks for this to occur at an early date.

The men behind this proposition have brought out three successful mines and **no Failures.**

Investigation will prove the real worth of this enterprise.

BUY CRACKER JACK STOCK AS A
Five Year Endowment

If you should die, you will leave an asset that will do what no Life Insurance can do. It will increase in value.

It will have marketable worth.

Your neighbor will give you cash on it; whereas he could not and would not attempt to cash an insurance policy.

Better than all, you don't have to die to win; you don't have to wait twenty years to win; you don't have to pay installments for life.

You don't have to pass a physical examination.

True of any stock, you ask?

In a degree but then—there is but one Cracker Jack. It is the culmination of experience and search on the part of men who have brought out three good gold mines.

They have proclaimed it BEST only after careful search, comparisons and tests.

Experience and records count!

This is not a bargain counter offering. You can't come in and carry your purchase back in your arms. You have to wait a while—and what you will get will be worth waiting for.

Don't dodge the issue. Don't fret and think this is a catch-penny scheme Go to a reliable mercantile agency and pay for information about LEE S. OVITT and the men back of this company. Abide by their word. They make a business of rendering commercial reports. They are cool and calculating. They can't afford to be misled. They are as rigid as the Government in matters of business.

There is no sentiment about this. It is open, fair and the company is trying to meet you half way.

You have some money Perhaps you think it wise to speculate. Look at the market and beware. Maybe you think railroad stock is good; but do you think that the Powers in Wall street will spare YOU when their war is on? And is it not on in nearly every listed security in this country?

Buying a home is nice; it is commendable. But interest counts up. You don't pay any interest here. You put your money to work. It will be kept at work and the result will be profits.

We are not forecasting dividends. That would be to mislead you. We know that there will be dividends; greater and better than in any industrial in the land—no company excepted.

Just Think and then Act

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC. . . .

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The mouey obtained from this sale is to be us.d for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

A FORTUNE AWAITS YOU

INVEST NOW IN THE

North Carolina Gold Fields

BUY

Redman Mining & Milling Co's Stock

AT 50 CENTS PER SHARE

DIVIDENDS IN SIGHT

Three developed mines with more than $540,000.00 worth of ore on the dumps and an inexhaustible supply in the mines, assaying as high as $100.00 per ton, with an actual mill test of seven tons running

$24.65 PER TON IN GOLD

One mill completed ready for operation and another being built. One and one-half miles from the main line of the Southern Railroad, cheap labor, cheap fuel. Plenty of water and a climate allowing operations 365 days per annum, are a few of the advantages that go to make this one of the most valuable mining properties today in the country.

Send for free copy of the "Gold Nugget" and learn something about the North Carolina Gold Fields that produced all the gold in this country before '49 and that are today attracting the attention of the world.

Redman Mining and Milling Company

367-373 FULTON STREET, BROOKLYN, N. Y.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price tha will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

Peterborough.

Humor of tha Hour.

The Family Friend—I suppose the baby is the sunshine of your home?

Mama—Sometimes. Frequently he is the storm centre.—Puck.

"To what do you attribute your longevity?" asked the reporter.

"My which?" queried the oldest inhabitant.

"Your longevity," repeated the reporter.

"Never had it. As far as I can remember I ain't never had no such complaint."—Puck.

Teacher—How far is Philadelphia from Pittsburg?

Tommy—Jist about as fur as it kin be. Pittsburg's got de pennant einched, an' Philadelphia's wid de tail-enders."—Philadelphia Press.

How, says Mary, with many sighs,
Shall I prevent those nasty flighs
From spoiling this, the best of pighs?
A welcome step is heard—"Arighs!
Sighing will never win the prighs:
Success is hers who only trighs
Poison the crust, and each one dighs!"
Now Mary turns, and with surprighs
Reflected in her wondrous eighs
Before her sees dear Cousin Lighs.
—New York Sun.

"If honesty is the best policy——"

"Well?"

"Why, then most politicians ain't politic."—Chicago Evening Post.

Beulah—Did you have a good time at the beach?

Belle—No! It was awfully stupid.

Only a few men there?

Yes; I was engaged to the same man the whole summer.—Yonkers Statesman.

Mr. Kidder—Ah, how-der do, Doctor! If you have a few minutes to spare, I wish you would come over to my house and chloroform my youngest boy.

Dr. Price—What is the matter with the lad?

Mr. Kidder—Oh, his mother wants to comb his hair.—Harper's Bazar.

"Yes," said the dentist, "to insure painless extraction you'll have to take gas, and that's fifty cents extra."

"Oh!" said the farmer. "I guess the old way'll be best; never mind no gas."

"You're a brave man."

"Oh! It ain't me that's got the tooth; It's my wife."—Philadelphia Ledger.

Carrie—I'm sure you misjudge Mr. Sweetser, papa. He is a man of great ambitions. You should hear him tell of the things he is going to do.

Carrie's Papa—And I suppose I'm one of 'em, but I reckon he'll find it harder to accomplish than he fancies it is.—Boston Transcript.

"Isn't it strange," remarked Mrs. Billins to her husband, "that I can never get a good bargain in shoes?"

"You did once," said her husband.

"When was that?"

"When you got me."—Chicago Record-Herald.

"Do you take this woman for better or for worse"—began the clergyman, but before he could proceed further he was interrupted:

"It's too early to tell yet," answered the groom; "you'll have to give me time, sir."—Boston Post.

Witherby—I made the mistake of my life this morning I told my wife I didn't like her new gown.

Plankington—What, was she angry?

Witherby—Oh, no, it wasn't that; but she wants another.—New Yorker.

Mrs. Church—Do you enjoy going to the theatre?

Mrs. Gotham—No, I can't say that I do; the cars are so frightfully crowded, don't you know? But I always enjoy it after I get there.—Yonkers Statesman.

Camera Fiend—Shall I take you, Miss Passee?

Miss Passee—Oh, you original man! How sudden!—Houston Post.

Knippe—Yes, by making mutual concessions, my wife and i get along very smoothly. For instance, I gave up smoking cigars the other day.

Tucque—What did your wife give up?

Knippe—Oh, she gave up scolding me for indulging in the habit.—Syracuse Herald.

Lawyer—What was the thing that led to your financial downfall? You seemed to be doing a good business.

Bankrupt—I was, but one day I started out to see if I could borrow some money. I found it so easy that I kept on borrowing.—Somerville Journal

There's a girl in our model apartment
Who practises singing all day,
The neighbors declare her a nuisance,
And wish they could drive her away.
I think that she sings like an angel,
And hope she will stay in the place—
No, pardon me, I'm not her sweetheart,
But simply—the girl in the case.
—New York Sun.

The War Office is waking up. We were scandalously short of "materiel" when the Boer war broke out, but that is now being rectified with all energy. A Parliamentary paper issued yesterday shows that during the past year the War Office entered into the following contract abroad, being presumably unable to obtain at home the article so urgently required:—

Powder puffs. £23

If we are to believe Sir Archibald Hunter's version of the siege of Ladysmith, the order was, no doubt, on behalf of the 4.7 naval guns.—London Star.

A Philadelphia woman was recently breaking in a new servant, a Swedish girl, who had not been very long in this country. She was fortunate enough to own a house which had a bath-room for the exclusive use of the servants.

"Now, Freda," she said, as she pointed out this room, "this is to be your own bath room. There's a tub and I want you to use it often."

"Vat! Git in dat place?"

"Why, certainly."

"Vit water in it?"

"Of course."

"Vy, ma'am, if I vas to git in dere I would git wet all ofer; an' I vas nefer vet all ofer in my life."—Philadelphia Ledger.

There are some first class bargains to be had in some new and second hand pianos and organs, at W. G. Landreth's, 170 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

A Romantic Episode.

The King's visit to Paris has been marked by a singular and picturesque incident, says the "Spectator." It appears that in 1878 a chemist named Danval was accused of poisoning his wife, and that the King, then Prince of Wales, anxious to watch French procedure, attended the trial, which ended in a sentence of imprisonment for life. The Prince, who had watched the evidence for five days, was certain that justice had miscarried, and visited the convict in his cell to tell him so, and enquire if any remedy were possible. None could be found, but after twenty years' imprisonment the sentence was revised and M. Danval liberated. The kindness of the Prince in his hour of despair had made a deep impression on his mind, and when the King recently visited Paris he addressed him a letter full of gratitude for the visit paid twenty-five years before. One wonders if kings know the depth of the impression both of regard and of hatred which they can almost unconsciously make.

"What's the difference between obstinacy and firmness?" "Why, obstinacy in oneself is firmness and firmness in another is obstinacy."—Chicago "Post."

Estate agent (to laborer's son)—Here, my boy, where can I find your father? Boy—In the pig stye, sir. You'll know 'im by 'is brown 'at!—"Punch."

Barber—How will you have it cut, sir? Peppery—Both short. "Both? Hair and beard?" "No; hair and conversation."

"Who originated the remark, 'It is always the unexpected that happens?'" "I don't know," said the melancholy government attache, "but I suspect he worked in the weather bureau."—Washington "Star."

"W'y don't you put mo' hell in you' sermons, Brer Williams?" "Well, w'en I gives 'em too much er it de congregation makes sich a noise fannin' deyself, I hez ter order a recess!"—Atlanta "Constitution."

Von Quizz What does your friend write? Verse? Novels? Tragedies? H. Kashe—Great Scott, what do you take him for? An amateur? No, sir! He writes advertisements, of course!—New Orleans "Times-Democrat."

Asum—How are the plans for your new house coming along? Subbubs—Splendidly. My wife has finally laid out all the closets she wants, and now all the architect's got to do is to build the house around them.—Philadelphia "Press."

"Did you give that woman two good eggs for her five cents?" asked the corner-grocer of the new boy. "I did, sir." "You're discharged. You should have sold her two bad eggs, so that she'd come back to kick, and give me a chance to sell her a porterhouse steak."—Baltimore "News."

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully."

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $500 will be paid for any case that it will not permanently cure.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA

AND

BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 200 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 195 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO.,

FISCAL AGENTS, 378-80-81 Wilcox Bldg., LOS ANGELES, CAL.

Fatal Catarrh

Pneumonia, Consumption and kindred evils follow in its trail.

Catarrhozone

The Great Inhaler treatment, cures and prevents catarrh and should be used now.

Have you ever had Catarrh? Have you been subject to coughs and colds lately? Are you all run down? Do you take a cold easily? If so you are liable to a severe attack at any time and should have Catarrhozone on hand, because it is a marvelous safeguard against coughs, colds and catarrh. Catarrhozone is the greatest protection against these complaints ever known. You just breathe it, that's all, and it cures. The Inhaler is able to carry in the vest pocket or purse, and can be used while at work, in the church, theatre any place, any time. Carry a Catarrhozone Inhaler, use it now and again it is quite pleasant and you won't have colds or catarrh.

Breathe Catarrhozone for five minutes occasionally and it cures coughs and colds.

Breathe it five minutes four times a day and it cures catarrh.

Breathe it ten minutes every hour and it will cure consumption.

Catarrhozone is guaranteed to do this and it if fails your money will be refunded.

It is highly endorsed by doctors and druggists as the most reliable and surest cure for bronchitis, colds and catarrh, and no case is recorded where it failed to give satisfaction.

Don't let your cold run on any farther. Cure it now by Catarrhozone. Complete outfit, hard rubber inhaler, and sufficient liquid for three months' use costs but one dollar; small size 25 cents. At druggists or N. C. Polson & Co., Kingston, Ont. Buy it to-day.

New Companies Chartered

The Ontario Gazette announces the incorporation of the following companies: The Fenelon Falls Milling Co., capital $20,000; provisional directors, F. Sandford H. Pulley, G. J. Nie. The Lindsay Portland Cement Co.; capital $600,000; provisional directors, J. D. Flavelle, T. Sadler, R. Sylvester, J. B. Knowlson, J. M. Squier, R. Kennedy, Alex. Ross, T. Stewart.

St. Luke's Guild

The following have been re-elected officers of St. Luke's Guild for the ensuing year:

President—Miss M. Calcutt.

Vice-President—Miss Alice Tivey.

Sec.-Treasurer—Miss Phillips.

The Guild during the past year has taken an active part in the work of the church and has rendered very valuable assistance, which will be continued during the ensuing year.

Park Street Church

The evangelistic meetings in connection with the Park Street Baptist Church have been closed, and were very successful. The membership will be largely augmented and the church and congregation are greatly encouraged. The ordinance of Baptism will be observed on Sunday next at both morning and evening service. Mr. Shields commences a three weeks series of meetings at the Belleville Baptist church on Sunday next.

—Lindsay Post—The town street lighting system was in operation for the first time Saturday night, and pleased expressions were heard on all side. Everything worked well and the town looked its best.

Carnival at Lakefield

It is intended to hold a grand masquerade carnival at Lakefield rink on February 2nd. There is a list of handsome prizes for the best and for the most comical dresses for ladies and for gentlemen. A ladies' gold watch is offered as a prize to the lady selling the greatest number of tickets. Peterborough ladies wishing to compete can get tickets to sell from Messrs. Ormond & Walsh.

THE THREE POLITICAL BRANCHES

To the Editor of The Times.

Sir,—The aftermath of the Conservative convention discloses the fact that there are now three branches of that party, i.e. (the straight Conservatives,) (2) the Stratton Conservatives and (3) the "Fusionists." The first two need no glossary to determine their real signification and the last branch is at once intelligible, which simply means that although standing out at first true to the instincts of the great Conservative party to remain pure, they at last seceded from their former position as part of the first branch and assimilated with the second thus earning for themselves the term "Fusionists." All honor to those who have remained true to their principles and refused to coalesce with the mercenaries and whose duties will now be to clean out the Augean stables.

FOLUS.

Farmer Devoured by Hogs

Thomas Millan, a young farmer of Reach Township, met a horrible death on Friday night. Just after dark he went out to feed his pigs, and as he did not return for supper his nephew went out to find him. After going through the barn and stables, he returned to the house, saying that he could not find his uncle. Then he and his aunt went out and as they were passing the pig pen, the pigs were making so much noise they looked there, and to their horror saw the pigs devouring Millan's body. The animals were immediately driven off and the body was lifted out, minus the greater part of the face, the right hand and some other parts of the body gone, and taken to the house. It is supposed that Millan, who was subject to fainting spells fell into the pen, and was attacked by the pigs before he could recover.

MR. E. A. PECK FOR WARDEN

The County Council will Probably Make This Choice

The County Council will meet on Tuesday next. It is understood that the next Warden will be Mr. E. A. Peck, who has been a member of the Council from the Otonabee Division since the new County Councils Act came into force.

There is no member of the Council more familiar with the affairs of the County or the duties of the office of Warden than Mr. Peck. He has been assiduous in his duties as a member of the Council and it is an open secret that he has devoted his time unsparingly in order to straighten out the tangle in the office of Clerk and Treasurer.

The Council will certainly make no mistake in electing Mr. Peck to the highest office at their disposal.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporter on Their Rounds

—This is great curling weather.

—There are no mosquitoes abroad this weather.

—The cold weather is apparently at an end.

—The County Council will meet on Tuesday next.

—At the Police Court yesterday morning Wm. Jordan was given 10 days for obtaining $1.25 under false pretences.

—The Sons of England Hall has been closed until Monday next, on account of the fire.

—Gilodon's orchestra will play every Monday evening during the winter in the Albany Club rooms.

—Carmel is the name of a new post office that has been opened in the Gleason Settlement, Township of Haldimand, Ont. Mr. W. W. Gleason is the postmaster, and it has a tri-weekly service, Monday, Wednesday and Friday.

—The Minden Echo says the unprecedented snowfall this winter has almost buried the north country. The snow is three feet deep on the level and six feet deep on the roads in places. The mail carriers are having a dreadful time.

—Rev. Dr. O'Brien delivered an interesting and very instructive lecture on "A Trip to London and Rome," at the T. A. S. rooms on Monday night. In addition to the lecture a short musical programme was rendered, including vocal duet by Miss Lizzie Coster and Miss Nettie Lewis, vocal solo by Mr. Geo. Pope, and two flute solos by Mr. P. Broderick. At the next meeting the speaker will be Rev. Father Fitzpatrick.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Lieut.-Col. Miller was in Norwood last night in connection with the installation of the officers of I. O. O. F.

—Globe: Miss Ethel Walton, of Peterborough, will spend the remainder of the season with her sister, Mrs. Albert Armstrong, Farnham avenue, Deer Park.

—Mr. Howard Taylor, who has been in the employ of Messrs. Frost & Co., jewellers, town, has left for Orillia. He will be greatly missed by his many friends here.

—Mr. Will Green has received a paper from Vancouver, stating that his cousin, Hon. R. F. Green, Commissioner of Lands and Works, barely escaped sailing on the ill-fated Str. Clallam. Mr. Green is an old Peterborough boy.

Bargains in Pianos

There are some first class bargains to be had in some new and second hand pianos and organs, at W. H. Lendrum's, 179 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

STATIONERY

When in need of anything in the line of commercial stationery, visiting cards, etc., leave your order at the Times job department. Workmanship unexcelled.

Piano Tuning

Heintzman & Co.'s piano tuner, R. A. Shaw, is here from Toronto. Leave orders at Ormond & Walsh's drug store. Phone 148.

A $30,000 BLAZE

BLOCK ON HUNTER STREET BADLY GUTTED

Mr. R. M. Roy a Heavy Loser—Buildings Owned by Toronto Real Estate Investment Company, Mr. S. J. Laplante and Mr. Aaron Cox

Peterborough has again been visited by a serious conflagration, causing a loss of about $30,000. The fire broke out in the rear of the grocery of Messrs. Holmes & Christie, about 4.30 a.m. yesterday and rapidly spread. When the fire brigade arrived the flames had gained considerable headway. The following business establishments were badly wrecked: Helliwell's fancy goods, Mrs. Darnley's millinery, Holmes & Christie's grocery, R. M. Roy's photography, Dominion Express Company, McMillan & McGuire stock brokers. These with the exception of the Dominion Express Company lost almost everything. Mr. Helliwell places his loss at $2500, and he has an insurance policy of $1700. Mrs. Darnley states that she is positive her loss, not covered by insurance, will be $2,500; she has an insurance of $1000. Holmes & Christie claim $2,500 loss with $1600 insurance.

Mr. R. M. Roy, for whom there is the deepest sympathy, had only $1700 insurance on his stock and plant, which he values at $7000.

The loss to the Dominion Express Co. will probably amount to $250, caused chiefly by water.

McMillan & Maguire's office is damaged to the extent of about $150 by water, but it was not sufficient to prevent the firm from doing business.

The office of Dr. Wightman, in the Cox block, is damaged to the extent of $500. Dr. Wightman says he has a small amount of insurance.

The Cox building is a total wreck. Mr. Cox said he estimated its value at $8000. It is insured in the London Mutual, of which Davis Thompson & Co. are agents for $5000. Last summer, he states, he put some $2000 improvements on Roy's and Wightman's offices.

The Laplante block, which is not badly damaged by the fire, is insured for $2500, with Mr. Cluxton, which will probably cover the damage. The building is valued at $4500.

Two apartments of Mr. Roy, in the Real Estate Company's block, is damaged by smoke and water, as is also the ante room leading into the Sons of England Hall. Mr. Cluxton's insurance office is also damaged. The losses, as far as can be ascertained, are as follows:

R. M. Roy	$7,000
C. W. Helliwell	2,500
Mrs. Darnley	2,500
Aaron Cox	4,000
Holmes & Christie	1,600
Dr. Wightman	500
Dominion Express Co.	250
W. H. Cluxton	250
S. O. E. Hall	100
McMillen & Maguire	250
J. T. O'Connal	250
	$18,000

Chief Rutherford is of the opinion that the fire started in the grocery store, from a stove that was situated near a hallway. The statement of Mr. Finney, the nightwatchman, is that he visited all these stores about two o'clock and found nothing wrong.

The firemen had a difficult task as the thermometer was 20 below zero. They stuck to their work, though wet to the skin, and did not cease their struggle until well on in the forenoon.

MR. ROY'S PLUCK.

Although Mr. Roy naturally feels the destruction of his establishment most keenly he declared that he would be at work again as quickly as things could be got into shape. His friends everywhere will be pleased to know that he is not at all discouraged.

The insurance companies concerned are The Western, London Mutual, and the Royal, of which Davis, Thompson & Co., are agents; the Northern, the National and the Equity, of which Mr. W. H. Hill is agent, and those companies represented by Mr. Cluxton.

In working about the fire yesterday Mr. R. M. Roy picked up one of his lenses, which he valued at $200. Unfortunately the glass had been broken by the heat.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 29th, 1903

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 16 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,

MR. JOHN WOOD,
Pouky Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same price $500 will be paid for any case that it will not permanently cure.

The Blushing Bride—The deacon done go ask me ef I take Washington foh bettah or foh wohse.

$500 REWARD FOR WOMEN WHO CANNOT BE CURED.

So uniformly successful has Dr. Pierce's Favorite Prescription proven in all forms of Female Weakness, Prolapsus, or Falling of Womb, and Leucorrhea, that, after over a third of a century's experience in curing the worst cases of these distressing and debilitating ailments, Dr. Pierce now feels fully warranted in offering to pay $500 in cash for any case of these diseases which he cannot cure.

IT STANDS ALONE.—The "Favorite Prescription" stands alone, as the one and only remedy for these distressingly common forms of weakness, possessed of such positively specific curative properties as to warrant its makers in proposing, and binding themselves to forfeit, as we, the undersigned proprietors of that wonderful remedy hereby do, to pay the sum of $500 in legal money of the United States in any case of the above diseases in which after a fair and reasonable trial of our treatment, we fail to cure. No other medicine for the cure of woman's peculiar ailments is backed by such a remarkable guarantee; no other medicine for woman's ills is possessed of the unparalleled curative properties that would warrant its manufacturers in making such an offer; no other remedy has such a record of cures on which to base such a remarkable offer.

Therefore, *insist* on having Dr. Pierce's Favorite Prescription and turn your back on any unscrupulous dealer who would insult your intelligence by attempting to foist upon you some inferior substitute, under the plea that "it is just as good." Insist on having the article which has a record of a third of a century of cures and which is backed by those willing to forfeit $500 if they cannot cure you.

In cases attended by a leucorrheal drain a solution of Dr. Pierce's Lotion Tablets should be used conjointly with the use of the "Favorite Prescription." They are sold by all druggists, or sent post-paid to any address, on receipt of 25 cents in stamps. Send 50 cents in stamps for Dr. Pierce's Common Sense Medical Adviser. Address WORLD'S DISPENSARY, Buffalo, N. Y.

Weak and sick women are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as strictly private. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Pellets cure biliousness.

Interesting for Ladies.

About Furs.

Furs are always of supreme interest at the approach of winter, says The London Daily Graphic, and anything new in the way of skins is eagerly sought after. A well known Old Bond street house has just introduced the "Russian mink" fur, which, unlike the ordinary mink, has no tinge of red, but is shaded almost identically with a sable. This fur deserves popularity, not only on account of its novelty, but for its intrinsic value, as it is unquestionably superior to any mink fur hither to in the market. A costly dress in the old shade of heliotrope cloth had the skirt very gracefully pleated and trimmed with a stole of Russian mink, falling from the waist at each side, terminating in five tails, and shorter stoles more towards the back. The bodice was a mink bolero applique on a blouse of heliotrope panne, ornamented with motifs of cream braid, passementerie, and Oriental embroidery. At the top was an embroidered shaped facing of green velvet, and the full sleeves were finished with lace ruffles. The toque intended to go with this handsome dress was of rough cream beaver, with turned-up directoire brim, overlaid with medallions of virgin gold embroidery, and a Russian mink placed flat on the outside, the tails falling over the back.

Monkey fur is likely to be fashionable for women's wear during the coming season, says an English exchange. A French furrier is responsible for the introduction of this latest novelty, and already a few wraps of the long-haired, silky, shining, uneven fur have been seen. One has cuffs, stole-collar and muff of dazzling white fox skins. English furriers prefer mole to monkey fur, as it is new to the public, and pretty. Sable, however, is still the standard fur, and ermine is being generally used. There are two novel fur models. One is a pelerine cape of Russian sable, cut rather low at the throat, with a line of dark fur edging the triangular opening. Round the shoulders is a hood like drapery of ermine, fastening in front under grey satin rosettes, and cut to a point at the waist-line. From under the hood falls a flounce of sable, arranged in supple folds suggestive of plaiting. The other notable fur is a belted blouse of mink. Over the shoulders the fur is folded back, resembling a hood, the fur coming to a point in front and behind. Muffs are very large this winter, principally in sable, with the sides draped in box plaits, lined with ermine.

Mamma—Ethel, dear, how can you think of marrying Mr. Wright—a man who has neither position nor money?

Ethel—Dear mamma, I would rather be Wright than be President.

RUSSIA FOR CONQEEST MANCHURIA THE STAKE

American Diplomat Says That War is Inevitable Nothwithstanding Russia's Pacific Utterances

Chicago, Jan. 21—That Russia is determined to control Manchuria was demonstrated in the opinion of John Goodnow, United States consul at Shanghai, by the comments of officials organs on the treaty in which the grant ... is country two ports in Manchuria.

Mr. Goodnow reached Chicago Tuesday on his way to China after a trip to Washington with this treaty. "Whether war between Japan and Russia will be declared I do not know," he said, "buut that Russia is determined to control Manchuria many things indicate.

"I am not certain that Russia has lodged any complaint or is even angry at the United States for its part in the treaty. But I do know that the Novoi Krai, the official organ of Port Arthur, found fault with it when it was first mentioned. One of its salient features is the provision for two ports in Manchuria, Mukden and Antung. It was the provision for these ports that angered the Russian organ.

PROPHECY MADE BY ORGAN.

"It pointed out the fact that while China was in control of Manchuria at the present time it might not be in the future. It added that if at any time Russia was in control of Manchuria it would have to recognize the terms of the new American treaty. Rather a significant stand, was it not?

Regarding the prospects for peace, Mr. Goodnow said that he believed war was inevitable, notwithstanding what Russia was promising in the way of peace. Russia will never retreat, and this meant war.

Consul Goodnow was asked whether he believed that Japan would have a chance of victory in case war was declared.

"You remember the record the soldiers of Japan made in the relief of Pekin!" he asked, and he would say no more.

JAPANESE EXPECT HELP

Rely on the Friendship of England and America

DO NOT FEAR INVASION

Has Little Fear of Invasion by Armies of the Czar

Tokio, Jan. 21—Japan does not expect Russia's rejoinder for at least a week. In the meantime the nation is prepared for war and grimly reconciled. Political and other distinctions have disappeared and the country is patriotically united. The government is receiving many offers of contributions in the event of war, amounting to many million of yen.

The Japanese people would welcome an honorable peace, but are resolved to fight before receding from their position in Oriental affairs. They fear the aggression of Russia and believe if it is not stopped now it will never be stopped. They are confident that their demands are fair and moderate and their diplomacy, which has been patient, has gone to a reasonable limit. They expect the world's sympathy in the struggle and have a splendid confidence in their army and navy.

Have No Fear of Invasion.

In the event of reverses or a national disaster it is thought that England and the United States would intervene to preserve a balance of power in Eastern Asia. There is no fear of an invasion of Japan, a country which is probably the most strongly defended one in the world.

The growth of British and American sentiment is remarked. Numerous displays of the flags of the two nations are made and popular songs reciting the glories of the "lion" and "Uncle Sam" are sung. The characters of "Johnny Bull" and "Uncle Sam" are also seen at public dances. The activity of the United States in the opening of the ports of Mukden and Antung is keenly watched, and in some quarters it is hoped that this may aid in solving the problem of insuring peace.

The censorship prohibits the publication of military movements. All the recent movement are merely preliminary and aimed to insure an immediate dispatch of an immense land and sea force if it should become necessary.

DROWNED WHILE SOUNDING

Quebec, January 21—John Bonville, a foreman of the extensive carbide works being erected at Shipshaw, on the Upper Saguenay, by Mr. Wilson, of Ottawa, was accidentally drowned while taking soundings for a new wharf.

The success of your cake depends upon the baking powder.

Cheap baking powder makes poor cake and a poorer cook.

The wise housewife uses a pure cream of tartar baking powder like Cleveland's. The result,—good, wholesome, digestible cake every time.

POLAR BEARS ON ICEBERG

Six of the Monsters Afloat Near Newfoundland

New York, Jan. 21—The polar bear story told by the officers of the steamship Hanover on her last trip to Baltimore is quite unusual, but not improbable. They say that when entering the eastern edge of the Grand Banks of Newfoundland they sighted a large iceberg and through a glass discovered it was tenanted by two or three polar bears. Drawing nearer they could see with the naked eye six bears clambering around on the ice mass.

Unless appearances were deceptive it is evident that these involuntary wanderers were making an unusually long journey to the south and were bound for awful destruction by drowning. They had probably not suffered for food, as the Greenland and Labrador waters, through which they had passed abound with seal, but they were finally in a region where bear food is scarce, and icebergs rapidly disappear.

There is no doubt that some of these animals perish by being carried out to sea on ice floes. The bear that lived for twenty-three years in the zoological gardens of London, and whose death some years ago brought grief to many youthful admirers, was captured when young on a floating piece of ice south of Spitzbergen. From five to twenty bears on rare occasions have been seen on the drifting floes near this archipegalo. The westerly drift, which heaps great masses of ice against the eastern shores of Greenland, sometimes brings bears with it from far-away Spitzbergen and there is good evidence that these immigrants on one occasion drifted around Cape Farewell to the western coast of Greenland, where they were shot. The animal is now very scare in Danish Greenland and in the best of seasons only forty to fifty are killed there and most of them are pilgrims from the north, brought down on the floating floe from Melville bay or Smith sound.

SLAVERY IN TEXAS

Many Negroes Held in Bondage Ignorant of Emancipation

Galveston, Tex., Jan. 21—The federal grand jury did not find sufficient evidence to justify indictments, but claims were made as to the alleged existence of peonage in Texas which, if true, reveal a deplorable state of affairs.

There are hundreds of large plantations in the state upon which thousands of negroes are employed. The agreed remuneration usually averages 60 to 75 cents a day.

Parties who claim to know allege that that upon many of these plantations, particularly in districts remote from traveled roads, negroes have been held practically in bondage, some of them being descendants of men and women who were slaves on the same plantations. It is said that some of these have been kept in ignorance of the emancipation. It is known that negroes in some districts loosely regard marriage.

MOUNTAIN SNOWSLIDE

Winnipeg, Man., January 21.—The trans-continental express from the West on the C.P.R. due yesterday, is twenty hours late, due to a snow-slide in the mountains west of Calgary. A special made up at Laggan, brought the transferred passengers here.

A BRILLIANT WEDDING

London, January 21—Lady Marjorie Greville, daughter of Earl and Countess of Warwick, and Viscount Helmsley, heir apparent of Earl of Feversham, were married at Warwick yesterday. The ceremony was brilliant. The Bishop of Oxford officiated. King Edward sent Lady Marjorie a diamond and ruby brooch.

CLAIMS AGAINST GOVERNMENT

Ottawa, January 21—In consequence of the recent fire at the post-office, claims amounting in all to some $10,000 will be made against the Government for losses rising from parcels damaged by fire, smoke and water. The claims will probably be decided by the Exchequer Court.

MINISTER OF RAILWAYS

Ottawa, January 21—Hon. H. R. Emmerson leaves for Westmoreland to-morrow, accompanied by Mr. Turgeon, M.P. At Bathurst a halt will be made for the presentation of an address to Mr. Emmerson, and Moncton will be reached on Thursday evening.

EVERYBODY READS THE TIMES.

THE OLD STORY

"Opposition" Telephone Companies Have Only Disaster to Face

Some months ago the Michigan Telephone Company was sold under foreclosure proceedings taken by the bondholders the sale price being $1,100,000—considerably less than the amount of the Company's bonds. The stockholders who thus saw their investment completely wiped out, though they had received no dividends for years, undertook to save something from the wreck and applied to the courts to have the sale set aside but in a decision handed out on December 24th ult., the sale is confirmed. There are quite a number of Canadians interested financially in this matter. Detroit has had three unsuccessful opposition telephone companies. The first of these was boomed through Canada and even in Great Britain as a perfect gold mine" and a considerable amount of bonds and stock disposed of in this country on the glowing representations of professional promoters. Investors after looking long for their interest have lately seen their holdings wiped out. The Detroit "Free Press" of December 26th ult., comments on the situation as follows:

There are seven ages of man, but only five ages of the modern public service corporation. First, there is the corporation itself, performing its functions indifferently, and with no due regard for the public rights. Then there is the competitive stage, in which two corporations undertake to share with greater or less hostility a natural monopoly. Then comes the consolidation, with the inevitable overcapitalization and the destruction of a great amount of property. After this the Company passes into the hands of a receiver, and is sold for the benefit of the bondholders, the minority shareholders losing their investment. Then comes the stage of reorganization in which the corporation undertakes to perform its functions normally for the time being, the speculative elements having been eliminated.

The Michigan Telephone Company has now passed through four stages and is in the fifth. The minority stockholders are left in the lurch.

The people of Detroit and Michigan are tired of having their telephone service a football for speculators. They are willing to pay a reasonable price for a reasonable service. They are desirous that the investors obtain fair returns on their money; but they have no further yearnings in the direction of being "financed." They have had enough of that. They would like to see the telephone business managed like any other legitimate business, and not on the ancient principle that the public is a new milch cow.

A MISER'S END

Died in Wretchedness while Worth $20,000

New York, January 21—Mrs. Ellen Cunningham, 60 years old, No. 33 First street, who died in Christ Hospital, Jersey City, of complicated diseases, had lived a recluse, apparently very poor, says the American. She had refused to have a physician, saying she could not pay. Bank books showing deposits to her credit, aggregating $20,000 have been found in her rooms, and are in the custody of the surrogate. The authorities have not found any relative and the neighbors know of none.

GAVE UP HIS LIFE

He Saved His Wife But Perished in the Flames

Dunville, Ont., January 21—The residence of Mr. William Spurbeck was destroyed by fire early this morning. Mr Spurbeck perished in the flames and his wife was badly burned. They were the only occupants of the house which was on the outskirts of the town and the fire was only discovered when the bed on which they slept was partly burned. Mr. Spurbeck helped his wife out of the upstairs window, but was overcome himself by the smoke and assistance arrived too late. The cause of the fire is unknown.

ARE UNANIMOUSLY FOR PREFERENCE

Henry W. Lucy Gives Anti-Chamberlainites a Bitter Pill

FOUND CANADA UNITED

In Favour of the Policy Proposed by Hon. Joseph Chamberlain

London, January 21—Henry W. Lucy (Toby, M. P., in Punch) writing to the Westminster Gazette, gives anti-Chamberlainites an awkward pill to swallow. Liberal though Lucy is, he is bound to admit that Canadians are Chamberlainite to a man. He says: "With a preference tariff of 5 per cent., Canada can, with her cattle upon a thousand hills, ship in with beef, elbowing out the American dealer. Thus would the Chamberlain tariff, like the quality of mercy, be twice blessed. Canada would secure a dominating share in the lucrative colonial trade, and her profit would be gained at the disadvantage of the aggressive and disliked American.

ATTITUDE TO ENGLAND.

Mr. Lucy concludes his article as follows: "Occasionally at the outset I made a feeble effort to ascertain where the British taxpayer came in. The distraction that followed was not prolonged. England must look out for herself and it is politely hinted that in the course of long connection the Dominion had always found her equal to her opportunities in that direction. My original inquiry was, 'Does Canada approve of Chamberlain's preferential tariff scheme?' Canada emphatically answers, 'Yes.' And small blame to her!"

PUBLIC OWNERSHIP FIGURES

Brockville's Public Utilities Make a Good Showing

Municipal Waterworks Unsuccessful in Towns While Gas and Electric Lighting Show Good Percentage of Profit.

During the last session of the Legislature the House decided to obtain information regarding the municipalities from 1898 to 1902. Returns have now been received from many cities, town and villages in Ontario and the following statistics have been compiled therefrom.

The municipal waterworks systems were conducted on a paying basis in cities generally, and on a losing basis in towns and villages. Gas plants, where operated, showed a surplus. Electric light was a losing business in cities and successful in towns and villages. The figures given are for the average of the years 1898 and 1902.

The total capital invested in reproductive undertakings by cities was $11,061,001; by towns, $7,647,309, and by villages $630,637, the combined total being $19,065,947.

Brockville has gone in for conducting her own reproductive undertakings on a broader scale than any municipality. They had their own waterworks, gas, and electric light plants, and in each case had invested more capital than any other town. Altogether, they had $601,811.79 invested, with average annual working expenses of $32,020.62, and income of $63,760.64 showing an annual average profit of $31,739.52.

There were 12 cities, 63 towns and 16 villages conducting their own waterworks. Of the cities, Toronto had the largest amount of money invested in the waterworks, namely, $4,171,181.64. The average working expenses, including repayment of principle and interest charges of the system in Toronto was $97,284.50, showing an average deficit of $24,120.96 per annum. Brockville had $241,811.19 invested in waterworks, the largest amount for a town. The average working expenses were $12,826.92, and the income was $16,114.80, showing an annual profit of $3,290.38. Of villages Hintonburg headed the list for waterworks having $85,000 invested. The average working expenses were $6,644.06, and the income was $3,563.61, showing an average annual deficit of $3,330.45.

In cities, the total capital—inclusive of borrowed capital—provided by the corporations for municipal waterworks was $10,908,028; in towns $3,500,865.61 and in villages $372,079.41.

The average annual income from municipal waterworks was $1,044,756 in cities; $281,146.06 in towns, and $25,222.56 in villages. The average annual working expenses, including a sinking fund for municipal waterworks in cities was $892,301.66; in towns $256,864.12, and in villages $41,963.65.

No cities had their own gas plants. Brockville and Kingsville were the only two plants with gas plants of their own. Brockville had the largest amount of money invested in their plant, namely $75,000. The average working expenses were $20,470.34 and the income was $24,070, showing an annual profit of $4,000.

The capital provided by the two towns for municipal gas lighting amounted to $112,000. The average income of these two towns was $29,785.10 against working expenses of $26,028.18, showing an average annual profit of $3,756.62.

Three cities, 33 towns, and 8 villages had their own electric light plants. Woodstock had the largest amount of money invested in electric light among the cities namely, $40,000. The average annual working expenses were $7,551.90 and the income was $7,613.62 showing an average annual profit of $61.72. Brockville headed the towns with $66,000. The average working expenses were $12,375.30 and the income was $13,675.30, showing an average annual profit of $1,300. Dundalk headed the villages, with $65,000 invested. The average working expenses were $1,572.90, and the average annual income was $1,580, showing an average annual profit of $7.10.

The average annual income from electric lighting plants in cities was $7,613.62, in towns $154,043.57, and in villages $11,247.75. The average working expenses of the same in cities was $18,418.14, in towns $107,581.54, and in villages $17,898.21.

There were no municipalities, as yet, with their own electric power plants, nor any with their own telephone service. Of other unclassified undertakings, Niagara Falls among the towns and Shelburne among the villages, reported that they had one or two in operation, with capital invested amounting to $8,000 in Niagara Falls and $6,392.85 in Shelburne. The income and working expenses were not given.

FOUR-YEAR-OLD WRECKER

Vancouver, B.C. January 21—The Electric Railway people reported to the police on Saturday that some persons had maliciously placed stones between the rails at a switch and packed them with wet sand. The culprit was run to earth, and proved to be a four-year-old boy. The child had scattered dry sand over the top to prevent his work being detected. His work caused an accident. The wagon was smashed, one man hurt, one passenger badly shaken up and many frightened.

GOLD STAMPEDE IN YUKON

Vancouver, B.C., January 21—W. L. Whitney, wholesale merchant of Whitehorse, brings word to Vancouver that the new stampede to Boulder Creek, near White Horse, is still in an acute stage. A steady stream of sleighs is en route to the diggings, with tons of provisions for the summer. Ernest Johnson is cleaning up from 20 to 25 cents to the pan at a depth of six feet. He has not reached bed rock. Mr. Whitney claims this is richer than the richest claim in the Klondike.

CENTRAL MILITIA CAMP

Ottawa, January 21—The militia authorities admit that the Ontario Government has made an offer of a site for the proposed central militia camp, situated on the Canada Atlantic Railway. No decision has been come to in the matter. The site which the Government has been considering, but on which no decision has ever been arrived at, near Kazabaua, will cost at least $50,000 to purchase.

Piano Tuning

Heintzman & Co.'s piano tuner, R. S. Shaw is here from Toronto. Leave orders at Ormond & Walsh's drug store 'Phone 146.

DAIRY MEETINGS

List of Special Dairy Meetings for the Peterborough District

January 27th, 2 p.m.—Stoco
January 28th, 2 p.m.—Thomasburgh.
February 1st, 2 p.m.—Hastings.
February 1st, 7.30 p.m.—Keene.
February 2nd, 2 p.m.—Warsaw.
February 2nd, 7.30 p.m.—Norwood.
February 3rd, 2 p.m.—Lakefield.
February 3rd, 7.30 p.m.—Buckhorn.
February 4th, 2 p.m.—Caranville.
February 4th, 7.30 p.m.—Peterborough.
February 5th—Dunsford.
February 6th, 2 p.m.—Cameron.

This series of meetings is to be followed by another series in the Campbellford District.

WHY TRAINS ARE LATE

Cold Weather and Its Effects Upon Railways.

Few people who ride on trains in Canada have any idea of the difficulties which constantly confront those connected with the transportation departments of the various lines. Especially are these difficulties accentuated in winter. In zero weather such as obtained recently, the lost energy on the part of the engines is a very heavy item and is responsible for many delays. The engines burn up more coal, and have to take on water much more frequently, and often an engine that would take water but once on a trip under normal conditions, may have to stop two or three times in such weather.

But, notwithstanding, the public in Canada evidently fare as well, if not better, during cold spells, than their cousins across the border, whose railways rarely have to face the great difficulties which confront transportation lines in the Dominion so frequently every winter and which have been more noticeable this winter, owing to the continued severity of the cold, and unusual snow fall.

The effect of the cold spell that ushered in the New Year was especially severe upon the railways of New York State and New England.

THE CLALLAM DISASTER

William Jensen a Seaman Tells of Occurrences on the Vessel

Victoria, B.C., January 21—William Jensen seaman of the Clallam, gave evidence at the coroner's inquest yesterday that he had charge of the flags of the Clallam, but knew of no signal flags aboard. He had hoisted the ensign union side down at half-mast; 15 minutes afterward he had found the flag at the masthead. He again lowered and believed it remained there. He told of the chief engineer having come on deck an hour and a half from Port Townsend, and saying: "I wish the captain would turn round and go back." Witness replied, "It's blowing pretty hard and I guess we'll make Victoria all right." Witness did not know the steamer was making water. He told of several visits of the chief engineer to the main deck, and of how he had tried to get into the pilot house. Failing, he asked witness to tell Captain Roberts to keep the steamer's head to the wind if he could. Soon afterwards the chief engineer came on deck covered with oil and grease and went to the pilot house. Immediately after the captain called all hands to set the jib. Then the engines stopped. Witness said he believed the boats would have a better chance if they had been made ready before leaving the steamer. He did not think Captain Roberts had full control of himself.

THE INDUSTRIAL FAIR

THE ANNUAL REPORT A SATISFACTORY ONE

A Balance of Nearly $800 to Start Next Year With—Officers Elected

The first annual meeting of the Peterborough Industrial Fair Association was held in the Council Chambers yesterday afternoon, Mr. D. Hughes-Charles was in the chair, and congratulated the society on the success which had attended the fair in the first year of its existence. Mr. Charles reviewed the difficulties under which the society worked last year, and expressed confidence in its future.

There were present D. Hughes-Charles, president; and Messrs. K. Eardley-Wilmot, Ed. Elliott, Geo. Fitzgerald, A. Rountree, R. J. Munroe, R. Fair, and Secretary W. J. Green.

The report of the secretary was presented as follows:

Government grant	$380 00
Town grant	200 00
County grant	100 00
Members tickets	54 00
Rent of grounds	51 00
Donations	1,896 00
Gate receipts	1,298 60
Concert	1,348 71
Entry fees	326 35
	$5,654 66

Expenditures.

Pail prizes	$1,430 90
Duty, postage, etc	21 54
Rent of grounds	150 00
57th Band	90 00
Cold Stream Band	1,000 00
Hockey rink	35 00
Printing	390 75
Bill posting	55 00
Speeding in the ring	345 00
Labor	214 75
Judges	48 00
Accounts	108 62
Sec'y-Treasurer's salary	100 00
On hand	841 00
	$5,654 66

The report was on motion adopted.

Mr. Hughes-Charles said that the secretary-treasurer's report showed a very satisfactory state of affairs, especially for the first year. He was perfectly satisfied that placing an entrance fee on all exhibits was a step in the right direction, and resulted in only good stock being shown.

The election of officers was then proceeded with and resulted as follows:

President—D. Hughes-Charles.
1st Vice-President—Mr. A. Elliott.
2nd Vice-President—Mr. E. Elliott.
Sec.-Treasurer—W. J. Green.
Directors—Messrs H. P. Kennedy, R. Fair and W. Irwin of Peterborough; Geo. Fitzgerald, Smith; S. Hubner, North Monaghan; J. K. Galvin, Ennismore; Geo. Mooney, Douro; Robert Fowler, North Monaghan; and R. J. Munroe, town.

A motion was passed instructing the association secretary to write to the town council on behalf of the Industrial Fair Association and Turf Club, urging them to do all in their power to have the street railway running by August 1st, 1904.

In accordance with a letter from the secretary of the Canadian Association of Fairs, Messrs. D. Hughes-Charles and Geo. Fitzgerald were appointed to attend the annual meeting, to be held in Toronto on Feb. 17th and 18th.

The meeting then adjourned.

A REVOLT IN GERMAN SOUTH-WEST AFRICA.

The Berlin Government will Send Expedition Against the Hereros Tribesmen Menacing the Colonies

Berlin, Jan. 21.—In the Reichstag today bills authorizing supplementary credits of 1,706,300 were passed to cover the expenses of an expedition in Southwest Africa, to deal with the revolt of the Hereros tribesmen, who are menacing the German colonies. An explanation of the situation was given by Dr. Steubel, on behalf of the Foreign Office. He said that there was a rising of tribesmen which had been put down before January 10. But a telegram which arrived on January 11 from Winhoek said that Okahandja had been occupied, and that telegraphic connection with Winhoek and Swakopmund had been cut. A relief column was despatched from Swakopmund but it was not known how far it had gone. Otyimbingue, a mission station, had been occupied by the natives and a German post besieged. Troops had been sent to protect the railroad station at Karibib.

Dr. Steubel said that the government regarded the situation as grave. The Hereros did not rebel in 1896, though they were enemies of social order. The main cause of native discontent came from the dispossession of the people by immigrant farmers. The natives and the settlers were unable to agree as to terms in the purchase of land. Dr. Steubel pointed out the great services rendered by the railroad in protecting the base of operations.

Dr. Spahn, of the Centre, pledged the support of the House to the government.

Herr Bebel, the Socialist, did not oppose immediate action, but thought that the Hereros had grievances. He reserved criticism until the arrival of more detailed despatches.

KNOWS THE PURPORT OF RUSSIA'S REPLY

Czar Said to Have Agreed to Russia's Requests--Still Talk of War

London, Jan. 21.—It is understood that the Czar has communicated to the Japanese Minister the purport of Russia's reply, by which Russia agrees to enter into the engagements Japan had required. The Imperial Council had previously decided to the same effect. It is reported that M. Bezabrazof, the leader of the Russian war party, has gone to Cannes, and the report is believed to be true.

The Port Arthur correspondent of the Daily Mail cables that he has had an interview with Admiral Alexieff, the Russian Viceroy in the Far East, who spoke hopefully of the possibility of arranging a modus vivendi with Japan.

Foreign Ambassadors Confer.

St. Petersburg, Jan. 21.—Mr. Robert S. McCormick, the American Ambassador, and Sir Charles Scott, the British Ambassador, held a conference today, which, it is believed, was in connection with the friendly pressure the powers are believed to be exerting against war.

Port Arthur, Jan. 21.—Officials here assert that the Japanese continue to make demonstrations in Corean waters, and that they are landing small bodies of troops. They add that even though Japan violates her conventions Russia will not interfere. Forty thousand Russian troops are departing northward. It is stated that they are bound for the Yalu River. The authorities are declining numerous applications from newspaper correspondents to accompany the Russian army, saying that war is not expected.

Tokio Jan. 21.—The more peaceable view of the situation held in Europe is not shared here. Nobody seems to believe that the next Russian note, even if it contains concessions, will satisfy Japan's demands, and war continues to be regarded as the only possible outcome. The Kokumin and Jiji Shimpo declare that the time for an amicable settlement is past. The increase in the disturbances in Corea accentuates this feeling. The newspapers urgently appeal to the government to immediately adopt measures to protect its vital interests in the peninsula.

GOOD GAME TO-NIGHT.

WHEN THE PETERBOROUGH II MEET THE T.A.S

The game at the rink to-night should prove to be a strong drawing card, and a large crowd of spectators will no doubt witness a keenly fought match, when the Peterborough II. meet the T. A. S. for the first time in the T. V. L. Both teams have practised hard for the coming battle and are in good shape. A good clean game of fast hockey will be served to the spectators.

A large crowd of supporters will accompany the hockey team to Belleville to-morrow. A special train will not be run, owing to the impossibility of a crowd from Peterborough getting into the Belleville rink as it is much smaller than the one in Peterborough, and there is sure to be a large crowd of Belleville spectators, who will no doubt fill the rink.

Last night before a crowd of about one hundred spectators the Nationals defeated the Y. M. C. A.'s by a score of 6—4. The Nationals have a good combination and are good stick handlers. Murray Nicholl scored the first goal on a pass from E. Coughlin. R. Lynch and O. Giroux played a combination up the ice and O. Giroux scored. Giroux scored again on a shot from centre. Lynch scored and Coughlin followed with another. Half time—C. Conroy played a great game at cover-point, stopping many a good rush. Frank Heffernan played a good game also at point. Conroy made a rush up the ice and passed to Lynch, who scored. Crane made a rush and shot, but L. Giroux, who played a fine game in the flags, prevented a score. Coughlin got the puck, passed it up the ice and passed to O. Giroux, who scored. Moore of the Y.M.C.A.'s rushed up the ice with the rubber but Conroy blocked him. Nicholl got the puck and scored. About two minutes before time was up L. Giroux stopped a hot shot on goal, and lifted it which passed through the Y.M.C.A. flags.

The line up was as follows:

Young Nationals—Goal, L. Giroux; point, F. Heffernan; cover point, C. Conroy, forwards, R. Lynch, M. Nicholl, O. Giroux and E. Coughlin.

Y. M. C. A.—Goal, A. Dawe; point, H. McMahon; cover point, C. Moore; forwards Crane, Mann, Laing and McGuire.

The Young Nationals will journey to Norwood to play the team of that place a week from Saturday.

Picton, Ont., Jan. 19—Words utterly fail to portray the bloody battle played here last night. Belleville, when they found they could not win by fair means, began slaughtering the Picton forward line in an unmerciful manner. Capt. Strike, Embury, Powell and Seale were a sight to behold. The injuries consisted of broken nose, teeth knocked out, eyes cut open, cheeks cut, knees knocked out, and battered and bruised and hurt internally. The Picton players would have doubled the score had Belleville played clean hockey for Capt. Strike and Bobbie Embury time and time again, when about to score would be brought down on the ice and injured. The referee, Hugh Rose, from Fort Erie, was too lenient, only ruling the players off for one minute at a time, and when the Pirates would get through an offside would generally be the result. There was no living team that could have beaten the visitors with their rough work, and twice the Pirates scored before the referee rang his bell, but the goals were not allowed.

Manager Frank Boulter, of the Picton team, called up the Mail and Empire last night and said the game was the roughest he had ever seen. He said the Belleville players never let up in their rough work.—Mail and Empire.

MURDER TRIAL FOR CARLISLE

New Carlisle, Que., January 21—The Bonaventure Criminal Court opens tomorrow, when Richard Murray, Michael Murray, and Archibald Gerald will be placed on trial for the alleged murder of Richard Mann last summer.

APPOINTED CURATE

Quebec, January 21—Rev. R. W. E. Wright of Magog, son of the Rev. Dr. Wright, of Montreal, has been appointed curate of the Anglican Cathedral here to succeed Rev. Lennox Smith, who is going to the Cathedral at Ottawa.

SALVATION ARMY CONGRESS

The Salvation Army Congress will be held in London, England, next July, when probably 100,000 members of the religious body will be in attendance. Crystal Palace, the first building ever constructed to be used for a world's fair, has been selected as the place in which the mammoth gathering will hold meetings. General Tucker Booth, who is in command of the Salvation Army in the United States is now engaged in making preparations for the departure of an army that will be well up in the thousands. Barracks in all parts of the Country will choose representatives to the Congress. Before sailing for Europe the American army will hold a great farewell demonstration in Carnegie Hall, New York city.

WEATHER NOTES

Morning—Cold.

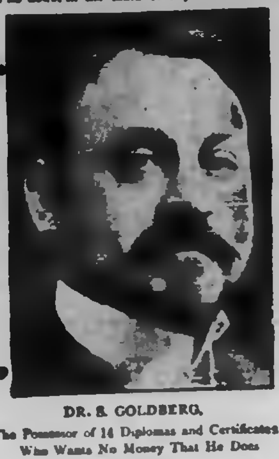
CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free —Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has



DR. S. GOLDBERG.

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario

trangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month, and to outside points at $3 per year strictly in advance

UNION LABEL

PETERBOROUGH, JANUARY 21, 1904

THE COLONIAL WEAVING COMPANY'S BY-LAW

The action of the Council, when in Committee of the Whole on Monday night, has placed the Civic Board in the unenviable position of having broken faith with the Colonial Weaving Company, on account of considerable opposition to the Dickson Co's proposed exemption. There was never, at any time, the slightest objection raised to fixing the assessment of the Colonial Weaving Co., and a by-law was passed to that effect in 1903, on the strength of which, to some extent, at least, the company went ahead with establishing their plant. Without going into the merits or demerits of the by-law passed by Ashburnham Council granting exemption to the Dickson Co., valid under the present Assessment Act from May 1903 till December, 1904, the Committee's action in repudiating that bylaw was morally speaking, a breach of faith with Ashburnham, providing the two Councils agreed that any measure adopted by each during the time pending a legal consummation of union should be binding on 1904's Council. But some members of this year's Council apparently entertain the view that especial care was taken to rush this by-law through in Ashburnham at the last moment before amalgamation in order to avoid any possible chance of its being side-tracked by Greater Peterborough. They also maintain that the measure is as unpopular with the villagers as with themselves and contended that it should be voted on by the Committee independently of the other two by-laws. Others considered themselves bound in honor to endorse the action of the Ashburnham Council, and argued that the question of applying for legislation on the three by-laws—the Dickson Co., the Ultimator Co., and the Weaving Co.—should be decided by ONE vote. And the result was both factions lost their point to some extent. No one opposed the Weaving Co.'s fixed assessment and one party evidently thought that by lumping the three by-laws it would carry the other two on its shoulders to victory. But what was the result? The three were lumped, by a majority vote, but the resolution to apply for legislation confirming these three by-laws was voted down, and the Weaving Co., are out their fixed assessment, as far as the Committee of the Whole are concerned, and the Town will repudiate its own policy on these lines unless this committee's recommendation is amended at the Council's next meeting. Now there is considerable difference between a fixed assessment and exemption, and it is hardly fair to the Colonial Weaving Co. that the Town should break faith with them as the result of a difference of opinion as to what course should be adopted in regard to another Council's action. We don't think, as far as we can judge, that any Ackerman intended for one moment to abrive the Weaving Co.'s by-law; that was the result of an unlooked for continuation of circumstances, and perhaps at the next meeting of the Council, a vote on the Committee's recommendation will tell a different story.

SALVATION ARMY CONGRESS

The Salvation Army Congress will be held in London, England, next July, when probably 100,000 members of the religious body will be in attendance. Crystal Palace, the first building ever constructed to be used for a world's fair, has been selected as the place in which the mammoth gathering will hold meetings. General Tucker Booth, who is in command of the Salvation Army in the United States is now engaged in making preparations for the departure of an army that will be well up in the thousands. Barracks in all parts of the Country will choose representatives to the congress. Before sailing for Europe, the American army will hold a great farewell demonstration in Carnegie Hall, New York city.

In planning for an international congress, the heads of the Salvation Army throughout the world undoubtedly had in mind the excellent effect that such a gathering would have upon the future efforts of the earnest, self-sacrificing workers who, for a number of years, have been performing splendid work for humanity. With thousands of officers in conference the narration of experiences and plans for future effort should contribute largely towards the efficiency of one of the noblest bodies that have ever striven to lift the fallen and bring doubters nearer to God.

PROTECTION OF GAME FISH

Dominion and Ontario Governments Reach Understanding

Ottawa, January 20.—The Governments of Ottawa and the Dominion have come to an understanding in regard to the regulations to be enforced for the protection of fish in Ontario. After the judgment of the Privy Council in 1898 the province adopted certain regulations which, however, were pronounced ultra vires. Since that time the authority of the province on fishery matters has not been well defined, and resulted either in the overlapping of legal enactments or inaction on the part of both Governments with the result that the fisheries, especially as concerns black bass, maskinonge, trout and other varieties valued for food and for purposes of sport, have suffered severely.

BRAIN POWER

HOW IT MAY BE STRENGTHENED AND INCREASED

The brain is a great nerve battery that presides over all the powers and impulses of the human body.

Very frequently as a result of poor blood, it becomes enfeebled, and a general weakness of the entire system follows.

No remedy possesses the marvelous brain strengthening power that Ferrozone has demonstrated in thousands of cases.

It contains an abundance of phosphates and iron which are essential in the formation of red, vitalizing blood, and in this way supplies the brain with extra power to perform its numerous and important duties.

Ferrozone is the best preparation for brain workers, and those inclined to a sedentary life. It improves the appetite, insures good digestion, regulates the bowels, and helps the stomach to do its work.

Lawyers, ministers, and those whose occupation entails much thinking and brain labor, will find Ferrozone of immense value, because of its power to stimulate mental activity. Students who take Ferrozone regularly, find it not only clears the brain and makes it more receptive, but makes them strong in body as well as mind.

A medical student of Toronto University, who has proved the good qualities of Ferrozone says: "On my study table there is always a place for Ferrozone. I find by keeping my digestion in perfect order, and maintaining a splendid appetite, it enables me to accomplish a great deal of hard work. I consider Ferrozone at the same time food for the brain, the blood and the nerves and can highly recommend it."

Very few are so strong and healthy that a course of Ferrozone would not benefit. It is good for the young and old alike, and is prepared in convenient tablet form, price per box 50cts., sold by all druggists and N. C. Polson & Co., Kingston, Ont.

FOUND GUILTY OF MURDER

Charles Bonier Buffalo Murderer will be Electrocuted

Buffalo, N.Y., January 20.—Charles Bonier has been found guilty of murder in the first degree for killing Franz and Johanna Frehr, an old German couple, in their little home in Jefferson street on November 19, 1903. The verdict carries the death sentence with it. The jury was out a little less than six hours. Bonier, who is 21 years took his conviction coolly, looking calmly at the foreman, as he announced the result of the jury's deliberations.

Attorney Murphy, on behalf of Bonier, asked Justice Lambert to give him until today to make any motion that might be deemed necessary in the interest of his client. Justice Lambert granted his request. Bonier left the court room with a firm step, his giant form towering head and shoulders above the deputies at each side. The Frehrs were murdered for their money.

The murderer buried the bodies in a shallow grave in their own yard, and proceeded to install himself and his housekeeper in their former home, within a few feet of the mutilated bodies of his victims.

PIERRE DESCHAMBEAULT DEAD

Winnipeg, January 19.—M. Pierre Deschambeault, eldest son of George Henry Deschambeault, direct lineal seignorial representative of Seignory Deschambeault, is dead at St. Boniface, aged 65 years. He was once chief factor for Hudson's Bay Company, and member of first early commission. Death was caused by typhoid.

Ayer's Pills

Vegetable, liver pills. That is what they are, liver pills. They cure constipation, biliousness, sick-headache.

J. C. Ayer Co., Lowell, Mass.

EXPOSES INTERIOR OF MAN

New York Physician Makes Diagnosis of the Stomach

New York, Jan. 20.—Another important use of Dr. William J. Morton's fluorescent water cure was made today. Dr. Robert C. Kent has discovered that an almost perfect diagnosis of the stomach may be made by the use of the fluorescent liquid and a light that will cause it to fluoresce. The intestines are first flooded with the liquid and then the patient swallows a small lamp adapted for this experiment. In an experiment made by Dr. Kent he discovered that when the fluorescence took place the interior of the abdomen was plainly visible. This aid to diagnosis is almost as important as the discovery that Dr. Morton's solutions or liquid sunshine will cure cancer.

The fluids given to the patient are very dilute solutions of various fluorescent substances and they have never been in any way subjected to the radium or X-ray influences before administration internally. In other words, the water thus administered is not radioactive, but is water capable of being rendered illumable by the agencies of radium when used from the exterior.

DID NOT FIND RICHES

Nova Scotians Failed in their Search for Treasure

San Francisco, January 20.—M. McManus and C. Thompson, of Halifax, N.S., have returned here from an unsuccessful search for treasure in Terre Del Fuego. They sailed from Nova Scotia on March 17 last, with eight companions on the schooner Hattie L. M., to look for treasure in large quantities, which the captain of the vessel said was to be found there. When the schooner reached the coast of Terre Del Fuego she went aground in trying to land, and McManus and Thompson having had a misunderstanding with others of the party, took all their belongings from the vessel and started for the interior with a band of Patagonian Indians. Here they met with nothing but hardship and finally made the coast again, where they made a voyage of 125 miles in a canoe and reached a point whence they sailed for this port.

COULD NOT FAVOR UNIONS

Toronto, Jan. 20.—The city of Toronto recently called bids for fireman's clothing and the lowest competitor was the Crown Tailoring Company. The contract, however, was awarded at a higher price to a concern using the union label. Thereupon the Crown Tailoring Company obtained an injunction. In rendering a judgment Chancellor Boyd declared that in issuing specifications the city could not demand the use of any particular union label and thus discriminate against certain classes of laborers who might be as capable as those entitled to use the label. The true test of ability, he held, is not membership in a union.

GOLD ASSAYS $150,000 A TON

Cripple Creek, Col., Jan. 18.—The most important gold strike ever made in this district became known today. It was made on Beacon hill. A six-foot vein, through which streaks run which assay averaging $200 a ton, was uncovered, as high as $150,000 a ton.

COL. LYNCH MAY GO FREE

London, January 20.—The Weekly Despatch says that Col. Arthur Lynch, who commanded the Irish Brigade against the British forces in South Africa, and who was afterwards convicted of treason and sentenced to imprisonment for life, will be liberated soon.

Bannie Ledge 22 Feet Wide.

New York, Jan. 18.—The strike in the property of the Bannie Gold Mining & Milling Co., near Prescott, Ariz., is on a ledge 22 feet wide. The ore averages $100 a ton and 10 tons are being shipped daily to the Val Verde smelter.

SOME IFS

If papa didn't have to go to work;
If mamma always could sit down and play;
If chocolates were used instead of bread;
If combs and sponges could be thrown away;
If toy stores didn't have a single clerk;
And any child could go in there and stay;
If we had Saturdays five times a week;
If Christmas came on every other day;
If grown folks loved to hear a lot of noise,
This world would be quite nice for little boys.

The first duty of the farmer who desires to succeed with poultry is to know the breeds and the best purposes for which each should be applied. As the breeds differ in their characteristics, each is better adapted for some special purpose than any other, yet each may be deficient in some respect. There is no "perfect" breed. The "best" breed is best for some special use only. It may be the largest and yet not the best in quality of flesh. It may be the best for laying and yet be lacking in hardiness, size or for the table. It may be hardy and vigorous, more easily escaping disease than some, yet fail to equal another breed in laying. It may excel as a non-sitter, while another breed may be necessary to provide the mothers for the next generation. If a "best" breed—a "general purpose" one, that combines everything that could be desired in a breed—should be introduced there would consequently exist only one breed, as it would soon crowd all others out of existence, for, whether the breeds may be preferred for their beauty of plumage or to afford pleasure, utility will always be dominant as a desire and will regulate the selection of breeds.

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure the gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U.S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

in the tie which bound Henry to him not known by Mr. Dowling, but Henry was perfectly conscious of it.

In the hour of sorrow he had pushed his great heart of sympathy against Henry's heart, and left an impress upon it never to be obliterated. It was language intelligible and indelible.

Elsie's tender and saddened heart had also known the power of love's contact as never before, because both Mr. Dowling and Grace had been so helpful, and carried the needed comfort at the most trying time of her life. Flowers had been sent to her, but the flowers most fragrant and lasting were those which angel hands had picked in the garden for her—attention, sympathy and sacrifice.

Mr. Dowling was all ready, except his speech, when the young men arrived. He met them at the door, and said:

"You might have thought I would not be ready, and was not anxious to go, but you see I am."

He walked down the steps between the two, and for a moment took hold of their arms as a sign which every man understands. It was real friendship.

Henry said, "I am sure you are not so glad to go as we are to have you. Isn't that right, Dick?"

"That's so," quickly answered Richard.

"Yes," said Henry, "this is the night that I have been most anxious to go to a union meeting of any time in my life. I believe there is great good in it."

"I hope there will be," replied Mr. Dowling. "I am sure if you men know how dead in earnest I am in the desire to change the present condition of both the workingmen in their relation to the employer, and also in relation to the church, they would listen and stand by me, too."

"Here are two fellows who will," said Richard.

"Thank you," said Mr. Dowling; "that makes me feel better and gives me security; a certain backing, and I will depend upon you."

"Well," said Henry, "I am the one who wanted you there, and I propose to help you all I can. You just go ahead to-night and say what you think—something like the sermon would not hurt, and even more along that same line. I rather think they expect it, but I will not make any suggestion. You probably have it all ready."

David Dowling hardly knew what to say now, because he had several lines of thought in his mind, and was just trusting to Christ's help to formulate them, and he replied:

"No, I have not fixed it exactly, but, anyway, you may be sure that I will do as Christ desires, as near as I know it. I stand for him, you know, and this is one way at least for Christ to belong to a labor union."

When they reached the door and entered, the meeting had just been opened. Some business was being transacted. All eyes were turned upon David Dowling as he sat down near the door next to Henry. There was great expectancy. It was an innovation, and the interest in it had called out the largest meeting they had held for a long time—if not the largest ever seen in that union.

Everything was quickly dispatched, so as to come to the address and the open meeting.

If ever a man was controlled by a burning desire to do the right thing, David Dowling was that man now. He was saying to himself: "Anything for thee, my Christ. Help me to be true and fair, and show Thee in the right light."

When he arose to speak, there was a ripple of applause, but not enthusiastic, because most of the men did not know what attitude to assume and some of them had even voted against his coming.

He walked to the front and said:

"Gentlemen, I thank you for this honor, which I consider one of the greatest of my life, because of the confidence you have manifested in me. I believe we are one in desire, and nearer to each other than you think. My work is different from yours, but I promise you now that my purpose is the same—in helping the cause of justice and humanity.

"We have been separated too long by misunderstanding, and the enemies of us both have misrepresented us. I hope this event to-night will be the dawn of a new era in the relation of the church to labor.

"Your call to me came from my venturing to ask the question, which I consider a vital one to you as well as to myself: 'Would Christ join a labor union?' I said 'Yes' then, I say, more emphatically, 'Yes,' now."

There was a shadow of excitement and a rustle of whispering as he continued:

"If the union has a right to existence in human society, and I believe it has, Christ would belong to it, if he was a carpenter in this city as he was a carpenter in Nazareth. If he came to the world in human form today, the divine plan would not be changed. It was the plan of the eternities.

"If He came to your city as his dwelling place, He would learn His trade, and join the union for protection, and for the ultimate redemption of all men. He would be one of your number to-night. Yes, He is, and would say, 'Come unto Me all ye who labor and are heavy laden, and I will give you rest.'

"His mission is not outside of the circle of labor. He began at the center of the carpenter shop, and will not give up until His scarred hand touches every part of the circumference, and His power regenerates the whole.

"Now, I did not come here to preach. I invite you all to come to my church to hear the sermon, and perhaps there will not be as much 'preach' in that as you think there is, but I am here now to say some things to you which lie at the very core of my heart.

"You would not want me to be hypocritical. I cannot be, if you do. I never spoke in my life with such conviction and such blood-earnest desire."

The men looked more intently at him, and some of them even nodded to each other. He had not only gained their attention, but he already had the respect and confidence of most of his auditors.

He paused a moment, and then continued:

"I propose to say something about myself first, and then something concerning you and your work. If you have misunderstood me and my methods, let me change that feeling, if I can. Do not be prejudiced. Listen and pass your own judgment.

"I sat a few hours ago by the side of a young man—he is now dead. He was dying of consumption, and they sent for me. He was a member of one of the labor unions. He was perfectly conscious until his death, and also while I was there. What was my first business in his presence and the presence of death? Every man of you will answer at once, 'To do all in my power to make that poor fellow ready to meet God. To help him in the final preparation for the next world.'

"It would be folly and criminal to talk to him about this world, and trades, and work, and the wrongs of society. Eternity was just ahead of him, and was the only reality now.

"That is only an incident which illustrates the character of my whole life. I stand on the edge of the grave between immortal souls and their destiny.

"My first business must necessarily be their salvation hereafter. You say, I am too other-worldly. How can I be otherwise? Yes, how can any thinking man put the next world secondary to this? If the preacher is "too other-worldly," most men are too much 'this-worldly.'

"The fact is that you cannot separate the two worlds. The divine plan is to save men in this by saving them for the next.

"If you thought that I ought to preach only concerning the questions of the hour and solve the social prob-

(To be continued.)

Cross Bulls.

We once knew a man who lived among his fellow-farmers with the reputation of being morose, surly and unsociable. One neighbor, who had known him from childhood, accounted for his peculiar traits by saying that "he was brought up unsocially as a boy."

There is something in this when applied to men, and we believe it to be true when applied to bulls. As a rule, the bull is kept in a separate apartment, away from all social contact with his kind. He is not made to work and consequently misses this powerful influence for the promotion of the spirit of obedience and docility. He is given but little exercise, is fed well and what wonder is there if he soon becomes charged with all the power of the cartridge of dynamite and about as ready to go off on slight provocation.

We have never had a cross bull that we had reared to full service ourselves. At the present time there stands at the head of our herd two young Guernsey bulls nearly two years of age, who graze together in the same paddock and who take their turn, night and morning, on the tread power in separating the milk. In the stable these bulls stand alongside of the cows.

It is astonishing how civilized a member of society it makes of a bull when he has to work like other folks, and is not shut away from his fellows as though he was a criminal.

By this, however, we do not mean to be understood as saying that every bull should be not handled with a full idea that he is liable at any time to become vicious. But the chances of such a collapse are reduced fully 75 per cent. if he is reared in a kind, firm and industrious manner. Half of the deviltry among men and bulls occurs because of a lack of employment. We have often noticed that with boys, for instance, one hour's work was worth two hours of preaching to keep them out of mischief.—Hoard's Dairyman.

Professor Roberts of the Cornell station claims that to fatten calves successfully on skim milk and grain to supply the butter fat, the calves should first be fed a moderate amount of new milk for a few days, and then skim milk should be gradually substituted so that at the end of a few weeks the calves would be fed entirely on skim milk. If seven pounds of corn meal is mixed with one pound of linseed meal, old process preferable, he finds it will make a fairly good substitute for the butter fats of the new milk.

There is no monopoly in the sheep business, nor is it dependent upon the efforts of any particular individual. What the farmers should do is not to become discouraged, but endeavor to improve their flocks and get larger profits. Should wool remain low the farmer may gain the difference in price by adding to the weight of the carcass. The difficulty with our flocks is that they are composed of small sheep. Wool has absorbed all the attention, and yet it is not the only source of revenue to be derived from sheep.

Twenty years ago Kansas had but 471,548 milch cows, and scarcely a creamery worthy the name, and their product was unsought. Ten years ago Kansas had 567,353 milch cows; creameries of a better class were being slowly established, but their output begged a market. To-day Kansas has 802,738 milch cows, or more than at any previous time, and many high-grade creameries and cheese factories, including the largest creamery in the world, hundreds of contributory receiving and skim stations, and their product is not only favorably known in the principal markets, but sought beyond the supply. "Brains in the man and blood and feed in the cow," observes Secretary F. D. Coburn of the State Experiment Station, "are essential to success in Kansas, as elsewhere."

The Latest Humor.

"Mrs. Talkyer-Blind can say some of the most cutting things."

"Yes. If she could only keep her mouth closed for five minutes you could have her arrested for carrying concealed weapons."—Life.

IT IS A PRODUCT

OF THE

WEALTHY WEST

"The Cracker Jack"

This is a year of plenty; It is a year that will go down in history as the beginning of a New Era. The WEST is the center of Tangible Wealth. It is proving the ONE means of salvation for the East

The Eastern markets are dull and the Western markets are active. There is more Money in the West than there has been before. Bank clearings show an increase savings accounts are over Two Billion Dollars. The crops have been greater than during any previous year in our "Fat" seven.

It is HIGH TIME NOW to put your money where the fluctuations incident to trade conditions and conditions that will be caused by the coming presidential year will not affect it.

Seek SAFETY for the time being; and liberal remuneration for the future.

Put your money where it will be secure and where it will be active.

Put it beyond the cavil and caprice of the human agencies behind the money markets.

Put it where it will produce a commodity of prime importance.

In other words, **Put your money in Cracker Jack Consolidated Gold Mines Company's Treasury Stock.**

THE

CRACKER JACK PROPOSITION

BOILED DOWN

The Cracker Jack is a mining property in the Cracker Creek District, Baker County, Oregon.

It is the adjacent Northern Neighbor of the Cracker-Oregon, the adjacent Eastern Neighbor of the North Pole, and the Northeast Neighbor of the Eureka and Excelsior.

It contains the continuation of the Cracker-Oregon veins and a split from the E. & E.

It has 120 acres of mineral land.

It has sufficient timber for all mining purposes.

Tunnels are being driven to the veins and ore bodies have already been uncovered.

Work will be continued all winter.

Stock is selling at one-fourth of par.

As soon as the large vein has been crosscut, stock will be worth at least par.

The company looks for this to occur at an early date.

The men behind this proposition have brought out three successful mines and **no Failures.**

Investigation will prove the real worth of this enterprise.

BUY CRACKER JACK STOCK AS A

Five Year Endowment

If you should die, you will leave an asset that will do what no Life Insurance can do. It will Increase in value.

It will have marketable worth.

Your neighbor will give you cash on it; whereas he could not and would not attempt to cash an insurance policy.

Better than all, you don't have to die to win; you don't have to wait twenty years to win; you don't have to pay installments for life.

You don't have to pass a physical examination.

True of any stock, you ask?

In a degree but then—there is but one Cracker Jack. It is the culmination of experience and search on the part of men who have brought out three good gold mines

They have proclaimed it BEST only after careful search, comparisons and tests.

Experience and records count!

This is not a bargain counter offering. You can't come in and carry your purchase back in your arms. You have to wait a while—and what you will get will be worth waiting for.

Don't dodge the issue. Don't fret and think this is a catch-penny scheme Go to a reliable mercantile agency and pay for information about LEE S. OVITT and the men back of this company. Abide by their word. They make a business of rendering commercial reports. They are cool and calculating. They can't afford to be misled. They are as rigid as the Government in matters of business.

There is no sentiment about this. It is open, fair and the company is trying to meet you half way.

You have some money Perhaps you think it wise to speculate. Look at the market and beware. Maybe you think railroad stock is good; but do you think that the Powers in Wall street will spare YOU when their war is on? And is it not on in nearly every listed security in this country?

Buying a home is nice; it is commendable. But interest counts up. You don't pay any interest here You put your money to work. It will be kept at work and the result will be profits.

We are not forecasting dividends. That would be to mislead you. We know that there will be dividends; greater and better than in any industrial in the land—no company excepted.

Just Think and then Act

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.

2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.

3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.

4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.

5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.

6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.

7th—By being able to ease a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 16th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.83 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.83 to $10,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

W. D. WALRATH,

NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

PETERBOROUGH BROKERAGE CO., Local Fiscal Agents, Peterborough

New Story of Pius X.

The following story of the Pope is told in the Italian papers. A deputation of the monks of some Order had obtained an interview with him. According to the etiquette of the Vatican, only Cardinals are allowed to sit in the Pope's presence, and an invitation from him to do so is deemed equivalent to the promise of a Cardinalate. Pope Pius X. is a plain man, utterly indifferent to the etiquette of the Papal Court. He therefore, begged the monks to take seats. They hardly knew whether they could venture to do so, and whilst they stood hesitating he said to them, "You do not, I suppose, expect me to draw your chairs forward for you?"

Would that all other Sovereigns had strength of mind to put an end to the ceremonial tomfooleries of former ages that encircle them! devoutly exclaims "Truth." All the bowing and scraping, the kissing of hands, the retiring backward, and such like antics are out of date. I recognise the ditty of every citizen to treat his official head with respect, whatever be the title by which he is known. But all such tricks only befit a performing dog, and are out of place when the performers are human beings. Court uniforms, to my thinking, are equally absurd. What can be more ridiculous than some peaceful citizen, fat and scant of breath, masquerading as a deputy lieutenant in a military uniform, or some worthy father of a family in a velvet coat, knee-breeches, and ruffles? Yet so silly and so little sense of humor have these guys that I have seen many of them disporting themselves in clubs in this array, and I am credibly informed that they actually exhibit themselves to their admiring families, as proud of their appearance as a barn door cock is of his feathers.

A Despiser of Letters.

"Sigma" in his reminiscences in "Blackwood's Magazine" (by the way, can "Sigma" be Goldwin Smith?) says that excepting Justin McCarthy, he has met in his time only two individuals who knew Thackeray personally—"one of whom certainly deserves immortality, though unfortunately I am unable to record his name, having forgotten it in the march of time. I met this individual at dinner nearly thirty years ago, when in my first 'Thackeray' enthusiasm. He was a gray-headed, square-jawed 'diner-out,' apparently of about sixty-eight or seventy, with an assertive nisi-prius manner, and one of those rasping voices that seem to dominate the dinner-table. After dinner, on the departure of an intervening lady, I found myself compelled to 'close-up' to this objectionable fellow-guest. As it happened, a minute or two previously I had heard him allude to the Charterhouse as his former public school. 'Why,' thought I, 'this old gentleman was most probably at the Charterhouse with Thackeray; suppose I break the ice by enquiring.' Accordingly, after an uncomfortable moment in which he seemed to be considering whether I was worth talking to or not, I timidly ventured to remark that I had heard him alluding to the Charterhouse, and wondered if by any chance he was there with Thackeray. 'Thackeray, sir; what Thackeray!' he answered with a contemptuous stare. 'I mean the great Thackeray,' I rejoined, rather astonished. 'What!' he rejoined; 'the fellow who wrote books? Oh yes, he was my fag, and a sniveling little beggar I thought him; often have I given him a sound kick for a false quantity in his Latin verses. I thought nothing of him, sir—nothing, I can assure you!' 'Ah, but,' I exclaimed, 'you have changed your opinion since, of course?' 'Not at all,' he growled, 'not at all; why should I?' 'Why, on account of his books,' I retorted, fairly staggered. 'Never read a syllable of them. I give you my word!' he growled with magnificent complacency; then, turning his back with a gesture of infinite disdain, he proceeded to tackle his neighbor on the other side. When I told this to Mr. McCarthy, he felicitously observed, 'What wouldn't Thackeray have given to have known that man!'"

Counsel (to witness)—How can you prove that the prisoner stole six of your handkerchiefs? "Why, because they were my handkerchiefs that were found on him. Look at them for yourself. They are exactly the same as mine." "That proves nothing. I have some handkerchiefs like those." "That's quite possible," replied the witness. "several more of mine are missing."—Ex.

He had risked his life to rescue the fair maid from a watery grave, and, of course, her father was duly grateful. "Young man," he said, "I can never thank you sufficiently for your heroic act. You incurred an awful risk in saving my only daughter." "None whatever, sir," replied the amateur life saver; "I am already married."—Chicago "Daily News."

Oats a Safe Hen Food.

It is strange what fool theories men of good common sense will allow themselves to believe. Listen to this, which comes from one of our veterinary writers "Oats in the hull will so injure and inflame the lining of the crop of the fowl as to cause death." As a theory, this is bad enough, but when we are told by some poultry editor that we must give up feeding oats because the practice is dangerous, then is becomes ridiculous. As a matter of fact, the hull of the oat is not of an inflammatory nature, and contains nothing that can possibly lead to an inflamed condition. Oats fed whole are not even irritating, as the hull is neither stiff nor sharp, and when moistened in the crop of the fowl becomes soft and pliable.

I have fed oats to hens and to growing chicks for years, and have never had one die from this cause. On the contrary, I believe oats to be not only a stimulating and energy-making food, but a very wholesome one as well. From my experience, which is by no means limited, I have come to believe that oats are one of the best egg-making foods we have; that they are productive of growth when fed to chicks, and that they go a great way toward keeping up the energy and health of the flock. The hull of the oat may not contain much nourishment, but it has some food value and is harmless.

Hens need some bulk to their food, and the oat hulls will keep the food from becoming too compact in the crop and digestive organs. There is no need to resort to the expense of feeding hulled or ground oats, whole oats are better and cheaper.

My flock of laying hens has eaten an average of one-half bushel each during the year—I have sometimes fed more—and the results have been satisfactory. Not a case of crop disease of any kind. —F. C. Dow, Belfast, Me., in N. Y. Tribune.

Devonshire Cream.

What is known as Devonshire cream is a species of pasteurized cream and is made as follows:—

"The milk must be taken direct from the cow and strained into the pans in the usual way. It should set in a cool dairy, and I believe for want of this cool apartment many a good housewife has failed to turn out the genuine article. Good, sound pans must be used, as they have to bear constant beating. There is an objectionable plan in some establishments of leaving the milk in the sheds for a time after it is drawn from the cow. Clotted cream made from such milk will not turn out a good flavor, as there is sure to have been more or less tainting of milk while standing about. Just now many Devonians milk out in the open field, and if the cows are quiet the plan has its advantages, for there is no tainting of milk there.

"This requires the most care; indeed, there is nothing else in the whole process but a mere tyro could manage. As soon as the milk is cold, or, say, about nine or twelve hours after brought from the cow, the pans are lifted to the fire. In big dairies there are what are known as Devonshire stoves especially made for the purpose. The stoves so made, heat water in which a number of pans may be set so as to scald a quantity of milk with little trouble. In smaller dairies the kitchen range does duty, the pans of milk being set in vessels of boiling water, or the pans may be set on a heated range. In any case, the object is to scald the milk, and to do it promptly and exactly. It should reach such a temperature that causes a little movement on the surface—a very slight simmer suffices; then it may be removed back to the dairy to get cold. When cold, the cream is taken off at convenience, and that is clotted cream, which is rightly, so highly esteemed. In cold weather the milk is all the better left for twenty-four hours or even thirty-six, before scalded."—Hoard's Dairyman.

Strawberry Cure for Rheumatism.

"The strawberry cure for rheumatism is the latest fad I have heard of," said a druggist. "This cure has, too, some reason and some fact behind it. Linnaeus, the great naturalist, cured himself of rheumatism with strawberries, and it has recently been proved that strawberries contain salicylic acid, which is the rheumatism remedy that all physicians use. Linnaeus, I understand, was very poor and very rash. In studying nature he would go out in all weathers, and it is said that he would often sleep all night in wet clothes. Consequently, rheumatism developed in him. He cured this disease by eating several quarts of strawberries a day. His biographers narrate the story, and in that way the fruit's popularity as a rheumatic specific was achieved. Lately, on account of the discovery of salicylic acid in strawberries, this popularity has increased. I know a great many rheumatic persons who are eating strawberries three times a day, with great benefit to their heath. Salicylic acid, the rheumatic specific, is used also to keep milk fresh and to preserve meat." —Philadelphia Record.

The size of the seed for potatoes influences the yield. In England whole potatoes are used almost in every section, and successful growers in the United States use seed potatoes cut in half, never cutting to smaller sizes. Deep ploughing, deep planting and level culture give better results than hilling. A single plant in a place gives the largest tubers, but not so many as when two or more plants are together.

Some Interesting Essays.

Perhaps nothing is more difficult than to say exactly what we mean. A teacher of composition in a private school who realized this, has lately been trying the experiment of making her pupils write anything they like about a given subject in a given time, generally about five minutes; and some of the results have been most enlightening. One of the subjects was "Wind," for example, and here is one of the answers: "There are four winds, north, east, south and west; but sometimes two of these blow at the same time, and then we get a S.W. or N.E. wind." Another was at least topical: "Wind is an abominal element. It blows off people's hats and uproots trees. But it is very useful for yacht races."

The subject "Jam" was equally inspiring, judging by the remarks written on it. "Jam is to be found in nearly every house," wrote someone; "and some people eat it at every meal. Some jams are sticky." We should rather like to hear of the jam that is not sticky. Another subject that provoked the same simple directness was "Ireland." More eloquent than the eloquence of a whole Gaelic league was the delightful sentence: "The Irish were conquered by the English in days of old, and have been annoyed about it ever since." We cannot help recalling after this a charming passage in a forgotten lesson book—"The Child's Guide to Knowledge"—relating to a thunderstorm. This is what it enjoined: "Pull down the blinds, draw your bed to the middle of the room, lie down and commit yourself to God."

In facing a sleeve, turn it, and place the facing inside the sleeve before sewing it on.

Gathers should always be set on the right side, but never with a needle; use a large pin.

Ancient British Wheat Fields.

A wheat field a thousand years old is quite a common sight in this country. Of course, it has not grown a crop of corn every year in the ten centuries, but during that long sequence of ages, in the fixed and abiding order of this ancient country, that particular area of land has been cultivated with the production of wheat as its main object, and it has remained as a part of the English granary from the days of Edward the Confessor until those of Victoria. Many of the wheat fields are far more ancient than this, but the records of Doomsday Book is a practical voucher for a period of 1,000 years. The custom of the Saxon cultivators, and the evidence of local names, are proof of a still greater antiquity of cultivation on some of the best corn land; and beyond the days of the Saxons lie the last two centuries of Roman occupation, when England was the great wheat-growing country of the West, and supplied the population of Rome with daily bread.—London Weekly Country Life.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema.

January 29th, 1902.

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,

MR. JOHN WOOD,

Peake Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same price. $100 will be paid for any case that it will not permanently cure.

EVERYBODY READS THE TIMES.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the north-west is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $10 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $10 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values, $12.50. This being a general sample taken from the dump. The other two assays are $62.68 and $19.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will meet a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.

PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 900 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $3,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.
Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.
Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.
Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.
Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03
Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.
Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.
In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSBY, Prescott, Arizona.

A FORTUNE AWAITS YOU

INVEST NOW IN THE

North Carolina Gold Fields

BUY

Rodman Mining & Milling Co's Stock

AT 50 CENTS PER SHARE

DIVIDENDS IN SIGHT

Three developed mines with more than $500,000.00 worth of ore on the dumps and an inexhaustible supply in the mines, assaying as high as $100.00 per ton, with an actual mill test of seven tons running

$24.65 PER TON IN GOLD

One mill completed ready for operation and another being built. One and one-half miles from the main line of the Southern Railroad, cheap labor, cheap fuel. Plenty of water and a climate allowing operations 365 days per annum, are a few of the advantages that go to make this one of the most valuable mining properties today in the country.

Send for free copy of the "Gold Nugget" and learn something about the North Carolina Gold Fields that produced all the gold in this country before '49 and that are today attracting the attention of the world.

HUTCHENS C. BISHOP, Rector St. Philip's Church (P. E.), New York City

No man can serve two masters.—St. Mat., vi., 24

It is always impressive and helpful to have a statement intended as a rule of life uttered with authority and in language so simple and direct that it cannot be misunderstood.

Jesus Christ, whose words these are, was not only the "Lord of Life," but the Master of living. He spoke not only as one having authority, but out of an experience that had tested in His own life the rules He gave for guidance of others.

That He exemplified both in letter and spirit the principle expressed in the text is so clearly a matter of history that even His most persistent critics have not been able to gainsay. Nor should anyone fail to understand the force of the axiom —"No man can serve two masters." It is a universal negative and asserts an impossible condition of service. It does not destroy the free exercise of the human will, but it places a limitation upon the functions of that will.

We are so constituted that, though one may boast of his independence in thought and action, nevertheless there is a mastery to which every one is ever rendering an obedient service. We must serve some master, but "no man can serve two masters." Nevertheless we are confronted with the fact that the great majority of men are endeavoring to do the very thing which is here pronounced impossible and proved to be so by all experience. Alas! how many have fallen victims to this vain endeavor; how many are still engaged in the hopeless task of a dual service!

The proposition is as true in the affairs of everyday life, in the questions affecting political, civic, ethical, commercial and social relations and the numerous situations in which we are called upon to assume an attitude of service, as in the realm of religion and morals. The tendency of the age is to be non-committal, to straddle, to be on the fence, to serve two masters, when, as a matter of fact, such an effort is a delusion and a snare, and in the end subverts the best interests of the individual and of the common weal. Compromise is always a sign of weakness. Conservatism is a sort of fetich of the day. In questions of honor and dishonor, of good report and evil report, of right and wrong, there is no middle ground upon which honest men can afford to stand. In such we are at the "parting of the ways," and we must follow one or the other.

Especially is this true in matters of religion. Here the line of separation is so clearly defined that it cannot honestly be escaped. The Great Teacher gives a concrete example :—"Ye cannot serve God and Mammon." God, as representing the very highest, because most perfect, mastery, and Mammon, as demanding the very lowest, because the most degrading, service—each is an imperious and exacting master, and no man can be loyal to both. Their wills are so different, their commands so opposite and their ends so antagonistic that the occasion must frequently rise when one or the other will have to be despised and disobeyed if the other be honored and served. Try as we may to elude the difficulty of the situation, we are forced to enlist in the service of the one or the other. Beyond a doubt Mammon rule—Mammon worship—is one of the distinctive features of the day, and few realize how deep is the impress upon life and character.

There is an expression about "every man" or "everything" having its price, and the fact that it calls forth a resentment that steadily grows less pronounced indicates how far we have gone in this direction. However, there is no necessary conflict between God and Mammon, between the acquisition of wealth and the highest duty of life, but there is a necessary conflict between the mastership of wealth and the mastership of God. When men are so dominated by the love of gain that it becomes an absorbing passion and the higher claims of duty are made secondary they should at least be honest with themselves and know in what service they are enlisted, and not be deluded by the thought that they can "hold to the one" and not "despise the other." Unworthy service assumes other forms. Society, fashion, pleasure may be substituted for "Mammon," and we have identically the same situation. It is not a question of inconsistency or incongruity. It is not "ye ought," but "ye cannot."

If, therefore, every man must serve some master, and "no man can serve two masters," and every man really does serve one master, ought not each one to deal honestly and fairly with himself, and as an intelligent and responsible being demand an answer to this very pertinent question, "Who or what is my master ?"

At the Rothamstead, England, Experimental Farm, conducted so long by Lawes and Gilbert, a field is this year carrying its sixteenth successive crop of wheat.

In estimating the profit from a butter cow *something* is due the cow for the skim milk and butter milk furnished the pigs. A lot of pigs should always be kept where cream is sold or butter sent to market. The pigs provide a source for the disposal of refuse milk, and a portion of the profit should be credited to the cow.

Mr. J. A. Kinsella, at one time a dairy instructor for eastern Ontario, has been appointed to take charge of the dairy work for the Transvaal Government. Mr. Kinsella came from Brockville and had a practical training in dairy work. Two years ago he was appointed a dairy instructor for New Zealand and upon the resignation of Mr. Ruddick was made superintendent in New Zealand.

Regarding Old Age.

It was stated in a former article that the essential underlying fact in the physical changes peculiar to old age is the encroachment of one set of cells—the common elements—upon the territory belonging to another set—the noble elements.

This encroachment weakens all the functions, reduces the power of assimilation, stiffens the arteries so that the blood charged with supplies for broken-down parts finds less ready access to the organs and tissues, and lower vital resistance. The fibrous structures having, in their overgrown state, no proper function to perform, degenerate and give way to deposits of earthy matter, and so man tends to return to the dust from which he was formed. How, then, to prevent this fibrous outgrowth, or rather retard it is the problem of the physician.

The great physical difference between the living machine and one made of inert matter is that the living machine wears out with non-use while the other wears out with use. Friction eats away the bearings of the steel structure, and finally the worn-out parts must be replaced by others. Use wears away the cells of the animal machine, it is true, but repair from within keeps pace with wear, and in early life outstrips it, so that the body grows and increases in strength. When two cells are used up in the functions of the machine three are called into activity to replace them.

If, then, we would keep the "noble" *elements of the body in condition to* perform their duty well and to resist the encroachments of the "common" elements, we must exercise them. This does not mean that the man of fifty must keep up the athletic pursuits he followed at twenty, or that the man of seventy must *toil with his* brain as he did at forty. The inevitable has begun; the muscles and the brain are less sturdy than they were, and can do less; but they still can do much, and must not be allowed to degenerate by non-use.

The man who retires from business at the beginning of old age and suddenly exchanges an active life for one of sloth commits a fatal blunder. If he lays down the burden of business he must take up some other less exacting occupation to keep from rusting.

Exercise, mental occupation, fresh air, moderate eating and avoidance of excesses of all kinds, either of activity or of idleness—these are the brakes on the wheel of time which prevent a precipitate rush into old age.
—Youth's Companion.

He—So the engagement is broken off ?

She—Yes. He told her he thought she should stop reading novels and read something more substantial, something that would improve her.

He—Well ?

She—Well, the idea of a man intimating to his fiancee that she could be improved in any w[illegible]

◆

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully."

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $100 will be paid for any case that it will not permanently cure.

EVERYBODY READS THE TIMES.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 196 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS,
C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO.,
FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

WANTED—GOOD AGENTS IN EVERY CITY.

Successfully Rescued

Mr. Harry Gibson of Kingston, was rescued from an enemy that relentlessly pursued him for years

Mr. Gibson was born and brought up in Kingston. By profession he is a school teacher. He received his training in Queen's University, where he took a course in arts and medicine that well befits him to talk on almost any subject.

The enemy that for 26 years relentlessly pursued Mr. Gibson is a menace to our entire population—it is the demon Catarrh.

Mr. Gibson says:—"For years I was never free from Catarrh of the nose and throat. It bothered me winter and summer and kept me so continually coughing and hawking that I found it a great impediment to the proper performance of my duties at school. I used every available means of obtaining a cure, took bottle after bottle of medicine prescribed by local doctors, but never got more than temporary relief. I consulted a well-known specialist in the States, but after spending a considerable amount of money with him to no advantage, was forced to look elsewhere for relief, which I first received from Catarrhozone.

I consider Catarrhozone a genuine cure for Catarrh. It drove the loathsome disease completely out of my system, and to-day I am as well as if I never knew what the word Catarrh implied."

A straightforward proof of cure, coming from a well known gentleman like Mr. Gibson carries conviction of the fact with it that Catarrhozone does all that is claimed for it. As a cure for Catarrh and Bronchitis it positively has no equal. All druggists, price $1.00; small size 25 cents. By mail from Polson & Co., Kingston, Ont.

Morning Times

PETERBOROUGH, JANUARY 21, 1904

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Auditors at Work

Messrs. Wm. O'Brien and Geo. W. Bennett, county auditors, will begin the half-yearly audit of the County Treasurer's accounts this morning.

Bargains in Pianos

There are some first class bargains to be had in some new and second hand pianos and organs, at W. G. Landrum's, 176 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

STATIONERY

When in need of anything in the line of commercial stationery, visiting cards, etc., leave your order at the Times job department. Workmanship unexcelled.

Mr. Roy's New Studio

Mr. R. M. Roy, whose studio was destroyed by the fire on Tuesday morning is looking up temporary premises until the new studio, which will be on the ground floor of the Cox block, is ready for use. Mr. Roy, with his usual enterprise, is losing no time, and hopes to be ready for business in a very short time.

Going to Germany

A three months' leave of absence has been granted by the congregation of St. Luke's church to their rector, Rev. A. E. Langfeldt who leaves on 30th instant on a trip to Germany for the benefit of his health. Mr Langfeldt will be accompanied by Mrs. Langfeldt and their little daughter, Dorothy. During the absence of the rector, Rev. J. L. Holah, L.S.T., late curate of St. Thomas' church, Belleville, will officiate. Mr. and Mrs. will take up residence at St. Luke's rectory. Mr. Holah comes very highly recommended by the Bishop of Ontario, the Dean of Ontario and other prominent clergymen. He will assume charge of the parish and preach next Sunday.

A Narrow Escape

What might have proved a fatal accident occurred at the Grand Trunk crossing on Dalhousie street yesterday. A little girl, named Edith McKinley, who lives with her parents at 197 Townsend street was hanging on to a delivery rig on her way from school. When crossing the track at this point the child, in some way fell off just as an express train was approaching. The engineer saw the child and slackened speed in remarkably short time, but the little girl, after being carried about ten feet, was knocked off the track. She was picked up and carried to a neighboring house, where it was found that her hip was injured and that her injuries were not as serious as was expected.

An Example for the Council

Cobourg Post—During the past week several Liberals have given ex-Mayor Floyd and the old council credit for at least one good action during the past year. In revising the rules of order, a clause was included authorizing that the proceedings of the new council be opened with prayer by a duly ordained minister of the Gospel, which is considered the proper thing by many of the good thinking people of our town. The attention of the Mayor was drawn to the rule by Coun. Munson, and at the evening session the Rev. Mr. Grant, Baptist minister, was on hand and officiated. Although new in Cobourg, it is the custom in many towns and cities throughout Canada to open the proceedings with prayer.

The Bannie Company.

There has been considerable action in the stock of the Bannie Gold M. & M. Co. whose advertisement appears in this issue, during the past month and nearly all of it that has been available locally at inside prices has been picked up through local brokers. The company has not been pushing the sale of its treasury stock recently, although it can be had from them at 60 cents a share which is the office price. As a result of an excellent showing and new strikes of high grade ore which have lately been made on this property, opportunities to secure the shares at bargain figures have been taken advantage of by investors and curb quotations have advanced several points. The Bannie is a good mine without question. Considerable of the loose stock that had been floating around was bought by parties directly interested in the Bannie Co., and when the few lots that are yet offered are placed, a noticeable advance will likely occur in quotations on this stock and it is doubtful if any of it can be bought at a less figure than the company's present selling price. Quite a number of eastern investors have been buying Bannie stock recently through the Arizona brokers.

THE TRENT WATERWAY

Important Meeting To Day of the Conservation Association

An important meeting of those interested is called by the Trent Water Conservation Association, for this morning, to consider the subject of storing the waters of the back lakes. The members of the Trent Valley Canal Association have also been invited to be present.

It is important that some action be taken to store the water in order to provide an ample supply during the dry period in the early autumn. This can only be done by the construction of new and better dams, and repairing the old ones.

The subject of the completion of the canal will also be considered, and steps no doubt will be taken to bring the matter before the Minister of Railways.

A BREACH OF FAITH

The Dickson Company Has Just Reason for Complaint

The action of the Council in over-riding the action of the Ashburnham Council in regard to the assessment of the Dickson Company's mill property is not at all creditable to our city fathers. If the Company was induced to build their mill in Ashburnham on a pledge that there would be a fixed assessment, then the Council should loyally carry out that arrangement. The action of the Ashburnham Council and the statement of Ald. Adams proves that the Company were entitled to consideration in regard to their assessment. Had the company centered their business in Lakefield, it would have been a serious matter for the poor people of the town, who have to depend largely on mill wood for fuel.

BIRTHS

CHAMBERS—On 15th inst., at Leakard, Ont. Mr. and Mrs. R. S. Chambers, of a daughter.

—The oldest inhabitant confesses he is beaten. The weather has been too much for him.

MEAT'S PLACE

Not Needed by All

A Beverly, Mass., family experienced a curious change by leaving off meat and using Grape-Nuts.

"For 9 or 10 years my husband had poor health, constantly doctoring, and at times would lay out $10 and $12 once or twice with Dr. —— of Boston and once or twice with Dr. —— of Boston, two famous specialists. The amount above I have mentioned was just for one treatment. He was treated for heart trouble and at another time for dyspepsia and another time for catarrh of the stomach. The treatment would help him for the time but he would lapse back again into the same condition.

"He was told that flesh foods were not good for him nor me. We felt willing to give up the meat, but of course needed something to take its place. I bought a package of Grape-Nuts because of the nourishment the food was advertised to contain, so we gave up the meat, and in its place we had Grape-Nuts on our table and for several months used the Grape-Nuts the same as I used flesh foods before, along with my vegetables, fruits, and other foods.

Day by day the change showed until in a few months my husband was a new man, all heart trouble, dyspepsia and stomach trouble left him and he has not paid out one doctor's bill since, even his disposition has changed. We all changed children and all; our very home was changed too, for where irritableness had been, happiness had come, and I shall have to give credit to the food that has more than filled the place of meat on my table, and every day you can find Grape-Nuts a part of our diet.

"We have three perfectly healthy children who have never had any of the children's diseases but whooping cough and measles. While other diseases have been around them their constitutions seemed to be above them and it's all owing to what their diet has been, of which Grape-Nuts has been a noted part.

"My husband is a perfectly healthy looking man now while 3 years ago he looked like a skeleton—all owing to the food he adopted. In regard to myself, I used to be troubled with my memory—I could not remember anything I read and would be confused, but when I gave up my flesh foods and used Grape-Nuts my memory came back to me and I can read and answer when I am reading aloud and remember it. May Grape-Nuts have a place in every home." Name given by Postum Co., Battle Creek, Mich.

There's a reason.

Look in each package for a copy of the famous little book, "The Road to Wellville."

THE ORIGIN OF THE FIRE

It is Now Supposed to Have Started in Mrs. Barnley's

There appears to be some doubt as to where the Hunter street fire originated. Mr. Holmes telephoned The Times yesterday that it did not start in his premises. As there was no evidence of flames in the rear portion of the store it must, therefore, have had its origin in the hall adjoining, where the floor was burned through. Mr Holmes places his loss at $2,000, on which there is an insurance of $1,600 in the Economical Co., of which Lindsay & Might are the agents.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Beatrice Dutton is visiting friends in Brantford.

—Mr. Wm. Fair, the well known fiscal agent, was in Toronto yesterday.

—Mr. Geo. B. Hilliard, Lakefield, was in town yesterday on business, and gave The Times a call.

—The many friends in Peterborough of Dr. Moher will be pleased to learn that he has been appointed to the position of medical superintendent of Brockville Asylum.

—Mr. Johnston Thornton, of Scotia Junction is visiting his brother, Mr. Robert Thornton, Harvey street, after an absence of 24 years. Mr. Thornton says that a city now stands where the old town once was.

—Messrs. T. S. Ford, Mitchell; R. E. Ford, Petrolia; A. J. Ford, Lindsay; W. Newcombe, Clinton, and W. Evilly, Toronto were the guests of Mr. and Mrs. A. W. Cressman yesterday.

—The many friends of Mr. Fred T. Harris, formerly city editor of The Times will be pleased to learn that he has attained the responsible position of telegraph editor of the Rochester Herald.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporter on Their Rounds

—The Trent Conservation Association meets in the Town Council Chamber this morning at 10 o'clock.

—A boy lost a pair of hockey boots and skates, which were stolen from the pond near Bethune street.

—Handsome birthday cards; also a nice line of invitation cards for children's parties, at Times Bookstore.

—A committee of ladies and gentlemen have decided to give a concert in aid of the Lady Minto Hospital Fund. Watch for particulars.

—The man who leaves his horse uncovered on the street in weather like what we have been having deserves to be horsewhipped.

—On Saturday we will again sell pound packages of Queen's quality note paper, containing 125 sheets, for 19 cents. Don't fail to take advantage of this special bargain. Times Bookstore.

—Mr Harry Adams has been elected representative of St. Luke's church, on the Nicholls Hospital Board, and Rev. E. A. Langfeldt the representative on the Charity Board.

—A very fine photo taken by Mr. G. E. Whitten of the Peterborough Football Team, O.R.F.U., champions, 1902, appears in Spaulding's Football Guide of 1903.

How to Clean a Brass Fender.

If you do not use any of the advertised polishes, make a paste with paraffin of a very little powdered ammonia and plenty of fine emery powder. Scour with this and then polish with a leather or cloth.

How to Wash Kid Gloves.

To wash kid gloves, first get the kind that will wash. Then wash them right. Don't imagine that any old way will do. The washable kid can be cleaned. But they demand that it be done properly. The glove must first be soaked for half an hour or more in a lather of tepid soap and water, then washed on the hand in a fresh lather, and finally rinsed and squeezed gently with a towel, so that when taken from the hand it is not dripping wet and dries quickly. These economical gloves can be had in kid or suede and in pretty shades of beaver and grey as well as in white.

The Christmas Turkey.

The question of stuffing or not stuffing the Christmas turkey is debated from year to year. Many people declare that the flavor of the bird is distinctly impaired by stuffing, and others exclaim that the stuffing is itself half the feast. Whether the old-fashioned bread crumb, sage and onions, chestnut, or, as in the south, peanut dressing may be used, be sure that the turkey is roasted breast downward in the pan. There are dozens of good dressings for turkey, of which the following are recommended:

Sausage dressing—Crumble with the hands a baker's loaf, from which all the crust has been cut away. Moisten slightly with cold water. Stir in two tablespoonfuls of melted butter, half a pound of country sausage meat, a tablespoonful of finely chopped parsley, and, if liked, two or three sour apples. Season carefully, as the sausage is itself seasoning.

Chestnut dressing—Shell about three pints of large chestnuts and blanch in boiling water. Cover them with water or weak stock, and add a tablespoonful of sugar, a little salt, and a bay leaf. Boil until tender enough to put through a sieve. Buy a marrow bone, and, having covered either end with a thick paste of flour and water, wrap in a cloth and simmer in water for three hours. Scoop out the marrow and add to the chestnut puree, with a tablespoonful of butter. Mix to a stiff paste and fill the turkey. This recipe is taken from Good Housekeeping.

Serve cranberry jelly instead of sauce with the turkey. It is as easy to make and not nearly as mussy to look at. To a quart of picked-over berries add a cupful of water and cook until the berries are soft. Strain through a jelly bag, add a pound of sugar, and boil fifteen minutes. Pour in a fancy mould, or in individual moulds, and set aside in a cold place.

For the supper table, chicken or turkey salad in a cranberry mould is delicious. Make the jelly as directed and mould in a ring. Turn out very carefully just before serving, and fill the centre with the salad. Turkey salad, by the way, is as good as, if not better than, chicken salad, when mixed with plenty of celery and a few walnut meats.

There are some first class bargains to be had in some new and second hand pianos and organs, at W. G. Landrum's, 176 Charlotte street, Agent for Heintzman & Co., Toronto. Call and see for yourself.

Day and Night Classes.

It is desirable that all who purpose entering the school should do so on the above date.

WM PRINGLE,
Opposite Post Office, Principal.

THE AX of toughest steel becomes dulled by constant use and must have a new edge if it is to do good work. Constant work dulls a man as it does an ax, makes him sluggish of body and dull of mind. He needs a tonic, something that will restore the keenness of mind and activity of body. Dr. Pierce's Golden Medical Discovery puts new life into weak, worn-out, run-down men and women. It strengthens the weak stomach, purifies the blood, and effectively stimulates the liver. The whole body is built up with sound, solid flesh by the use of "Golden Medical Discovery."

"I was confined to my bed for four months from January 1st, 1899, and commenced to take your medicine January 26th, 1899," writes Mrs. Sallie L. Sheppard, of Poplarbluff, Mo. "I took eight bottles of Dr. Pierce's Golden Medical Discovery, four of 'Favorite Prescription,' two vials of 'Pleasant Pellets,' and one bottle of Doctor Pierce's Compound Extract of Smart-Weed, as a liniment. Indigestion, obstinate constipation, and hardening of the liver was my trouble. I am at this time able to do almost any kind of house work. Your medicine saved me from my grave. Thanks to you for the benefit. My case was hopeless when I began taking your medicine."

Don't be fooled into trading a substance for a shadow. Any substitute offered as "just as good" as "Golden Medical Discovery," is a shadow of that medicine. There are cures behind every claim made for the "Discovery," which no "just as good" medicine" can show.

Biliousness is cured by the use of Dr. Pierce's Pleasant Pellets.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 29th, 1902

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Foxley Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done great work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 413, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same price $100 will be paid for any case that it will not permanently cure.

NEWFOUNDLAND OPPOSED TO UNION WITH CANADA

The Island Not in Favour of Uniting Her Destinies with Us at Present

Montreal, Jan. 22—Mr. W. D. Reid, Vice-President of the Reid Newfoundland Company, was in the city yesterday. In the course of an interview Mr. Reid spoke of the present condition of affairs in the island today. He said that at no time in the history of Newfoundland was its industrial prosperity so widespread. The year which closed December 31 was a record one in the Colony in point of development of its natural resources, surplus revenue, and realization of its products. As regards the latter, fully one-third more was paid by the merchants this year for the produce of fisheries than the previous year, and this not taking into account any increase of products. The high prices realized for the Colony's exports enabled the purchasers to pay higher prices. The markets for Newfoundland fish were never better, particularly the Mediterranean markets, this being due in a great measure to the shortage of the French and Norwegian catch.

DEVELOPMENT OF COUNTRY.

As to the development of the lumber and mining industries, Mr. Reid said;

"Mineral prospecting is vigorously pursued all over the island, and outside capital is daily being interested in mineral development. As an illustration of lumbering activity, I may say that five years ago there was little or no lumber exported from the Colony, yet during the past year, the export was double the output of any previous year, and I think I am safe in saying that the export of 1904 will double that of 1903.

"Up to the present time there are no pulp manufactures of any account, but I know of no country offering greater inducements for such an industry than Newfoundland. In the first place there are millions of acres of the very best pulp wood in the world, unsurpassed water powers, abundant shipping facilities, as the railway passes through the greater portion of these lands, and further, from the peculiar geographical shape of the island, being an irregular triangle indented with deep bays, there is no spot in its interior fifty miles from a deep water shipping port. When we take into consideration the enormous growth of newspapers and magazines, not to speak of the trade demands for paper, some slight idea may be had of what, in the very near future, must come to Newfoundland in the way of a boom in pulp and paper manufacture. One or two large pulp and paper mills operated to their fullest capacity would equal in the value of the exports, the present total export of the Colony."

DO NOT WANT UNION WITH CANADA

As to Confederation, the union of Newfoundland with Canada, Mr. Reid was of opinion that if there was any sentiment on the island on the question, it was against the union, but as far as he could judge, it was no a practical issue at all, nor was either party at the next election likely to take the question up seriously. There never was any very strong sentiment on the island in favor of Confederation, and the only two occasions on which the matter was officially dealt with was in 1869 and 1894. On the former occasion, the question of union was disputed in Newfoundland at the polls in a general election, and on the latter occasion a delegation from Newfoundland visited Ottawa, but the terms offered by the Dominion Government were such as to render it impossible that the Newfoundland delegates could recommend them to their Government.

He explained that on both occasions the serious discussion of the question by Newfoundland was not by choice, but by necessity, as on each occasion the country was passing through unusual trade depression, caused by unremunerative fisheries and indifferent realization. But now all that is changed, the country no longer depends on her fisheries alone for the support and maintenance of its inhabitants, but was daily launching out into new and varied industries.

On the whole, Mr. Reid thought the outlook for Newfoundland for the very near future was bright and promising. A small population of less than half of the population of the city of Boston or Montreal had taken upon themselves, unaided from outside, the work of developing their country by the building of a railway from one end of the island to the other. The wisdom of the policy was daily being justified, and the increased earning powers of the people would be the justification for assuming so large a burden of taxation. When asked as to the position the colony was likely to take on the fiscal policy of Mr. Chamberlain, Mr. Reid said that no pronouncement had been so far made by either Government or Opposition, but he had seen a statement by the Newfoundland Attorney-General, made to a Boston paper, in which that gentleman had said that Newfoundland fully endorsed Mr. Chamberlain.

FAR EAST SITUATION IS MORE HOPEFUL

Japanese Continue to be More Warlike Than the Russians

RUSSIAN SHIPS FOR EAST

A Number of Them are at Present at Port Said—The Latest Advices

London, January 22—The Pekin correspondent of the Times says, "The inspired messages alleging improved prospects of peace, which are telegraphed so industriously in regard to the Far East and the rise in Japanese and Chinese securities indicate either that Europe is ignorant of the terms of the Japanese note sent to Russia on January 13, or the conviction that in the face of Japan's determination to abate nothing, Russia will climb down, for the note is stronger in tone than the preceding one, which was answered by the Russian proposals published in Berlin last week. Japan is unable to accept the Russian proposals. She will not yield her moderate standpoint, and will not accept the mediation of a third power. She will insist upon her reasonable demands being accepted by Russia, and if they are not accepted she will have recourse to arms. As a prominent diplomatist describes the situation, 'Russia has bluffed once too often.'"

A Russian correspondent of the Times says; "From a thoroughly competent Russian source comes further confirmation of the extremely peaceful outlook, from the present, from the point of view of the recent conclusions reached in Russian ruling spheres. In the interests of peace it is hoped that the renewed demands of Japan will not be pressed in an unconciliatory spirit so as to make it difficult for Russia to continue in her present frame of mind."

RUSSIAN SHIPS IN SUEZ CANAL.

Port Said, January 22—The Russian battleship Aurora, the transport Orel, the collier Saratoff and nine torpedo boats, bound for the Far East, have entered Suez Canal.

St. Petersburg, January 22—The attacks on Japan in the Russian press are ceasing. The newspapers print prominently reports to the effect that the acute phase is passing and they continue to assert that mediation is unnecessary.

ALEXIEFF IS HOPEFUL.

London, January 22—The Port Arthur correspondent of the Daily Mail cables that he has had an interview with Admiral Alexieff, the Russian viceroy in the Far East, who spoke hopefully of the possibility of arranging a modus vivendi with Japan. His diplomatic agent, M. Plancon, emphasized the impossibility of Russia's evacuation of Manchuria, and said, "Orders were given six months ago to evacuate New Chwang and Manchuria, providing the Chinese would agree to simple terms, but, owing to the intrigues of the Japanese minister with the Wai Wu Pu (Chinese Foreign Board), these orders were countermanded."

MORE WARLIKE IN TOKIO.

Tokio, January 22—The more peaceable view of the situation held in Europe is not shared here. Nobody seems to believe that the next Russian note, even if it contains concessions, will satisfy Japan's demands, and war continues to be regarded as the only possible outcome. The Kokumin and Jiji Shimpo declare that the time for an amicable settlement is passed. The increase in the disturbances in Corea accentuates this feeling. The newspapers urgently appeal to the Government to immediately adopt measures to protect its vital interests in the Peninsula.

THE FRENCH MINISTRY

Doom of French Ministry May be Close at Hand

Paris, January 22—If Friday's meeting of the Chamber does not finally settle the fate of the Combes Cabinet, some of the oldest Parliamentarians and publicists in France will be surprised. The slender and somewhat anomalous majority which supported the Government in last Friday's debate is certain to desert the Premier in a large part on the question of the expulsion of Abbe Delsor from Luneville, an affair which has been seized as a pretext to destroy Coombes. All the angry passions smouldering in France including the animosity raised by the Congregations Law on the one side, and the determination to stamp out clericalism on the other, will be loosed on the Palias Bourbon. Premier Coombes himself realizes that he has to make a fight for life. Friends of the aged Premier, however, say that he is ready to step out and make way for a moderate Cabinet that will be pledged to modify the measure which has nearly denuded France of ecclesiastics. Meantime the Nationalists who have cleverly mixed up the Alsatian question with the Delsor expulsion appeal to the Chauvinistic instincts of scores of deputies who otherwise might help to prolong the life of the Combes Ministry. In the corridors of the Chamber today there is a general impression that all is over but the formal spectacle of the Ministry's death.

FOUR-YEAR-OLD WRECKER

Vancouver, B.C. January 21—The Electric Railway people reported to the police on Saturday that some persons had maliciously placed stones between the rails at a switch and packed them with wet sand. The culprit was run to earth, and proved to be a four-year-old boy. The child had scattered dry sand over the top to prevent his work being detected. His work caused an accident. The wagon was smashed, one man hurt, one passenger badly shaken up and many frightened.

STATIONERY

When in need of anything in the line of commercial stationery, visiting cards, etc., leave your order at the Times job department. Workmanship unexcelled.

COL. HUGHES NOMINATED

He is Again Conservative Candidate in Victoria

A the Liberal Conservative convention in Lindsay on Wednesday Col. Sam Hughes captured the Conservative condidate to contest the united Riding of Victoria county at the coming general elections. The friends of Dr. Vrooman put up a stiff fight, and Dr. Wood, of Kirkfield had a good following, but the men from the north bore down all opposition.

Balloting began at four o'clock and the Colonel captured the required two-thirds majority on the first count.

A MASONIC TEMPLE

The Toronto Masons May Build a Temple

Toronto, January 22—The Freemasons of Toronto are considering the advisability of securing a site and erecting a Masonic Temple to serve as a home for the order in this city. The reason for this step is that they have been notified that when their present lease of the Masonic quarters in the Foresters Temple expires in four years the yearly rental will be raised from $2,000 to $4,000. The Masons will consider two propositions, the erection of a temple or the making of an arrangement for quarters in some large building.

A STRIKE IN TORONTO

The Toronto Bolt and Forging Company Closed Down

Toronto, January 22—About a week before Christmas the rolling mill of the Toronto Bolt and Forging Company, Ltd., Swansea was closed down for repairs. Late last week the tunnage men were notified that the mill would resume operations before the end of this week, but that they would have to accept a reduction of ten per cent. in wages. The men objected, held a meeting, and decided not to accept the lower scale. About 25 men are affected by the change, and 35 others, comprising laborers and boys are unemployed, owing to the strike.

The tunnage men work on a varied scale, each being paid a fixed sum per ton, according to the class of work in which he is engaged. The general run of prices is 25c to 85c per ton. The company officials say that they reduced wages because the manufacturers in the United States had lowered the pay of their tonnage hands by about 10 per cent., and the price of bar iron had dropped $6 to $8 per ton during the past three months.

ENNISMORE

Inaugural Meeting of the Municipal Council

The council elect of the township of Ennismore met in the town hall on Monday, January 11th, at eleven o'clock a. m. All made and subscribed to the statutory declaration of qualification and office. Minutes of previous meeting were read and signed. On motion of Messrs. Killen and Kennedy, by-law No. 299, authorizing the appointment of the following township officers, received the necessary readings and was passed and signed and sealed. J. F. Collins, clerk, M. F. Crough, treasurer; R. Cosgrove assessor, Dr. C. B. Coughlin, medical health officer, and a board of health, consisting of E. Corkery, reeve; J. F. Collins, clerk; David Guiry, three years; Eugene Murphy, two years; Patrick Twomey, etc., 1 year. On motion of Messrs. Killen and Cavanagh, the collector's time for collecting the taxes of 1903 was extended to the first of March, 1904. On motion of Messrs. Cavanagh and Kennedy the following orders were drawn on the treasurer for payment,—Thos Galvin, poll clerk, $2.00; David Crowley, burying nuisance, 50c; M. F. Crough, constable on election day, $1.50; L. O'Connor, wood, $1.00; Wm. D Cavanagh, work on road, $1.00; J. F. Collins, subscription to Municipal World, $1.00, reeve and council, one day's service, $10.00.

OTONABEE

Inaugural Meeting of the Township Council

At the inaugural meeting of the Otonabee council the following business was transacted:—Officers appointed, A. Stewart and Thos. Soucie, auditors, J. C. Hope, assessor, salary $60, W. Drummond, collector, salary, $70, Dr. McWilliams, medical health officer, John Dinwiddie and W. McAllister, sanitary inspectors, W. J. Porter, member of the local board of health. Councillors Fife and Porter appointed at the last meeting to investigate the claim of Wm. Clark for alleged damage to a horse going over the end of a culvert, while drawing a binder along the road, reported that they had examined the culvert and found it wide enough to drive a binder over, therefore would recommend that no damages be paid. On motion the report was received and recommendation was adopted. B. Pullybank made application to purchase some trees, said to be dead, on the road allowance opposite lot 21, Con. 12. The reeve was authorized to tell if the trees are dead. The clerk was instructed to send for one copy of the Municipal World. Jas. Bryce and R. J. McCamus were present and asked that some changes be made in the town hall so as to increase the seating capacity. The council agreed to the change and to pay seventy-five per cent. of the cost, the total cost not to exceed $250. D. H. Moore was appointed caretaker of the town hall vice R. B. McIntyre, resigned. A resolution was passed to the effect that 75c. would be accepted from any person in lieu of his performance of statute labor, but unless paid on or before the time fixed for doing the work, $1.00 would be charged on his taxes. The following accounts were passed—H. Beeson, gravel, $1.24, John Anderson, gravel, $1.44, Geo. Hall, repairing road, $1.00, S. T. Wedlock, repairing account, $3.35, R. M. Dennistoun, legal advice, $5.00; R. B. McIntyre, care of hall, $1.50. J. M Drummond, salary $2.00; balance of account, $5.50. The council adjourned till February 15th next.

A PLEDGE FOR CANDIDATES

Toronto, January 22—The executive of the Ontario branch of the Dominion Alliance has adopted a pledge which will be submitted to every candidate for the Legislature, binding him to support the temperance legislation to the full extent of the power of the province, irrespective of party alliance.

THE TRENT WATERS.

CONSERVATION MEETING HELD YESTERDAY

Government Action to be Secured if Possible—Deputation to Go to Ottawa

A largely attended meeting of those interested in the conservation of the waters of what is known as the Trent waters, was held yesterday in the council chamber. The president of the association, Mr. D. Gilmour, of Trenton, occupied the chair, and others present were: Messrs. J. M. Kilbourn, Lakefield; A. Payne, Warsaw; W. T. C. Boyd, Bobcaygeon; Jas. Drain, H. O. Fiske, E. G. Patterson, A. Macdonald, J. H. Larmouth, Peterborough; F. W. Fowlds, Hastings; Thomas Sadler, Lindsay, John Carnegie, Peterborough; Mayor Roger, Ald Mason, W. Henderson, R. M. Dennistoun, R. R. Hall, R. B. Rogers, D. Hughes-Charles, President of the Board of Trade; W. H. Moore, A. Stevenson, Secretary-Treasurer. The chairman explained the object of the meeting, amongst other things, to receive a report from the committee which had been appointed to wait upon the government at Toronto to see if some action could not be secured looking to the placing of the reservoirs in the back country under one control, or the adoption of some other plan that would cause a more perfect conservation of the waters in the north.

After reading the minutes Mr. Kilbourn reported verbally that the committee, consisting of Messrs. Boyd, Shook and himself had waited upon the government at Toronto, and found that they were willing to do anything in the public interests. They derived little revenue from the waters, and it was suggested that if the dams were given over, Mr. Walters the custodian of the same at Lindsay, employed by the Provincial Government he understood favored the project, and now that elections are coming on a sufficient effort should be made that would apprise the Dominion Government of what was going on. It was only by united effort that anything could be accomplished. The lower section of the canal should be completed as soon as possible and all candidates for the Commons should be pledged to push the matter as much as possible.

Mr. Gilmour considered the report satisfactory. He asked Mr. Rogers to give information with regard to the lakes.

OUR GREAT RESERVOIRS.

Mr. Rogers said that he had not had much time to prepare a report, but he had calculated the capacities of the great reservoirs to the north. On Gull Lake alone there were over one hundred lakes, which totalled up to 41,000 acres. Kaseshi Lake was a large one of 5,000 acres, Redstone 3,000 acres, Little Redstone 300 acres and there were several other large ones. On the Burnt River there were thirty lakes, making a total of 23,000 acres. On the Mississaga and Nogey's Creeks were also acres of large size. Jack's Creek, 4,103 acres, Crow River, fifteen lakes, 16,000 acres, Deer Bay Creek eighteen lakes, 26,000 acres; the larger lakes, Balsam, Cameron, Scugog, etc. 90,000 acres, Buckhorn, Chemong and Pigeon, 19,000 acres, making a total of 181,000 acres. Mr. Rogers stated his information was not detailed. He said that few people appreciated the resources of the north country in water power. The statement made by the president of the International Paper Company in reference to the reservoirs of New York was applicable here and that they were far more valuable than the gold mines of California, both of which had their distinct limits, while the water areas were perpetual.

In reply to Mr. Gilmour, he stated that he could prepare an estimate for damming one or two of the largest lakes in the north country, so that a deputation might have some information to lay before the government.

Mr. Kilbourn stated that if the government would only make an appropriation for the purpose, as a start, the particular dams to be built would not be of such primary importance. The rest would follow.

It was pointed out that the Dominion Government could take over the dams owned by the Ontario Government by order in Council, and that Premier Ross did not see the necessity of expenditure until it was seen whether or not the Dominion Government would take over the dams.

Moved by Mr. Carnegie, seconded by Mayor Roger,—That the Ontario and Dominion Governments be requested to make no further grants of lands on the waters pending the completion of a comprehensive scheme for the construction of such waters, or in the event of the making of such land grants, that they be made subject to the rights of either government to raise and maintain all adjacent waters as may be necessary for the purpose of such conservation.—Carried.

The secretary read an excellent paper prepared by the president, on the importance of canal navigation in the transportation problem, and, on motion of Mr. Carnegie, seconded by Mr. Kilbourn, the secretary was instructed to have the paper published.

Moved by Mayor Roger, seconded by Mr. E. G. Patterson,—That in view of the vast growing navigation and manufacturing interests dependent upon a regular flow of the waters tributary to the Trent River, which have suffered during the past summer for want of proper regulation, and in view of the fact that there now exists a number of abandoned and neglected dams, which, if regulated, might add materially to the existing water supply, that the Dominion Government be requested to take possession and control of all such dams, as may be wanted for the purpose of conserving of such waters and regulate the same for said purpose, and further that the government be urged to secure control of all dams or other strategic points essential to the establishment of a complete system of reservation and control of such waters.—Carried.

GOLD STAMPEDE IN YUKON

Vancouver, B.C., January 21—W. L. Whitney, wholesale merchant of Whitehorse, brings word to Vancouver that the new stampede to Boulder Creek, near White Horse, is still in an acute stage. A steady stream of sleighs is en route to the diggings, with tons of provisions for the summer. Ernest Johnson is cleaning up from 20 to 25 cents to the pan at a depth of six feet. He has not reached bed rock. Mr. Whitney claims this is richer than the richest claim in the Klondike.

EVERYBODY READS THE TIMES.

DON'T LIKE THE BRITISH

The Thibetans were Insolent to the British

Chumbi Valley of Sikkim, British India, January 22—The general staff of the British expedition to Thibet, accompanied by a mountain battery, has returned to Chumbi. They report that Colonel Younghusband, with two officers, visited the Thibetan camp at Coru, and met with an insolent reception. Up to the present there has been no hostile act on the part of the Thibetans.

THE VAST ICE GORGE

The Generators Badly Damaged at Niagara Falls

Niagara Falls, N. Y., January 22—An immense accumulation of ice weighing many tons, hanging on the cliff above the power House of the Niagara Falls Hydraulic Power and Manufacturing Company, broke away Monday, and fell upon the roof. Two steel trusses were broken and the ice and snow penetrated the power house, shutting down four of the immense generators. It will require two days to get them running again. The damage was considerable.

END OF REBELLION

The Revolutionists are Crippled in San Domingo

Cape Hautien, Hayti, January 22—General Jiminez, leader of the Dominican revolution, is very much crippled by the loss which his forces have sustained through the re-capture of Puerto Plata by President Morales. The troops of the President are now marching on Santiago de Los Caballeros, where it is believed, the decisive battle will take place. It is presumed that this engagement will be stubbornly fought on both sides.

DOUBLY BEREAVED

Mr. John Menogue of Chandos is Again Bereaved

The many friends in town of Mr. John Menogue member of the County Council from Chandos, will deeply sympathize with him and Mrs. Menogue in the death of their son John, who passed away on Monday last at the age of 17 years. This makes the second death in the family, Mr. Menogue having lost a child only a few weeks ago.

The lad was a particularly bright and loveable boy, and was very popular with all who knew him. He had been ailing for some months, and although everything that human skill could do was done to ward off the destroyer, it was in vain. The Times extends its heartfelt sympathy to the bereaved parents.

The Test of Respectability.

The New York "Evening Post" points out the fact that Carlyle's favorite definition of respectability, a "gigman," seems obsolete in the light of modern developments. In place of the old standard "he keeps a gig," we have substituted "he has a steam yacht." Most amusingly was this latter-day measure of wealth brought out in the letters from Paris of the promoter in search of an underwriter. Question arose as to the financial responsibility of one ready subscriber (apparently without ready cash), and the astute American applied himself to the task of rating the fellow. But how did he go to work? Did he go to the banks, the agencies, the Bourse? No, he simply observed the man's manner of life. When he discovered that the backward underwriter kept a yacht, his doubts were instantly relieved, and he cabled the joyful news to New York. Evidently, we say, in the lexicons of today we must look to see the entry: "Gigman; modern, yachtsman."

Privileged.

The Honorable Colonel William J. Bryan appears to believe that the constitutional provision regarding free speech was inserted for his especial benefit.

Fired.

"I understand Blankley was ejected from Jones's house, where he went to pay a visit."

"Yes, he was an old flame of Mrs. Jones, and Jones put him out."

Some Interesting Essays.

Perhaps nothing is more difficult than to say exactly what we mean. A teacher of composition in a private school who realized this, has lately been trying the experiment of making her pupils write anything they like about a given subject in a given time generally about five minutes; and some of the results have been most enlightening. One of the subjects was "Wind," for example, and here is one of the answers: "There are four winds, north, east, south and west; but sometimes two of these blow at the same time, and then we get a S.W. or N.E. wind." Another was at least topical: "Wind is an abominal element. It blows off people's hats and uproots trees But it is very useful for yacht races."

The subject "Jam" was equally inspiring, judging by the remarks written on it. "Jam is to be found in nearly every house," wrote someone; "and some people eat it at every meal. Some jams are sticky." We should rather like to hear of the jam that is not sticky. Another subject that provoked the same simple directness was "Ireland." More eloquent than the eloquence of a whole Gaelic league was the delightful sentence: "The Irish were conquered by the English in days of old, and have been annoyed about it ever since." We cannot help recalling after this a charming passage in a forgotten lesson book—"The Child's Guide to Knowledge"—relating to a thunderstorm. This is what it enjoined: "Pull down the blinds, draw your bed to the middle of the room, lie down, and commit yourself to God."

Is New Zealand British?

Queer points are raised from time to time in courts of law; for instance, one just seriously reserved for consideration by an Australian Judge of the Supreme Court, namely, whether New Zealand is legally a British possession. It sounds like a joke at the expense of that most ardent and energetic of Imperialists, "King Dick" Seddon. At the same time it is possible there may be something in the point. Although Captain Cook repeatedly urged upon the Imperial Government the colonization of New Zealand no practical step was taken until very late in the thirties, when it leaked out that the French were contemplating the annexation of the islands. It was a close race between a British and a French

JAPAN IS NOW READY FOR ALL EMERGENCIES

Russia Reported to be About to Give Way--France is Against Her.

London, Jan. 21—The correspondent of The Times at Tokio says preparations are proceeding for the issue of a short-time domestic loan. Meanwhile private subscriptions are pouring into the treasury. Little confidence is placed in the pacific reports coming from Europe. The Privy Council today adopted the draft of urgency ordinances relating to marine defences, the railways, the transportation of troops and the organization of the field postal service. The symptoms of growing unrest in the Corean provinces create anxiety in Japan.

RECONSTRUCTION IN COREA

London, Jan 21—The correspondent at Seoul says an Imperial decree announces the reconstruction of the Government, commencing today, the minor departments being entirely suppressed. The Government maintains a Mi-cawberlike attitude, but all is quiet here.

NEW ZEALANDERS BACK JAPAN.

London, Jan. 21—The Wellington correspondent of The Times says the Japanese Consul here is receiving numerous applications of New Zealanders to fight for Japan in case of war. The offers are being declined on the ground that Japan is confident she can protect the national interests without the assistance of outsiders.

RUSSIAN NAVAL MEN WANT WAR.

London, Jan 21—The correspondent of The Times at Vladivostock cables that among Russian naval men the war feeling is intense, but the public seems indifferent. The prospects of peace are improving. No military movements are being made here towards the south. The new railway under construction through Mongolia to Kiegian is reported to be stationary.

PETERBOROUGH II DEFEAT T. A. S.

LAST NIGHT IN BROCK STREET RINK BY A SCORE OF 3-1

In the first game between the T.A.S. and Peterborough II.'s in the Trent Valley League, the latter team won by a score of 3 to 1, the half time score being 2-1.

The match was witnessed by about 600 people, each team having about an equal number of supporters.

The game was keenly contested throughout as the score indicates, but was clean and free from roughness, as referee Jack Hynes, of Toronto, penalized freely for any infraction of the rules which no doubt kept the players in their places. The Peterborough team were a trifle the lighter. Their defence was strong, Glover at point and McPherson at cover were hard men to pass, and stopped many assaults made on the nets by the T.A.S forward line. Glover cleared well, McPherson's lifting being a feature of the game, but the forward line were very slow in following up. Lee played a very effective game; Cameron at centre worked hard and is a very strong player. Ernie Ford at left wing played a steady game and put in some well directed shots. Ranton on the right wing has lots of speed and shows signs of a very promising player. The forward line lacked combination work very little being indulged in. Ernie Wasson appeared in the nets and showed that he had not forgotten how guard the flags. He stopped some hot ones thrown at him.

The T.A.S. were better at breaking away and following up than their opponents. McCoy played in the nets and filled his position well. Meagher at point played his usual strong game, as did also Crowley at cover point, who figured in a number of good rushes up the ice. The forward line was a little off in shooting ability a great many shots going wide. Billy George showed up well and played a very brilliant game. Lynch Parnell and McGrath played a very steady game. Lynch was very prominent in the shooting line, but his shots mostly went wide.

The first game was scored by Peterborough II after 11 minutes play, Cameron locating the nets. During this period Lynch put a hot one into Wasson, who prevented a score. Ranton stopped a rush by Crowley; Meagher, of the T. A.S. and McPherson and Cameron of the Peterboroughs were each off for 1 minute.

In the second game the T.A.S began to push matters. Lynch made a rush and shot, but it was wide. The game was delayed for a few minutes on account of a broken skate of Wasson's. After about 12 minutes play in which honors were pretty evenly divided, Ford, Cameron and Ranton figured in a piece of nice combination with the result that Ranton landed on the nets making the score 2—0.

The T.A.S went at it hard, and after 4 minutes play Billy George had landed it in the nets. This ended the scoring in the first half.

In the last half it was see saw all the way only one goal being scored, Cameron doing the trick just a few minutes before time was up, making the score at the end of time 3—1.

The following was the line-up—

T.A.S.—Goal, McCoy; point, Meagher; cover-point, Crowley, forwards, Lynch, Parnell George, McGrath.

Peterborough—Goal, Wasson; point, Glover, cover-point, McPherson; forwards, Lee, Cameron, Ford, Ranton.

Goal umpires—McAuliffe, Bradburn, Timekeepers—Tom Turkett, J. McCabe

Referee—J. Hynes

—Belleville and Peterborough juniors play here tonight.

Chaucer Elliott will referee at Belleville tonight.

GIVES BOER LONG SENTENCE

Police Magistrate Sends Kruger's Nephew to Jail in Indiana

Lafayette, Ind., Jan. 22—Epke Holf de Wall who claims to be a nephew of Oom Paul Kruger, former president of the South African Republic, is serving a 30-day sentence in the Lafayette jail. He came here on a lecture tour in behalf of his countrymen. Being out of money, he appropriated $17 belonging to Joseph Riehle, a saloon-keeper. He was arrested in Frankfort, Ind., and when brought back confessed to the theft. He was then tried in the police court and given a jail sentence of 163 days on the charge of petit larceny.

Later Riehle filed a charge of "practicing medicine without a license" against the boer, De Wall having written a prescription for Riehle's uncle. De Wal was then given an additional sentence of thirty-seven days in the county jail.

De Wall is short and stout and 44 years of age. Born near Pretoria, his life has been full of romantic adventures. His mother, he says, was a sister of the wife of Paul Kruger. He refused to take the oath of allegiance to England and was exiled from his native land at the close of the boer war. He has been in this country since last June.

IN FIFTEEN GAOLS WITHOUT A CRIME

George Francis Train's Summary of his Life

New York, January 22—George Francis Train, who died on Monday at Mill's Hotel, number one, in Bleecker street, probably was one of the most picturesque figures in the history of America. Only a year ago, when he was then 74 years of age, he dictated the reminiscences of his extraordinary career and the result was published in book form. Summarized in his own curious fashion, this contained the following information about his life;

"Shipping clerk, sixteen years as manager eighteenth partner in Train and Company, twenty with an income of $10,000. Established firm, George Francis Train and Company, Melbourne, Australia, 1443; agent, White Star line, income $90,000. Started forty clippers to California in 1849. Built railroad connecting Erie with Ohio and Mississippi.

"Pioneered the first street railway in Europe, America, Australia and England. Built first Pacific railway, 1862-1869 through credit mobilier. Owned 5,000 lots on Omaha, worth $8,000,000. Been in fifteen gaols without a crime."

THE YELLOW PERIL.

Australia Strongly Opposes Chinese Labor

Melbourne, Victoria, January 22—The Federal Premier, Alfred Deakin, after a conference with the Premier of New Zealand R. J. Seddon, has cabled to the authorities at Pretoria to the effect that Australia, after an experience of years, is convinced that the prohibition of Chinese labor is imperative in British communities expecting to enjoy responsible self-government. Premier Deakin added that he was reluctant to interfere outside of Australia, but the Federal Ministry was compelled to express deep apprehension as to the results of the introduction of Chinese labor into the Transvaal.

KEENE.

—Mr. Jas McCarthy, of Aurora, spent a few days in the village last week.

—Mr. M. Kenneally spent a couple of days with friends in town last week.

—We are sorry to learn that Harry Elmhirst is still very ill with appendicitis, and hope he will soon recover.

—Mr. J. Kane, who has been in the lumber camps since last spring arrived home on Saturday.

—Mr. F. Walsh who has been at Powassan as G.T.R. operator, for sometime, is home.

—Miss Willena Miller, is, we are pleased to report, convalescent, after a severe attack of pneumonia.

—Mr. C. Bell shipped a large number of hogs to the Matthews Co. on Wednesday.

—The management of the rink have installed six new gasoline lamps. They were much needed, as the hockey players always complained of lack of light.

—The Curling Rink Co. hold their first Carnival on Friday evening, when liberal prizes will be given for the best costumes for ladies, gentlemen and children.

—The hockey match between Keene and the T.A.S came off on Friday evening last as advertised, and the large crowd who attended pronounced it one of the best of the season. The score at the finish was 3—6 in favor of Keene.

—Two rinks of local curlers went to Peterborough on Tuesday to play for the district cup. They defeated Norwood and the Peterborough Thistles on Tuesday, but met defeat from Lakefield on Wednesday morning.

INDIAN RIVER.

—Mr. Frank Devlin, who had his hand badly cut in the shanty a few days ago, is in St. Joseph's Hospital at present, and it is hoped he will soon be able to come home.

—Mr. Wm. Crough, of Ennismore, is visiting at Mr. M. Fitzgerald's.

—The Indian River grain market is doing a rushing business. Oats is the principal grain, bringing 30 cents per bushel.

—Miss Hannah Fraser, of Peterborough, is visiting at James Devlin's.

—A number of our sports went down to see the hockey match in Keene, between T.A.S. and Keene. It was exciting at times, but Keene was determined to trim the boys from Peterborough.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases In Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month, and to outside points at $3 per year strictly in advance.

PETERBOROUGH, JANUARY 22, 1904

DISTRICT NEWS

INDIAN RIVER.

—Mr. Frank Devlin, who had his hand badly cut in the shanty a few days ago, is in St. Joseph's Hospital at present, and it is hoped he will soon be able to come home.

—Mr. Andrew Quinlan was the guest of F. B. Marquis on Sunday last.

—Mr. Wm. Crough, of Ennismore, is visiting at Mr. M. Fitzgerald's.

—The Indian River grain market is doing a rushing business. Oats is the principal grain, bringing 30 cents per bushel.

—Miss Hannah Fraser, of Peterborough, is visiting at James Devlin's.

—A number of our sports went down to see the hockey match in Keene, between T.A.S. and Keene. It was exciting at times, but Keene was determined to trim the boys from Peterborough.

APSLEY.

—About four feet of snow and extremely cold weather. The roads are badly drifted in places, but Mike gets here on time. Several barns have collapsed with the weight of snow. Jimmy has had his rebuilt and found all the dogs and fowl that were buried under the roof, alive, but hungry.

—Jimmy gave the young people a dance at his residence in Burleigh last week, and says, "Now, what's the matter with me running for Reeve next time? Sure, eh?—

—Mr. Finlay, of Norwood, Liberal candidate, accompanied by Mr. Calander, paid us a flying visit last week, meeting a large number of the electors and left a good impression. His chances are good for a large majority at the polls here.

—To-night, 15th inst., the thermometer registers 31 below zero at 10.30. Pretty cold, but I guess we can stand it.

—Colds and sore throats are the general complaints.

—We are pleased to hear that Miss Emma Clegg is recovering from her long illness.

—It is with deep regret we have to chronicle the death of John Minorgan, son of our esteemed County Councillor, who passed away on Monday last at the early age of 17 years. He had been ailing for the past six months. This is the second death in Mr. Minorgan's family in the past few weeks, their youngest, aged 4 months, having died about two weeks ago. Mr. Minorgan has the sincere sympathy of the entire neighborhood in his sad affliction.

Mostly Men.

The writer, a Manitoban, and an Anglo-Indian bound for Penang were seated in the smoking parlor of a Canadian Pacific Pullman car. The Manitoban was a cheery optimist; the Anglo-Indian a pessimist with a liver, who said he believed Canada's future lay with the United States. This my Manitoban resented, and when the Anglo-Indian ended a remark with a pious hope that Manitoba might some day be a desirable country, in spite of her severe winter, my Manitoban did not try to conceal his contempt.

"Huh!" he ejaculated. "I tell you, it's pretty prosperous right now, sir, winters and all, and don't you forget it. A fur coat's a lot cheaper than malarial fever anyway." (The Malay peninsula had been described.)

"Oh, yes! it's prosperous enough I dare say," replied the Anglo-Indian disdainfully; "but really when you talk of the Canadian North-West supplying the British wheat market . . . ." and he shook his head pityingly.

"See here," said my Manitoban, "how much wheat did Great Britain import in 1902, anyway?"

The Anglo-Indian shook his head again. "Really," he began, "I'm not able to state offhand——"

"Well, I am," interrupted the other. "Great Britain imported in 1902 one hundred and fifty-one million bushels of wheat. In 1902 Manitoba's crop of all grains was one hundred million bushels, and the total wheat crop was fifty-three million bushels."

"And how much of that fifty-three million bushels found its way to England?" asked the Anglo-Indian sarcastically.

"That's all right," nodded the Manitoban; "little enough, maybe. But I'm coming to that. During the year ending June 30, 1902, the whole Dominion exported to Great Britain twenty-five and one-quarter million bushels of wheat and three-quarters of a million barrels of flour out of a total export of twenty-six million bushels and one million barrels. Now, sir, that fifty three million bushels was raised on two million acres of land. By 1910 Manitoba may have six million acres of land under wheat cultivation—the land is there all right—and similar conditions to 1902 would mean a crop of one hundred and fifty nine million bushels, or the total consumption of wheat in Great Britain for last year. And take notice, please, I am not saying a word about the millions of acres of rich soil in the North-West Territories awaiting colonization."

"Why is there so much unoccupied land in Manitoba?" I asked, watching the Anglo-Indian ponder on the figures quoted as I spoke. "Are they 'free' lands?"

"No, sir," replied the Manitoban; "you bet most all the free land that's any good has been taken up in Manitoba. The railways, the land companies, syndicates, private individuals, own thousands of acres of land in Manitoba, and they are selling them every day, cheap, too."

"What do you call cheap?" asked the Anglo-Indian.

"Ten dollars to twenty dollars, £2 to £4 per acre," replied the other. "Why, land which is not nearly so productive in Ontario sells from $40 to $60 per acre. The West is still supposed to be 'wild,' I guess," and he laughed merrily. "Last year the official average of wheat per acre in Manitoba was given at 20 bushels. Take an average price of 60 cents per bushel, and you have a gross return of $12 per acre. Farming by figures is easy—and delusive—so let's cut this return in half (and that provides for every contingency except annihilation) and you have a gross return of $7.50 per acre, which leaves a profit, after expenses, sufficient to warrant the price of good lands going to $50 per acre within a year or two."

"And what is the reverse side of this picture?" asked the Anglo-Indian, interested in spite of himself.

"Oh, that's there all right," laughed the Manitoban. "We've had bad crops, frozen crops, dry seasons. We get a six months' winter, which is gen—u—ine winter, all right. In the early days we had to team our wheat twenty-five to fifty miles to market, and that was no picnic when the thermometer was at 40 degrees below zero. Then the mosquitoes in summer, they worry a tenderfoot some, and . . . . oh, dang it! that's about all, I reckon. But still," and he waved his hand out towards the darkness, "I tell you, sirs, it's a fine country, whether it's yellow with ripening wheat or white under the bright winter stars. Its men are mostly men—those who count are—and its women know how to make a farmhouse on the prairie a pretty good place for a fellow to get home to. It's a clean, healthy life, gentlemen, and a man keeps young on the prairie a long time after he has passed the 50-mark.

"We're a long way from the center of things up here, I guess, and maybe we are a bit rough, but that doesn't count. I've often watched the twilight steal along so gently it's like a dream, and the Northern Lights shoot across the sky like a mist of flame. And it's good to smell the spring rains when they start the old earth into greenness, and to hear the houk! houk! of the geese overhead, saying they are pleased to get home to the Northland again. You bet, gentlemen, it's a good country to live in and work in, and I guess it's all right to sleep in when the work is well done. Here's my station, and I'll bid you good-night, and I hope I haven't tired you with my talk."

And the Manitoban stepped off the car as we pulled up at a station.

The moving train had resumed its steady thud! thud! thud! before the Anglo-Indian spoke.

"The Canadian Government mayn't know of him," he said, "but that man is the best sort of emigration agent they have got." He rose and yawned. "I think I'll turn in," he said. "Good-night."

But I sat and smoked for a while, thinking of the Manitoban and the life he had sketched. And the train rushed steadily forward through the night, and I thought of the unseen end as yet untilled prairie stretching to the horizon on either hand, and tried to imagine its broad acres peopled with "men who were mostly men."—H. T. Munn in "Outlook."

The Prodigal.

I bought my laughter with the coin of grief,
I paid for happiness as kings might do.
Yet, though I beggared me beyond relief,
Oh heart, the glad, mad spendthrift hours we knew!

—Theodosia Garrison in "Harper's Bazar."

GOLD STAMPEDE IN YUKON

Vancouver, B.C., January 21— W. L. Whitney, wholesale merchant of Whitehorse, brings word to Vancouver that the new stampede to Boulder Creek, near White Horse, is still in an acute stage. A steady stream of sleighs is en route to the diggings, with tons of provisions for the summer. Ernest Johnson is cleaning up from 30 to 35 cents to the pan at a depth of six feet. He has not reached bed rock. Mr. Whitney claims this is richer than the richest claim in the Klondike.

Ayer's Cherry Pectoral for the children. One dose at bedtime quiets their night coughs and prevents croup. Ask your doctor. J. C. Ayer Co., Lowell, Mass.

Devonshire Cream.

What is known as Devonshire cream is a species of pasteurized cream and is made as follows :—

"The milk must be taken direct from the cow and strained into the pans in the usual way. It should set in a cool dairy, and I believe for want of this cool apartment many a good housewife has failed to turn out the genuine article. Good, sound pans must be used, as they have to bear constant heating. There is an objectionable plan in some establishments of leaving the milk in the sheds for a time after it is drawn from the cow. Clotted cream made from such milk will not turn out a good flavor, as there is sure to have been more or less tainting of milk while standing about. Just now many Devonians milk out in the open field, and if the cows are quiet the plan has its advantages, for there is no tainting of milk there.

"This requires the most care; indeed, there is nothing else in the whole process but a mere tyro could manage. As soon as the milk is cold, or, say, about nine or twelve hours after brought from the cow, the pans are lifted to the fire. In big dairies there are what are known as Devonshire stoves especially made for the purpose. The stoves so made, heat water in which a number of pans may be set so as to scald a quantity of milk with little trouble. In smaller dairies the kitchen range does duty, the pans of milk being set in vessels of boiling water, or the pans may be set on a heated range. In any case, the object is to scald the milk, and to do it promptly and exactly. It should reach such a temperature that causes a little movement on the surface—a very slight simmer suffices; then it may be removed back to the dairy to get cold. When cold, the cream is taken off at convenience, and that is clotted cream, which is rightly, so highly esteemed. In cold weather the milk is all the better left for twenty-four hours or even thirty-six, before scalded."—Hoard's Dairyman.

Strawberry Cure for Rheumatism.

"The strawberry cure for rheumatism is the latest fad I have heard of," said a druggist. "This cure has, too, some reason and some fact behind it. Linnaeus, the great naturalist, cured himself of rheumatism with strawberries, and it has recently been proved that strawberries contain salicylic acid, which is the rheumatism remedy that all physicians use. Linnaeus, I understand, was very poor and very rash. In studying nature he would go out in all weathers, and it is said that he would often sleep all night in wet clothes. Consequently, rheumatism developed in him. He cured this disease by eating several quarts of strawberries a day. His biographers narrate the story, and in that way the fruit's popularity as a rheumatic specific was achieved. Lately, on account of the discovery of salicylic acid in strawberries, this popularity has increased. I know a great many rheumatic persons who are eating strawberries three times a day, with great benefit to their heath. Salicylic acid, the rheumatic specific, is used also to keep milk fresh and to preserve meat."—Philadelphia Record.

The size of the seed for potatoes influences the yield. In England whole potatoes are used almost in every section, and successful growers in the United States use seed potatoes cut in half, never cutting to smaller sizes. Deep ploughing, deep planting and level culture give better results than hilling. A single plant in a place gives the largest tubers, but not so many as when two or more plants are together.

A MISER'S END

Died in Wretchedness while Worth $20,000

New York, January 21.—Mrs. Ellen Cunningham, 60 years old, No. 32 First street, who died in Christ Hospital, Jersey City, of complicated diseases, had lived a recluse, apparently very poor, says the American. She had refused to have a physician, saying she could not pay. Bank books showing deposits to her credit, aggregating $20,000 have been found in her rooms, and are in the custody of the surrogate. The authorities have not found any relative and the neighbors know of none.

A Woman's Friend

It's Because Ferrozone Brings Good Health That It Brings Good Looks and is Counted an Invaluable Friend by Millions of Women on this Account

Many women look old and lose their beauty, not through age, but through disease, ill health and suffering.

If you don't feel your best, of course you won't look your best and as long as your blood remains impure, your nerves unsteady, don't expect to feel tip-top.

If you have no Appetite, poor digestion, are bilious and constipated, your skin will be sallow and pimply with an unnatural pallor about the cheeks.

Women without number who have suffered the mortifications of this run down condition, have made themselves healthy and well by taking Ferrozone. It is a wonderful remedy for the blood and nerves, and brings good looks because it brings good health.

Take Ferrozone for your beauty. It is a wonderful restorative, and strengthener for weak women, purifies and enriches the blood, and sends it circulating to all parts of the body. Thus it builds up muscle and tissue, puts on fat and makes the action of the heart regular and strong.

Nothing can possibly do you so much lasting good as Ferrozone. It will enable you to get through life with pleasure and assurance, free from sickness and worry. We are quite sure you need Ferrozone, and know it will [illegible] N. C. Polson & Co., [illegible]

PULLING UP STAKES

IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.46.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

MEN'S SUIT SLAUGHTER

Men's Black and Blue Worsted Serge Suits, Regular $10.00, for	$5.75

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

lems, you have mistaken Christ's work on earth and made Calvary only a tragedy instead of the atonement for sin.

"I have declared that Christ would belong to a labor union, and I will belong to yours, if you will have me, and help you all I can."

Henry and Richard started applause, but it did not reach a wave, only a ripple.

Mr. Dowling continued:

"But Christ would make His sacrifice for sin the foundation of all salvation for society. He was not only an example. He was infinitely more. I am going to deal with social questions and your wrongs, but I must begin always at the Cross. If you think it otherwise, you have mistaken my sacred mission and the relation of salvation here to salvation hereafter. Another thing I want you to know about me and my ministry. I do not fear any man on earth, and I am not catering to any individual or any class. Your position is upon the outside, and many of you do not hear the sermons, and you cannot pass right judgment. At least, do not make wholesale condemnations. Many ministers are sacrificing everything for truth's sake, and have even given up pulpits and salaries and friends and all. They are ready to stand by you, if you will only stand by them. Here is one of them, anyway! My last drop of blood is yours, and out it goes in your cause for right. My church is open to you, other churches are anxious for you. The best place is yours. If it is not, I will resign my pulpit to-morrow. I wish we could form some mutual understanding—some better relation. I wish you had honorary members, or some class to which I could belong. I stand for Christ, and I would like to be in your organization. I would like to have every one of you in the Church, and there are more workingmen in the Church than statistics represent and pessimists believe. Most of you are right near its doors.

"Now, let me ask a vital question about yourselves.

"Suppose Christ was a member of this union. Would everything in it be just as it is to-night? Would not some of the plans be changed? Would not the Golden Rule be the motto? Would not the Sermon on the Mount enter into all your relations with other men? You could not have Christ in here without having His spirit and example. I am sure some speeches would not be made, and some hasty actions would not be taken. Our employers would be treated as we ask them to treat us, with fairness and justice and sympathy. I do not say there would not be a strike, but every possible means to prevent it would be first exhausted. We would recognize duty and obligation and fidelity, and the other side as well as our own. Bitterness, and anger, and malice, and envy, and vengeance would not enter into our discussion or our actions.

"Also, if Christ would belong to your union, and help your cause, you ought to belong to His Church and help His cause, out of which the union and every other righteous institution grew. If the Church is not just as it should be, help Christ make it after His pattern. You cannot separate Christ and the Church. He said it was His body, and some wicked distinctions have been made by men, who said they represented your cause, but misrepresented it. They have even said to me that there has been a hiss heard at the mention of the Church. How the heart of the Saviour must be grieved at that! It is His institution as the channel of salvation to the world. Help it; support it; do not stand outside of it. Do not claim it has purely a social function. Hear Christ say that you cannot save society without first saving the individual. 'Ye must be born again,' is the cry of the Church, and in that cry is the keynote of the regeneration of society and the salvation of the cause of labor. There is not too much philanthropy or too much reform in the world, and the Church is not too much interested in that. It is not enough interested in that, but it has a distinctively spiritual mission, and first things must be kept first, or less will be done than is now being accomplished.

"One of the fallacies of this day is that all people need is a change of environment, and they will be good. The whole Gospel is against this, and teaches that the soul right with God first changes external conditions, and, however much I might wish to do for any labor, or benevolent, or philanthropic organization, I must not compare them with the Church or neglect the first work of the Church for them.

"Jesus died to save a man who was immortal and eternal. That means that He would do all He could for that man's welfare by association with your effort in the union or anywhere, and so will I.

"It is not a false position in which I place Christ, when I bring him into a labor union, or else I am wrong in being here now, and every man of you is out of his place. But I am simply trying to keep Christ's death and life right before the world. Ask of me as His representative anything that I can do for your benefit, and I will do it. I promise you my best co-operation and my deepest sympathy. I wish I might shake hands with every one of you on that promise."

Just as he was about to sit down, Henry Fielding arose and said:

"Here is one man who would like shake hands with you, Mr. Dowling, and I wish you would stay where you are until we have all had the opportunity."

David Dowling looked confused, but Henry was in front of him in a moment, and following them nearly every man in the room passed by him to grasp his hand.

Then the chairman said:

"I don't see any reason why this union could not have honorary member, or some plan by which such a friends of ours and our cause as Rev. Dowling could be one of our number. I shall propose that change in our constitution at the next meeting."

The statement was greeted with the heartiest applause, and one of the most important meetings ever held in a union came to its conclusion.

Who can say that it was not an epoch-making time in the cause of the workingman.

CHAPTER VIII.

In The Homes of The Poor.

After the service on Sunday morning, almost every one had passed out of the church. There were a few scattered groups of two and three still talking.

Near the door stood Henry Fielding, waiting for his opportunity to speak to Mr. Dowling.

In the other corner, Elsie and Grace were making some plans for their missionary work during the coming week.

Henry had been spoken to and welcomed as usual by several of the congregation, but now he was alone. He did not feel strange in a church, nor was he in any special hurry to get away.

As soon as Mr. Dowling was at liberty, Henry walked up in front of the pulpit where he stood, and received a hand grasp, which was only the sign of deepest affection.

Immediately some one else was in their presence.

Elsie and Grace had received a sudden impulse to ask Mr. Dowling and Henry to go with them the next evening, and visit some of the homes and see the needs in the poorest district of the city.

The invitation was met with almost immediate acceptance when the discovery was made that the evening was free from other engagements.

David Dowling would not have been so willing a few weeks or months previous.

A great change had come into his life, and now his heart carried a deep desire to help the poor and the oppressed and to serve his fellow-men without regard to their station in life.

(To be continued.)

Coupling the Flock.

J. A. McDonald, Hermonville, P. E. I., writes:—The season is near when the ewes must be coupled if full profit is to be made from the flock. The early lamb is worth twice as much as the late one, and is more safely reared. Thus the choice of the ram and its introduction to the flock is a timely matter for consideration at the present moment. As to breed, it does not matter very much, unless this is a main point in keeping the sheep. If the flock is pure bred, of course, the breed is to be kept up, but even then it is good policy always to get a ram from another flock than from your own. This is an axiom which pertains to all classes of live stock—that is, get a pure bred male from some other flock or herd once every two years, and, if circumstances permit, get an imported male rather than a home-bred one. The ordinary farmer breeder will not, however, probably need to get an imported animal. He can get something good enough from those who make a business of supplying first-class males for breeding purposes. Close breeding is more disastrous to sheep than to cattle or hogs.

The best results are obtained by choosing a sound, well-formed, vigorous animal, rather than a bigger one without these qualities. This is an axiom which also works with other classes of live stock besides sheep.

The fleece is to be studied, for the lambs will take after the ram in respect to wool mostly, if the animal is from a good flock. Choose a well-formed, solid-bodied ram, with short legs and small, well-shaped head. The age of the ram is of great importance, for upon this to a very great extent will depend the sex of the forthcoming lambs.

There are many supposed laws of breeding. One of them is a wise provision of nature for the preservation of the species. When any race is in danger of extermination for any cause this law will operate to secure the extension of its existence in some way. When food is abundant and the race is vigorous we expect it to increase most rapidly. Then the younger males, active and full of energy, monopolize the females and drive off the old males. The result is a much greater proportion of female births than of male, even to the extent of three to one. On the other hand, ewes served by an old ram produce an equal proportion of male births. The breeder, then, who wants his flock to increase will choose young, vigorous rams, and will feed the flock liberally, so as to preserve the conditions suitable for rapid increase of the stock. The breeder, on the other hand, who makes his profit from young rams which he sells, will follow the opposite course, and so increase his income from a surplus of those to be disposed of.

Probably the months of March and April will be the periods when most people want the lambs to come, while there are not a few in the north and east who consider May early enough. This is a matter, of course, for individual consideration. The period of gestation in the ewe is five months. November coupling, therefore, means April lambs; December, May lambs, etc.

Good feeding of both ewes and ram from this time on is a desideratum, and the presence in the flock of a sturdy young ram, under two years of age. It is essential that he be well grown and matured. A ram eight months old may be used, if it be growthy and vigorous; but one twice as old is greatly to be preferred.

Feed oats and wheat bran in preference to corn, for nitrogeneous food will be the best stimulant for the ewes, and there is no grain that so stimulates the sexual system as oats. Fat is not desirable at the breeding season. The aim should be in both ram and ewes to get flesh and a strong nervous condition. The ewes should receive a half pint of oats and the same of bran every day from now on, while a pint of whole oats and as much bran a day will not be too much for a vigorous young ram. If the ewes are not in breeding condition, on account of neglect or poor pasture, or undue exposure, one or two grains of cantharides given to the ewes will usually bring them into condition for prompt breeding, provided it is observed they are lax in this respect. With intelligent feeding, largely of oats, it will seldom be necessary to resort to drugs. But the breeder of pure bred sheep who may want his lambs to come promptly on time, to sell for early breeders next fall, or for show purposes, or those in the winter lamb business, occasionally find it necessary to resort to drugs. Plenty of good, sound oats, however, are the best thing I know of to stimulate tardy breeding of not only sheep, but all other of the domestic animals on the farm.—New York Tribune Farmer.

IT IS A PRODUCT

OF THE

WEALTHY WEST

"The Cracker Jack"

This is a year of plenty; It is a year that will go down in history as the beginning of a New Era. The WEST is the center of Tangible Wealth. It is proving the ONE means of salvation for the East

The Eastern markets are dull and the Western markets are active. There is more Money in the West than there has been before. Bank clearings show an increase savings accounts are over Two Billion Dollars. The crops have been greater than during any previous year in our "Fat" seven.

It is HIGH TIME NOW to put your money where the fluctuations incident to trade conditions and conditions that will be caused by the coming presidential year will not affect it.

Seek SAFETY for the time being; and liberal remuneration for the future.

Put your money where it will be secure and where it will be active.

Put it beyond the cavil and caprice of the human agencies behind the money markets,

Put it where it will produce a commodity of prime importance.

In other words, **Put your money in Cracker Jack Consolidated Gold Mines Company's Treasury Stock.**

THE

CRACKER JACK PROPOSITION

BOILED DOWN

The Cracker Jack is a mining property in the Cracker Creek District, Baker County, Oregon.

It is the adjacent Northern Neighbor of the Cracker-Oregon, the adjacent Eastern Neighbor of the North Pole, and the Northeast Neighbor of the Eureka and Excelsior.

It contains the continuation of the Cracker-Oregon veins and a split from the E. & E.

It has 120 acres of mineral land.

It has sufficient timber for all mining purposes.

Tunnels are being driven to the veins and ore bodies have already been uncovered.

Work will be continued all winter.

Stock is selling at one-fourth of par.

As soon as the large vein has been crosscut, stock will be worth at least par.

The company looks for this to occur at an early date.

The men behind this proposition have brought out three successful mines and **no Failures.**

Investigation will prove the real worth of this enterprise.

BUY CRACKER JACK STOCK AS A

Five Year Endowment

If you should die, you will leave an asset that will do what no Life Insurance can do. It will increase in value.

It will have marketable worth.

Your neighbor will give you cash on it; whereas he could not and would not attempt to cash an insurance policy.

Better than all, you don't have to die to win; you don't have to wait twenty years to win; you don't have to pay installments for life.

You don't have to pass a physical examination.

True of any stock, you ask?

In a degree but then—there is but one Cracker Jack. It is the culmination of experience and search on the part of men who have brought out three good gold mines

They have proclaimed it BEST only after careful search, comparisons and tests.

Experience and records count!

This is not a bargain counter offering. You can't come in and carry your purchase back in your arms. You have to wait a while—and what you will get will be worth waiting for.

Don't dodge the issue. Don't fret and think this is a catch-penny scheme Go to a reliable mercantile agency and pay for information about LEE S. OVITT and the men back of this company. Abide by their word. They make a business of rendering commercial reports. They are cool and calculating. They can't afford to be misled. They are as rigid as the Government in matters of business.

There is no sentiment about this. It is open, fair and the company is trying to meet you half way.

You have some money Perhaps you think it wise to speculate. Look at the market and beware. Maybe you think railroad stock is good; but do you think that the Powers in Wall street will spare YOU when their war is on? And is it not on in nearly every listed security in this country?

Buying a home is nice; it is commendable. But interest counts up. You don't pay any interest here. You put your money to work. It will be kept at work and the result will be profits.

We are not forecasting dividends. That would be to mislead you We know that there will be dividends; greater and better than in any industrial in the land—no company excepted.

Just Think and then Act

IS THERE CERTAINTY IN MINING

The Idaho Richmond Gold Mines Company says Yes

·AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.

2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.

3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.

4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.

5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.

6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.

7th—By being able to lease a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter of gift stock and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances on Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, and a fine mill. A 70 foot shaft on the Marathon claim shows a vein of $39.52 ore 6 feet across, the vein is in true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $39.52 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay then $240 in monthly dividends. The price of this stock will be $1.00 in less than one year. This is the best investment we ever handled or saw. For prospectus and particulars address,

W. D. WALRATH,

NOTTINGHAM BUILDING, SYRACUSE, N.Y.

PETERBOROUGH BROKERAGE CO., Local Fiscal Agents, Peterborough

Anecdotal.

An old Scotchwoman when advised by her minister to take snuff to keep herself awake during the sermon, replied: "Why dinna ye put the snuff in the sermon mon?"

A well known landscape painter was busy "dashing in" the colors of a sunset in the country. The tints were hurriedly conveyed from tube to palette, and from palette to canvas, for the artist was anxious to catch the effect. A rustic standing by observed the operation for a little while, and then remarked: "Ah, you be a-painting two pictures at once That's clever." He paused a moment, and blurted out: "I like that picture best—the one you've got your thumb through!"

According to the "Scottish American," the following was overheard in a London railway refreshment room: An Aberdeen man, noting a woman eating an ice said to the waiter: "Hi, man, gi'e me yin o' thae." Being supplied, he took a spoonful, and made a wry face. "I'm dootin' it's a bit frost-bitten, mister," said he. "Oh, no, sir," remarked the waiter. "It's all ice." "Gosh! Do they eat ice in London?" asked the wondering Aberdonian. "Man, we slide an' skate on't in Aberdeen!"

The quickness and felicity of Hon William M. Evarts in the line of repartee is pleasantly illustrated anew by President Timothy Dwight in the following story from "Memories of Yale Life and Men:" On one occasion, writes President Dwight, at one of our Yale commencement dinners. I had the duty, as the presiding officer, of introducing the speakers. In performing this duty with reference to Mr. Evarts, I said, in allusion to the well-known length of his sentences in public address: "Mr. Evarts will now give us a single sentence." He rose and instantly replied: "It will be a life sentence."

An instructor at Cornell University who was one of Dr. Goldwin Smith's pupils when the latter was a professor there, says: "Dr. Smith was describing to us one morning the difficulty of making young men understand things quite unfamiliar to them. He said there was once a blind youth to whom he tried for a long time to explain the nature of light. He made this subject of light as clear as he could; it seemed to him that he had explained it perfectly, but at the end the young blind man said: 'Then I am to understand, sir, am I not, that light is composed of very much the same material as sugar?'"

It is told of a United States ambassador, freshly arrived at St. Petersburg, his wife reluctantly left in America because of an expected addition to the family—that when asked in public audience, "And how are things at home?" (the Czar meaning, of course, affairs of state), he replied: 'Oh, I have just received a telegram that it is a girl." When the other ambassadors giggled he looked foolish, and believing that his mistake consisted in not asking in return after the health of the Czarina, who at the moment was also the more beloved because a child was expected, ran after his Majesty, and, throwing a hand familiarly upon his shoulder, asked, "And your wife—is it a girl or a boy?"

When Bill Nye one day happened on the modest sign of the late Major Pond the lecturer manager, in a window of the Everett House, in New York, he said to a friend who accompanied him: "Here's the man that incites the lecturers; let's go in and see if we can't induce him to lead a better life." Entering Nye removed his hat and ran his hand over the hairless expanse of his head and, after staring about for a moment said: "This is Major Pond, I believe." "Yes, sir. What can I do for you?" answered the major. "I want to get a job on the platform," returned Nye. "Ah—yes," said the major, slowly. "Have you had experience?" "Well, I've been before the public for a couple of years." "Yes. May I ask in what capacity?" "I've been with Barnum. Sat concealed in the bottom of a cabinet and exhibited my head as the largest ostrich egg in captivity."

Justin McCarthy says that Thackeray often created quite erroneous impressions of himself by indulging in irony in the presence of people who were incapable of understanding it. One curious instance which he gives is this: "Thackeray had been dining at the 'Garrick,' and was talking in the smoking-room after dinner with various club acquaintances. One of them happening to have left his cigar-case at home, Thackeray, though disliking the man, who was a notorious tuft-hunter, good-naturedly offered him one of his cigars. The man accepted the cigar, but, not finding it to his liking had the bad taste to say to Thackeray, 'I say, Thackeray, you won't mind my saying I don't think much of this cigar.' Thackeray, no doubt irritated at the man's ungraciousness, and bearing in mind his tuft-hunting predilections quietly responded, 'You ought to, my good fellow, for it was given me by a lord.' Instead, however, of detecting the irony, the dolt immediately attributed the remark to snobbishness on Thackeray's part, and to the end of his days went about declaring 'that Thackeray had boasted that he had been given a cigar by a lord!'"

Rudyard Kipling once visited the late Cecil Rhodes at Lekkerwijn, one of his fruit farms at Paarl, South Africa. One morning Rhodes went round his farm before breakfast, leaving his guest, who was not so energetic behind. Time went on, and Rhodes did not appear. Hunger soon roused Kipling to action, and in a short while he was very busy on his own account. As Rhodes returned he found his trees bearing a new kind of fruit in the shape of placards, inscribed in huge black letters with "Famine!" "We are starving!" "Feed us!" etc. On reaching the front door he was confronted with the following, in still larger type: "For the Human Race Breakfast tones the mind, invigorates the body. It has sustained thousands; it will sustain you. See that you get it." Then in the house, on every available wall, he came across other mysterious placards, in more and more pathetic appeal: "Why die when a little breakfast prolongs life?" Larger and larger grew the type: "It is late, it is still later," leading at last into the little breakfast-room, where he found Kipling reading his paper in peaceful innocence, but very hungry. It did not need much ingenuity to guess the author of these broadsides.

To Shakespeare.

They say you are immortal;
  They say it with reason,
For still you endure
  Though you're murdered each season
          —Washington "Star."

Explained.

Hostess—Of course the dinner is given for Miss Purdy, but I can't let you take her in because you never will take the trouble to be agreeable except for a pretty woman.

Reggy Westend—Whom do I take in, then?

Hostess—Mrs. Farris.

Reggy Westend—But she's uglier than Miss Purdy.

Hostess—I know that, but she's married and used to being neglected.

JAPANESE EXPECT HELP

Rely on the Friendship of England and America

DO NOT FEAR INVASION

Has Little Fear of Invasion by Armies of the Czar

Tokio, Jan. 21—Japan does not expect Russia's rejoinder for at least a week. In the meantime the nation is prepared for war and grimly reconciled. Political and other distinctions have disappeared and the country is patriotically united. The government is receiving many offers of contributions in the event of war, amounting to many million of yen.

The Japanese people would welcome an honorable peace, but are resolved to fight before receding from their position in Oriental affairs. They fear the aggression of Russia and believe if it is not stopped now it will never be stopped. They are confident that their demands are fair and moderate and their diplomacy, which has been patient, has gone to a reasonable limit. They expect the world's sympathy in the struggle and have a splendid confidence in their army and navy.

Have No Fear of Invasion.

In the event of reverses or a national disaster it is thought that England and the United States would intervene to preserve a balance of power in Eastern Asia. There is no fear of an invasion of Japan, a country which is probably the most strongly defended one in the world.

The growth of British and American sentiment is remarked. Numerous displays of the flags of the two nations are made and popular songs reciting the glories of the "lion" and "Uncle Sam" are sung. The characters of "Johnny Bull" and "Uncle Sam" are also seen at public dances. The activity of the United States in the opening of the ports of Mukden and Antung is keenly watched, and in some quarters it is hoped that this may aid in solving the problem of insuring peace.

The censorship prohibits the publication of military movements. All the recent movement are merely preliminary and aimed to insure an immediate dispatch of an immense land and sea force if it should become necessary.

POLAR BEARS ON ICEBERG

Six of the Monsters Afloat Near Newfoundland

New York, Jan. 21—The polar bear story told by the officers of the steamship Hanover on her last trip to this port is quite unusual, but not improbable. They say that when entering the eastern edge of the Grand Banks of Newfoundland they sighted a large iceberg and through a glass discovered it was inhabited by two or three polar bears. Drawing nearer they could see with the naked eye six bears clambering around on the ice mass.

Unless appearances were deceptive it is evident that these involuntary wanderers were making an unusually long journey to the south and were bound for awful destruction by drowning. They had probably not suffered for food, as the Greenland and Labrador waters, through which they had passed abound with seal, but they were finally in a region where bear food is scarce, and icebergs rapidly disappear.

There is no doubt that some of these animals perish by being carried out to sea on ice floes. The bear that lived for twenty-three years in the zoological gardens of London, and whose death some years ago brought grief to many youthful admirers, was captured when young on a floating piece of ice south of Spitzbergen. From five to twenty bears on rare occasions have been seen on the drifting floes near this archipelago. The westerly drift, which heaps great masses of ice against the eastern shores of Greenland, sometimes brings bears with it from far-away Spitzbergen and there is good evidence that these immigrants on one occasion drifted around Cape Farewell to the western coast of Greenland, where they were shot. The animal is now very scarce in Danish Greenland and in the best of seasons only forty to fifty are killed there and most of them are pilgrims from the north, brought down on the floating floe from Melville bay or Smith sound.

THE CLALLAM DISASTER

William Jensen a Seaman Tells of Occurrences on the Vessel

Victoria, B.C., January 21—William Jensen seaman of the Clallam, gave evidence at the coroner's inquest yesterday that he had charge of the flags of the Clallam, but knew of no signal flags aboard. He had hoisted the ensign union side down at half-mast; 15 minutes afterward he had found the flag at the masthead. He again lowered and believed it remained there. He told of the chief engineer having come on deck an hour and a half from Port Townsend, and saying: "I wish the captain would turn round and go back." Witness replied, "It's blowing pretty hard and I guess we'll make Victoria all right." Witness did not know the steamer was making water. He told of several visits of the chief engineer to the main deck, and of how he had tried to get into the pilot house. Failing, he asked witness to tell Captain Roberts to keep the steamer's head to the wind if he could. Soon afterwards the chief engineer came on deck covered with oil and grease and went to the pilot house. Immediately after the captain called all hands to set the jib. Then the engines stopped. Witness said he believed the boats would have a better chance if they had been made ready before leaving the steamer. He did not think Captain Roberts had full control of himself.

MOUNTAIN SNOWSLIDE

Winnipeg, Man., January 21.—The trans-continental express from the West on the C.P.R. due yesterday, is twenty hours late, due to a snow-slide in the mountains west of Calgary. A special made up at Laggan, brought the transferred passengers here.

A BRILLIANT WEDDING

London, January 21—Lady Marjorie Greville, daughter of Earl and Countess of Warwick, and Viscount Helmsley, heir apparent of Earl of Feversham, were married at Warwick yesterday. The ceremony was brilliant. The Bishop of Oxford officiated. King Edward sent Lady Marjorie a diamond and ruby brooch.

There are some first class bargains to be had in some new and second hand pianos and organs, at W. G. Landrum's, 190 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema.

January 29th, 1902

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,

MR. JOHN WOOD,

Peake Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same price $100 will be paid for any case that it will not permanently cure.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.66 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.20 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, thus, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $61.66 and $19.06 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet farther, it will cut a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1879, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.

PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. F. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves, thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,000 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet, 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 28th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 300-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle the ore.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O.

The Prescott National Bank,
Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.

The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Individualities.

Sir Frederick Treves, the famous English surgeon, who has just retired, established a record in performing one thousand consecutive operations for appendicitis without a death.

Great interest has been aroused in London by the announcement that the Marchese Karlo di Rudini, son of the former Italian Premier, is to marry Dora Labouchere, daughter of Henry Labouchere, the noted editor of "Truth."

During his lifetime Gordon McKay the wealthy inventor of the machine that revolutionized shoemaking, who died at Newport lately, deeded all his property, valued at four millions of dollars, to Harvard University, retaining an income for life.

Mark Twain and his wife have leased the Villa Papiniano, which belonged originally to the sculptor Baccio Bandinelli, a contemporary and rival of Michael Angelo. The villa is pleasantly located about halfway between Florence and Fiesole, and connected with the modern town and the old Etruscan stronghold by a line of electric cars.

That much-quoted superstition, "three times a bridesmaid never a bride," seems to have no terrors for Alice Roosevelt, who has accepted an invitation to serve in this capacity at the approaching marriage of Miss Lilla McCauley and Mr. Wolcott Tuckerman, which will take place in Washington, D.C., November 25. Miss Roosevelt was a bridesmaid at the wedding of Miss Ruth Pruyn and Mr. David M. Goodrich, in Albany, last June, and also at the marriage of Miss Madeline Jackson to Mr. George C. Lee, jr., in Boston, several years ago.

Pope Pius has appointed Mgr. Merry del Val to be Papal secretary of state. It is reported that the nomination, however, will not be made officially until the next consistory, when the monsignor will also be made a cardinal. Mgr. Del Val is under forty years of age, and is descended from one of Spain's noblest families. His mother was an Englishwoman and he was born in England, receiving his early education from the Jesuit fathers in Stonyhurst College. His higher education was received in the Academy of Nobles, in Rome, the institution of which he is president.

New York clubmen are going in for politics with a vengeance. It is evidently the intention of both Democratic and Republican parties to have representative men as aldermen. Eddie Crowninshield, who is a member of the Knickerbocker Club, one of the Rough Riders, and a leading spirit in a great many social and other enterprises, is to run on the Tammany ticket for alderman in the "kid-glove" district. In the Republican camp, there is Beverley R. Robinson, son of Dr. Beverley Robinson, who is to be the candidate in the twenty-ninth aldermanic district, which comprises the territory on Fifth avenue, between Fifty-second and Fifty-fourth streets.

Helen Keller has just begun her senior year at Radcliffe. Her studies this year will consist of Professor Kittredge's Shakespearian course, Dr. Neilson's English literature, Professor Moore's course in Plautus, Cicero and Lucretius, and Professor Morgan and Dr. Rand's course in Latin, which covers the annals of Tacitus, the satires and epistles of Horace, and selections from Catullus. Up to the present time Miss Keller has passed with credit all her college examinations. When she has completed this year's work, as outlined, she will have accomplished more in the way of scholarship than any other person who has been handicapped with the loss of sight, hearing and speech.

When Eleanor Calhoun, the California actress, was married, a few months ago, to Lazarovitch, the Servian leader, she announced to her friends that she might some day return to the stage. She has now, however, abandoned all such ambitions and has thrown herself enthusiastically into assisting her husband with his political writings and into looking after his three children. It will be remembered that Lazarovitch, according to his own statement, was approached by certain Servians prior to the massacre of King Alexander and Queen Draga, and asked to accept the throne as next in line of succession should the plot prosper. Lazarovitch, however, having no desire to rule the kingdom, not only refused to be a candidate, but left the country. It was then he came to London, met the California actress, and married her.

When the Duke of Devonshire and the present Duke of Manchester's grandfather were young they loved Louisa, daughter of the Count d'Alten of Hanover. Devonshire, then known as Lord Hartington, was a laggard in his love affairs, as he has been in everything else, and so the lady became Duchess of Manchester in 1852, and duchess she remained for forty years. But, though she married the other man, her devotion to Lord Hartington and his devotion to her were famous. She counseled him in all the important affairs of his public life, spurred him on, and was his nearest friend. Nobody thought of inviting one without the other. At last Manchester died, Hartington himself shortly afterward succeeded to a dukedom, and in 1892 the widow, still one of the beautiful women of England, became a bride and a duchess again.

Inexcusable Stupidity.

"I noticed," said the druggist to his assistant, "that a gentleman came in with a prescription, and that you took it and gave him the stuff in about three minutes. What do you mean by that? When a prescription for salt and water or peppermint and cough syrup is handed to you, you must look at it doubtfully, as if it were very hard to make up. Then you must bring it to me, and we will both read it and shake our heads. After that you go back to the customer and ask him if he wants it to-day. When he says he does, you answer that you'll make a special effort. A patient appreciates a prescription that there has been so much trouble over, and when he takes it he derives some benefit from it. But don't you do any more of that three-minute prescription business, my boy, if you want to become a first-class druggist."

A Small Favor.

Farmer (to lady)—Have you seen my bull? Lady—Mercy no! Where is he? Farmer—He got loose. And if you should see him, will you please keep on that there red coat and run this way!—"Life."

Facial massage is a popular treatment for wrinkles. I know a better—contentment.

The "summer girl," like some extravaganzas, is not always gold because she glitters.

ARE UNANIMOUSLY FOR PREFERENCE

Henry W. Lucy Gives Anti-Chamberlainites a Bitter Pill

FOUND CANADA UNITED

In Favour of the Policy Proposed by Hon. Joseph Chamberlain

London, January 21 — Henry W. Lucy (Toby, M. P., in Punch) writing to the Westminster Gazette, gives anti-Chamberlainites an awkward pill to swallow. Liberal though Lucy is, he is bound to admit that Canadians are Chamberlainite to a man. He says: "With a preference tariff of 5 per cent., Canada can, with her cattle upon a thousand hills, ship in with beef, elbowing out the American dealer. Thus would the Chamberlain tariff, like the quality of mercy, be twice blessed. Canada would secure a dominating share in the lucrative colonial trade, and her profit would be gained at the disadvantage of the aggressive and disliked America."

ATTITUDE TO ENGLAND.

Mr. Lucy concludes his article as follows: "Occasionally at the outset I made a feeble effort to ascertain where the British taxpayer came in. The distraction that followed was not prolonged. England must look out for herself and it is politely hinted that in the course of long connection the Dominion had always found her equal to her opportunities in that direction. My original inquiry was, 'Does Canada approve of Chamberlain's preferential tariff scheme?' Canada emphatically answers, 'Yes.' And small blame to her!"

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully."

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years: the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $500 will be paid for any case that it will not permanently cure.

MONEY TO LOAN ON STOCK

and Debentures on convenient terms

Interest Allowed on Deposits

The Home Savings and Loan Co., Ltd
Church Street, Toronto Can.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA

AND

BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over [illegible] feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 195 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a smal block of stock will be sold at 15 cents per share. When machinery is paid fo no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY,

A Startling Revelation

The Friends of Miss May McKenzie of London Were Astonished to hear that she had gone into consumption

This sad intelligence came as a shock to Miss McKenzie's many friends. In the early fall she contracted a heavy cold which developed rapidly into Catarrh, and finally made such rapid advances that the bronchial tubes and lungs became affected.

Although the doctors said nothing short of a change of residence to the south would benefit, on the advice of a Dundas street druggist Miss McKenzie decided to thoroughly test Catarrhozone, which is warranted to cure all diseases of the throat, lungs and bronchial tubes.

Miss McKenzie says "After my druggist had recommended Catarrhozone I spoke to my friends about it and they all said it was such a good remedy that I commenced forthwith to inhale it five or six times each day. I breathed it deeply into my lungs, and felt its beneficial action very quickly. It seemed to go where other remedies did not reach, and was so pleasant and convenient that I did not mind using it very frequently, which, probably, was the cause of it curing my obstinate case so quickly. Certainly no case of Catarrh or Bronchitis should go uncured if the sufferer can get Catarrhozone, which is a sovereign remedy, worthy of the highest recommendations."

Miss McKenzie's case needs no enlargement. She was in a critical condition, apparently beyond the aid of doctors' medicines.

Catarrhozone has cured her, and others in her condition should no longer experiment with uncertain, untried treatments, but should turn at once to Catarrhozone, and in it they will find relief and cure unobtainable by other means. Remember the name, Catarrhozone. Complete outfit guaranteed to cure. Price $1.00. Small size 25 cents. Druggists, or N. C. Polson & Co., Kingston, Ont.

PETERBOROUGH, JANUARY 22, 1904

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Obituary

The many friends of Mr. and Mrs. Philip Westlake, Smith, will deeply sympathize with them in the death of their darling little daughter, Minnie, aged two years who had been ill with cholera infantum. Interment took place yesterday in the Little Lake cemetery.

Indian Tea and Concert

The annual Indian council meeting took place last night in the new hall, built by the Dominion Government, at the Indian Village, Chemong. This was preceded by a tea, which was largely attended by the Indians of the district. Many of the tribesmen were present from Hiawatha, Roseneath, Orillia and Scugog.

The Times in Douro

Yesterday The Times had a pleasant visit from Mr. Wm. Condon, one of Douro's leading citizens, who called to renew his subscription to The Times. Mr. Condon has a very high opinion of this great family journal, and takes no pains to conceal the fact. During the period that he filled the position of assessor, Mr. Condon, in making his rounds, found this g.f.j in almost every house in the [illegible] should not be forgotten by the advertisers. The same conditions prevail in every other township in this district.

Primary and Junior Union

The regular weekly meeting of the Primary and Junior Union will be held in the Board room of the Y.M.C.A. this evening at eight o'clock. The Sunday school lesson for Jan. 24th, will be taken by Miss A. Williamson and Rev. J. G. Potter. As a special effort is being put forth to make these meetings both interesting and helpful, a large attendance of those interested in the primary and junior work of our Sunday schools is desired.

Why Trains are Late

Mr. Wm. Whyte, who has charge of the western section of the Canadian Pacific Railway, has issued a circular to all the employees of the road, with regard to passenger trains being run on time. Mr. Whyte directs their attention to the annoyance that passengers suffer in waiting for trains, and asks their co-operation in avoiding delays. When Mr. Hays assumed the management of the Grand Trunk he took similar action, and for a time the results were excellent. But with the running down of the motive power, it has been impossible to keep to the time-table, even if the congestion of freight did not impede the service. It is all right to order the engineer to make time, but to do so, he must have power in the locomotive, and that is where the trouble lies in Western Ontario.

Merchants and the Buying Public

A leading merchant says he does not consider that his goods have been really placed on the market until they have been distinctly advertised in the newspapers. His advertising appropriation he considers as essential a part of his business as the purchase of his stock, and he gives to it quite a serious attention. This is undoubtedly a proper view, as publicity is the great essential in these days of close competition. The business man who refrains from inviting the public by mention of prices and goods practically declares his unwillingness to submit to competition and reserves the right to charge higher prices whenever possible. Some of these men tell their customers, "No, I don't advertise, but the money I save in that way benefits my customers, because I can give them better bargains." What are the facts — nine times out of ten the buyer pays less money for the goods offered by the man who has the enterprise to ask for trade in a tradesmanlike way, because the quick turnover of the stock gives him a profit out of reach of the slow-going dealer, who tries to keep his head above water by tacking on a few cents of extra profit whenever the opportunity presents itself. The man who advertises enters into a pledge with the buying public—the man who does not try to do business with people who are not even extended the courtesy of an invitation to call and compare his goods with those offered elsewhere.

ACTION FOR DAMAGES

Forsyth vs. C. P. R. Co., a Case of Local Interest

Osgoode Hall, Toronto, Jan. 20, before Street J.;—Forsyth v. C.P.R. Co.—F. D. Kerr Peterborough, for adult plaintiff, F. W. Harcourt for infant defendants. Action by widow and children of a veteran of defendants, who was killed on the railway, to recover damages under the fatal accidents act, and the workmen's compensation act. Judgment by consent for plaintiffs for $2,274.21 for damages and $100 for costs. One-third of the amount of damages to be paid into court for the credit of the children, who are infants. One-third of the whole amount apportioned to the youngest child and remaining one-third apportioned equally between the other two. Question of allowance for maintenance to be spoken to again.

WEDDING BELLS

Nuptials of Miss May Jones and Mr. Thos. H. Ford

On Wednesday evening a very pretty wedding took place at the home of Mr. Robert Elliott, 239 George street, when Miss May Jones became the bride of Mr. Thomas H. Ford.

The bride was becomingly attired in a blue travelling suit and white silk waist. Miss Bertha Livingstone was bridesmaid and wore a dark cloth skirt and white silk waist. Mr. Bradley Mowry was best man.

Among the guests were Mr. and Mrs. Thos Sawers, Miss Ethel Fisk, Mr. and Mrs. Chas. Scates, Mr. Alfred Little, Mr. Elgin Bound, of Norham; Miss Robina Sherwood and the Misses Mary and Gertie Hamilton.

The ceremony was performed by Rev. A. H. Brace, at the conclusion of which the guests sat down to a dainty dejeuner. Mr. and Mrs. Ford will reside in Peterborough.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—The sleighing never was better.

—This winter does not need an asbestos curtain.

—A meeting of the Finance Committee was booked for last night.

—A drunk was assessed $2 or ten days by P. M. Dumble yesterday at the police court.

—The annual congregational meeting of St. Andrew's church took place last night, a report of which has been held over till to-morrow.

—The annual tea of the Murray street Baptist Church Sunday School including the Home Department, will take place this evening at 5.30 sharp

—The Mayor will entertain the members of the council to an oyster supper at Long's Palm Parlours on Monday evening next.

—An agitation is being carried on to have the deer season a week later, namely, from the 8th to the 22nd of November, as the deer spoil during the warm weather the first week in November.

NO FAIRY TALK

But a True Coffee Story.

A coffee tale well told by a lady of East St. Louis;

"During the first five years of my married life my husband was constantly taking medicine for severe headaches every day and he was always constipated. His back ached and liver and kidneys seemed terribly out of order. One doctor said the trouble lay in his kidneys, there were traces of too much albumen, but after taking several bottles of medicine without getting any relief he changed doctors going to a celebrated physician of St. Louis, who said it was his stomach and gave him physic, and a tonic to build up his system. But every effort failed and he became discouraged

"Then he consulted another doctor who after a thorough examination told him he was on the verge of appendicitis and that an operation was necessary which he would perform for $150.00. My husband consulted me and I refused my consent as several of our friends had been operated upon, one of whom had died from just such an operation and in some cases it was found, too late, that they were not suffering from appendicitis at all. This was in July—I persuaded my husband to at least wait until cooler weather. About this time my attention was called to the effect coffee often had on liver and bowels, so I got some Postum Cereal Coffee and after trying it I decided to use it but feared he would refuse to drink it, so said nothing about it, I served it at supper and after tasting it he remarked;

'This must be new coffee.'

'Why?' I asked.

'Because it tastes better than it did today.' And my father who lives with us remarked, 'I was just thinking there was something good about it.' and I said, 'Yes, I am trying a new brand,' but did not tell them what it was.

"The next morning my father said he had slept better than he had for months as he usually laid awake most of the night. When my husband returned from work in the evening he was in fine spirits said he felt so good, did not have the customary headache for the first day in a long time. Only those having an ailing man around can realize how unpleasant my life was at this time, husband cross and crabbed, nothing satisfied him, and many a cry I have had over his crankiness. Well we kept on day by day getting better for we continued using Postum, with Grape-Nuts generally for breakfast, with graham bread and fruit, and he is now entirely well; headaches and pains of all kinds are banished, physics are thrown to the dogs, his bowels are regular as clockwork, he eats what he pleases, sleeps like a top, and weighs 170 pounds.

"Postum has also helped my father as he does not complain of sleeplessness any more and rheumatism and neuralgia do not bother him so often. It is a blessed relief that we all owe to Postum.

'I have a friend here who had almost as obstinate a case of constipation as my husband and I persuaded her to try Postum with the result that she is entirely cured and has gained over 10 pounds since and is as healthy as can be." Name given by Postum Co., Battle Creek, Mich.

Look in each package for a copy of the famous little book, "The Road to Wellville."

—Complaints in regard to the poor way the snow plowing is being done have been received at this office.

—A number of insurance valuators are at work on the scene of Tuesday morning's fire.

—Dr. Clarke's Little Red Pills for a patient have no equal as a system builder. For sale by Ormond & Walsh, Peterborough.

—The Collingwood Bulletin, referring to the sprinkling of salt on snow and slippery walks, mentions that in Galt, cement walks have been ruined in that way, and adds, "If this is the case the sooner it is discontinued the better. Collingwood's system of cement sidewalks is unequalled by any town in Ontario, and as salt is used principally on the business streets, its injurious effects if such are possessed, will be most readily seen.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—The many friends of Mr. C. B. McAllister will regret to learn that he has been laid up with la grippe.

—Mr. Howard Waram, of the Canadian Northern Railway, Winnipeg, is home on a six week's visit.

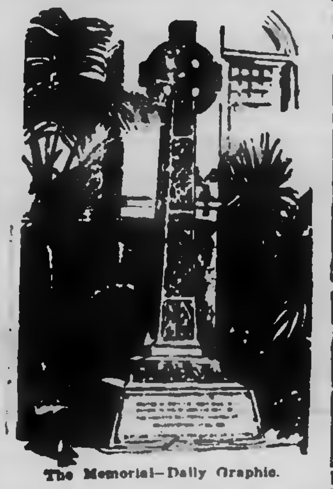
—Owing to absence from town Mrs. R. F. McWilliams will not receive this evening, but on Friday evening of next week instead.

—Mr. F. G. Cope, of Montreal, Superintendent of the agencies of the Sun Life Assurance Company, of Canada, was in town yesterday.

—We regret to learn that the Warden, Mr. Richard Crowe, is not in good health. He has been the guest of his brother-in-law, Mr. Hughes, No. 5 Ward, where he will probably remain till after the meeting of the Council next week.

Magersfontein Monument.

On Saturday, Oct. 17, a replica of the monument erected at Magersfontein to the memory of the Highland soldiers who fell in South Africa was placed in the Winter Garden of the People's Palace at Glasgow Green. The memorial is in the form of an Ionic cross, with Celtic ornamentation, and stands about 20 feet in height. It was originally intended that Mr. Chamberlain should unveil the memorial on the occasion of his recent visit to Glasgow, but owing to the limited time at his disposal in Glasgow, he was unable to do so. The unveiling was carried out without any formal ceremony. The accompanying illustration is from The Daily Graphic of Oct. 19.



The Memorial—Daily Graphic.

Inspected the Frontier.

The London Daily Chronicle says:—The tour which Lord Kitchener has just completed on the Northwest frontier of India is the most complete ever undertaken by a Commander-in-Chief. He has inspected the whole of our frontier line from Quetta to Gilgit, and examined every fort and point of natural vantage in the country, so that he is now in a position to gauge exactly the chances of a Russian invasion. It is stated that Lord Kitchener has found our forts defended as usual in large measure by the obsolete muzzle-loaders, and has given orders for their replacement by quick-firing guns. He has also discovered our telegraphic and signalling methods to be out of date. Lord Kitchener has just introduced an important and far-reaching scheme for renumbering our Indian army throughout, and he is credited with the intention of reorganizing it completely and putting it on a war footing. When two men of such energy as Lord Curzon and Lord Kitchener get together at the head of affairs, reforms are at hand, and these are now in progress in India.

To be Trained in Winter.

British papers of a recent date contain details of a scheme of winter training for the troops in the first army corps issued by Lieut.-General Sir John French, to be put into operation at once. Everything contained in the scheme is on a progressive scale, the training commencing with company, squadron and battery drill, and route marches to be carried out twice a week by the first and second divisions. These marches will not be a matter of covering so many miles of road, for outposts and other field exercises and musketry field practices will be combined with them. No man is to be exempt from the marches, all employed on garrison duty being relieved for the purpose of attending. Musketry is to form a most important feature in the winter training, the infantry being instructed to fire at least twenty rounds per month at various practices on the ranges. Bad shots and recruits are to perform two exercises per week on the miniature ranges in barracks, and judging distance practice is to be carried out fortnightly. In the very cold weather soup and fires will be provided on the ranges. The Royal Engineers will carry out practical field and defensive works. War games for the officers are to be played, staff rides, field sketching, and reconnaissance conducted periodically, and instructional practice in field dressing and stretcher work undertaken.

The first duty of the farmer who desires to succeed with poultry is to know the breeds and the best purposes for which each should be applied. As the breeds differ in their characteristics, each is better adapted for some special purpose than any other, yet each may be deficient in some respect. There is no "perfect" breed. The "best" breed is best for some special use only. It may be the largest and yet not the best in quality of flesh. It may be the best for laying and yet be lacking in hardiness, size or for the table. It may be hardy and vigorous, more easily escaping disease than some, yet fail to equal another breed in laying. It may excel as a non-sitter, while another breed may be necessary to provide the mothers for the next generation. If a "best" breed—a "general purpose" one, that combines everything that could be desired in a breed—should be introduced there would consequently exist only one breed, as it would soon crowd all others out of existence, for, whether the breeds may be preferred for their beauty of plumage or to afford pleasure, utility will always be dominant as a desire and will regulate the selection of breeds.

"To say a pleasant word to anyone was almost impossible."

"I was troubled with female weakness for eight years; and suffered more than I can tell," writes Mrs. Gust. Moser of Ovando, Deerlodge Co., Mont. "My disposition was affected to such an extent that to say a pleasant word to anyone was almost impossible.

"I had two operations performed by one of the most skilled surgeons of the West, but did not get relief. Then, against my doctor's strict orders, I commenced taking Dr. Pierce's Favorite Prescription and 'Golden Medical Discovery,' and also followed the advice given in the Common Sense Medical Adviser.

"I continued this treatment for three months, and to-day am as healthy and well as a woman can be. I cannot thank Doctor Pierce enough for his kind letters to me."

Womanly diseases, as a rule, spoil the "disposition," because of the extreme nervousness and suffering they cause. Happiness as well as health is restored to the woman whose diseased condition is cured by the use of Dr. Pierce's Favorite Prescription.

After eight years of suffering and two fruitless operations, three months' use of "Favorite Prescription" restored Mrs. Moser to perfect health. This great remedy for woman's ills, establishes regularity, dries weakening drains, heals inflammation and ulceration and cures female weakness.

The Common Sense Medical Adviser, 1008 pages, in paper covers, is sent *free* on receipt of 31 one-cent stamps to pay expense of customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.

A minister doesn't have to know the marriage ceremony by heart, for if he forgets a word the woman can always prompt him.

The only thing which would punish a woman worse than having to say what she believed would be having to believe what she said.

The main difference between a cat and a woman is that the cat has whiskers.

Any man can go into a room ful of women and pick out the one that thinks she is "advanced."

As the women run things nowadays, nobody but an Emperor can go in good society without having to be a hypocrite.

A woman's club is a place where a woman can go and learn all about baby food, garbage and Rubinstein at the same time.

Whenever you hear a woman tell another she is sorry she read a certain book, you can make up your mind the other woman is going to read it.

Many a hero to the world at large sees a "no-account" every time he looks in the glass.

The man who talks business at home is in danger of getting well-meant but risky advice.

No man can stand on top because he is put there.

Jealousy is the flattery of love. Husband and wife should never cease to be jealous of each other.

In man's eyes disappointment in love is but a pretence for seeking amusements without love.

THE HOPE FOR PEACE IS NOW VERY STRONG

It is Now Conceded that Immediate Danger of an Outbreak in Far East is Past

EVEN THE JAPANESE ARE NOW VERY HOPEFUL

Lord Lansdowne Who Has Been a Pessimist, Takes a Brighter View of the Situation

St. Petersburg, January 23—A despatch from Vladivostock says,

"The news received here from Japan has dispelled the fears of war. Peace, apparently, is assured for a long time to come."

MORE HOPEFUL AT TOKIO.

Tokio, January 23 — The growing belief that a peaceful settlement of existing international difficulties will eventually be attained has served to strengthen the financial markets and stocks are advancing on the local exchange.

The Government, which has so far not recieved any communication from Russia, remains silent, awaiting a formal response to its last note. The mere acceptance of Japan's proposals will not suffice. Japan will unquestionably insist upon some definite plan of action, besides mere promises, including a reduction of the Russian fleet in Japanese waters.

The Government of Japan has expended a large amount of money in preparations for war and is now ready to fight and is naturally unwilling to disarm unless absolutely convinced that her rights will be safeguarded.

The Government is now considering an elaborate plan for coast defence, the nature of which is maintained strictly secret.

It is also watching closely the spread of disorder in Corea, and while considering the possible necessity of intervention for the protection of the Japanese and foreign residents, hesitates to send a larger force there than there now, on account of the existing delicacy of the general situation.

A PEACE PROPOSAL.

Paris, January 23—It has been learned in official quarters that the international peace commission (having its headquarters at Berne) which is an adjunct of The Hague arbitration tribunal, has sent a circular note to the powers, asking for the adoption of means to secure a settlement of the Russo-Japanese controversy. The note has received serious attention from some of the governments, including, it is understood, that of Washington, which has taken steps to learn the attitude of the foreign governments towards the proposition. It is expected that France will not act upon the note, as Foreign Minister Delcasse has already taken what is considered to be more effective means of exerting influence upon Russia.

THE CHANCES ARE FAVOURABLE.

London, January 23— The Westminster Gazette this afternoon voices official and general opinion on the Far East crisis, saying: "We believe the chances of peace are at this moment more favorable than they have been for some weeks past."

It is learned that even Lord Lansdowne, who has been consistently pessimistic yesterday took a hopeful view of the situation and expressed the belief that war would be averted. His opinion was based on the conditions contained in these despatches, namely, that Russia is willing to concede practically all Japan's demands; but that she cannot see her way to make a treaty with Japan, recognizing in black and white China's sovereignty over Manchuria.

HAYASHI IS PESSIMISTIC.

Discussing this, however, Baron Hayashi, the Japanese Minister to Great Britain, maintains a pessimistic view. He declared yesterday that Japan would rather fight than forego an actual treaty admission by Russia of China's sovereignty over Manchuria.

The diplomats here, though differing in views as to the outcome, all agree that the dispute is not likely to be settled without another depressing period which is expected to occur when the war party in Japan raises its inevitable objections, after the receipt of the pending Russian reply, against any settlement except by recourse to arms.

DELCASSE IS FOR PEACE.

Paris January 23— Dr Motono, the Japanese Minister, called at the Foreign Office yesterday and had a long talk with M. Delcasse. The latter continues to exert his influence for the maintenance of peace. His talk with Dr. Motono brings out the impartial course France is pursuing, as the Foreign Minister is urging both sides to consider the horrors of war and to seek every means to avert an international tragedy.

SNOWSHOE COSTUMES
MADE NEW BY
DIAMOND DYES.

If your blanket costume, sash, tuque and stockings worn last year are now faded, soiled or spotted, you can, at a cost of from 10 to 30 cents make them as good as new by using DIAMOND DYES. The work is easy and simple. Diamond Dyes are money savers.

THREE MEN HELD ON MURDER CHARGE

Gerrard and Two Murray Brothers Are on Trial

FOR RICHARD MANN'S DEATH

Judge Choquette Makes Strong Charge to Grand Jury at New Carlisle

New Carlisle, Que., January 22 —The session of court, at which Archibald Gerrard and Michael and Richard Murray are to be tried for the murder of Richard Mann, was opened yesterday before Judge Choquette, who is on the bench owing to the illness of Judge Debilly.

HOW MANN WAS KILLED.

The circumstances that have placed the three young men, Archibald Girrard and Michael and Richard Murray in the prisoners' box, charged with the death of Richard Mann, are these; On the evening of July 23rd last, Richard Mann crossed the ferry, which runs from Campbellton, N.B. to Cross Point, Bonaventure Co., Quebec. He had, according to evidence given at the inquest, been drinking during the voyage. He got into a scuffle with an Indian Louis Michael, and they were separated. Mann later got into a row with Archibald Gerrard, and Gerrard struck him a blow in the face. Arriving at the shore at Cross Point, Gerrard was driving away on a truck, when he and the driver were approached by the deceased. Richard Mann and the Indian, Louis Michael, Michael pulled Gerrard off the truck and was struck by the driver. Mann and Gerrard then got into a row, during which Gerrard knocked Mann down. William Murray, father of the two young men implicated, then appeared on the scene, and he and Gerrard got into an altercation. During this, or immediately after, Richard Mann and the Murray boys were mixed up in a row. The evidence on this point given at the inquest is not quite clear, but Richard Mann came to his death that evening, and the doctors post mortem showed that death was caused by hemmorrhage at the base of the brain, produced by blows on the skull. As a result of the inquest, Gerrard and the two Murrays were committed for trial.

SIX LAWYERS ENGAGED

The crown is represented by Messrs. Blanchet, of New Carlisle, and Dunbar, of Quebec. L. J. Riopel, Quebec, and W. A. Mott, ex-M.L.A. of Campbellton, are looking after the interests of Archi. Gerrard. John H. Kelly of New Carlisle, who has been, and who is conducting the case for the Murrays, assisted by Alexander Taschereau, of Quebec, partner of Chief Justice Fitzpatrick, and Premier Parent, of Quebec.

The prisoners who have been in the county gaol here, since last July, have changed little, if any, in appearances. They speak highly of the manner in which they were used by those having charge of the gaol, and whilst they had not the luxuries of life, they had what was wholesome and clean. Many friends of the young men have called the last few nights to see them and spent the evening until the hour for closing forced them to depart.

WHO THE ACCUSED ARE.

Archibald Gerrard, is a son of Robt. Gerrard, of the Tide Head, four miles from Campbellton. Some four years ago he smashed his hand while at work for the Corporation Boom Company, and blood poisoning setting in, necessitated the amputation of the right arm. At the time he was employed as timekeeper, with the Baie Chaleurs Company, a large concern, erecting mills, and opening large business interests opposite Campbellton. He is not married.

Michael Murray, a successful lumberman residing at Cross Point. He is married. Richard Murray is also a son of Wm. Murray, but is single.

FIGHT TO A FINISH

Bondholders will fight Schwab to the Bitter End

New York, January 23 —Counsel for complainants, the first mortgage bondholders of the United States Shipbuilding Company, have insisted upon the unconditional surrender of Charles M. Schwab before they will call a halt in the contest for rehabilitating that enterprise. Mr. Schwab has so far refused to agree to any plan that means the wiping out of his twenty millions of dollars in holdings of the preferred and common stock in the reorganization of the concern. Therefore the fight will be waged as bitterly at Trenton next Monday before Judge Kirkpatrick as at any time during the last 8 months. The suit of C. A. Cavanagh of Watertown, N.Y., to compel the Sheldon Committee to return his shipyard securities, has forced an issue. Another source of irritation to Mr. Schwab is the threatened suit of Archibald Maccorachie, a member of Parliament and one of the directors of the Pneumatic Tool and Trust Company of England for a return of $250,000, which he asserts he put into the enterprise.

THE NEW POWER

They Plan to Run Fast Trains by Electricity

Schenectady, January 23. —If the plans now being made by the officials of the New York Central Railway are carried out, a train will before long be run by electric power over the stretch of track between this city and Amsterdam, at the rate of 125 miles an hour. An electrical expert connected with the General Electric Company, and who was a member of a party of officials who visited the Central offices here yesterday, said, "It is planned to equal, and, if possible, better the showing made at Zossen, Germany, when a speed of 130 miles an hour was made. This showing was made on a specially prepared roadbed and that is the secret of the feat. If the New York Central desires a high rate of speed it will have to provide a suitable roadbed. This, we understand, will be done, so we are pretty nearly certain that the result of the tests will be that electric engines, capable of maintaining a speed of 125 miles an hour, and more, will be shipped to the New York Central for use at the New York terminal."

FAVORS THE END BUT OPPOSES THE MEANS

Imperial Labor Federation Will Oppose Food Taxation

London, January 23 —The new organization, the Imperial Labor Federation formed at Manchester yesterday, has issued a manifesto to fight food taxation until they are in a position to produce in Great Britain all they need themselves.

COLONIAL LOYALTY.

J. Nettlefold, who will be ousted from the position of Treasurer of the Midlands Liberal-Unionist Association says Colonial cupboard love is an insecure foundation for the Empire.

THE BIRMINGHAM GOSPEL.

The Bishop of Hereford has written a letter denouncing the Birmingham gospel as all in the interests of the rich and without mercy to the poor. It is the duty of every Christian minister to oppose it, he says.

AN IMPERIALIST NOVEL.

The Chronicle says Mr. Chamberlain should find much interest in Mrs. Cote's new novel, "The Imperialist," which presents Canada's dream of a preferential tariff with the Motherland. The idea was schemed out weeks before Mr. Chamberlain's fiscal speech.

The Standard's Berlin correspondent wires that negotiations between Germany and Canada are unlikely to be concluded until the fiscal question in England is settled, although the German Government would be glad to dispose of the matter as soon as possible. The export of sugar, amounting to 13 million marks in 1902, has almost completely disappeared.

Mrs. Elizabeth King
Gets Rid
of Her
Rheumatism
After
Years of
Suffering.

Mrs Elizabeth King, of Cedar Hill, Victoria B.C., writes thus—"I have been troubled with rheumatism all my life, and about eight years ago I had a very severe attack, almost losing the use of my right arm. A friend recommended Paine's Celery Compound and gave me a bottle. I was so much benefitted by the one bottle that I took three more and was quite cured. Since then it has been almost my only medicine for all the ailments from which I have suffered, and all my family have found benefit from it. I am sixty-five years of age; I live on a farm, get up early in the morning, and am quite equal to a good day's work."

PAINE'S
Celery
Compound
Cured Her.

Medical advice free to all who desire it. Address "Consulting Physician," The Wells & Richardson Co., Limited, 200 Mountain street, Montreal, P.Q.

A HEAVY FINE

$480,000 Judgement Given at Toronto Against A. E. Wallace

Toronto, January 23 — The heaviest judgment ever recorded at Osgoode Hall was pronounced in the Atlas Loan case yesterday, the Master-in-Ordinary giving judgment against President Wallace for $480,000, as contributory for shares standing in his name at the time of the Atlas failure.

Mr Wallace's only explanation was that he had bought them under his agreement with Ames & Company, but that he had not bought all upon which he had the option and had not completed his part in the agreement.

The liquidator admitted he could have no case against Ames & Company.

UNCLE SAM WANTS ISTHMUS

Senator Morgan Proposes to Annex Panama

Washington, D.C., January 23 - Senator Morgan yesterday introduced a bill providing for the annexation of Panama to the United States. "The rights and property of Panama resting in the United States, without reserve." The bill appropriates $10,000,000 as compensation to Panama for its cession; places $15,000,000 at the disposal of the president for the compensation of Colombia, and appropriates $40,000,000 for the purchase of the property of the new Panama canal company in Colombia, including the Panama canal. It is especially provided that the provisions of this bill shall not have the effect of repealing the Spooner Act. Mr. Morgan gave notice that he would submit some remarks on the bill today.

—At the police court yesterday Chas. Beavis was sent to gaol for one month for vagrancy.

IS SYMPATHIZER WITH CHAMBERLAIN

Mr. Herbert Gregory Thinks New Tariff Policy Will Win

BY-ELECTION NO CRITERION

Cry of 'Dear Loaf" Was Ridiculous and is Now Seldom Heard

Montreal, Jan. 23—In spite of the fact that he comes from Manchester, the storm centre of free trade, Mr. Herbert Gregory is an enthusiastic supporter of the fiscal proposals of Mr. Chamberlain. To a press representative at the Windsor yesterday Mr Gregory outlined the present position of the struggle in Great Britain.

"Can you account for the free trade victory in Gateshead where Lord Morpeth, the Chamberlain standard-bearer, was defeated yesterday?" was asked.

"You cannot judge a by-election with any degree of certainty," was the reply. "There are always so many local issues involved and the election as a rule hinges on some question other than a national one. Then, again, it is a well known political axiom that a by-election is bound invariably to go against the Government. The recent elections that have been fought have not been valuable as tests of public feeling in the matter of fiscal reform. They are absolutely worthless as criterions. The real test of public opinion will not take place until an appeal to the country is made."

"And when do you think that appeal will be made, Mr. Gregory?"

"That is a very difficult question to answer. Some time ago, it seemed probable that the Government would go to the country before the spring, but the Balfour Cabinet has been reorganized and there seems every probability that the present Unionist administration will continue in power until such time as Mr. Chamberlain has had an opportunity of putting his tariff policy thoroughly before the people and engaging in a fiscal campaign that will have for its object the careful explanation of those principles in regard to tariffs that Mr. Chamberlain in common with thousands of Englishmen deem to be absolutely necessary for the well being and prosperity of the British Empire."

"Do you think public opinion in England is undergoing any change in regard to the fiscal policy of the country?"

"I do think so most decidedly. Cobden's views and policies in regard to free trade were all right for Cobden's generation. Those views and policies are entirely too antiquated to be kept in practice at the present time. We want a policy suitable to the times and business of 1904. Our manufacturers are at the mercy of other nations that use the markets of Great Britain as a dumping ground for their surplus stock. We want a weapon to fight them with. Cobden says, 'Turn the other cheek when they smite your trade.' Chamberlain says, 'Give us a weapon to fight them on their own ground.'"

Mr. Gregory is firmly of the opinion that the working men of Great Britain are with Mr. Chamberlain. The cry of the "dear loaf" has been proved to be ridiculous and is seldom heard now. Both sides are organizing for one of the fiercest fights in the history of British politics, and when the elections do come the battle will be waged with perfect organization on each side, and with the best interests of the Mother Country and the Empire at heart.

FURNACES IN OPERATION

Sydney, N.S., January 23—Five of the open hearth furnaces of the Steel Company that were closed a few weeks ago, for repairs, were relit yesterday, and are now in active operation. Large portions of the plant are being now re-constructed under the personal supervision of Mr. Graham Fraser, and work on the unfinished plant is being pushed with all speed possible.

PETERBOROUGH DEFEATED BY ONE GOAL

The Boys Put Up a Great Fight at Belleville Last Night

It took ten minutes overtime to decide the winners of the game at Belleville last night between the team of that place and the Peterborough seniors. It was generally conceded in Peterborough that the team owing to heavy ice and the lightness of their forward line would have to submit to the inevitable, but while there is life there is hope and the supporters of the team retained confidence in the boys until the very last. That it was anybody's game until the final is indicated by the score for at half time neither team had tallied. In the second half Peterborough was first to score, Chris. Graham finding the spot, followed by one to Belleville's credit making the score a tie. Neither team scored before time was up and an extra ten minutes—five each way—was played, and in the last five minutes of this Belleville succeeded in scoring the winning goal. It seems hard to take, but we certainly feel proud of the boys, who have won great honor for themselves and the town in fighting such a hard battle.

It was a great test of physical endurance; the ice was very heavy, which had a great strain on the players, but the boys played like trojans against great odds, the rink being poorly lighted, besides playing on strange ice with several hundred spectators encouraging their opponents.

During the first half Fred Whitcroft was injured and had to be carried from the ice for a short time.

About 2000 people witnessed the game.

This practically puts Peterborough out of the running, unless Picton defeats Belleville on the latter's ice.

Chaucer Elliott refereed the game very satisfactorily.

Harold Armstrong and Billy Cavanagh played a horse of a game.

Cavanagh was knocked out for about 6 minutes.

The line-up of the teams was the same as played in Peterborough last week.

The Peterborough Juniors have at last struck their gait and by defeating the Belleville Juniors last night showed that they are still playing hockey.

At the first stages of the game our boys appeared to be outplayed or else they were not playing themselves as in the first 20 minutes of play Belleville located the net five times to Peterborough's once, but in the next ten minutes the boys picked up and scored two more making the score at half-time 5—3.

In the second half the Peterborough boys were effectively aroused from their lethargy and started in to win and owing to their improvement in combination work since their last game, succeeded in holding Belleville down to only one while they notched four, making the score at full time 7—6.

The teams were very evenly matched, Belleville's combination being excellent, and it was owing in a large measure to our Junior's strong defence that saved them the game. Every Peterborough man made a first class showing, but perhaps to Parker at cover point and Moore at point, belong the honors of the game. The most brilliant phase of the game was "Jakey" Moore's two successive rushes up the ice, both of which resulted in scores. Parker's rushes were probably the most brilliant ever seen here in a junior game and he is a promising subject for intermediate company.

For Belleville P. Hamilton probably played the star game, although the Belleville team as a whole played fine hockey.

The game was inclined to be rough, but Referee Fred Clark kept the players properly in their places and gave good satisfaction.

The following was the line-up;

Belleville—Goal, Dolan; point, W. Hamilton; cover-point Connolly; forwards, Brennan, Spangenberg, P. Hamilton, Weher.

Peterborough—Goal, VanEvery; point Moore, cover-point, Parker; forwards, Hall, Smith, Kennedy, Long.

Goal umpires—W. Bradburn, F. Spangenberg

Referee—Fred. Clarke.

The T.A.S. will play the return game with the Peterborough II.'s on January 29th.

—Mr. George Lynch was in Norwood last night, refereeing a game between the team of that town and Campbellford

CHALLENGE.

The members of the Fire Brigade hereby challenge the Old Heads of the 57th Batt to a game of hockey to be played any time convenient to both teams, players to appear in uniform.

Senator Depew justifies the seizure of the Panama canal route by the United States upon the ground of protecting the interests of the French Canal Company. Such a touching evidence of regard for the citizens of a sister republic is enough to make a Panama Indian weep.

"FEED UP"

Is the Way to Make Old Men Young

One of the most remarkable evidences of the power of proper food is found in the following interesting story by a Canadian.

"I am now 71 years of age and have been ailing more or less ever since I was 16 years old, part of the time an invalid suffering with stomach and bowel troubles.

"About two years ago having learned of the good Grape-Nuts food was doing for some friends of ours I resolved to try it myself and I immediately found help in more vigor and power of endurance.

"That summer the heat did not affect me as it did before I used Grape-Nuts and after about four months constant use I began to realize what it was to be well and found my bowels adjusting themselves so that now I am free from the old troubles. I had long despaired of such results and can safely say I am enjoying better health today than for many years past for this wonderful food has literally made a new man of me." Name given by Postum Co., Battle Creek, Mich.

There is nothing wonderful about it, only sound scientific reason that anyone can prove by trial.

Look in each package for a copy of the famous little book, "The Road to Wellville."

WEDDED IN SMITH

Mr. W. T. Turnbull of Stockton, Weds Miss Georgie Preston, of Smith

On Wednesday, Jan. 20th, a very pretty house wedding took place at the residence of Mr. Peter Preston, of Smith, when his second daughter, Miss Georgie was united in marriage to Mr. William T. Turnbull, of Stockton, Man., in the presence of over fifty guests. The ceremony was performed by Rev. C. A. Campbell of Lakefield. The bride was given away by her father, and was assisted by her sister, Miss Margaret Preston, as bridesmaid. Mr. A. W. Freeman, of Stockton, Man., supported the groom. The groom's gift to the bride was a Persian lamb coat, with sable trimmings and to the bridesmaid a brooch set with pearls.

After an extended tour through the eastern and western states, Mr. and Mrs Turnbull will reside in Stockton, Man.

DAIRY MEETINGS

For Peterborough District for the Present Winter

The Dairy Division of the Dominion Department of Agriculture has made arrangements with the Peterborough, Lindsay and Tweed Cheese Board for a series of meetings, at which the cool curing of cheese and other up-to-date dairy questions will be discussed. The speakers will be Messrs. N. G. Somerville and Jas. Burgess, Superintendents of the Government Illustration Cool Curing Stations at Brockville and Woodstock respectively. The following are the dates and places of meeting;

Jan. 27th, 2 p.m.—Stoco.
Jan. 28th, 2 p.m.—Thomasburg.
Feb. 1st, 2 p.m.—Hastings.
Feb. 1st, 7 p.m.—Keene.
Feb. 2nd, 2 p.m.—Warsaw
Feb. 2nd, 2 p.m.—Warsaw.
Feb. 2nd, 7 p.m.—Norwood.
Feb. 3rd, 2 p.m.—Lakefield
Feb. 3rd, 7 p.m.—Buckhorn.

THE FRENCH MINISTRY

Doom of French Ministry May be Close at Hand

Paris, January 23—If Friday's meeting of the Chamber does not finally seal the fate of the Combes Cabinet, some of the oldest Parliamentarians and publicists in France will be surprised. The slender and somewhat anomalous majority which supported the Government in last Friday's debate is certain to desert the Premier in a large part on the question of the expulsion of Abbe Delsor from Luneville, an affair which has been seized as a pretext to destroy Coombes. All the angry passions smouldering in France including the animosity raised by the Congregations Law on the one side, and the determination to stamp out clericalism on the other, will be loosed on the Palias Bourbon. Premier Coombes himself realizes that he has to make a fight for life. Friends of the aged Premier, however, say that he is ready to step out and make way for a moderate Cabinet that will be pledged to modify the measure which has nearly denuded France of ecclesiastics. Meantime the Nationalists who have cleverly mixed up the Alsatian question with the Delsor expulsion appeal to the Chauvinistic instincts of scores of deputies who otherwise might help to prolong the life of the Combes Ministry. In the corridors of the Chamber today there is a general impression that all is over but the formal spectacle of the Ministry's death.

D. O. C. FOR KINGSTON

Ottawa, January 23 — The Order-in-Council appointing Col. Buchan D. O. G. at Kingston, has passed Council, and the appointment will be gazetted shortly.

Capt. Kemmis Betty, R. C. R. will sail on January 30 for England to take a course at Aldershot.

NORTH ATLANTIC SQUADRON

Halifax, January 23—An official at the dockyards is in receipt of a letter from D. Munro, of Portsmouth, England, formerly of H.M.S Crescent, which states that the North American and West Indies squadron will be further increased next spring by H.M.S Brilliant and Blenheim. The letter also states that the report that H.M.S Adiadne would be relieved, is unfounded. H.M.S. Adiadne will remain the flagship of the squadron for another year.

CHARGED WITH STEALING $3600

Toronto, January 23— A warrant has been issued on behalf of the Employers Liability Corporation against Alf. H. E. Ellis, lately in the employ of the Manufacturers Life Insurance Company charging him with having stolen $3,600. Ellis originally came from Orangeville, and he is alleged to have stolen the money while in charge of one of the company's branch offices in China. The Employers' Liability Corporation made good the amount, and is now seeking to have Ellis, who has disappeared, brought to account.

BETTER STREET CAR SERVICE

Toronto, January 23 — Corporation Counsel Fullerton presented to the Board of Control yesterday the proposition made by the Toronto Railway Company for the settlement of the suit with the city. The chief feature of this proposition is an intimation that the company is prepared to recognize the right of the city engineer to prescribe a time table for the operation of the cars on the various lines, and this means that if the company does not live up to the time table prescribed the city can proceed against it for contempt of court. It also means that the company will have to provide enough cars to give a satisfactory service.

A DISASTROUS FIRE

Shelby, O., January 23— The United States Steel Corporation sustained a heavy loss by fire late last night at the plant of the Shelby Steel Tube Company. The fire started in one of the smaller stock rooms from a defective electric wire, and spread to the larger stock rooms, completely destroying all of them, and the product of the entire plant for the past six months was destroyed within an hour, consisting of 800,000 tons, making in all 25,000,000 feet of finished product and valued at $3,000,000.

BUILD MEMORIAL ON SITE OF THEATRE

That is the Plan of Iroquois Memorial Association

THE CORONER'S INQUEST

David Jones on Stand in Connection with Charge of Destroying Evidence

Chicago, January 23— Arthur N. Hull, leader of the Iroquois Memorial Association, announces that he will offer the site of the Iroquois Theatre for the erection of a memorial to the victims of the fire. Mr. Hull refuses to say who authorized him to make the offer. The heirs to the estate of which the site is a part, have agreed to convey it to the association, Mr. Hull says.

JONES ON THE STAND.

David Jones, a mason foreman for the Fuller Construction Company, was the star witness of yesterday's hearing before the coroner. Jones was the man who removed the skylights from the theatre on the day following the fire, and he failed to make a satisfactory explanation. He denied the Fuller people sent him to remove the skylights, but admitted three iron workers went with him, all on the time of the Fuller Company. When asked why he had removed the skylights, he said they were afraid the glass would fall down and hurt somebody on the stage. He admitted that he knew this was a matter for the Police and Fire Departments, but insisted he was not attempting to destroy evidence.

CONSULTED ATTORNEY.

The witness then told how he had visited the Attorney for the Construction Company on the morning following the day of his removal of the skylights. He said he heard the police were after him. He was questioned as to whether he had talked with any official of the Fuller Construction Company between the times he removed the skylight, and when he visited the company's attorney's. Jones finally said he saw Superintendent Lynch. Henry H. Hornby, Chief Electrical Inspector for the city of Chicago, testified that the city had not issued a permit of the "spot" light in the Iroquois Theatre."

The hearing of Will J. Davis and Harry J. Powers, managers of the Iroquois Theatre and Building Commissioner Williams charged with manslaughter, will be continued until January 29.

FIRE-PROOF CURTAINS.

Chicago, January 23 — Joseph L. Ferrell of Philadelphia, has thrown handfuls of excelsior on a hot gas fire in the rooms of the Western Society of Engineers. It smoked, but it did not blaze. Then he placed pine shavings on top of the excelsior, pine splinters on top of them, and piled pine shingles and slabs of pine on the supposedly inflammable material below until he should have had a good sized bonfire started. There were no flames however, except the blue ones from the gas.

Mr. Ferrell had been asked to address the engineers on the subject of fire-proofing wood and cumbustible fabrics. To show that theatre scenery could be made as impervious as wood, the chemist held a piece of canvas in the flame, and while it smoked a little around the edges, there was no flame. Sulphate of aluminum is the composition Mr. Ferrell had used to fireproof the wood and cotton. His plan is to saturate the material under a pressure. Sulphate of aluminum is cheap, costing 75c a hundredweight, and the expense is comparatively small.

TRAIN'S BRAIN ABOVE NORMAL

New York, January 23 —Dr. E. C. Spitzka Jr., who is to make an analytical examination of the brain of Geo. Francis Train, has found that the weight of the brain of "Citizen" Train was above the normal for a man of his weight and stature. The brain weighed 53 8-10 ounces, and takes the twenty-sixth place in the list of the brain weights of distinguished men. Turgeneff heads the list, with nearly 71 ounces, Benjamin F. Butler is sixth with 62, and Daniel Webster thirtieth with 53 1-2. The brain of the average man of Train's age and stature should weigh 46 to 48 ounces.

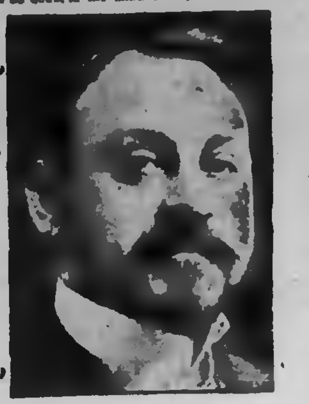
Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.



DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

DIPLOMATIC FENCING

In regard to the situation in the far east one man is about as wise as another and all definite predictions are unfounded and worthless guesses. There is no outcome of the negotiations conceivable which is not also possible and no one will need to be surprised at anything that may happen.

At the same time, reasoning and speculation are both admissible and unavoidable, and as a mere speculation perhaps we are justified in surmising that the long drawn negotiations now being conducted between Russia and Japan may not be intended nor expected to result in an agreement, but are continued for an ulterior and sinister purpose.

Perhaps both parties are oppressed with a sense of the incompleteness of their preparations. One might suppose that nations that have looked forward to a certain war for years would be prepared at any moment for hostilities, but it is not so. The war always breaks out in spite of them before they are quite ready. In the present case the rush of preparation is as great as if some unforseen contingency had developed the danger of war within a week. It is possible, therefore, that both Russia and Japan are willing to mark time because both of them believe that they will be gainers in point of preparation by delay.

Another object in this delay, if it is intentional, may be the desire of each nation to make the other the apparent aggressor. It may be set down as certain that each of them is anxious that, if there is to be war, the other may break of negotiations and fire the first gun.

It is singular what a moral advantage there is in a nation at war with another being, even outwardly, on the defensive. This sentiment, for it can be called nothing more, was of incalculable value to England in its war in Africa.

The same situation exists at present in the east. Russia has made her arrangements for absorbing Corea and Japan, and Japan must strike or go down forever, and yet it will weaken her cause to break off the negotiations and fire the first gun. If the negotiations are prolonged by both nations in the hope of gaining this advantage the chances are altogether in favor of Russia, which has only to sit still and do nothing in order to undermine and destroy the Japanese empire.

On the part of Russia, however, the tedious delay may have another object and that is to accomplish her plan of aggrandizement without fighting at all. Russia has only one diplomatic stratagem, but that has always been sufficient for her purposes and never more so than since her occupation of Manchuria. This stratagem consists in pushing her aggressions until her opponent prepares for war and then cooling off the war spirit with special concessions which as soon as quiet is restored, she repudiates.

Russia has played this game repeatedly with regard to Manchuria with the great powers of Europe, and it will be singular if she cannot play it in regard to Corea with Japan. However, we shall see what we shall see.

EDITORIAL COMMENT

Senator Depew justifies the seizure of the Panama canal route by the United States upon the ground of protecting the interests of the French Canal Company. Such a touching evidence of regard for the citizens of a sister republic is enough to make a Panama Indian weep.

THE FRENCH MINISTRY

Downfall of French Ministry May be Close at Hand

Paris January [illegible]—If Friday's meeting of the Chamber does not finally settle the fate of the Combes Cabinet, none of the oldest Parliamentarians and publicists in France will be surprised. The slender and somewhat anomalous majority which supported the Government in last Friday's debate is certain to desert the Premier in a large part on the question of the expulsion of Abbe Delsor from Lune Ville, an affair which has been seized as a pretext to destroy Coombes. All the angry passions smouldering in France including the animosity raised by the Congregations Law on the one side, and the determination to stamp out clericalism on the other, will be loosed on the Palias Bourbon. Premier Coombes himself realizes that he has to make a fight for life. Friends of the aged Premier, however, say that he is ready to step out and make way for a moderate Cabinet that will be pledged to modify the measure which has nearly denuded France of ecclesiastics. Meantime the Nationalists who have cleverly mixed up the Alsatian question with the Delsor expulsion appeal to the Chauvinistic instincts of scores of deputies who otherwise might help to prolong the life of the Combes Ministry. In the corridors of the Chamber today there is a general impression that all is over but the formal spectacle of the Ministry's death.

Hobbled Six Years

Cured in Six Weeks of Chronic Rheumatism By Ferrozone

Hundreds, aye thousands of cures have been put on the market for Rheumatism during the past few years, but a remedy with power to cure Chronic Rheumatism, Ferrozone excepted, in the estimation of Mr. Cullen, of Sturgeon Bay, does not exist.

Mr. Cullen says: "As everyone knows I have been simply tortured for years with Muscular Rheumatism, not the ordinary kind that bothers most people, but the kind that ties one up so that they can't move.

"For six years I hobbled about like a cripple, unable to move without crutches and canes. I used quantities of medicines, special baths and so forth, but they didn't help me very much.

"On the advice of a Presbyterian minister I used Ferrozone, gave it a good trial at first and when I saw it was helping, I bought six boxes and took one tablet at the close of each meal. I am perfectly cured and am today as spry as a youngster of ten. I am convinced that my recovery is entirely due to the marvellous action of Ferrozone."

Mr. Cullen's case is a fair example of the kind of cures that Ferrozone is effecting every day. In severe cases of Neuralgia, Sciatica, Rheumatism, and Lumbago, it acts with surprising alacrity, and no case is recorded where it failed.

Ferrozone cures these diseases because it is a solvent for uric acid in the blood. It removes all traces of it and other poisons from the blood in from two to ten days. Then it builds up and invigorates the system, and makes weak, sickly people strong and well enough to resist and ward off disease.

The best Rheumatism remedy that one can buy is Ferrozone. It relieves quickly and cures so perfectly that the disease never again returns. After all other remedies fail, it cures, and that is the sort of medicine you want. Ferrozone price 50c. per box, or three boxes for $1.25. Sent to you address by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont.

APPLICATION TO PARLIAMENT

Notice is hereby given that an application will be made on behalf of the Town of Peterborough to the Legislative Assembly of the Province of Ontario at the next session thereof for an act for the following purposes:

1. That the said Town of Peterborough may be incorporated as a City, with all the rights, powers and privileges of cities under The Consolidated Municipal Act 1903.

2. To declare that it has been and shall be lawful for the Commissioners of the Peterborough Town Trust, with the approval of the Municipal Council, to invest a portion of the sinking fund received by them in the purchase of the buildings and other permanent improvements erected and made by tenants under lease from the Commissioners on any land vested in the Commissioners.

3. To provide for the vesting of the real estate and sinking fund which belonged to the Corporation of the former Village of Ashburnham in, and the management of the same by, the Commissioners of the Peterborough Town Trust.

4. To amend section 3 of 2, Edward VII., chapter 60, so as to authorize the Council without the assent of the electors to borrow sums not exceeding $15,000 in any year for the purpose of making extensions, repairs, improvements and alterations in the waterworks, and to pass by-laws for that purpose.

5. To ratify and confirm By-Law number 1053 of the Corporation of the Town of Peterborough, entitled, "A By-Law to aid the Colonial Weaving Company" being a By-Law to fix the assessment of the said Company at $4,000 for a period of ten years from the first day of January, 1903, upon the conditions in said By-Law mentioned.

6. To ratify and confirm By-Law number 1062 of the said Corporation, being a "By-Law to authorize the purchase of certain real property required for the use of the Corporation of the Town of Peterborough and to borrow the sum of $10,000 to pay for same and to authorize the sale of any part of said land not required for Municipal purposes."

7. To authorize the Council, without the consent of the electors, to borrow money for the purpose of erecting an Isolation Hospital or Hospitals, and to pass By-laws for that purpose.

8. To confirm the purchase by The Little Lake Cemetery Company of part of Lot number Forty-six and Lots numbers Forty-seven and Fifty-seven on Registered Plan No. 59 for the Town of Peterborough.

9. To make alterations in the number term of office, manner of appointment and duties of the Town Trust Commissioners.

10. To provide for the reduction of the number of members of the Board of Education.

11. To provide for the election of Aldermen for a term of two years and for one half of the members of the Council retiring each year.

12. To provide for the appointment by the Council of a Court of Revision consisting of three members, none of whom shall be a member of the Council.

13. To ratify and confirm By-Laws passed by the Council of the late Village of Ashburnham exempting the property of The Dickson Company, of Peterborough, situated on Burnham's Point, and the property of The Canadian Ultimator Company, Limited, situated on the south side of Elizabeth Street, from taxes, except school taxes, for a period of ten years, upon the conditions in said By-Law mentioned.

Dated at Peterborough this sixth day of January, 1904.

E. H. D. HALL,
Solicitor for the said Town.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Armoury, at Cobourg," will be received at this office until Tuesday, February 9, 1904, inclusively, for the construction of an Armoury at Cobourg, Ont.

Plans and specifications can be seen at this Department and on application to John Boyd, Caretaker Public Building, Cobourg, Ont.

Tenders will not be considered unless made on the printed forms supplied, and signed with the actual signature of tenderers.

An accepted cheque on a chartered bank, payable to the order of the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, must accompany each tender. This cheque will be forfeited if the party tendering decline the contract, or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,
FRED. GELINAS
Secretary

Department of Public Works,
Ottawa, January 20, 1904.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

DRS. KENNEDY & KERGAN

The Leading Specialists of America. 25 Years in Detroit. Bank Security.

Nine out of every ten men have been guilty of transgression against nature in their youth. Nature never excuses, no matter how young, thoughtless or ignorant he may be. The punishment and suffering corresponds with the crime. The only escape from its ruinous results is proper scientific treatment to counteract its effects. The DRAINS, either by nightly losses, or secretly through the urine, must be stopped, the NERVES must be built up and invigorated, the blood must be purified, the SEXUAL ORGANS must be vitalized and developed, the BRAIN must be nourished. Our New Method Treatment provides all these requirements. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers disappear; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. We invite all the afflicted to call and consult us confidentially and free of charge. Cures Guaranteed or no Pay. We treat and cure: Varicocele, Blood Diseases, Stricture, Gleet, Emissions, Urinary Drains, Spermatorrhoea, Unnatural Discharges, Kidney and Bladder Diseases.

CONSULTATION FREE. BOOKS FREE.

If unable to call, write for a QUESTION BLANK for Home Treatment.

Now producing and shortly to go on a Dividend Paying Basis

Offers the best opportunity for immediate investment of any Mining Stock in the Market. The Company is now installing additional stamps to work in their mill, which will be in operation this week, when the Capacity of the present plant will be increased to upwards of

100 TONS PER DAY

$ $

GOLD BAR

6 1-2 inches long, 2 7-8 inches wide and 1 3-8 inches deep

$ $

The above Gold Bar, weighing 168 ounces, recently sent to the San Francisco Mint represents a ten day's run of the New York Grass Valley Mill, and is valued at about $2800.00.

We hold an option on a limited amount of the stock which we can offer for a very short time longer at

30 Cents per Share This is an **Exceptional Opportunity**

To secure a first class stock, and one that will not be available for any length of time, as on the declaration of the first dividend, which is due this month it will be impossible to secure it at anything like present prices.

We anticipate 75 cents to $1.00 per share within six months.

We advise the immediate purchase of New York Grass Valley stock for large and handsome dividends.

We are the authorized agents of this Company, and you will find it greatly to your advantage to deal directly with us.

IS THERE CERTAINTY IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.
2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.
3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.
4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.
5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.
6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.
7th—By being able to erect a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter of gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

Manager.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 90 foot shaft on the Martha claim shows a vein of $30.32 ore 3 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.32 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

W. D. WALRATH,
NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

PETERBOROUGH BROKERAGE CO., Local Fiscal Agents, Peterborough

The Girls of France.

Mr. H. B. Marriott Watson, the novelist, complains of the decadence of the "American girl," owing to idleness and lack of aim. Mrs. Philip Gilbert Hamerton brings the same indictment against the girls of France. Forty years ago, she writes, the French girl was modest, retiring; simple in dress, diffident in talk, and respectfully obedient to her parents—either from natural bent and the powerful influence of her surroundings, or through the discipline of education and the weight of public opinion in her own country. That some French girls were by nature coquettish, fond of finery and show, impatient of restraint and control, cannot be doubted, but when these tendencies did exist they had to be carefully hidden behind the outward appearance of a willing and contented self-effacement in all circumstances by every girl who wished to be thought "bien elevee." For the slightest deviation from this strict rule was sufficient to mark her as "mal elevee," and to banish her from the intimacy of all friends who wished to be "comme il faut." To-day, Mrs. Hamerton says, the modern French girl would be astonished were she told not to take the leading part in conversation, not to giggle loudly, not to set her arms akimbo, and never to talk privately with a young gentleman. "She would think," adds Mrs. Hamerton, "that such recommendations were perfectly ridiculous as preventing all possible flirtations, for the art of flirtation is never at its best unless practised in private. But forty years ago, when parents deemed that marriage was not a proper subject for the thoughts of their daughters, flirtation—even as a word—was unknown in France. At that time simplicity in dress was the order of the day for young maidens, and even conferred a certain distinction, being carried as far as possible among the aristocracy. There were special light silks and inexpensive trinkets for jeunes filles, set with corals, enamels, and pearls, among which the thinest of diamonds would never have been tolerated any more than costly laces, furs, or elaborate trimmings. At a glance it was easy to ascertain by the style of dress whether a young woman was married or not, whereas it is not by any means so easy now, the same satins, velvets, feathers, and jewels being worn alike in both cases. And it is not any easier to guess from the behavior in society, for it may happen that the conversation is taken up and carried on by the girls in their desire to shine and to attract attention—the married ladies being silenced and ignored in the midst of the excitement and amusement artfully created by free sallies, unrestrained laughter, and much attitudinizing. No doubt the conventional restrictions of forty years ago were somewhat excessive, and kept French girls till after marriage in a state of prolonged childhood; nevertheless, it remains to be seen whether the rapid change which has supervened is a real gain, for if it has remedied some evils of the old system, it has also engendered new ones, and on that account many thoughtful French parents are now seriously disquieted about the future of their daughters."

London to Have a Gay Winter.

The social outlook for the winter season in London is most promising now that the English royal family is out of mourning, and King Edward and Queen Alexandra have begun to entertain lavishly. The sisters of the King are also throwing off the mantle of sorrow. The papers comment enthusiastically on the recent brilliant dinner party, followed by a ball, given on the Isle of Wight by Princess Beatrice, the widow of Prince Henry of Battenberg, the handsomest of all the "handsome Battenbergs." Her mourning for Prince Henry has been long and sorrowful, but she would have emerged sooner from the gloom that enshrouded her life for so many years had she been less the principal companion of Queen Victoria, and been allowed to follow the natural bent of her years, for of all the children of the late Queen there are none that seemingly love the pleasant things of this world more than her eldest son, King Edward, and her youngest daughter, Beatrice. According to the London correspondent of the New York "Herald," she is far more attractive than some of the younger members of the royal family in manner and appearance, although prone to stoutness, like Princess Christian, her eldest sister now living, and of late also the dispenser of considerable hospitality at her new, beautiful town house in Pall Mall. The most attractive of the King's sisters is Princess Louise, Duchess of Argyll, whose London residence is Kensington Palace where her youngest sister, Princess Beatrice, has also had willed to her for life a suite of spacious apartments. Princess Louise has never acted as hostess to any great extent, and even since the accession of her husband as the sixth Duke of Argyll (who has nearly a dozen other hereditary titles in addition, and innumerable posts that increase his income), the expenditure of Princess Louise for purely social hospitality is very limited, both in London and at her Scottish seats.

Power of a Remark Overheard.

A man waiting patiently at the glove counter of a New York department store heard one young shopwoman say to another, as she handed down a box of gloves: "Maria told him downright she'd have nothing more to do with him; and she called him a poison-faced adder, he gripped her in the waltz that scandalous." This was all! Customers clamored for attention, and the confidence ceased at this point. But the force and richness of the language, the liveliness of the allusion, captivated the hearer's soul. He confessed that, for years afterwards, when he was waltzing with decorous reluctance under the compelling eye of his hostess, memories of Maria's partner would assail him, and he would find himself envying the adder the mysterious nature of his enthusiasm.—New York "Life."

Wasted Indignation.

"Let me see," said the minister, as he was making out the baptismal certificate, "this is the thirteenth, isn't it?"

"The thirteenth," exclaimed the indignant mother, "indeed, but it's only the seventh, and would have been the sixth, only two of 'em were twins."

"The thirteenth of September," said the minister, mildly, and peace was restored.—Ex.

"Mr. Nozzleton," she said, "if you try to hug and kiss me again I shall call papa." "Where is your father?" he asked. "He's in the Yellowstone Park, and will be beyond mail or telegraphic communication for three weeks."—Chicago "Record-Herald."

She (reproachfully)—Before we were married you used to say you couldn't live without me. He—A man never knows what he can do till he tries.—"Life."

EVERYBODY READS THE TIMES.

A Groom's Voluntary.

Sir Frederick Bridge, the English musician, is a good story teller, according to T.A.T., and has a fund of amusing personal experiences to draw upon. One of the great musician's best stories is about a provincial church organist, who was once a pupil of his. This young man was appointed to an important church in the Midlands. In course of time he married. During his absence his voluntaries were much missed by the congregation. They had always been appreciated, and their renewal was looked forward to. "Imagine," says Sir Frederick Bridge, "the intense amusement of the people when the newly-married organist gave as his first voluntary, upon his return, Handel's 'Waft Her, Angels, to the Skies.'"

To Build Cruisers.

As a result of the recent naval manoeuvres the British authorities are considering the advisability of building some "dogging" cruisers, to pursue battleship fleets of the enemy and pounce on those which are forced to fall behind. The Bacchante and the Aboukir "dogged" Lord Charles Beresford's fleet in this way almost to the Azores. The flagship Majestic had something the matter with her engines. She was frequently compelled to slow down. Then the big, heavily armed cruisers of the pursuing fleet would swoop down on her. It was necessary to slow down the entire squadron several times for her protection.

"Another point of much interest is that of speed in battleships," writes a British naval authority. "Those who have been engaged in the manoeuvres would have done much better with a few knots more in hand. There are experienced flag officers who say that high speed in battleships is not essential. Yet if gun powder and protection go before it, speed is, in nine cases out of ten, the only thing that can enable a strong fleet to bring a weak one to action. It is the factor that enforces victory and will enable the British fleet to carry on its old policy of seeking out the enemy to destroy him wherever he may be found."

The Wrong Man.

They had been married only a few months, and the wife stood by the side of her husband looking into one of the department store windows. A handsome tailor-made dress took her fancy, and she left her husband to examine it more closely. Then she went back to him, still talking.

"You never look at anything I want to look at any more," she complained. "You don't care how I dress. You don't care for me any more. Why, you haven't kissed me for two weeks."

"Indeed, I am sorry, but it is not my fault," said the man.

Turning, the lady looked at him and gasped. She had taken the arm of the wrong man.—Philadelphia Ledger.

A Baloon Trip.

There is nothing exciting about a balloon voyage. You take your place in a shallow wicker basket; decide to take a picture of the crowd as you leave the earth; hear the order "let go," and before you can press the button the crowd has evaporated—sunk out of sight—and the rest is a moving picture show, with no sense of motion, the air delightfully cool and absolute silence. Presently a voice, apparently from another balloon a long way off, asks how you like the journey. You have exactly the same trouble with your hearing you had while in the caisson, but from an opposite cause there pressure, here rarefaction. In this case, too, the act of swallowing brings relief. A balloon trip is for all the world like sitting in a dentist's chair and taking a whiff of gas, followed by a pleasant dream. But, of course, instead of taking gas, gas is taking you. Photography under these conditions is a very simple matter—pointing the lens over the edge of the basket, waiting until the desired object comes into view, and the snapshot is taken.—W. N. Jennings, in Booklovers' Magazine.

A Quiet Village.

It seems hardly credible, says The London Telegraph, that not more than thirty minutes from all the noise and bustle of Paris there lies a village that is so quiet, so peaceful and so old-fashioned that one would imagine one's self at least one hundred miles away from the gay capital. Here at this village, La Frette by name, and about fifteen minutes' walk from Cormeilles, preparations for midday and evening repasts have to be made very early in the morning, for no such thing as a good shop is anywhere near, and the walk to Cormeilles is one which one considers twice before taking, for it is up steep and rough roads. So daily butcher, baker and greengrocer pass this quaint little place, and the villagers gather round the various tradesmen and make their purchases for the day. They also buy their clothes in this way, and may often be seen trying on bonnets, dresses and boots in the middle of the street. From a scenic point of view, all artists have agreed that there is no place to equal La Frette between Paris and Havre. To the left of the village is the park of Maisons Laffitte, and facing the park is Sartrouville, while opposite lies the forest of St. Germain, in all its green splendor. To the right is Herblay, quite an important place, whose church is visible for miles along the Seine. La Frette itself has the quaintest villagers possible. Many of them speak worse French than those of the Midi, and it is an event indeed when one takes a journey up to the capital. They are thriftiest of the thrifty. Only a short time ago one of the peasants gave his daughter no less a sum than 250,000 francs on her wedding day, and another is to receive the same amount on her approaching marriage. And yet this man, who must be worth 4,000,000 or 5,000 000 francs at least, lives in a patched-up old house and digs in the fields from early morning till late at night.

Be Regular in Milking.

The cow is a creature of habit, and therefore the time and manner of milking should vary as little as possible from day to day. The yield of milk will sometimes vary by reason of matters of such small moment that we fail to reckon them. From our results a change in milkers showed a small average loss in yield. Some cows were not affected at all, while others gave a slightly reduced yield. This will depend, however, upon the ability of the milker. Carlyle found no appreciable difference in the frequent changing of milkers. Tracy found by a good milker following a careless one an increase with five cows of 244 pounds of milk in two weeks.

Cows fed at milking time are apt to hold their milk when the customary feed is withheld. This may occur even when the animals have access to abundant pasture. This is so noticeable with some of the station cows that it is advisable to give them a little grain through the summer season to induce them to give down their milk. Emery notes that a cow that gave over seven pounds of milk gave only two pounds when her customary feed was withheld at milking time.

Allowing cows to miss a milking has a tendency to dry them up, and is liable to cause an injury to the udder, some cows being affected much more than others in this respect.—(Bulletin No. 106, Kentucky Agricultural College.)

[illegible]

Chumbi Valley of Sikkim, British India, January 22—The general staff of the British expedition to Thibet, accompanied by a mountain battery, has returned to Chumbi. They report that Colonel Younghusband, with two officers, visited the Thibetan camp at Guru, and met with an insolent reception. Up to the present there has been no hostile act on the part of the Thibetans.

There are some first class bargains to be had in some new and second hand pianos and organs, at W. G. Landrum's, 190 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema.

January 29th, 1902

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peaks' Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years: the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same pr $100 will be paid for any case that it will not permanently cure.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.66 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $1 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.66 and $19.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on its present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. G. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 95,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 205-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 60 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

BIG G CURES in 1 to 5 days. Guaranteed not to stricture. Prevents Contagion. THE EVANS CHEMICAL CO. CINCINNATI, O. U.S.A.

MEN AND WOMEN. Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

'Henry Fielding's Dream'

By CORTLAND MYERS.

The soul of every man had taken on new value for him, and the Gospel new meaning and power. He said: "I have been anxious to do just this. I want an introduction to this kind of work, and I am going to do more of it myself if I can—at least, I want to come in contact with any man who needs Christ and me."

He had just been preaching about the blind man crying out for Christ to help him, and the surprise of the crowd who witnessed Jesus stop and leave them and their enthusiasm and worship in order to lift up a poor wretch who lay in darkness and poverty.

The *conscientious minister* preaches first to himself, and the truth which lay at the core of the Gospel now pushed its way relentlessly toward the very centre of his heart. He was moving in the footsteps of the Son of God—at any cost to his desire and ambition and comfort.

A new ideal was rising in his sky like a bright star. It was claiming and receiving his attention.

He once had aimed to be intellectually great; to create masterpieces of literature, to be rhetorical and polished in style, to command the admiration of the cultured and the rich. Now, all that must be secondary, and he was to save men, and by every legitimate means draw them to their Saviour and into the Church.

Instantly, when Grace Chalmers proposed this plan for Monday evening, he saw blessing in it for himself as well as others, and the meeting of a great need in his own life, for he had not made much investigation concerning the way the poor lived and suffered.

Henry hesitated a moment, because this was out of his line and the errand was new to him, but the very novelty of it attracted him, and then, again, there were other attractions.

He would go most anywhere to be in certain company, but the chasm seemed to increase in width and depth both, while no bridge appeared.

He tried to struggle against a certain feeling which he could not understand, and wondered whether he was a subject for the insane asylum, or what was the matter with him.

The whole situation seemed ridiculous to him but he could not lessen the grip of something which was reality, and yet he did not know what to call it.

In the secret silence of his own soul, he had said often:

It was "sentiment," "infatuation," or a score of other words without definition, but he never had ventured to explain it by a monosyllable of four letters.

That would have been best, but it was too bold for his modest and inexperienced state.

His hesitation soon vanished like a snowflake in the warmth of the sun, while the flowers of his real desire appeared in his answer, that he would be delighted to go with them.

The next evening, by arrangement, they met at Mr. Dowling's home, and started their journey from that point.

They entered a downtown car, and Mr. Dowling sat directly opposite to the other three, that being the only vacant place.

He had been very quiet all the way and now sat in deep meditation, as if no one was near him. A man can oftentimes be most alone in a crowd. The loneliest place in the world is in the centre of the rush of humanity which does not care any more for you than the car itself, and would rather push against you than against it.

The car was crowded, and he was out of reach of their conversation, but was deep in his own thoughts. They motioned to each other as he wrinkled his brow and almost closed his eyes. The motion of his hands as they pressed each other told the secret of his nervousness. No, it was more than that; it was the honest soul in a man while in life's greatest struggle—to find the right path and take it, even though the heaviest burden lay directly across it.

He was saying to himself: "Let the sermon go. I must do more of this personal Christlike work."

David Dowling did not then know that that kind of a resolution and life was the theological seminary where the best doctrine and homiletics were learned. An essay is not a sermon—that is only anatomy. A sermon is something with blood in it. He was on his way now for the material which makes the life and effectiveness and saving force of the sermon.

A minister's study is not confined to the four walls of a small room and musty commentaries and moldy encyclopaedias and machine-made sermons.

A man on one side of him was talking to the gentleman with him about a great opportunity in business. Some people standing in front of him were talking about the theatre, and their anxiety to get seats for the play that night, while some one near him, partially intoxicated, was muttering a jumble of unintelligible words, with an occasional oath in the mixture. He heard it all, but his thoughts were too overpowering to be conquered by it.

That was the picture of the whole world. The good surrounded by the bad, and the bad making the most noise. But the good is here, and, though less often seen and heard, has not less power.

A single man with a holy determination is a greater factor in the world than some whole carloads of ordinary humanity.

As the car stopped at one of the crossings a small boy, burdened with a great bundle of clothing, which he was apparently returning to the tailor shop, tried to push his way on the car. The package was larger than the boy, and he was almost exhausted, as he dropped it partially in the doorway.

When the car started on, the conductor seized the boy by the arm and said: "You can't have that on here. You will have to get off again. It is in the way, and we are not supposed to be an expressst cart."

The little fellow looked puzzled and frightened all at once, and apparently did not know what to do. With only a nickel, and more than a mile to go, what should he do.

The car was at the next crossing, and the heartless conductor had his hand on the boy's shoulder again, ready to push him off, when suddenly a young man arose, who sat near the door and had heard it all.

He was Henry Fielding. The same impulse, so often appearing in his life, was at work again, and if all the world tried to stop him, he must go on. He suddenly seized the bundle, stepped in front of the boy, and said:

"My boy, you stay on that car—at least till I get off."

He then raised the huge bundle to his shoulder and stepped as far away to the opposite side of the platform as he could, and stood there with the load on his strong shoulder and the poor boy in front of him, amazed at his kindness.

Some of the passengers had not seen it, because of the calmness and skill with which it was done. Those who had were almost as much astonished as the boy himself.

The most startled one of all was the conductor. He pulled the rope and then began to talk, but the car went on its way, and Henry never spoke a word.

He stood like a giant, the kingliest among men.

Three pairs of eyes were fastened on him with a peculiar gaze.

Elsie was proud of her brother, and straightened up, as if she wanted to tell everybody that she was his sister.

David Dowling looked at the deed of courage and love, and glanced away to the floor to mutter, almost audibly, "Not far from the kingdom."

It was almost like Jesus, as he looked at the young man and loved him.

Grace was possessed with a different thought and feeling from the other two. It was something more than admiration. Money could not win her. Position could not win her. Character was the only magnet. The divinity in manhood was the only sceptre to which she would ever bow.

When they were to leave the car Henry asked the boy how far he had to go. It was several blocks distant. He then turned to the conductor and inquired if he would allow the boy and his bundle to stay on the rest of the way. If not, he would go to the end with him.

The conductor did not [illegible]

(To be continued.)

—An agitation is being carried on to have the deer season a week later, namely, from the 8th to the 22nd of November as the deer spoil during the warm weather the first week in November.

HOME LIFE.

The happiness of home life depends largely on the health of the wife and mother. When her strength is unequal to the daily cares and duties of home, the evening hour finds her utterly worn out, too tired to talk, too weary to read. At first even she is glad to have her husband go out for the evening. She wants rest and quiet at any price. And so the foundation for marital misery is often laid in ill-health.

But when the housewife is healthy and strong she finds in her day's duties only a sufficient outlet for her energy. She looks forward all day to the evening hour spent with her husband over a book, or passed in quiet conversation. And every evening so spent draws the wife nearer to the husband and knits together the twain who are "one flesh" in the higher unity of one mind.

Every woman should know that the general health depends on the local womanly health. Irregularity, weakening drains, inflammation, ulceration and female weakness are disorders which sap the woman's strength and destroy her happiness with her health.

In ninety-eight cases in every hundred the use of Dr. Pierce's Favorite Prescription will effect a complete cure of womanly diseases. It is a reliable regulator. It dries the drains which enfeeble women. It heals inflammation and ulceration and cures female weakness. *It makes weak women strong and sick women well.*

Sick and ailing women are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as sacredly confidential and womanly confidences are guarded by strict professional privacy. Address Dr. R. V. Pierce, Buffalo, N. Y.

In a little over thirty years, assisted by his medical staff of nearly a score of physicians, Dr. Pierce, chief consulting physician to the Invalids' Hotel and Surgical Institute of Buffalo, N. Y., has treated and cured more than half a million women.

There is no similar offer of free consultation by letter which has behind it a physician of Dr. Pierce's eminence and success, or an institution of world-wide fame such as the Invalids' Hotel and Surgical Institute of Buffalo, N. Y.

Write to Dr. Pierce and obtain a specialist's opinion absolutely without charge or fee.

WAS NEARLY CRAZY.

"I was pleased that Dr. Pierce answered my letter," writes Mrs. C. W. Young, of South Regent Street (Lee Park), Wilkesbarre, Penna. "I am perfectly willing for you to use my name and address, as I think it my duty to let the people know what a wonderful medicine you have. When I had those mishaps I began to think I would never have children, and my husband always said that if I would take your medicine I would soon be all right. My back used to almost break and I would get sick at my stomach and have such headaches I did not know what to do; they used to set me nearly crazy, and I used to dread to get up, I felt so bad; then I began taking your medicine. When baby was expected I took it all the time I was that way. I felt fine all the time and I never get those dizzy spells now. I hardly ever have a nervous headache any more. I have a perfect romp of a boy; he is the light of our home. I am now twenty years old and my baby is almost eight months old. I now feel well and weigh [illegible] pounds, and the baby [illegible] pounds. We feel very grateful for the good your medicine did for us. We are both healthy, thanks to Dr. Pierce's medicine."

ALMOST A SKELETON

"Your 'Favorite Prescription' has done so much for me," says Mrs. Susan Weast, of Lawndale, Cleveland Co., N. C., "that I feel it my duty to write to you and tell you I think it saved my life. I had been under the treatment of two doctors—had two mishaps. I was almost a skeleton, weighed only seventy pounds. A friend of mine recommended Doctor Pierce's Favorite Prescription, and when I commenced to take it my health began to improve greatly. In two months I was a happy mother. I had only taken six bottles and have never taken any medicine since, of any kind, and now weigh 130 pounds. I am now awaiting the coming of another child in the best of health. I cannot say too much in praise of your 'Favorite Prescription.'"

Dr. Pierce's Pleasant Pellets are at once the most agreeable and most effective laxative for women's use.

IT IS A PRODUCT
OF THE
WEALTHY WEST

"The Cracker Jack"

This is a year of plenty; It is a year that will go down in history as the beginning of a New Era. The WEST is the center of Tangible Wealth. It is proving the ONE means of salvation for the East

The Eastern markets are dull and the Western markets are active. There is more Money in the West than there has been before. Bank clearings show an increase savings accounts are over Two Billion Dollars. The crops have been greater than during any previous year in our "Fat" seven.

It is HIGH TIME NOW to put your money where the fluctuations incident to trade conditions and conditions that will be caused by the coming presidential year will not affect it.

Seek SAFETY for the time being; and liberal remuneration for the future.

Put your money where it will be secure and where it will be active.

Put it beyond the cavil and caprice of the human agencies behind the money markets.

Put it where it will produce a commodity of prime importance.

In other words, **Put your money in Cracker Jack Consolidated Gold Mines Company's Treasury Stock.**

THE
CRACKER JACK PROPOSITION
BOILED DOWN

The Cracker Jack is a mining property in the Cracker Creek District, Baker County, Oregon.

It is the adjacent Northern Neighbor of the Cracker-Oregon, the adjacent Eastern Neighbor of the North Pole, and the Northeast Neighbor of the Eureka and Excelsior.

It contains the continuation of the Cracker-Oregon veins and a split from the E. & E.

It has 120 acres of mineral land.

It has sufficient timber for all mining purposes.

Tunnels are being driven to the veins and ore bodies have already been uncovered.

Work will be continued all winter.

Stock is selling at one-fourth of par.

As soon as the large vein has been crosscut, stock will be worth at least par.

The company looks for this to occur at an early date

The men behind this proposition have brought out three successful mines and **no Failures.**

Investigation will prove the real worth of this enterprise.

BUY CRACKER JACK STOCK AS A
Five Year Endowment

If you should die, you will leave an asset that will do what no Life Insurance can do. It will increase in value.

It will have marketable worth.

Your neighbor will give you cash on it; whereas he could not and would not attempt to cash an insurance policy.

Better than all, you don't have to die to win; you don't have to wait twenty years to win; you don't have to pay installments for life.

You don't have to pass a physical examination.

True of any stock, you ask?

In a degree but then—there is but one Cracker Jack. It is the culmination of experience and search on the part of men who have brought out three good gold mines

They have proclaimed it BEST only after careful search, comparisons and tests.

Experience and records count!

This is not a bargain counter offering. You can't come in and carry your purchase back in your arms. You have to wait a while—and what you will get will be worth waiting for.

Don't dodge the issue. Don't fret and think this is a catch-penny scheme Go to a reliable mercantile agency and pay for information about LEE S. OVITT and the men back of this company. Abide by their word. They make a business of rendering commercial reports. They are cool and calculating. They can't afford to be misled. They are as rigid as the Government in matters of business.

There is no sentiment about this. It is open, fair and the company is trying to meet you half way.

You have some money Perhaps you think it wise to speculate. Look at the market and beware. Maybe you think railroad stock is good; but do you think that the Powers in Wall street will spare YOU when their war is on? And is it not on in nearly every listed security in this country?

Buying a home is nice; it is commendable. But interest counts up. You don't pay any interest here. You put your money to work. It will be kept at work and the result will be profits.

We are not forecasting dividends. That would be to mislead you We know that there will be dividends; greater and better than in any industrial in the land—no company excepted.

Just Think and then Act

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC. . . .

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

A FORTUNE AWAITS YOU

INVEST NOW IN THE

North Carolina Gold Fields

BUY

Rodman Mining & Milling Co's Stock

AT 50 CENTS PER SHARE

DIVIDENDS IN SIGHT

Three developed mines with more than $500,000.00 worth of ore on the dumps and an inexhaustible supply in the mines, assaying as high as $100.00 per ton, with an actual mill test of seven tons running

$24.65 PER TON IN GOLD

One mill completed ready for operation and another being built. One and one-half miles from the main line of the Southern Railroad, cheap labor, cheap fuel. Plenty of water and a climate allowing operations 365 days per annum, are a few of the advantages that go to make this one of the most valuable mining properties today in the country.

Send for free copy of the "Gold Nugget" and learn something about the North Carolina Gold Fields that produced all the gold in this country before '49 and that are today attracting the attention of the world.

Individualities.

Sir Frederick Treves, the famous English surgeon, who has just retired, established a record in performing one thousand consecutive operations for appendicitis without a death.

Great interest has been aroused in London by the announcement that the Marchese Karlo di Rudini, son of the former Italian Premier, is to marry Dora Labouchere, daughter of Henry Labouchere, the noted editor of "Truth."

During his lifetime Gordon McKay, the wealthy inventor of the machine that revolutionized shoemaking, who died at Newport lately, deeded all his property, valued at four millions of dollars, to Harvard University, retaining an income for life.

Mark Twain and his wife have leased the Villa Papiniano, which belonged originally to the sculptor Baccio Bandinelli, a contemporary and rival of Michael Angelo. The villa is pleasantly located about halfway between Florence and Fiesole, and connected with the modern town and the old Etruscan stronghold by a line of electric cars.

That much-quoted superstition, "three times a bridesmaid never a bride," seems to have no terrors for Alice Roosevelt, who has accepted an invitation to serve in this capacity at the approaching marriage of Miss Lilia McCauley and Mr. Wolcott Tuckerman, which will take place in Washington, D.C., November 25. Miss Roosevelt was a bridesmaid at the wedding of Miss Ruth Pruyn and Mr. David M. Goodrich, in Albany, last June, and also at the marriage of Miss Madeline Jackson to Mr George C. Lee, jr., in Boston, several years ago.

Pope Pius has appointed Mgr. Merry del Val to be Papal secretary of state. It is reported that the nomination, however, will not be made officially until the next consistory, when the monsignor will also be made a cardinal. Mgr. Del Val is under forty years of age, and is descended from one of Spain's noblest families. His mother was an Englishwoman, and he was born in England, receiving his early education from the Jesuit fathers in Stonyhurst College. His higher education was received in the Academy of Nobles, in Rome, the institution of which he is president.

New York clubmen are going in for politics with a vengeance. It is evidently the intention of both Democratic and Republican parties to have representative men as aldermen. Eddie Crowninshield, who is a member of the Knickerbocker Club, one of the Rough Riders, and a leading spirit in a great many social and other enterprises, is to run on the Tammany ticket for alderman in the "kid glove" district. In the Republican camp, there is Beverley R. Robinson, son of Dr. Beverley Robinson, who is to be the candidate in the twenty-ninth aldermanic district, which comprises the territory on Fifth avenue, between Fifty-second and Fifty-fourth streets.

Helen Keller has just begun her senior year at Radcliffe. Her studies this year will consist of Professor Kittredge's Shakespearian course, Dr. Neilson's English literature, Professor Moore's course in Plautus, Cicero and Lucretius, and Professor Morgan and Dr. Rand's course in Latin, which covers the annals of Tacitus, the satires and epistles of Horace, and selections from Catullus. Up to the present time Miss Keller has passed with credit all her college examinations. When she has completed this year's work, as outlined, she will have accomplished more in the way of scholarship than any other person who has been handicapped with the loss of sight, hearing and speech.

When Eleanor Calhoun, the California actress, was married, a few months ago, to Lazarovitch, the Servian leader, she announced to her friends that she might some day return to the stage. She has now, however, abandoned all such ambitions and has thrown herself enthusiastically into assisting her husband with his political writings and into looking after his three children. It will be remembered that Lazarovitch, according to his own statement, was approached by certain Servians prior to the massacre of King Alexander and Queen Draga, and asked to accept the throne as next in line of succession should the plot prosper. Lazarovitch, however, having no desire to rule the kingdom, not only refused to be a candidate, but left the country. It was then he came to London, met the California actress, and married her.

When the Duke of Devonshire and the present Duke of Manchester's grand father were young they loved Louisa, daughter of the Count d'Alten of Hanover. Devonshire, then known as Lord Hartington, was a laggard in his love affairs, as he has been in everything else, and so the lady became Duchess of Manchester in 1852, and duchess she remained for forty years. But, though she married the other man, her devotion to Lord Hartington and his devotion to her were famous. She counseled him in all the important affairs of his public life, spurred him on, and was his nearest friend. Nobody thought of inviting one without the other. At last Manchester died, Hartington himself shortly afterward succeeded to a dukedom, and in 1892 the widow, still one of the beautiful women of England, became a bride and a duchess again.

Inexcusable Stupidity.

"I noticed," said the druggist to his assistant, "that a gentleman came in with a prescription, and that you took it and gave him the stuff in about three minutes. What do you mean by that? When a prescription for salt and water or peppermint and cough syrup is handed to you you must look at it doubtfully, as if it were very hard to make up. Then you must bring it to me, and we will both read it and shake our heads. After that you go back to the customer and ask him if he wants it to-day. When he says he does, you answer that you'll make a special effort. A patient appreciates a prescription that there has been so much trouble over, and when he takes it he derives some benefit from it. But don't you do any more of that three-minute prescription business, my boy, if you want to become a first-class druggist."

A Small Favor.

Farmer (to lady)—Have you seen my bull? Lady—Mercy no! Where is he? Farmer—He got loose. And if you should see him, will you please keep on that there red coat and run this way?—"Life."

Facial massage is a popular treatment for wrinkles. I know a better—contentment.

The "summer girl," like some extravaganzas, is not always gold because she glitters.

IN FIFTEEN GAOLS WITHOUT A CRIME

George Francis Train's Summary of his Life

New York, January 22—George Francis Train, who died on Monday at Mills Hotel, number one, in Bleecker street, probably was one of the most picturesque figures in the history of America. Only a year ago, when he was then 74 years of age, he dictated the reminiscences of his extraordinary career and the result was published in book form. Summarized in his own curious fashion, this contained the following information about his life:

"Shipping clerk, fifteen years as manager, eighteenth partner in Train and Company, twenty with an income of $10,000. Established firm, George Francis Train and Company, Melbourne, Australia, 1853, agent, White Star line, income $90,000. Started forty clippers to California in 1849. Built railroad connecting Erie with Ohio and Mississippi.

"Pioneered the first street railway in Europe, America, Australia and England. Built first Pacific railway, 1862-1869 through credit mobilier. Owned 5,000 lots on Omaha, worth $3,000,000, been in fifteen gaols without a crime."

A STRIKE IN TORONTO

The Toronto Bolt and Forging Company Closed Down

Toronto, January 22—About a week before Christmas the rolling mill of the Toronto Bolt and Forging Company, Ltd., Swansea was closed down for repairs. Late last week the tonnage men were notified that the mill would resume operations before the end of this week, but that they would have to accept a reduction of ten per cent. in wages. The men objected, held a meeting, and decided not to accept the lower scale. About 25 men are affected by the change, and 35 others, comprising laborers and boys are unemployed, owing to the strike.

The tonnage men work on a sliding scale, each being paid a fixed sum per ton, according to the class of work in which he is engaged. The general run of prices is 25c to 85c per ton. The company officials say that they reduced wages because the manufacturers in the United States had lowered the pay of their tonnage hands by about 10 per cent., and the price of bar iron had dropped $5 to $8 per ton during the past three months.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully.

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 35c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $100 will be paid for any case that it will not permanently cure.

MONEY TO LOAN ON STOCK

and Debentures on convenient terms

Interest Allowed on Deposits

The Home Savings and Loan Co., Ltd

Church Street, Toronto Ont.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
AND
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,602 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 200 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 196 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS.*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

CURED

In a Few Minutes

COLDS
That make you snuffle and sneeze

COUGHS
That inflame and irritate the bronchial tubes and the throat

CATARRH
That makes your head ache, causes deafness and dyspepsia

BY SIMPLY INHALING

CATARRHOZONE

This simple inhaler is a wonderful cure for coughs, cold in the head, catarrh and lung trouble. The agreeable penetrating vapor traverses every air cell and passage of the nose, throat, bronchial tubes and lungs. In one breath it carries death to the million of germs infesting the respiratory organs, and breaks up a cold in ten minutes.

A trial will convince you that Catarrhozone is the most potent, pleasant and satisfactory remedy. The inhaler can be conveniently carried in the vest pocket and is suitable to use in church, in the street car, theatre, at work—any place—at any time of day or night.

Catarrhozone is a new scientific method of cure that is endorsed by ministers, doctors and thousands it has benefited. Complete outfit, consisting of a beautifully polished hard rubber inhaler, and sufficient liquid for recharging to last two months, costs one dollar. Small trial size 25c. Sold by all druggists, or sent safely to your address by mail if price is forwarded to N. C. Polson & Co., Manufacturing Chemists, Kingston,

Obituary

The many friends of Mr. and Mrs. Joseph Hefferman, 34 Downie street, will sympathize with them in the death of their four-months old baby boy, whose demise took place on Thursday afternoon. Interment took place yesterday in the Roman Catholic cemetery.

Presentation to Rev. E. A. Langfeldt

Rev E. A. Langfeldt, accompanied by Mrs. Langfeldt and family, left yesterday for Orillia, where they will spend a week before Mr. and Mrs. Langfeldt and daughter, Dorothy, will go to Germany to spend some months. Prior to his departure a deputation from the congregation waited upon Mr. Langfeldt at the station and presented him with a well-filled purse of gold.

S. A. Meetings

The Salvation Army officers are arranging for a series of special meetings to be held in the Barracks from Saturday January 30 to Tuesday, February 2, inclusive. Brigadier Turner, of Montreal, assisted by the officers of the Peterborough district will conduct the services, an interesting feature of which will be the presentation of the new band instruments on Monday night.

All Saints' Choir

The following officers of the choir of All Saints church have been elected:

Hon. Pres.—The Rector.
Pres.—Mr. R. H. Shepherd.
Organist—Miss M. Bullen.
Choir Leader—Mrs. M. Grenslade.
Sec.-Treas.—Miss B. Best.
Choir Committee—Miss Mary Rush, Miss Bertha Brundrette, Mr. Bruce Ricker, Mr. J. A. Mills.

A Curling Bonspiel

On Tuesday next eight rinks of Orillia and Peterborough curlers will play the first annual contest for the Shefford-Neill Cup. Four rinks will go to Orillia while the same number will come here from that town. The skips at home will be Messrs. Ray, Connal, Knapman and Giroux, while those at Orillia will be Messrs. Neill, Morrow, Rutherford and Whiten. There no doubt will be a large crowd of lovers of the roaring game at the rink to witness the match.

Miss Dickson to Go to China

Miss Dickson, formerly secretary of the Y. W. C. A. in Peterborough, has been selected as missionary to China by the Foreign Missionary Committee of the Presbyterian church. Commenting upon the appointment of Rev. A. W. Loughead the Globe says: "The committee have also appointed Miss Dickson, of Fenelon Falls, to the position of a missionary in Macao, China, and she will leave in company with Mr. Loughead. Miss Dickson is a graduate of the University of Toronto. The expenses of Miss Dickson and of Mr. Loughead on their way out and their maintenance while in China, will be borne by a friend of the denomination, whose name, Dr. Mackay the secretary, cannot disclose."

THE INDUSTRIAL EXHIBITION

To the Editor of The Times.

Dear Sir,—I notice by the report in your paper of the meeting of the Peterborough Industrial Exhibition that after they had paid all the liabilities they had some $900 left. I think, Mr. Editor, that if the president and directors want to get the goodwill of the people that did not get their prize money, or paid for work done for the exhibition of 1902, now would be the chance to boom their exhibition for 1904 and pay these people, and then these people will do their best to help make the exhibition of 1904 a success. There is a great many people that feel very sore at not getting paid for work done and for prizes that were won and never paid. The president and directors of this exhibition may not be the same as those that run the exhibition of 1902, but that should not make any difference. The president and directors of 1902 and every other year that this exhibition has been in existence have done their best to make it a success and if they were not successful, the fault was not theirs, as they all did the work without money and without price.

Hoping the president and directors will take this honorable course at once, so that they can go to the people and ask them for their support, as the people will have confidence in the new president and board that they are trying to do what is fair and honest.

Thanking you, Mr. Editor, for kindly inserting this, I remain,

Respectfully yours,
ONLOOKER.

INSURANCE CLAIMS SETTLED

Valuators of the Property of Tuesday's Fire

The insurance valuators have just about completed their work in connection with Tuesday's fire. Mr. Helliwell, who carried $1,750 insurance, gets about $1,150; Mr. Roy, $1,500—the full amount, while Mr. Holmes gets $1,200 out of $1,600.

It is understood that Dr. Weightman has got a satisfactory settlement, as did also Mr. Cox, on the building.

The claims of Mrs. Darnley and Mr. LaPlante are under adjustment.

A SUCCESSFUL TEA

The Charlotte Street Church Annual Meeting

A very successful tea, in connection with the Charlotte street Methodist church, was held on Thursday night. At the annual meeting which followed Rev. Mr. Joliffe occupied the chair. The reports of the different societies connected with the church were read, and all were shown to be in a flourishing condition.

The financial statement submitted, was as follows:

Comparative statement of principal sources of church revenue and missionary collections:

Weekly offering receipts, 1902, $1810.38; 1903, $1083.00; increase $78.44; plate collections $430.92; $478.43; increase 34.51; pew rents, $1275.00, $1290.25; increase, 15.25; church debt collections, $936.00, $949.30; increase, $13.30; missionary collections, $376.00, $395.56; increase 19.56.

In addition to this amount for missions there has been paid on the Bi-Centenary Fund $100, which will appear on next year's report, so that in round numbers $500.00 missionary money has been raised this year.

The year closes with all accounts paid and a balance of $700.00 in the treasury.

Last year the church debt stood at $3875.00. This year's report will show the debt at $1378.22. This has been further reduced since Jan. 1st, 1904, by $109.00 leaving the debt at present, $1278.22, a reduction since Jan. 1, 1900, of over $2,-800.00.

The pastor reported that 77 had been added to the church membership, and 22 names had been taken off the roll, through death or removal, leaving an increase of 55.

Refreshments were served after the programme and a pleasant social half-hour was spent.

SMITH TOWNSHIP COUNCIL

Officers Elected and Organization Business Transacted

The newly elected council of the township of Smith met in the hall at Bridgenorth on Monday, the 11th January, namely E. M. Elliott, reeve; R. N. Scott, Joseph Harvey, Thos. H. Graham and Dr. M. Bell, councillors. After making the necessary declarations of office and qualification, the reeve took the chair. Minutes of last meeting read and confirmed.

Moved by Mr. Bell, seconded by Mr. Graham, a by-law to appoint a member of the local Board of Health be read a first time.

On motion of Mr. Scott, seconded by Mr. Harvey, that by-law was read a second time in Committee of the Whole, Mr. Bell in the chair, and the name of Thos. R. Mann was inserted in the by-law.

On motion of Mr. Harvey, seconded by Mr. Scott, the by-law was read a third time and passed.

Moved by Mr. Scott, seconded by Mr. Graham that John Black and James A. Young be appointed auditors for 1904—Carried.

Moved by Dr. Bell, seconded by Mr. Scott, that Dr. Morgan be appointed Medical Health Officer for 1904.—Carried.

Moved by Mr. Harvey, seconded by Mr. Bell, that R. J. Edmison be appointed overseer for 1904.—Carried.

A by-law was then passed confirming the said appointments.

Moved by Mr. Scott, seconded by Mr. Graham, that $5.00 be granted to the Hospital for Sick Children in Toronto.—Carried.

It was also ordered that no goods be supplied for charities, except by order of the representative of the division in which the person requiring charity resides.

The following claims were ordered to be paid, namely

Thos. Edmison, work on road	16 00
Peterborough Hardware Co. ac.	50
W. Head, work on road	1 50
W. Stafford, for repairs	1 50

The Council then adjourned, to meet on Monday the 1st of February.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. J. M. Might, Toronto, is in town.

—Mr. Harry Cavanagh, who has been laid up with la grippe, is again able to be around.

—The members of the Mark street church choir were delightfully entertained at the residence of Mr. and Mrs. Cunningham, Dennistoun avenue, on Thursday evening.

—Norwood Register—Miss Ida Mackey of Peterborough is visiting at the home of her uncle, Mr. Wm. Mackey, of this place.

—Rev. Mr. Hullah and family, has taken possession of St. Luke's rectory, and will occupy it until the return of Rev. Mr. Langfeldt three months hence.

—Lindsay Post—Miss Powers, who has been book-keeper in the post office for several years, left today for Fenelon Falls, to take a position in the office of Mr. W. H. Meldrum, miller. She is succeeded by Miss White, of Oakwood.

—Mrs. Courthope Poussette leaves this morning for Detroit, where she will join her husband, who holds the responsible position of accountant of the Board of Commerce of that city. She will be accompanied as far as Toronto by Mr. A. P. Poussette, K.C.

—Hon Geo. A. Cox, Mr. and Mrs F. G. Cox, Mr. and Mrs H. C. Cox, Miss Fairweather, of Toronto; Mr. and Mrs. R. A. Shaw, of Sewickley, Pa., Mrs. Chas. Stanley, of Warren, Pa.; Dr. and Mrs. Perry Goldsmith, of Belleville, were the guests of Mr. and Mrs. A. L. Davis yesterday.

—An agitation is being carried on to have the deer season a week later, namely, from the 8th to the 22nd of November, as the deer spoil during the warm weather the first week in November.

ST. ANDREW'S CHURCH

Annual Congregational Meeting—Very Encouraging Reports

There was a good attendance at the annual meeting of St. Andrew's church. The chair was occupied by Rev. J. G. Potter.

The annual report of the Board of Managers was most satisfactory, the affairs of the church being in a prosperous condition.

The financial statement shows total receipts of $3,227.16 cents, with expenditure of a like amount.

J. McBain reported on behalf of the Finance Committee, that of the estimate of $1,200, which was made, some $1,000 was raised. He did not anticipate any difficulty in raising the remainder.

The reports of the various auxiliary societies were read and approved.

The Board of Managers was re-elected. The members are:—Messrs. J. D. Tully, A. McFarlane, Robert Rae, T. G. Elliott, R. J. McWilliams, H. M. Lloyd. Secretary-Treasurer, Mr. John McClelland.

Sickness steals more savings than the burglar. Slowly, coin by coin, the money that has been so hardly earned is paid out for drugs and doctors. Sickness is the worst enemy of the working man, and the common cause of the working man's sickness is disease of the stomach often involving the heart, lungs, liver, or kidneys.

The use of Dr. Pierce's Golden Medical Discovery will stop the stealing of the savings by sickness. It cures diseases of the stomach and other organs of digestion and nutrition. It cures diseases of heart, liver, lungs, kidneys, etc., when these diseases are caused by the diseased condition of the stomach and its allied organs.

$3,000 FORFEIT will be paid by the World's Dispensary Medical Association, Proprietors, Buffalo, N. Y., if they cannot show the original signature of the individual volunteering the testimonial below, and also of the writers of every testimonial among the thousands which they are constantly publishing, thus proving their genuineness.

"About ten years ago I began to have trouble with my stomach," writes Wm. Connolly, of 535 Walnut Street, Lorain, Ohio. "It got so bad I had to lay off quite often. You advised the use of your 'Golden Medical Discovery' and 'Pleasant Pellets.' Am very happy to state that I commenced to get better from the start and have not lost a day this summer on account of my stomach. I feel tip-top, and better than I have for ten years."

Accept no substitute for "Golden Medical Discovery."

Dr. Pierce's Pleasant Pellets regulate the bowels.

THE OLDEST MAN IN AMERICA

Tells How He Escaped the Terrors of Many Winters by Using Pe-ru-na.

Mr. Brock's Age is 115 Years.

MR. ISAAC BROCK, BORN IN BUNCOMBE CO., N. C., MARCH 1, 1788.

His age is 115 years, vouched for by authentic record. He says: "I attribute my extreme old age to the use of Peruna."

Born before the United States was formed
Saw 22 Presidents elected.
Pe-ru-na has protected him from all sudden changes.
Veteran of four wars.
Shod a horse when 99 years old.
Always conquered the grip with Peruna.
Witness in a land suit at the age of 110 years.
Believes Peruna the greatest remedy of the age for catarrhal diseases.

ISAAC BROCK, a citizen of McLennan county, Texas, has lived for 115 years. For many years he resided at Bosque Falls, eighteen miles west of Waco, but now lives with his son-in-law at Valley Mills, Texas.

A short time ago, by request, Uncle Isaac came to Waco and sat for his picture. *In his hand he held a stick cut* from the grave of General Andrew Jackson, which has been carried by him ever since. Mr. Brock is a dignified old gentleman, showing few signs of decrepitude. His family Bible is still preserved, and it shows that the date of his birth was written 115 years ago.

Surely a few words from this remarkable old gentleman, who has had 115 years of experience to draw from, would be interesting as well as profitable. A lengthy biographical sketch is given of this remarkable old man in the Waco Times-Herald, December 4, 1898. A still more pretentious biography of this, the oldest living man, illustrated with a double column portrait, was given the readers of the Dallas Morning News, dated December 11, 1898, and also the Chicago-Times Herald of same date. This centenarian is an ardent friend of Peruna, having used it many years.

In speaking of his good health and extreme old age, Mr. Brock says:

"After a man has lived in the world as long as I have, he ought to have found out a great many things by experience. I think I have done so.

"One of the things I have found out to my entire satisfaction is the proper thing for ailments that are due directly to the effects of the climate. For 115 years I have withstood the changeable climate of the United States.

"I have always been a very healthy man, but of course subject to the little affections which are due to sudden changes in the climate and temperature. During my long life I have known a great many remedies for coughs, colds and diarrhœa.

"As for Dr. Hartman's remedy Peruna, I have found it to be the best, if not the only, reliable remedy for these affections. It has been my standby for many years, and I attribute my good health and extreme old age to this remedy.

"It exactly meets all my requirements. It protects me from the evil effects of sudden changes; it keeps me in good appetite; it gives me strength; it keeps my blood in good circulation. I have come to rely upon it almost entirely for the many little things for which I need medicine.

"When epidemics of la grippe first began to make their appearance in this country I was a sufferer from this disease.

"I had several long sieges with the grip. At first I did not know that Peruna was a remedy for this disease. When I heard that la grippe was epidemic catarrh, I tried Peruna for la grippe and found it to be just the thing."

In a later letter dated January 31, 1903, Mr. Brock writes:

"I am well and feeling as well as I have for years. The only thing that bothers me is my sight. If I could see better I could walk all over the farm and it would do me good. I would not be without Peruna."

Yours truly,
Isaac Brock,

For a free book on catarrh, address The Peruna Medicine Co., Columbus, O.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

FAR EAST SITUATION REMAINS THE SAME

Much Uneasiness Felt Over The Russian Reply Which is Expected in a Few Days

EVERYTHING HANGS ON RUSSIA'S REPLY

The London Times Print Some Statistics in Reference to The Russian Forces

London, January 25— The correspondent of the Times at Pekin, says the total of Russia's land force in the Far East, inclusive of the frontier or railway guard, consists of 3,115 officers, 147,500 men, and 266 guns. This comprises all the troops east of Lake Baikal, in Siberia and Manchuria, including those guarding the railway between Vladivostock and Khabarovka, those guarding the Amur river and the troops on shore at Vladivostock, Possiet Bay, Dalny and Port Arthur.

In considering these figures it is necessary to remember certain facts about the Russian position.

First, the line of communications between Manchuria and Western Siberia consists of a single line of lightly constructed railway.

Second, the Manchurian railway, which is somewhat exposed for wreckage, traverses over 1,500 miles of unfriendly country, whose people possibly may regard the Japanese as Liberators.

Thirdly, the total strength given represents the full war strength, with not a man sick or absent and not a gun disabled.

All the Russian war ships, except four armoured cruisers at Vladivostock, are at present at Port Arthur wedged in a confined harbour or rather basin with only one dock available for repairs.

The correspondent of the Times at Moscow says that Grand Duke Vladimir Alexandrovitch, commander-in-chief of the St. Petersburg military division, and Grand Duke Sergo Alexandrovitch, Commander-in-Chief of the Moscow military division, are strongly supporting Admiral Alexieff, the Viceroy in the Far East, while the Czar, though anxious to avoid war, is now wavering.

The correspondent of the Times at Tokio, says it will probably be necessary to remove the whole of the Japanese residents from Vladivostock, as they are suffering greatly at the hands of the Russians.

DISTURBANCES IN COREA.

According to despatches from various sources, the conditions of Corea is increasingly disturbed. The Tonghak rising is generally directed against the Government. It is reported that the Emperor has asked for a Russian bodyguard. The insurrection in Southern Corea is serious. It is ascribed to the extortion of the tax gatherers it is stated that the local Japanese are fomenting trouble.

WORKING FOR PEACE.

Two identical cablegrams originating with W. T. Stead, and W. R. Cremer, M.P., were despatched last night to the Czar of Russia, and the Mikado of Japan, urging these potentates if diplomacy failed, to submit the Far Eastern dispute to The Hague tribunal.

The messages are lengthy, and they appeal especially to the Czar as the "courageous originator of The Hague conference," to take the initiative in referring the matter to The Hague.

The appeals were signed by sixty prominent English advocates of arbitration.

QUESTION OF NEUTRAL ZONE.

A statement is published here this morning with an air of authority to the effect that the question of a neutral zone has disappeared from the Russian-Japanese negotiations. This agrees with other inspired statements that Russia has acquiesced to Japan's views regarding the integrity of Corea, and that the only trouble now remaining relates to Manchuria.

It is stated that Japan's domestic loan will amount to $50,000,000 and that her ordinary disbursements already amount to $15,000,000.

Despatches from Port Arthur state that all the American and British subjects employed by Russian firms are leaving that place. The Russian commissary department at Port Arthur originally estimated that there were provisions there sufficient to last 200,000 men two years. It has now been discovered that the supply is not sufficient for six months; that the quality is inferior, and the storage room and sanitary arrangements are inadequate. Admiral Alexieff, Viceroy of the Far East has consequently dismissed and punished a number of officials. Enormous efforts are being made to supply the deficiencies, but the authorities are handicapped by the shortage of labor, the coolies having fled from the town and neighborhood.

A Tokio despatch states that the disturbed situation is proving a great handicap to business. The prices of food have risen 15 per cent. Exports to China have fallen off 50 per cent., and the shipping trade is disorganized.

NO CHANGE AT TOKIO.

Tokio January 25—The Russian reply to the last Japanese note, which, it was expected, would be received yesterday, has not arrived. There has been no change in the situation.

RUSSIA'S REPLY IS READY.

St. Petersburg, January 25— It is unofficially stated that the Far East Committee at a meeting, under the Czar's presidency, yesterday practically completed the answer to Japan, which will be shortly presented.

It is the impression in official circles that it will courteously, but firmly, insist that whatever commercial concessions that have been granted in Manchuria that territory must remain politically and strategically under Russian influence. It is alleged that the hopes of a settlement are increased by the reported readiness of Japan to undertake not to fortify ports on the Corean coast which would threaten Russian communication between Vladivostock and Port Arthur, and also to her willingness with China, providing for the permanent security of the railways.

HIGH PRAISE FOR THE INTERCOLONIAL RAILWAY

Its Equipment, Scenery and Literature Most Favorably Commented Upon

Mr. D. Pottinger, General Manager of the Government Railways has received the following letter dated Dec. 3rd, from the office of the Board of Trade, Montreal, which speaks for itself;

D. Pottinger, Esq., General Manager Intercolonial Railway, Moncton, N.B.

Dear Sir,—I have pleasure in communicating herewith a resolution adopted by this committee conveying to your management an expression of gratitude for the tour over the Intercolonial Railway, provided for the over-sea delegates to the Fifth Congress;

"Resolved, that the Canadian Committee of Arrangements tenders to the Intercolonial Railway Management its most sincere thanks for having, at this Committee's request afforded the over-sea delegates to the Fifth Congress of Chambers of Commerce of the empire, a complimentary tour over its line, and for the added courtesy in providing special trains for the two parties.

"That the lovely scenery of the Matapedia River together with the beautiful valleys of the Miramichi and Nashwaak rivers, seen when the autumnal tints were at their best

WAS GREATLY ENJOYED
BY THE DELEGATES

as were also the visits to the cities of Fredericton, Halifax, St. John, and Sydney, with the local trips provided by the citizens thereof, while the ride along the shore of the beautiful Bras D'Or Lakes was declared to be worthy conclusion of the glories of the All Canadian tour.

"That the delegates greatly appreciated the illustrated volume, "Forest, Stream, and Seashore," which the Intercolonial Management so kindly presented to all who took the tour over its lines.

"That the Committee of Arrangement is convinced that the circumstance, that, with the assistance of the Dominion Government and by the kindness of the Railway and Inland steamboat companies it was able to tender to the over-sea delegates these extended tours through Canada added largely to the success which has attended the holding of the Fifth Congress in this City, and it is most gratifying to know that these tours have resulted in impressing the delegates most favorably.

WITH THE GREAT RESOUR-
CES OF THIS COUNTRY

the vast opportunities it affords for the investment of capital, and its superior advantages as a home for the surplus population of the motherland;

"That the committee has been gratified to learn that the knowledge of the resources and beauties of our country thus obtained by the delegates will be widely disseminated by them through various parts of the Empire from which they came, for it is the intention of many of the delegates to communicate to the members of their respective Chambers and to other audiences, by illustrated lectures and other means, the information they have gathered during their visit to Canada;

"That the Committee records its belief that the tours through Canada have filled in the highest degree the hope in which they were planned that in addition to affording much enjoyment to

THE OVER-SEA DELEGATES
TO THE CONGRESS

that would result in great and lasting good to our country, and that the railway and steamboat companies who gave the transportation privileges deserve and enjoy the gratitude of all Canadians for their wise generosity in this connection."

The recent Congress of Chambers of Commerce of the Empire being the first of these Congresses held outside of the Mother Country, this Committee caused a medal to be struck in bronze to commemorate that fact, and it subsequently had a few struck in silver for special presentation purposes, one of which is now sent you under another cover in token of the Committee's appreciation of your kindness in connection with the complimentary tour given over your line to the over-sea delegates.

I am Dear sir, yours truly,
(Sgd.) Geo. Hadrill,
Secretary.

A copy of a resolution passed by the Chamber of Commerce and Manufactures (Incorporated), of Sheffield, England, has also been received and which reads as follows:

"At a meeting of the Council of the Sheffield Chamber of Commerce and Manufactures (Incorporated) held on Oct. 22, 1903, it was resolved that the best thanks of this Chamber be and they are hereby awarded to the Intercolonial Railway for their great courtesy and hospitality extended to the delegates from the Sheffield Chamber on the occasion of the Fifth Congress of Chambers of Commerce of the Empire at Montreal.

(Signed)
HERBERT HUGHES,
"Secretary."

Before leaving for home Lord Brassey paid a warm compliment to the Intercolonial Railway. "I have never travelled," said he, "more comfortably nor on a better appointed train than that which conveyed me out of Halifax today." He alluded to Canada's Famous Train, the "Maritime Express."

SNOWSHOE COSTUMES
MADE NEW BY
DIAMOND DYES.

If your blanket costume, sash, tuque and stockings worn last year are now faded, soiled or spotted, you can, at a cost of from 10 to 30 cents make them as good as new by using DIAMOND DYES. The work is easy and simple. Diamond Dyes are money savers.

CHAMBERLAIN MAY COME TO CANADA

Visit Depends on the Date of British Elections

FIGHTING ON RACIAL LINES

Elections at Cape are Briton Versus Boer—Black Watch Band Coming.

London, Jan. 25.—Mr. Orr, manager of the Toronto Exhibition, who is in London, stated last night that he had made a contract for the full band of the Black Watch fifty strong, with twelve pipers, under the command of Major Rose. The band will sail for Canada, August 18, and be away six weeks. Colonel Duff, commanding the 1st Battalion, will likely accompany the men. The band will give three concerts daily.

Elections at the Cape.

The Times Cape Town correspondent writing of the elections says the Boers have succeeded in forcing the Progressives to fight the battle at the polls upon the race issue, and if the Bond wins it will mean the temporary exclusion of Cape Colony from the South African Federation. The Kaffir vote holds the balance of power. A Kaffir editor is standing for the assembly in the Bond interest.

An Imperial Exhibition.

An Imperial exhibition to be held in Canada suggested by Mr. Walton, is being boomed here. A number of members of Parliament and Government officials favor Toronto and 1907, the 50th anniversary of Confederation, as the date. The Agent-General of New Zealand is enthusiastic over the idea.

Mr. Chamberlain Coming.

Mr. Chamberlain has informed a prominent London-Canadian and close friend of his, that he will visit the United States, if the British elections are not held this fall, and in that case will likely attend the Toronto exhibition.

A Unionist Resigns.

Mr Nettleford has resigned the treasurership of the Midlands Liberal-Unionist Association, and his kinsman, E. Nettleford, a Protectionist, has been elected instead.

The Industrial Exhibition

The Times is in receipt of a letter in regard to the unpaid prize money of the Agricultural Exhibition of 1903. The writer forgot to append his name and the letter therefore will not appear. He claims to be a prize winner, and states that it is the duty of the present association to clear off the slate, if at all possible. He thinks that all the prize winners as well as the leading citizens, will gladly subscribe funds for this purpose, and remove what appears to be a bad handicap to the future prospects of fall fairs held in Peterborough.

WAR OR PEACE WILL BE DECIDED SOMFTIME TO-DAY, ALARMING REPORT

Official at Port Arthur Believe That the Decision Must Come--12,000 Japanese Troops Have Landed at Port of Ha-Sam-Pho

Russia Sending a Large Army to Chinese Turkestan

London, Jan. 24.—High officials at Port Arthur say they believe war or peace will be decided upon to-day or tomorrow.

The Daily Graphic this morning says it understands that there is no likelihood of a compromise owing to the attitude of Japan on the Manchurian question and the fact that in her last note to Russia, Japan struck out the whole article in the draft of the treaty relating to the demand of Russia for a neutral zone.

An Alarming Report.

The correspondent of the Morning Post at Chefoo has sent in an alarming report that 12,000 Japanese troops have landed at Ha-Sam-Pho, in Southern Korea, and the Port Arthur correspondent of the Paris edition of the New York Herald also refers to the fact that the news of the occupation of Ha-Sam-Pho is being received calmly. These reports are discredited by Baron Hayashi.

The Tokio correspondent of the Daily Mail wires

The Jiji Shimpo says that on the day following the ratification of the Chinese-American treaty Russia notified Japan that it was useless to negotiate a neutral zone on the Yalu, as the ratification of both treaties showed that Manchuria was Chinese domain.

The Shanghai correspondent of the Daily Mail declared the Chinese Government has learned that Russia is sending a large force to Chinese Turkestan.

The St. Petersburg correspondent of the Daily Telegraph cables "I learn that a difficulty has arisen through reluctance to grant the same freedom of immigration into Manchuria to the Japanese as to other foreigners, for fear that the Japanese would soon overrun the Province. Whatever concessions however Russia offers regarding Manchuria will probably be offered in the first instance to the United States."

Port Arthur Fleet is Stationed at the Mouth of Harbor.

The bulk of the Port Arthur fleet is stationed just outside the mouth of the harbor.

The Admiralty authorities decline to define the rights of neutral ships bound for Japan. Shipping rates have advanced a hundred per cent. The shipping companies are preparing to withdraw from here.

The authorities are considering the for those transportation ships are in readiness.

MASS MEETING

At the Opera House Addressed by Rev. G. J. Shearer

Large audiences greeted Rev. G. J. Shearer, B.A, Field Secretary of Lord's Day Alliance, at both services addressed by him yesterday in this city. In the afternoon he spoke at the opera house, the subject of his discourse being "Canada's Industrial Awakening and Christian Sabbath." And his evenings subject was "What we have we'll hold." Mr. Shearer is a very eloquent speaker and both his addresses were very interesting, as well as instructive. In the afternoon he spoke of the brilliant future of our fair country, with its unlimited resources in minerals, etc., as well as in commercial activity. He cited a number of instances where the Lord's Day Alliance had been called upon to take a hand in the operating of certain factories on our Sabbath in this fast-growing country of ours, with the result that the work was, after more or less trouble, discontinued.

His address in the evening at the George Street Methodist Church was equally as instructive and Mr. Shearer has undoubtedly a great work under his charge. Special collections were taken at both services in aid of the society.

Over 80,000 Army and Reserve Men in Manchuria

A despatch from Port Arthur says: After a conference of the heads of all the departments of the Manchurian Administration orders were issued that a list of every available army and navy reserve man in Manchuria be drawn up, as well as a list of those indispensable for the civil administration which it is impossible to send to the front. It is claimed that the reserves total 80,000 men

A blue book just issued makes an interesting statement of the naval expenditure and mercantile marine of the United States in 1902-03 is put at $81,01,580 and her mercantile marine engaged in oversea traffic at $82,555 tons. Russia spends $52,000,000 on her navy, and has an oversea tonnage of 664,303 tons. Germany spends 100,000,000 annually on her seagoing naval force, and her tonnage engaged in oversea traffic is 2,003,021 tons. France's navy costs her $62,000,000 yearly, and her mercantile marine has 1,317,641 tons. Japan, which now attracts much attention, spends yearly on her navy $14,500,000, and her mercantile marine has a tonnage of 917,879 tons. The figures here given in each case looks small, however, in comparison with those of the United Kingdom, which spends annually on its navy $175,000,000, and has to protect a mercantile marine of 10,054,770 tons. In addition India spends $3,330,405 yearly on a navy. Of the colonies Australia contributes yearly to the British navy $748,101, New Zealand $107,616, Cape Colony $150,000, Newfoundland $1,055, Natal $80,000, Canada does nothing for the British navy.

New York, January 23 —Counsel for complainants, the first mortgage bondholders of the United States Shipbuilding Company, have insisted upon the unconditional surrender of Charles M. Schwab before they will call a halt in the contest for rehabilitating that enterprise. Mr. Schwab has so far refused to agree to any plan that means the wiping out of his twenty millions of dollars in holdings of the preferred and common stock in the reorganization of the concern. Therefore the fight will be waged as bitterly at Trenton next Monday before Judge Kirkpatrick as at any time during the last 8 months. The suit of C. A. Cavanagh of Watertown, N.Y., to compel the Sheldon Committee to return his shipyard securities, has forced an issue. Another source of irritation to Mr. Schwab is the threatened suit of Archibald Maconochie, a member of Parliament and one of the directors of the Pneumatic Tool and Trust Company of England for a return of $150,000, which he asserts he put into the enterprise.

THE CAMPAIGN WAXES HOT IN NORTH OXFORD

The Conservatives are Determined to Win If at All Possible to Do So

Woodstock, Jan. 25.—The campaign in North Oxford will be short and sharp, whatever may be the issue. It is developed upon party lines, with Col. Munro as the Liberal and Mr. B. E. Butler the Conservative candidate. The Sentinel-Review observes that in former contests the issues were merely of a personal character. The appeal is now made on public grounds. The local Liberal organ asks for support for the Ross Government on the ground that it has been maligned by its opponents, that all the charges of corruption and irregularity have been mere lies trumped up to make a false impression. It congratulates the riding that there promises to be no intrusion of outside elements to disturb the holy calm of the electors' choice.

That the Conservatives are in the fight with a hope of success is apparent. Several old Liberals are discontented with their party—or rather with the Ross Government and are holding aloof altogether. The advent of Mr. Gamey into the riding is not relished by the Government supporters, although many claim that he will help the Liberal candidate. The meeting on Saturday at Woodstock [illegible] affair, the large hall being crowded to overflowing.

Much interest is centered in the threat which Mr. Gamey has made in different parts of the riding, to the effect that he will spring another sensation in the House this week. He is addressing one and even two meetings a day in different parts of the riding, but reports indicate that instead of making votes for his party he is creating a very bitter feeling. The Provincial Secretary has hosts of friends throughout the west who refuse to believe Gamey, and who think that the electors should be left alone on the present occasion. That the Liberal candidate will be elected is a foregone conclusion, although the majority is sure to be greatly reduced.

Lost

On Wednesday on George street, hand satchel containing a sum of money, G. T. R. ticket and a gold locket. Finder will please leave same at this office.

Elected Council to Rule The Great British Empire

Britain Requires Greater Economy, Members of Imperial Chamber Might be Appointed by Parliament

London Jan. 24.—Sir Edward Grey, speaking at Morpeth yesterday, said he had long wished to see the development of an Imperial Council which would make the colonies feel that questions of foreign policy did not affect the people of Britain alone, but affected the whole empire.

The colonies either misunderstood Mr. Chamberlain or Mr. Chamberlain was misunderstanding them. If Mr. Chamberlain meant to propose free trade within the empire he ought to say so immediately and the colonies would say that it is impossible for a fiscal policy being worked by the free trade within the empire, but would cheer for protection at home.

Scheme Worked Out.

The Post publishes an article upon an Imperial council in which the writer suggests that such a body be formed by the two Houses of Parliament combining to elect 125 members of the council, each member to be elected for five years, one-fifth resigning each year, the leader of the strongest party in the council to organize a Cabinet, the assent of the Crown being essential to the validity of every measure. The Cabinet should have legislative power and taxation should be retained by Parliament. Ultimately the representatives of the colonies and India should be admitted to the council.

Prince of Wales Speech.

C. Kinloch Cooke says the Prince of Wales memorable speech at Guildhall will never be fulfilled until the establishment of a department of emigration in Downing street.

Fears Chamberlain.

The Joseph Foster foundries in Preston have received orders from an American firm, which, they say, fears Mr. Chamberlain's success, for the manufacture of printing machines hitherto made exclusively in America. Another large American firm, for a similar reason, has made overtures for amalgamation with the Foster firm.

Prize for Rifle.

The National Rifle Association of Britain offers a prize of 100 guineas for competition, with automatic rifles suitable for military purposes, at the next Bisley meeting, the weight of the barrel, exclusive of removable appliances, not to exceed 3 1-4 pounds, the minimum trigger pull 6 pounds, and the rifle to use a cartridge serviceable from a military point of view.

Trusts Common Sense.

Sir Henry Campbell-Bannerman, addressing the Eighty Club last night, dwelt on the temptations offered to manufacturers by Mr. Chamberlain's proposed 10 per cent., advantage to them but believed the common sense of the country would reject the scheme.

Canadian Letters.

The twentieth anniversary number of The Financial News contains articles by prominent Canadians, Mr. H. S. Brett attributing Canadian trade expansion largely to the natural resources of the Dominion and the prominent position taken since the Diamond Jubilee finds Canada a trifle unsettled touching her trade policy, but hopeful as to her political destiny, which lies along lines advantageous to the empire and the colony.

London, Jan. 24.—Mr. Asquith, speaking at Southport yesterday said: "You may go through all the industries of Canada, certainly all those engaged in the exportation to Great Britain of raw material and food, and you will find that without stirring up infinite dissatisfaction and jealousy as between the different class of producers, so far from confining yourself to the simple expedient of putting a preferential duty on corn, you will have to do the same all round the whole list of Canadian exports to Great Britain. The South Africa wool-grower will want a preference equal to that given to the Canadian wheat-grower. Unless he gets it you will establish at once between Canada and Africa a position of invidious discrimination, under which, if the material bonds are needed to unite the colony to the Mother Country will make Africa say, "You are giving material bond to Canada, and you withhold one from me."

A Great Mistake.

The Statist says, "It is difficult to judge whether Mr. Chamberlain has made much impression on the public. He made a great mistake in devoting so much of his speeches to figures and relegated Imperialism to the end of his speeches. If he is ultimately to succeed it will be an appeal to the spirit of Imperialism, not by laboring with trade statistics. That alone will win support from the public."

Inequality of Sacrifice.

The Spectator says: "It is not friendship which Mr. Chamberlain offers for the colonies, but partnership, in which there is not even an equality of sacrifice, for if they are to give up by by preferential tariffs something of their revenue we are to go comparatively hungry, in order that they who can never even fear pangs of hunger may continue careers which are to produce for them what men call success. Men like Mr. Chamberlain think the most supreme success is growing rich."

Prolific Chamberlain.

The Economist, commenting on Mr. Chamberlain's Guildhall speech, says Mr. Chamberlain has been prolific in the production of plans, each for the time infallible, and he is equally ready in sacrificing his unhappy offspring when political exigencies for the moment demanded it. The colonies, according to the first suggestion, were to cease manufacturing in order to provide a market for the manufactures of the Mother Country. That idea the colonies promptly repudiated, and Mr. Chamberlain, with the skill of a political prestidigitator, promptly caused the suggestion to disappear.

Chicago, January 23— Arthur W. Hull, leader of the Iroquois Memorial Association, announces that he will offer the site of the Iroquois Theatre for the erection of a memorial to the victims of the fire.

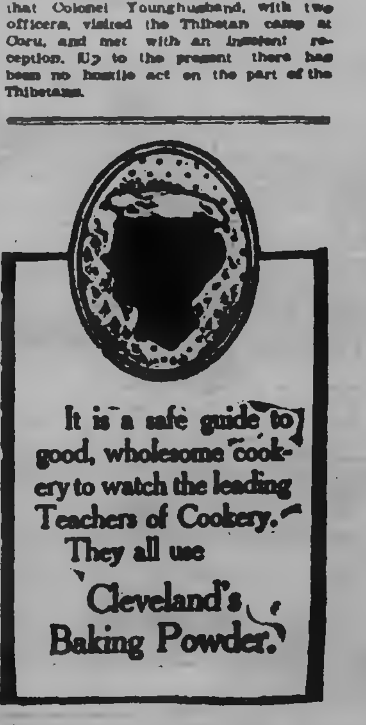
ANGLO-RUSSIAN RIVALRY BECOMES VERY ACUTE

Great Britain Will Maintain Her Groun Against the Russian Bear

Berlin January 25 —Facts are daily coming to light which reveal the strenuousness of Anglo-Russian rivalry in Central Asia. The Czar recently signified a desire to receive a special mission from the Dalai Lama of Thibet early in April. The Dalai Lama immediately appointed a mission which will travel to St. Petersburg by way of Tiflis, Batum and Odessa. This will be the third embassy of the kind welcomed at the Russian Court. The fact excites keen interest in England, because of the belief that the mission is due to the British expedition to Thibet. The India Office has taken cognizance of the matter and will forward Lord Curzon plans with regard to Thibet as expeditiously as possible.

How cautiously and comprehensively that work is already proceeding may be inferred from the story of four Baikal Buryats, who reached Odessa the other day after having fallen into the hands of a British Indian outpost from the frontier station of Darjeeling while returning from a journey to the Capital of Thibet. The Buryats are a Mongolian people who live in the Governments of Irkutsk and Trans Baikal They are Buddhists and reverence the Dalai Lama as the head of their religion. "Digressing from our proper route," said one of the Buryats, "to visit a holy shrine containing ancient relics, we ran afoul of King Edward's soldiers who detained us two months and then sent us to Calcutta, where we were subjected to a rigorous examination lasting nine days. We were questioned as to the strength of the Thibetan army, the kind and quality of its armament, the disposition and chief location of its forces, and the position and extent of the Lhassa arsenal. Enquiries were made as to whether Thibet received arms and ammunition from Russia; whether there were any Russians within the Thibetan borders, and if so, what was their character and capacity. Of course, we pled throughout with all possible adroitness. Our cross-examiners suggested that the British were looking forward to nothing less than a general conquest of Thibet. Our questioners were men of exceeding energy and keenness of mind."

Chumbi Valley of Sikkim, British India, January 23—The general staff of the British expedition to Thibet, accompanied by a mountain battery, has returned to Chumbi. They report that Colonel Younghusband, with two officers, visited the Thibetan camp at Guru, and met with an insolent reception. Up to the present there has been no hostile act on the part of the Thibetans.



It is a safe guide to good, wholesome cookery to watch the leading Teachers of Cookery. They all use
Cleveland's Baking Powder.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG.

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

UNION LABEL

PETERBOROUGH, JANUARY 25, 1904

THE NATIONS' NAVIES

A blue book just issued makes an interesting statement of the naval expenditure and mercantile marine of the United States in 1902-03 is put at $81,-[illegible] and her mercantile marine engaged in overseas traffic at 882,566 tons. Russia spends $52,000,000 on her navy, and has an oversea tonnage of 664,203 tons. Germany spends $50,000,000 annually on her seagoing naval force, and her tonnage engaged in oversea traffic is 2,000,000 tons. France's navy costs her $62,000,000 yearly, and her mercantile marine has 1,217,041 tons. Japan, which now attracts much attention, spends yearly on her navy $14,500,000, and her mercantile marine has a tonnage of 917,879 tons. The figures here given in each case looks small, however, in comparison with those of the United Kingdom, which spends annually on its navy $175,000,000, and has to protect a mercantile marine of 10,054,770 tons. In addition India spends $2,330,405 yearly on a navy. Of the colonies Australia contributes yearly to the British navy $748,-101, New Zealand $107,616, Cape Colony $150,000, Newfoundland $1,056, Natal $40,-000. Canada does nothing for the British navy.

FIGHT TO A FINISH

Bondholders will Fight Schwab to the Bitter End

New York, January 23.—Counsel for complainants, the first mortgage bondholders of the United States Shipbuilding Company, have insisted upon the unconditional surrender of Charles M. Schwab before they will call a halt in the contest for rehabilitating that enterprise. Mr. Schwab has so far refused to agree to any plan that means the wiping out of his twenty millions of dollars in holdings of the preferred and common stock in the reorganization of the concern. Therefore the fight will be waged as bitterly at Trenton next Monday before Judge Kirkpatrick, as at any time during the last 8 months. The suit of C. A. Cavanagh of Watertown, N. Y., to compel the Sheldon Committee to return his shipyard securities, has forced an issue. Another source of irritation to Mr. Schwab is the threatened suit of Archibald Maccoochie, a member of Parliament and one of the directors of the Parramatta Tool and Trust Company of England for a return of $250,-000, which he asserts he put into the enterprise.

THE STONY PASS COMPANY

Description of the Rich Properties Owned by This Mining Concern of Which Mr. Robt. Harrison is Agent.

The Miner, of Silverton, Colorado, states: "We are in receipt of a handsome booklet, "An Eastern Man in a Western Experience," being a description of the Golden San Juan and its famous gateway the most picturesque region on earth and the peer in mineral wealth. The book is designed particularly to describe the properties of the Stony Pass Mining Company, but contains a large amount of information in relation to the entire district. It is handsomely illustrated and tastefully designed. The book will have a wide circulation, and will attract much attention, especially of eastern people to Silverton and the San Juan. Such advertisements bring in big rewards and do much good, not alone to the company getting out the pamphlet, but to all of our mining interests.

The property of the Stony Pass Company will bear the fullest and most exacting scrutiny and the company is acting wisely in thus setting its merits before the public. Located as it is in different sections of the camp, and all the properties being in localities surrounded by the best mines of the camp, there can be no doubt but that the future will show it to be one of the greatest mining properties of the San Juan. The company is now patenting eight claims of the Lead Carbonate group, lying in the gold belt near the Gold King and the Hercules group, in prospect basin, and the Stony Pass group have each been surveyed and will be patented during the coming season. The following paragraph taken from the book indicates the extent of the company's holdings:

"We have the largest acreage of rich mineral ground of any company in the United States. We own our ground. We are not looking for the ore or veins, we already have the ore in vast quantities. We have spent thousands of dollars in opening it up and determining its extent and value. We know our stock is as safe as government bonds and will bring you in a hundred times more profit. We have passed the experimental stage and know that big dividends are only a question of time, the length of which depends on how long it will take the company to run drifts on the ore, put in stopes and shoots, so as to enable the company to take out the ore in large quantities at the cheapest possible cost."

Mr. Robert Harrison, whose offices are situated in the China Hall block, is the local representative of the Stony Pass Company.

THE NEW POWER

They Plan to Run Fast Trains by Electricity

Schenectady, January 23.—If the plans now being made by the officials of the New York Central Railway are carried out, a train will before long be run by electric power over the stretch of track between this city and Amsterdam, at the rate of 125 miles an hour. An electrical expert connected with the General Electric Company, and who was a member of a party of officials who visited the Central offices here yesterday, said: "It is planned to equal, and, if possible, better the showing made at Zossen, Germany, when a speed of 130 miles an hour was made. This showing was made on a specially prepared roadbed and that is the secret of the feat. If the New York Central desires a high rate of speed it will have to provide a suitable roadbed. This, we understood, will be done, so we are pretty nearly certain that the result of the tests will be that electric engines capable of maintaining a speed of 125 miles an hour, and more, will be shipped to the New York Central for use at the New York terminal."

A HEAVY FINE

$480,000 Judgement Given at Toronto Against A. E. Wallace

Toronto, January 23.—The heaviest judgment ever recorded at Osgoode Hall was pronounced in the Atlas Loan case yesterday, the Master-in-Ordinary giving judgment against President Wallace for $480,000, as contributory for shares standing in his name at the time of the Atlas failure.

Mr. Wallace's only explanation was that he had bought them under his agreement with Ames & Company, but that he had not bought all upon which he had the option and had not completed his part in the agreement.

The liquidator admitted he could have no case against Ames & Company.

THE ILLS OF WOMEN

A RELIABLE AND SAFE CURE FOR WOMANLY ILLS IS FOUND IN FERROZONE. A REMEDY THAT ALWAYS GIVES SATISFACTION AND NEVER DISAPPOINTS

If troubled with painful irregularities, dizziness, faintness, excitability, nervousness, remember there is a remedy that if regularly and persistently used, will cure all these ills. Its name is Ferrozone.

It is used by thousands of women who have experienced its great strengthening powers, and they would not be without it for ten times its price.

Ferrozone is primarily a blood maker. It drives all impurities from the crimson fluid, makes it strong and capable of supplying nourishment to the body. It quiets the nerves, banishes excitability and headache.

By taking Ferrozone regularly you can keep free from those dreadful backaches, and monthly sickness will pass off regularly and without pain or distress. Being prepared in tablet form, Ferrozone is both convenient and simple to use, and no uncertainty as to the proper quantity or dose can ever arise.

A Montreal hospital nurse who has used Ferrozone herself, and has seen also the benefit that other suffering women have derived from it, writes: "I have nursed and treated all form of female disorders, and from my personal experience, must say that Ferrozone is a remedy about which all womankind should know. It is reliable and sure, and will give prompt and satisfactory results. As a builder of muscle and tissue, I know nothing to equal Ferrozone. I have found it good to build up a weak appetite, and consider it a splendid medicine for the blood and nerves. I have no hesitancy in endorsing Ferrozone."

Don't continue to exist in a state of misery and weakness any longer. Ferrozone will make you strong and well just as it has done for thousands before you. All druggists recommend and sell Ferrozone, at 50c. a box, or 6 boxes for $2.50. Get a box to day from your druggists, or N. C. Polson & Co., Kingston, Ont.

MEDICINAL QUALITIES.

Asparagus is very cooling and easily digested.

Cabbage, cauliflower, Brussels sprouts and broccoli are cooling, nutritive, laxative and purifying to the blood, and also act as a tonic, but should not be eaten too freely by delicate persons.

Celery is delicious cooked, and good for rheumatic and gouty people.

Lettuces are very wholesome. They are slightly narcotic, and lull and calm the mind.

Spinach is particularly good for rheumatism and gout, and also in kidney diseases.

Onions are good for chest ailments and colds, but do not agree with all.

Watercresses are excellent tonic, stomachic and cooling.

Beetroot is very cooling and highly nutritious, owing to the amount of sugar it contains.

Parsley is cooling and purifying.

Turnip tops are invaluable when young and tender.

Green nettle shoots, if gathered in Spring and cooked as spinach, form a most delicate and wholesome blood-purifying vegetable.

Potatoes, parsnips, carrots, turnips and artichokes are highly nutritious, but not so digestible as some vegetables. Potatoes are the most nourishing and are fattening for nervous people.

Tomatoes are health-giving and purifying, either eaten raw or cooked.

Chili, cayenne, horse-radish and mustard should be used sparingly. They give a zest to the appetite, and are valuable stomachics. Radishes are the same, but are indigestible, and should not be eaten by delicate people.

WISE MAXIMS

There are no elevators in the house of success.

The "bad boy" often makes the best man.

A man can be too confiding in others, but never too confident in himself.

A college education is a good thing, but many a graduate finds himself over trained.

Clothes don't make the man, but good clothes have got many a man a good job.

A bad man with good manners often outdoes a good man with bad manners.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Armoury, at Cobourg," will be received at this office until Tuesday, February 9, 1904, inclusively, for the construction of an Armoury at Cobourg, Ont.

Plans and specifications can be seen at this Department and on application to John Boyd, Caretaker Public Building, Cobourg, Ont.

Tenders will not be considered unless made on the printed forms supplied, and signed with the actual signature of tenderers.

An accepted cheque on a chartered bank, payable to the order of the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, must accompany each tender. This cheque will be forfeited if the party tendering decline the contract, or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,

FRED. GELINAS,

Secretary

Department of Public Works,

Ottawa, January 20, 1904.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

PULLING UP STAKES

IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

MEN'S SUIT SLAUGHTER

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. W invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

head, but answered gruffly— almost an indistinct grumble: "Yes, he can stay."

The influence of that act was impressed upon every witness, and they were to carry it to others, while the wave was not to break until it reached the shore of Eternity.

As they walked toward the corner, Mr. Dowling turned a look at the disappearing car, and then said: "Inasmuch as ye did it unto one of the least of these, ye did it unto Christ."

Henry did not feel any pride. There was almost something of the opposite in his heart that prompted the immediate turning of the conversation into another and more welcome channel. He said:

"Are we to trust ourselves to these two young women. How do we know where they will take us?"

"I feel perfectly safe,' replied Mr. Dowling; "let them lead the way and we will follow."

Grace did not turn around, but went right on, and only said:

"You need not tremble. We will not harm you, and we will not let anybody else do so, either. We will be your protectors to-night; at least, I am not going to take you to any place where I have not been before."

They turned another corner, where the accustomed saloon gave out its bright light and poisonous odors.

A young man pushed through the half-screened doorway and staggered out toward the curb. He brushed against Mr. Dowling in his reeling movement and mumbled some meaningless sentences as they passed on.

David Dowling turned to look at him, and a burning desire to rescue him from the precipice just in front of his stumbling steps took possession of his heart.

He paused and then walked on again, as he said to Henry.

"Oh, what a pity that the saloon is permitted to ruin so many of our best young men. That poor fellow, even in his drunkenness, is marked with refinement, and I imagine came from a good home, possibly even religious influence. But what can a man do for him? Nothing, to-night. I would stop and talk to him and do anything to help him. That is the way I feel now, but you might as well talk to a piece of wood or block of stone——"

"Perhaps better," interrupted Henry, "because he would probably only insult you and swear at you."

"Yes, and I wish to Heaven that we could do something to prevent these stations along to road to perdition from transacting their awful business," said Mr. Dowling. "It is a disgrace to our civilization and an outrage upon humanity. These places ruin more young men in one night than any church saves in five years. They are also the greatest enemy of the workingman."

Just then Grace paused at the foot of a dark stairway.

"I have been here before," she said; "don't be afraid. Follow me, and they will be glad to see us, I know."

She went on until she reached the second floor, and rapped upon the door at the head of the stairs.

A woman opened it, and appeared surprised for a moment— not at seeing Grace, because she knew her—but at her companions.

The woman was only about thirty years of age. She carried a careworn and almost discouraged look. In every feature was the mark of trouble deep cut.

The smile had disappeared, evidently never to return.

Oh, the tragedy of such a life!

She had married with brightest prospects of a happy future in a home of her own. The years had come freighted with a great load of struggle and opposition. They had tried hard and honestly to make a living for themselves and their two children, but now her husband was in one of their two rooms, suffering not only the pain physical, but the greatest pangs of the soul also.

Despair was thrusting its blade into his heart. The world was stark. It was midnight all the time He could want himself, but to see his wife and children lack the very necessities of life was more than he could bear. Death would be a relief, but he was not a coward, and suicide did not even suggest itself to him But just what they were to do, he did not know.

Grace in her own way changed the atmosphere of their poor home into a welcome for herself and her friends.

She told them she came simply to inquire about Mr Robbins, and that she wanted him to know her pastor, and also Miss Fielding's brother.

It was a poor substitute for a home and that sacred name ought not to be given to such places. Here human beings could only exist, not live.

The children were asleep together upon an old lounge, and the curtain between the two rooms had been drawn aside, so that the father could be seen, while Grace stood midway between the rooms, and Mr. Dowling had gone to the bedside and asked what the trouble was.

Grace knew the sad story and she helped him tell it.

He had been employed by the street car company to take the place of one of the strikers, and was on his last trip for the night. The car had almost reached the terminus of the road.

Every passenger was out. He and the conductor were alone, when suddenly from a place in the shadow of the electric light a brick was hurled and broke the headlight, while almost at the same instant another had come with better aim, and struck him on the right shoulder.

He had turned the handle almost enough to stop the car when the first crash came, thinking that something had exploded under the car, and was just realizing what had taken place and getting ready to turn on the power again and escape, when the blow, as from a bolt of lightning, paralyzed his arm and side, so that he could not move.

He had almost fallen, but was up again, unable to lift his hand, or do anything, and the car came to a standstill. It all happened so quickly that his companion had not reached the front of the car before it was surrounded by angry men. They seized him and dragged him over the inclosure, and beat him with a half dozen blows at once. They called him "scab" and "tramp" and cursed him, and left him on the hard pavement, more dead than alive.

Help was soon there, and employes and policemen had scattered the strikers after a battle, in which seven had been injured and one man shot by an officer.

They were determined to break the car, and had succeeded in its ruin before they fled. When Mr. Robbins recovered sufficiently, he was carried into his poor home about twelve o'clock at night.

The feelings of his broken-hearted wife, after waiting weeks for employment, could not be described. Death itself would have been a relief for either one, and that night they imagined that even the children would be better off without them.

He said now to Mr. Dowling:

"Don't think that I blame the strikers. I don't know what to say about it. I didn't want to take the job. It was a case of necessity. I must steal, starve, beg or take the risk of their threats. They warned us often enough. They ought to have better pay and shorter hours. They ought not to work seven days in the week. They are right. I would rather be called anything else in the world than a 'scab'. I am on their side, and I felt guilty every turn I gave the electric motor. The company can get men enough— poor sticks, most of them— but they don't ask any odds of the old and faithful employes. I did it for the sake of my wife and babies, and here I am. I wouldn't do it again. I will stand by my fellow workmen. Better for a man to starve than to be a slave."

The man was so earnest and almost excited that Mr. Dowling had to interrupt him in order to get an opportunity to say anything, but "Mr. Robbins," he said, "it certainly cannot be right for one man to pound another. There is no law or liberty in that. That is barbarism, and not Americanism."

"Yes,' said he, "but what will the men do? I step in and run their car for the same old wages or less and then their fam'lies suffer. It is only a change of people, that is all, and the condition remains the same."

Mr. Dowling did not know what to say for an instant but ventured:

(To be continued.)

BUILD MEMORIAL ON SITE OF THEATRE

That is the Plan of Iroquois Memorial Association

THE CORONER'S INQUEST

David Jones on Stand in Connection with Charge of Destroying Evidence

Chicago, January 23— Arthur W. Hull, leader of the Iroquois Memorial Association, announces that he will offer the site of the Iroquois Theatre for the erection of a memorial to the victims of the fire. Mr. Hull refuses to say who authorized him to make the offer. The heirs to the estate of which the site is a part, have agreed to convey it to the association, Mr. Hull says.

JONES ON THE STAND.

David Jones, a mason foreman for the Fuller Construction Company, was the star witness of yesterday's hearing before the coroner. Jones was the man who removed the skylights from the theatre on the day following the fire, and he failed to make a satisfactory explanation. He denied the Fuller people sent him to remove the skylights, but admitted three iron workers went with him, all on the time of the Fuller Company. When asked why he had removed the skylights, he said they were afraid the glass would fall down and hurt somebody on the stage. He admitted that he knew this was a matter for the Police and Fire Departments, but insisted he was not attempting to destroy evidence.

CONSULTED ATTORNEY.

The witness then told how he had visited the Attorney for the Construction Company on the morning following the day of his removal of the skylights. He said he heard the police were after him. He was questioned as to whether he had talked with any official of the Fuller Construction Company between the times he removed the skylight, and when he visited the company's attorney's. Jones finally said he saw Superintendent Lynch. Henry H. Hornby, Chief Electrical Inspector for the city of Chicago, testified that the city had not issued a permit of the "spot" light in the Iroquois Theatre.

The hearing of Will J. Davis and Harry J. Powers, managers of the Iroquois Theatre and Building Commissioner Williams charged with manslaughter, will be continued until January 29.

FIRE-PROOF CURTAINS.

Chicago, January 23 — Joseph L. Ferrell of Philadelphia, has thrown handfuls of excelsior on a hot gas fire in the rooms of the Western Society of Engineers. It smoked, but it did not blaze. Then he placed pine shavings on top of the excelsior, pine splinters on top of them, and piled pine shingles and slabs of pine on the supposedly inflammable material below until he should have had a good sized bonfire started. There were no flames however, except the blue ones from the gas.

Mr. Ferrell had been asked to address the engineers on the subject of fire-proofing wood and cumbustible fabrics. To show that theatre scenery could be made as impervious as wood, the chemist held a piece of canvas in the flame, and while it smoked a little around the edges, there was no flame. Sulphate of aluminum is the composition Mr. Ferrell had used to fireproof the wood and cotton. His plan is to saturate the material under a pressure. Sulphate of aluminum is cheap, costing 3c a hundredweight, and the expense is comparatively small.

SINFUL HABITS IN YOUTH

MAKE NERVOUS, WEAK, DISEASED MEN.

THE RESULT of ignorance and folly in youth, overexertion of mind and body induced by lust and exposure are constantly wrecking the lives and future happiness of thousands of promising young men. Some fade and wither at an early age, at the blossom of manhood, while others are forced to drag out a weary, fruitless and melancholy existence. Others reach matrimony but find no solace or comfort there. The victims are found in all stations of life—the farm, the office, the workshop, the pulpit, the trades and the professions. Nervous Debility and Seminal Weakness are guaranteed cured by our New Method Treatment or No Pay. You run no risk. 25 years in Detroit. Bank security.

CURED WHEN ALL ELSE FAILED. No names used without written consent.

"I am 33 years of age and married. When young I led a gay life. Early indiscretions and later excesses made trouble for me. I became weak and nervous. My kidneys became affected and I feared Bright's Disease. Married Life was unsatisfactory and my home unhappy. I tried everything—all failed till I took treatment from Drs. Kennedy & Kergan. Their New Method built me up mentally, physically and sexually. I feel and act like a man in every respect. They treated me six years ago. They are honest, skillful and responsible financially, so why patronize Quacks and Fakirs when you can be cured by reliable doctors."—W. A. Belton.

CURES GUARANTEED OR NO PAY. Consultation Free—Books Free—Question Blank Free for Home Treatment.

NEW YORK-GRASS VALLEY GOLD MINING CO.

Now producing and shortly to go on a Dividend Paying Basis

Offers the best opportunity for immediate investment or any Mining Stock in the Market. The Company is now installing additional stamps to work in their mill, which will be in operation this week, when the Capacity of the present plant will be increased to upwards of

100 TONS PER DAY

$ $

GOLD BAR

4 1-8 inches long, 2 7-8 inches wide and 1 3-8 inches deep

$ $

The above Gold Bar, weighing 168 ounces, recently sent to the San Francisco mint represents a ten day's run of the New York Grass Valley Mill, and is valued at about $2800.00.

We hold an option on a limited amount of the stock which we can offer for a very short time longer at

30 Cents per Share This is an **Exceptional Opportunity**

To secure a first class stock, and one that will not be available for any length of time, as on the declaration of the first dividend, which is due this month it will be impossible to secure it at anything like present prices.

We anticipate 75 cents to $1.00 per share within six months.

We advise the immediate purchase of New York Grass Valley stock for large and handsome dividends.

We are the authorized agents of this Company, and you will find it greatly to your advantage to deal directly with us.

Write for full particulars KAYE, DeWOLF & CO., Brokers and Financial Agents, 39 41 Cortland Street, N. Y. C.

IS THERE CERTAINTY

IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.
2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.
3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.
4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.
5th—By having now on the dumps ore estimated to be worth over twenty thousand dollars, and all taken from development work.
6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.
7th—By being able to lease a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

ROBERT HARRISON
Manager.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 90 foot shaft on the Martha claim shows a vein of $20.23 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.82 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

PETERBOROUGH BROKERAGE CO., Local Fiscal Agents, Peterborough

Anecdotal.

A Western Congressman was asked if he did not think President Roosevelt certain to be re-elected, barring any "big mistake" the candidate might make. "Yes," was the reply, "but let me tell you that the biggest mistake he possibly could make would be to allow the crops to fail next year."

A friend of Edward MacDowell attended a recital given by a mediocre teacher's pupils, and when he met the American composer he remarked: "I heard one of the pupils, a little girl of eight, play your 'To a Wild Rose.'" The composer sighed dejectedly. "I suppose," MacDowell remarked, "that she pulled it up by the roots."

During the protracted sessions of the Parnell commission, Justice Day habitually sat with closed eyes. It was commonly supposed that his lordship was sleeping, and the late Sir Frank Lockwood, observing that the learned judge was very much awakened by a little tiff between the president and Sir Charles Russell, exclaimed, quite audibly: "This is the dawn of Day!"

Chauncey M. Depew declares that when King Edward, as Prince of Wales, visited the United States, the old Duke of Newcastle used to scan the accounts of expenditure. At the end of one hotel bill he one day found a charge which he couldn't make out. "What's that charge for?" asked the Duke of the hotel proprietor. "For making such a damned fuss," was the immediate reply.

General Nelson A. Miles says that during the Civil War there was one conscription fakir who made thousands of dollars before the authorities restrained him. This rascal would send letters broadcast, wherein he said he would communicate for two dollars a sure means of escaping the conscription. Letters, enclosing two-dollar notes, poured in on him, and in reply to each letter he would send a printed slip reading: "Join the nearest volunteer regiment."

An old negro living in Carrollton was taken ill recently, and called in a physician of his race to prescribe for him. But the old man did not seem to be getting any better, and finally a white physician was called. Soon after arriving, Dr. S—— felt the darkey's pulse for a moment, and then examined his tongue. "Did your other doctor take your temperature?" he asked. "I don't know, sah," he answered, feebly; "I hain't missed anything but my watch as yit, boss."

One of Pere Ollivier's flock, a very beautiful and handsomely dressed woman, coming very late to church one Sunday morning, caused some disturbance and stir among the worshippers by her entrance, and interrupted the flow of eloquence of the worthy father, who, very irritable and easily put out, said: "Madame perhaps waited to take her chocolate before coming to church?" To this, madame, by no means abashed, graciously replied: "Yes, mon pere; and two rolls with it."

It is related that the American commissioner of fine arts at a Paris exposition once wrote to several artists—to Whistler among them—saying that he would be in Paris shortly, and mentioning the time at which, and the place where he would like them to call upon him. Whistler was asked to call at four-thirty precisely. He wrote: "Dear Sir — I have received your letter announcing that you will be in Paris on the —th. I congratulate you. I have never been able and never shall be able to be anywhere at 'four-thirty precisely.' Yours most faithfully, J. McN. Whistler."

By his tact and amiability Sir Thomas Lipton has made thousands of friends during his visit in New York City. One day recently on the "Erin" he was watching the "Shamrock" from the bridge, and his guests, among whom were some pretty girls, were on the deck below, screened from the sun by awnings. Sir Thomas went down to chat with them for a few minutes, and then said: "I think I'll have the awning taken down." "Don't, Sir Thomas," the women all exclaimed in chorus, "we'll roast here." "But," tactfully replied the baronet, "I'm lonely on the bridge, and I miss your pretty faces." No one objected to the awning coming in after that.

Here is one of Lew Dockstader's latest stories: Two brothers had more or less trouble with the boy next door, and hadn't always come out victors. In fact, the boy next door was so much bigger that he seemed to have the best of it invariably. So it wasn't an unusual thing when one of the boys came into the house with a badly bruised eye. Moreover, he was crying when his aunt stopped him in the hall. "Hush, Willie," she said; "you mustn't make any noise." "What—what's the ma-matter?" he asked, between his sobs. "You may disturb your new brother," said his aunt, soothingly. He dried his eyes in a minute. "Have I got a new brother?" he asked. His aunt nodded. "One besides Jim?" She nodded again. "Bully!" he exclaimed. "You're glad of it?" she asked. "You bet!" Willie fairly shouted; "if Jim and me and the new one can't lick that feller next door, we'd better move."

A pretty story, illustrative of the change of feeling which has come over the Irish peasant toward King Edward since the recent royal visit, appears in the English press. Two London journalists, on their way from Dublin to Cork, accosted a shaggy, farmer-looking native at a Queen's County station with the words: "Well, Pat, what do you think of the King of England now?" "King of England, is it?" replied the Irishman, and there stole over his face an inimitable expression of drollery as he went on in a stage whisper: "Sure, avic, ye'll want a viceroy over there, I'm thinkin'. Himself an' herself are not goin' back to yes at all!" An old dame in Galway who had spoken with the King was questioned as to what she thought of his Majesty. She delivered herself of a long and enthusiastic eulogy, to the effect that "Edward the First of Ireland" was "a grand man entirely," closing with the remark that she had "only wan thrifling fault to find with him," and that was that "they keep the poor man so long in the Phaynix Park beyant that they have him talkin' with a strong Dublin accent."

Scribleto—I've got a winner this time. Friend—New historical novel? Scribleto—No; it's a book of excuses for borrowing money. They're all catalogued. Five for every day in the year.—Chicago "Daily News."

Larry—Phwat are yez doin' wid thim dog-biscuit, Pat?

Pat—Sure, the doctor said I needed more animal food.—Philadelphia "Record."

SEWING HINTS.

Always use as fine a thread and needle as the garment will allow.

When threading your needle make the knot on the end broken from the reel.

The rule for frilling is one and a quarter the length of the edge, to be trimmed.

Humor of tha Hour.

The Family Friend—I suppose the baby is the sunshine of your home?

Mama—Sometimes. Frequently he is the storm centre.—Puck.

"To what do you attribute your longevity?" asked the reporter.

"My which?" queried the oldest inhabitant.

"Your longevity," repeated the reporter.

"Never had it. As far as I can remember I ain't never had no sech complaint."—Puck.

Teacher—How far is Philadelphia from Pittsburg?

Tommy—Just about as fur as it kin be. Pittsburg's got de pennant cinched, an' Philadelphia's wid de tail-enders."—Philadelphia Press.

How, says Mary, with many sighs,
Shall I prevent those nasty flighs
From spoiling this, the best of pighs?
A welcome step is heard—"Arighs!
Sighing will never win the prighs:
Success is hers who only trighs
Poison the crust, and each one dighs!"
Now Mary turns, and with surprighs
Reflected in her wondrous eighs
Before her sees dear Cousin Lighs.
—New York Sun.

"If honesty is the best policy——"

"Well?"

"Why, then most politicians ain't politic."—Chicago Evening Post.

Beulah—Did you have a good time at the beach?

Belle—No! It was awfully stupid. Only a few men there?

Yes; I was engaged to the same man the whole summer.—Yonkers Statesman.

Mr. Kidder—Ah, how-der-do, Doctor! If you have a few minutes to spare, I wish you would come over to my house and chloroform my youngest boy.

Dr. Price—What is the matter with the lad?

Mr. Kidder—Oh, his mother wants to comb his hair.—Harper's Bazar.

"Yes," said the dentist, "to insure painless extraction you'll have to take gas, and that's fifty cents extra."

"Oh!" said the farmer. "I guess the old way'll be best; never mind no gas."

"You're a brave man."

"Oh! It ain't me that's got the tooth; It's my wife."—Philadelphia Ledger.

Carrie—I'm sure you misjudge Mr. Sweetser, papa. He is a man of great ambitions. You should hear him tell of the things he is going to do.

Carrie's Papa—And I suppose I'm one of 'em, but I reckon he'll find it harder to accomplish than he fancies it is.—Boston Transcript.

"Isn't it strange," remarked Mrs. Billins to her husband, "that I can never get a good bargain in shoes?"

"You did once," said her husband.

"When was that?"

"When you got me."—Chicago Record-Herald.

"Do you take this woman for better or for worse"—began the clergyman, but before he could proceed further he was interrupted:

"It's too early to tell yet," answered the groom; "you'll have to give me time, sir."—Boston Post.

Witherby—I made the mistake of my life this morning. I told my wife I didn't like her new gown.

Plankington—What, was she angry?

Witherby—Oh, no, it wasn't that; but she wants another.—New Yorker.

Mrs. Church—Do you enjoy going to the theatre?

Mrs. Gotham—No, I can't say that I do; the cars are so frightfully crowded, don't you know? But I always enjoy it after I get there. — Yonkers Statesman.

Camera Fiend—Shall I take you, Miss Passee?

Miss Passee—Oh, you original man! How sudden! — Houston Post.

Knippe—Yes, by making mutual concessions, my wife and I get along very smoothly. For instance, I gave up smoking cigars the other day.

Tucque—What did your wife give up?

Knippe—Oh, she gave up scolding me for indulging in the habit.—Syracuse Herald.

Lawyer—What was the thing that led to your financial downfall? You seemed to be doing a good business.

Bankrupt—I was, but one day I started out to see if I could borrow some money. I found it so easy that I kept on borrowing.—Somerville Journal.

There's a girl in our model apartment
Who practises singing all day;
The neighbors declare her a nuisance,
And wish they could drive her away.
I think that she sings like an angel,
And hope she will stay in the place—
No, pardon me, I'm not her sweetheart,
But simply—the girl in the case.
—New York Sun.

The War Office is waking up. We were scandalously short of "materiel" when the Boer war broke out, but that is now being rectified with all energy. A Parliamentary paper issued yesterday shows that during the past year the War Office entered into the following contract abroad, being presumably unable to obtain at home the article so urgently required :—

Powder puffs.. ....£23

If we are to believe Sir Archibald Hunter's version of the siege of Ladysmith, the order was, no doubt, on behalf of the 4.7 naval guns.—London Star.

A Philadelphia woman was recently breaking in a new servant, a Swedish girl, who had not been very long in this country. She was fortunate enough to own a house which had a bath-room for the exclusive use of the servants.

"Now, Freda," she said, as she pointed out this room, "this is to be your own bath room. There's a tub and I want you to use it often."

"Vat! Git in dat place?"

"Why, certainly."

"Vit water in it?"

"Of course."

"Vy, ma'am, if I vas to git in dere I would git wet all ofer; an' I vas nefer vet all ofer in my life."—Philadelphia Ledger.

DO NOT LIKE THE BRITISH

Chumbi Valley of Sikkim, British India, January 22—The general staff of the British expedition to Thibet, accompanied by a mountain battery, has returned to Chumbi. They report that Colonel Younghusband, with two officers, visited the Thibetan camp at Guru, and met with an insolent reception. Up to the present there has been no hostile act on the part of the Thibetans.

There are some first class bargains to be had in some new and second hand pianos and organs, at W. G. Landreau's, 190 Charlotte street, agent for Heintzman & Co., Toronto. Call and see for yourself.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 29th, 1903

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 15 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peake Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years: the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same pr $100 will be paid for any case that it w not permanently cure.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.65 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $3.75 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.66 and $79.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet further it would cut the present tunnel intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1879, and am now the manager and superintendent of the Imperial mine in that district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,350 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 20th, 1902, and partial payments have since been made. The Company is entitled to $4.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $165,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 365-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 1-…-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully.

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS. Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS. Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS. Cincinnati, O. Prescott, Ariz., 1-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS. Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

A FORTUNE AWAITS YOU

INVEST NOW IN THE

North Carolina Gold Fields

BUY

Redman Mining & Milling Co's Stock

AT 50 CENTS PER SHARE

DIVIDENDS IN SIGHT

Three developed mines with more than $500,000.00 worth of ore on the dumps and an inexhaustible supply in the mines, assaying as high as $100.00 per ton, with an actual mill test of seven tons running

$24.65 PER TON IN GOLD

One mill completed ready for operation and another being built. One and one-half miles from the main line of the Southern Railroad, cheap labor, cheap fuel. Plenty of water and a climate allowing operations 365 days per annum, are a few of the advantages that go to make this one of the most valuable mining properties today in the country.

Send for free copy of the "Gold Nugget" and learn something about the North Carolina Gold Fields that produced all the gold in this country before '49 and that are today attracting the attention of the world.

Rodman Mining and Milling Company.

Peterborough.

Individualities.

Sir Frederick Treves, the famous English surgeon, who has just retired, established a record in performing one thousand consecutive operations for appendicitis without a death.

Great interest has been aroused in London by the announcement that the Marchese Karlo di Rudini, son of the former Italian Premier, is to marry Dora Labouchere, daughter of Henry Labouchere, the noted editor of "Truth."

During his lifetime Gordon McKay, the wealthy inventor of the machine that revolutionized shoemaking, who died at Newport lately, deeded all his property, valued at four millions of dollars, to Harvard University, retaining an income for life.

Mark Twain and his wife have leased the Villa Paginiano, which belonged originally to the sculptor Baccio Bandinelli, a contemporary and rival of Michael Angelo. The villa is pleasantly located about halfway between Florence and Fiesole, and connected with the modern town and the old Etruscan stronghold by a line of electric cars.

That much-quoted superstition, "three times a bridesmaid never a bride," seems to have no terrors for Alice Roosevelt, who has accepted an invitation to serve in this capacity at the approaching marriage of Miss Lilia McCauley and Mr. Wolcott Tuckerman, which will take place in Washington, D.C., November 25. Miss Roosevelt was a bridesmaid at the wedding of Miss Ruth Pruyn and Mr. David M. Goodrich, in Albany, last June, and also at the marriage of Miss Madeline Jackson to Mr. George C. Lee, jr., in Boston, several years ago.

Pope Pius has appointed Mgr. Merry del Val to be Papal secretary of state. It is reported that the nomination, however, will not be made officially until the next consistory, when the monsignor will also be made a cardinal. Mgr. Del Val is under forty years of age, and is descended from one of Spain's noblest families. His mother was an Englishwoman, and he was born in England, receiving his early education from the Jesuit fathers in Stonyhurst College. His higher education was received in the Academy of Nobles, in Rome, the institution of which he is president.

New York clubmen are going in for politics with a vengeance. It is evidently the intention of both Democratic and Republican parties to have representative men as aldermen. Eddie Crowninshield, who is a member of the Knickerbocker Club, one of the Rough Riders, and a leading spirit in a great many social and other enterprises, is to run on the Tammany ticket for alderman in the "kid-glove" district. In the Republican camp, there is Beverley R. Robinson, son of Dr. Beverley Robinson, who is to be the candidate in the twenty-ninth aldermanic district, which comprises the territory on Fifth avenue, between Fifty-second and Fifty-fourth streets.

Helen Keller has just begun her senior year at Radcliffe. Her studies this year will consist of Professor Kittredge's Shakespearian course, Dr. Neilson's English literature, Professor Moore's course in Plautus, Cicero and Lucretius, and Professor Morgan and Dr. Rand's course in Latin, which covers the annals of Tacitus, the satires and epistles of Horace, and selections from Catullus. Up to the present time Miss Keller has passed with credit all her college examinations. When she has completed this year's work, as outlined, she will have accomplished more in the way of scholarship than any other person who has been handicapped with the loss of sight, hearing and speech.

When Eleanor Calhoun, the California actress, was married, a few months ago, to Lazarovitch, the Servian leader, she announced to her friends that she might some day return to the stage. She has now, however, abandoned all such ambitions, and has thrown herself enthusiastically into assisting her husband with his political writings and into looking after his three children. It will be remembered that Lazarovitch, according to his own statement, was approached by certain Servians prior to the massacre of King Alexander and Queen Draga, and asked to accept the throne as next in line of succession should the plot prosper. Lazarovitch, however, having no desire to rule the kingdom, not only refused to be a candidate, but left the country. It was then he came to London, met the California actress, and married her.

When the Duke of Devonshire and the present Duke of Manchester's grandfather were young they loved Louisa, daughter of the Count d'Alten of Hanover. Devonshire, then known as Lord Hartington, was a laggard in his love affairs, as he has been in everything else, and so the lady became Duchess of Manchester in 1852, and duchess she remained for forty years. But, though she married the other man, her devotion to Lord Hartington and his devotion to her were famous. She counseled him in all the important affairs of his public life, spurred him on, and was his nearest friend. Nobody thought of inviting one without the other. At last Manchester died, Hartington himself shortly afterward succeeded to a dukedom, and in 1892 the widow, still one of the beautiful women of England, became a bride and a duchess again.

Inexcusable Stupidity.

"I noticed," said the druggist to his assistant, "that a gentleman came in with a prescription, and that you took it and gave him the stuff in about three minutes. What do you mean by that? When a prescription for salt and water or peppermint and cough syrup is handed to you, you must look at it doubtfully, as if it were very hard to make up. Then you must bring it to me, and we will both read it and shake our heads. After that you go back to the customer and ask him if he wants it to-day. When he says he does, you answer that you'll make a special effort. A patient appreciates a prescription that there has been so much trouble over, and when he takes it he derives some benefit from it. But don't you do any more of that three-minute prescription business, my boy, if you want to become a first-class druggist."

A Small Favor.

Farmer (to lady)—Have you seen my bull? Lady—Mercy no! Where is he? Farmer—He got loose. And if you should see him, will you please keep on that there red coat and run this way?—"Life."

Facial massage is a popular treatment for wrinkles. I know a better—contentment.

The "summer girl," like some extravagances, is not always gold because she glitters.

The Test of Respectability.

The New York "Evening Post" points out the fact that Carlyle's favorite definition of respectability, a "gigman," seems obsolete in the light of modern developments. In place of the old standard "he keeps a gig," we have substituted "he has a steam yacht." Most amusingly was this latter-day measure of wealth brought out in the letters from Paris of the promoter in search of an underwriter. Question arose as to the financial responsibility of one ready subscriber (apparently without ready cash), and the astute American applied himself to the task of rating the fellow. But how did he go to work? Did he go to the banks, the agencies, the Bourse? No, he simply observed the man's manner of life. When he discovered that the backward underwriter kept a yacht, his doubts were instantly relieved, and he cabled the joyful news to New York. Evidently, we say, in the lexicons of today we must look to see the entry: "Gigman; modern, yachtsman."

Privileged.

The Honorable Colonel William J. Bryan appears to believe that the constitutional provision regarding free speech was inserted for his especial benefit.

Fired.

"I understand Blankley was ejected from Jones's house, where he went to pay a visit."

"Yes, he was an old flame of Mrs. Jones, and Jones put him out."

Notes Sent to Teacher.

These notes are declared by the Chicago "Inter Ocean" to be authentic:

Teacher—What shall I do mit Charley! Me and my man can't nothing make of him. When we want to lick der little imp he gets the bed under where we can't reach for him and must put a hook on her bedroom door to hold him for his licking. Please soak him in school about as often as you got time.

Teacher—If Louis is bad please lick him until his eyes are blue. He is very stubborn. He has a good deal of the mule in him. He takes after his father.

Teacher—I dink you are a fool. You want my boy to read when he don't no alferbits. Please teach him some.

Miss Brown—You must stop teach my Lizzie fiscal torture she needs yet reading and figors mit sums more as that, if I want her to do jumpin I can make her jump.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc., etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully."

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years: the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price $100 will be paid for any case that it w no permanently cure

The Home Savings and Loan Co., Ltd

Church Street, Toronto, Ont.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
AND
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1500 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS,

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a smal block of stock will be sold at 15 cents per share. When machinery is paid fo no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

BRONCHITIS

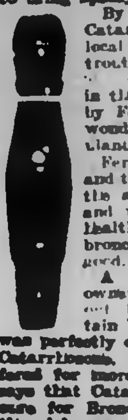
Scientifically Treated

The best authorities agree that bronchitis is treated most scientifically by Catarrhozone, which goes right to the root of the trouble

Bronchitis can be treated successfully only by a remedy carried direct to the affected parts along with the air breathed.

Catarrhozone is a vegetable antiseptic and is inhaled at the mouth, and after passing through all the air passages of the throat, bronchial tubes and lungs, is exhaled through the nose.

The healing vapor of Catarrhozone goes wherever the air you breathe goes, and reaches every part that is affected. No matter how deep-seated the bronchial irritation may be, Catarrhozone is sure to reach it. Catarrhozone protects and heals the mucous membrane, stops the cough, heals up the sores, and is guaranteed to bring speedy relief and sure cure.



By means of the inhaler Catarrhozone treats the local symptoms of bronchial trouble very effectually. Poisons and impurities in the blood are driven off by Ferrozone, which is a wonderful tonic and stimulant for the entire system.

Ferrozone is a muscle and tissue builder, increases the appetite aids digestion and makes the body so healthy and strong that bronchitis goes away for good.

A prominent steamboat owner, well known throughout Eastern Ontario, Captain Dunlop, of Kingston, was perfectly cured of Bronchitis by Catarrhozone. The Captain had suffered for more than 20 years, and says that Catarrhozone is the best cure for Bronchitis on the face of the globe.

Mr. A. J. Calloun, a prominent citizen of Neepawa, Manitoba, speaks very appreciatively of Catarrhozone as a specific for Bronchitis, and states that his wife could not get along without it.

Everyone that has used Catarrhozone is satisfied that it is superior to all other remedies. It is delightful to inhale, simple and convenient to use, and relieves from the first breath taken through the inhaler.

Better try Catarrhozone. All druggists sell and recommend it. Complete outfit, price $1.00; trial size, 25c. By mail from N. C. Polson & Co., Kingston, Ont.

A VERY SAD DEATH

Miss Etta Beatrice Garbutt, of Smith, Passes Away

It is with sincere sorrow that we chronicle the demise of Miss Etta Beatrice, only daughter of Mr. Robert Garbutt, Smith, who passed away on Friday last, at the early age of 18 years and ten months. The deceased had been in poor health for some months, and her demise was not unexpected. She was greatly beloved by all her acquaintances.

Interment took place yesterday in the Lakefield cemetery. The Times extends its sincere sympathy to the bereaved family.

A WORTHY OBJECT —

Is the Lady Minto College Hospital System—Introduced by Her Excellency Lady Minto

The chief object of the Lady Minto College Hospital system, introduced, as the name implies, by Her Excellency Lady Minto, is for the purpose of providing hospital centers in places where no hospitals exist, and where there is need for institutions of this nature. It is proposed to establish hospitals in such places as Shoal Lake, Swan River and Dauphin, in Manitoba; Fort William and Thessalon in Ontario; Regina and Yorkton in the Northwest, and provide medical care and comfort for the sick and the injured.

The concert to be given in the Market Building on February 2nd should be largely patronized by those who desire the welfare and happiness of hundreds and thousands, who are far removed from the cities and towns where hospitals exist.

DEATH OF CAPT. CRANDELL

Well-Known Citizen of Lindsay Called Suddenly on Friday Morning

Death came suddenly on Friday morning to Captain George Crandell of Lindsay, one of the oldest residents, and perhaps more widely known than any other man in the Midland district. The deceased had been out shovelling snow and feeling a weak spell coming on, staggered into the house and sat down. Dr. Shier was sent for, but before he arrived the old gentleman expired. His heart had been weak for some time, and the fatigue of shovelling brought on a fatal attack. Captain Crandell had been identified with navigation on the inland waters for over half a century. He had served as Reeve, and always interested himself to promote the interests of Lindsay and the county of Victoria generally. A widow and seven children survive.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporter on Their Rounds

—The County Council will meet to-morrow.

—The Board of Health are booked to meet this afternoon.

—Hear Frank Blatchford, of Toronto, the favorite violinist.

—Giddon's orchestra will play at the Albany Club rooms to-night.

—There was a blank at the Police Court on Saturday.

—A blazing chimney on Antrim street gave the firemen a run on Saturday afternoon.

—Don't miss the treat of the season—S. Homer Eaton, entertainer of Boston, on his costume characters.

—The annual Board meeting of the Y. W. C. A. will be held to-day at 3.30 p.m. The members of the Board are asked to be present as far as possible.

—Mr. John Findlay, the Liberal candidate, has already visited nearly every part of the riding, and reports very encouraging prospects.

—Chief Rozzel desires to have the people residing or occupying premises within the fire limits to understand that the snow by-law will be enforced.

—Lakefield News: Mr. Ernest Mann, of Peterborough, and Mr. W. H. Down, were in Pt. Perry last week looking after horses. They succeeded in purchasing a team of hackneys. They are the finest ever brought into this part of the country, weighing over 2800 pounds.

The Little Petes were successful in defeating the Little Shamrocks on Rubidge street rink Saturday afternoon. The score was 4—3. The four goals were scored two by Brick White and two by Hagle Phelan. The half-time score was 4—2 in favor of Little Petes. Harold White refereed the game.

—Lindsay Post: Our citizens were shocked this morning by news of the very sudden death of Capt. George Crandell, one of the oldest residents of the town, which occurred about 9 o'clock. The deceased had been out shovelling snow and feeling a weak spell coming on, staggered into the house and sat down. Dr. Shier was sent for but before he arrived the old gentleman had expired. His heart had been weak for some time, and the fatigue of shovelling brought on a fatal attack.

Laid at Rest

The funeral of the late Mr. James Pilling whose sudden demise on Thursday last came with a great shock to his many friends in Peterborough, took place on Saturday afternoon to the Little Lake cemetery. The service at the grave was conducted by Rev. A. H. Brace of the Park street Baptist church. The deceased suffered a paralytic stroke on Thursday, which carried him off. He was only 53 years of age, and leaves a wife and eight children, seven of whom are sons, to mourn the loss of a kind and loving husband and father.

—Hear Mr. Firth, the baritone singer and composer, in his own songs, at the concert Tuesday, February 2nd.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mrs. Hojah will be at home at St. Luke's Rectory on Fridays.

—Mr. Wm. Fair, of Millbrook, father of Mr. Robert Fair, was in town Saturday.

—Mr. G. Perks, of the Bank of Commerce staff, has been moved to the Toronto office.

—Mr. John Findlay, Liberal candidate for East Peterborough, was in town on Saturday and gave The Times a call.

—The many friends of Mr. "Jack" Rowe will be sorry to hear he is confined to the Nicholls Hospital with scarlet fever.

—Mr. Fred Kennedy, who has been taking a special course at the Ontario Agricultural College, Guelph, has returned home.

Norwood News: Miss Lundy, of Peterborough, has been visiting Mrs. Baldwin of Roxborough street, will leave town early next week.

—Rev. Henry Wilson, of New York, Rev. Isaac Hess, of South China, and Pastor Salmon, of Toronto, are in town for the purpose of holding special services in Bethany Tabernacle.

—The many friends of Mr. Archie Kidd the efficient Deputy Collector of Customs, will regret to learn that he was stricken with pneumonia on Wednesday last, and was seriously ill for a few days. He is now, we are pleased to say, gradually recovering.

—Saturday Night: A very much admired visitor in town is Miss Ethel Walton, of Peterborough. Miss Walton is at present the guest of her sister, Mrs. Albert Armstrong, Farnham avenue, Deer Park, and will receive with Mrs. Armstrong on the forth Thursday of this month.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 20th, 1903

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,

MR. JOHN WOOD,
Foxley Station, P.E.I.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same pr. $100 will be paid for any case that it w not permanently cure.

Anecdotal.

An old Scotchwoman when advised by her minister to take snuff to keep herself awake during the sermon, replied: "Why dinna ye put the snuff in the sermon, mon?"

A well known landscape painter was busy "dashing in" the colors of a sunset in the country. The tints were hurriedly conveyed from tube to palette, and from palette to canvas, for the artist was anxious to catch the effect. A rustic standing by observed the operation for a little while, and then remarked: "Ah, you be a-painting two pictures at once. That's clever." He paused a moment, and blurted out: "I like that picture best—the one you've got your thumb through!"

According to the "Scottish American," the following was overheard in a London railway refreshment room: An Aberdeen man, noting a woman eating an ice, said to the waiter: "Hi, man, gi'e me yin o' thae." Being supplied, he took a spoonful, and made a wry face. "I'm dootin' it's a bit frost-bitten, mister," said he. "Oh, no, sir," remarked the waiter. "It's an ice." "Gosh! Do they eat ice in London?" asked the wondering Aberdonian. "Man, we slide an' skate on't in Aberdeen!"

The quickness and felicity of Hon. William M. Evarts in the line of repartee is pleasantly illustrated anew by President Timothy Dwight in the following story from "Memories of Yale Life and Men:" On one occasion, writes President Dwight, at one of our Yale commencement dinners, I had the duty, as the presiding officer, of introducing the speakers. In performing this duty with reference to Mr. Evarts, I said, in allusion to the well-known length of his sentences in public address: "Mr. Evarts will now give us a single sentence." He rose and instantly replied: "It will be a life sentence."

An instructor at Cornell University, who was one of Dr. Goldwin Smith's pupils when the latter was a professor there, says: "Dr. Smith was describing to us one morning the difficulty of making young men understand things quite unfamiliar to them. He said there was once a blind youth to whom he tried for a long time to explain the nature of light. He made this subject of light as clear as he could; it seemed to him that he had explained it perfectly, but at the end the young blind man said: 'Then I am to understand, sir, am I not, that light is composed of very much the same material as sugar?'"

Mamma—Ethel, dear, how can you think of marrying Mr. Wright—a man who has neither position nor money? Ethel—Dear mamma, I would rather be Wright than be President.

QUIT COFFEE

Said the Great German Specialist

It disappoints some people to be told that coffee causes the disease. But it is best to look squarely at facts and set the face towards health for that's more fun than anything else anyhow. A Cincinnati man consulted a Berlin physician on nervous diseases and says:

"Four years ago I was an habitual coffee drinker, having used it for 25 years and being naturally of a nervous temperament I became almost a nervous wreck, suffering greatly from insomnia, almost constantly constipated and weighing only 128 pounds.

"I consulted physicians and took medicine all the time, but had no relief. About three years and a half ago I went abroad, and while in Berlin heard frequently of a great physician, Prof. Mendel, an authority on nervous trouble, so I resolved to consult him.

"Prof. Mendel surprised me very much by asking at once if I was a coffee drinker and on my telling him I used it two or three times a day he said, 'It is poison.' After carefully examining me he told me there was nothing the matter with me whatever but what could be entirely cured in 30 days by quitting coffee and other stimulants alone and dieting.

"I had a hard time following his advice I did not know what to do until I came home and told my wife who got some Postum. We tried it at first but did not like it; then we went over the directions on the package together and found we had not boiled it long enough. That was the beginning of the end of my trouble for the Postum was delicious after that and I drank it regularly and it helped from the start.

"In a very short time I began to feel much better and in the last three years I haven't been absent from business one hour on account of ill health for my health is fine now. I have a good appetite, sleep well and weigh 175 pounds." Name given by Postum Co., Battle Creek, Mich.

Any nervous person who drinks coffee will feel better from 10 days use of Postum in place of coffee. Trial easily proves this. There's a reason.

Look in each package for a copy of the famous little book, "The Road to Wellville."

A Nervous Woman

Will often feel compelled to stop the clock whose ticking seems unbearable to her. In such a nervous condition the woman needs a building up of the entire system. It is useless to attempt the cure of the nerves while the cause of the nervousness remains uncured. A very common cause of nervousness in women is a diseased condition of the delicate womanly organism.

Dr. Pierce's Favorite Prescription cures womanly diseases and the nervousness which they cause. It changes irregularity to regularity, dries the drains which weaken women, heals inflammation and ulceration and cures female weakness. It is a perfect tonic and nervine, tranquilizing the nerves, promoting the appetite and inducing refreshing sleep.

"I was so nervous I had to have some one by my side all the time, even in the daytime, and I could hardly eat anything," writes Mrs. Selma Erickson, of 496 Rice Street, St. Paul, Minn. "I quit all the doctors and began taking your medicines; I gained right along. I am as well and feel as good as ever."

$500 REWARD! FOR WOMEN WHO CANNOT BE CURED.

Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors and makers of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

WORLD'S DISPENSARY MEDICAL ASSOCIATION, Proprietors, Buffalo, N. Y.

For the Farmer.

Beets, turnips and carrots can be kept in bins in the barn or cellar. A layer of carrots and a layer of dry oats or corn, or even of sand, will dry them at an even temperature and prevent sudden freezing and thawing. The same applies to potatoes or other root crops. Cold does not do them as much damage as warmth. It is when they thaw suddenly that they begin to decay.

Cows That Are Thieves.

"If the 'man behind the cow' in Kansas would do his part no unprofitable animal would masquerade under the fictitious appellation of 'milch cow,' and she would either go to the butcher's block or be made to return a profit by more intelligent care and management," says Secretary Coburn in the last quarterly report of the Kansas Board of Agriculture. "It passeth understanding why theft by a cow should be tolerated more than theft by a human. In effect the result to the loser in either case is the same. Our Government has found it wisdom to study and establish far-reaching methods for the detection and the repression of the latter; and by the same token why should our farmers and dairymen be less vigilant is regard to this possible proclivity in their cows—beasts described as dumb, yet outwitting their owners? So long as cows of this class are permitted in the dairy herd, so long will there be dissatisfaction and failure. Improvement is the route to success, whether by breeding, better management, or other ways, and intelligence in our cowmen is the power that will force advancement in the right direction. Dairying has come to be one of the most important factors in Kansas agriculture, and, rightly conducted, is one of the surest moneymakers of our varied industries. It is incomparably more rational than any one-crop system, or even general farming, as its practice tends to rotation of crops, maintains or increases the fertility of land, and affords steady employment with returns remunerative according to the brains mixed with the business."

More Cannibalism.

If Edward Everett Hale,
I really do not know:
But Henrietta Crosman
And Harriet Beecher Stowe!
—"Life."

First Farmer—Did they hev fire-escapes at the hotel where ye slept, Zeke? Second Farmer—No, but it was the most eckernomical tavern I ever seen. First Farmer—In what way, Zeke? Second Farmer—Why, they had a rope hanging in every room, so that you could commit suicide without wastin' the gas.—Philadelphia "Evening Telegraph."

THE COREAN SITUATION IS VERY ALARMING

American Minister at Seoul Tells of Fresh Outbreaks--Cables That the Japanese Are Objects of Attack in Many Places.

St. Petersburg, Jan 26—As we have reached another acute crisis and the situation is arousing greater anxiety being more critical than on any previous occasion I again appealed to the same general, whose surroundings, as previously stated, are such as to put him in a position to reflect the views prevailing among the immediately dominating spirits in the entourage of the emperor.

"There is nothing satisfactory in the reply of Japan," he said. "That is known to us all. In my opinion, no amount of petty concessions, such as we can offer to Japan can alter the main points at issue and upon which there can be no compromise. No amount of beating about the bush avails anything. Russia needs and demands Manchuria as her own, and cannot admit Japan in the domination and supremacy in her sphere of interests, or whatever you like to call it, in Corea.

LIKE PRIZE FIGHTERS.

"The position of Japan and Russia at the present moment is like that of a couple of prize fighters stripped in the arena ready to fight. Each knows it will be a hard one and each knows he is to be badly punished. Even the stronger man, who feels he is going to win is afraid to draw the first blood. They do not even know whether some onlookers are not going to break down the ropes and mix in the melee."

When I asked if the ratification of the Chinese treaty for the "open door" in Manchuria had not made things awkward for Russia his face assumed a studied expression. He apparently was struck with the question, and replied,

"Surely no one can be simple enough to suppose that Russia has said her last word on that question."

HAND HAS BEEN FORCED.

This is exactly what I have heard in other directions—namely, that Russia had her hand forced and had bowed to circumstances, but China had not heard the last of the matter by any means.

M. Bezobrazoff, the new secretary of State and a prominent member of the Far East Council, has left here for the South of France. According to a letter which reached me M. Bezobrazoff on his journey gave an expression of opinion that if war did not break out at once it would surely do so within six months time, and M. Bezobrazoff is an out-and-out Admiral Alexieff man. He also stated that neither the Czar nor the people wanted war, but the crisis being inevitable, was being forced by powerful military interests.

The New Assessment Bill

Provisions of New Act--The Way Franchise Holding Companies are Dealt With

Toronto, Jan. 26—The new provincial assessment bill as prepared by Attorney General Gibson, and embodying the principles agreed upon by the special assessment committee of the legislature, aims to bring about many important changes in assessment.

An important feature will be in regard to franchise-holding corporations. The earnings of telephone and street railway companies in towns and cities will be taxed, and a special machinery provided for obtaining sworn returns.

In other municipalities telephone companies will be taxed on their wires as such, and not upon an assessment on the wires. The road bed, rails, land and real property of steam railways will come in for taxation.

The house tax by which householders were to be taxed upon rental will be abandoned.

A business tax is to supersede the personality and income tax. Every class of business will be taxed upon an assessment, though no tax will be levied when the assessment is less than $100. For merchants generally the tax will be upon 25 per cent. of the assessed value. This tax will reach all professional men.

A special provision will be made to get at departmental stores by increasing the percentage of the real estate upon which they are taxed. Distillers will be taxed on 125 per cent of their realty assessment, and brewers upon 100 per cent. for the business tax, in addition to their tax upon real estate.

The bill will be placed for the committee next Tuesday, and finally passed upon before being submitted to the House.

ADVISE THE PREACHER AGAINST WEDDING

Church Members Talk with Pastor on his Attentions to Brooklyn Girl

New York, Jan. 26.—Rumors have become so insistent that the attentions of the Rev. Howard S. Dawson, pastor of the Ainslie Street Presbyterian Church, of that members of his congregation have Brooklyn, to Miss Minnie Edsall, seventeen years old, a teacher in his Sunday school, had resulted in an engagement gone to him to advise against such a marriage.

Miss Edsall is the daughter of Chas. Edsall, a linotyper, of No. 161 Ainslie street and has not yet finished her course in the Girls' High School. For nearly six months Dr. Dawson, who is a bachelor of thirty-five, has been a frequent caller at her home, has attended lectures with her, has accompanied her on skating parties, and has occasionally taken her to prayer meetings.

Those who have interested themselves in Dr. Dawson's choice of a wife enough to confer with him on the question have told him that the interests of the church demanded that he marry a woman of more mature age.

Others while declaring Miss Edsall to be a most estimable young lady, have said that a wife nearer his equal in education would be more suitable. Still others have declared that the great disparity in the ages would cause such a sensation should the marriage take place that the reputation of the church would be injured.

Dr. Dawson, when seen by a reporter yesterday, said:

"We are not engaged. I admit that I have been paying more attention to this young lady than to other young ladies in my congregation, but there is yet nothing in the nature of an engagement between us. She is only a girl of seventeen, and of course there is a great difference in our ages which would be the main objection to our marriage at present if there should be one.

"As I said, she is comparatively young in years but she is fast growing older. It is not for me to state what the outcome of our relations will be.

"Members of my congregation have broached the subject to me, and have said that they felt that my marriage to a woman so young would injure the church. I admit that there is much in what they say, but I have told them not to worry."

Miss Edsall was out of town yesterday. Her mother denied that her daughter was engaged to the clergyman.

PARKS IS DYING

New York, January 26—Sam Parks, now in Sing Sing, has undergone an operation on his right hand. He became so weak from the effects of it that the prison physicians believe he has only a short time to live. Parks has been failing ever since he entered the prison. The operation performed was to remove a dead bone. A year ago Parks hit a man on the jaw and broke the bone in his hand.

DUKE BREAKS THE BANK

New York, January 26—A despatch to the Sun from Nice says, The Russian Grand Duke Alexis has broken the Bank at Monte Carlo, winning about 150,000 in half an hour playing roulette.

WAS BOILED TO DEATH

Vancouver, B.C., January 26—James McLennan, while working near a vat of scalding water used for loosening bark on logs in the British Columbia Manufacturers box factory on Lulu Island fell into the vat, and before he could be extricated, he was boiled to death.

A SUCCESSFUL YEAR

Toronto Savings and Loan Company's Annual Report

We congratulate the officers and stockholders of the Toronto Loan and Sav- [illegible] of the Toronto Savings and Loan Company on the result of the year's operations as set forth in the financial statement to be found on another column. The gross earnings for the year amounted to $162,410.56, and the net profit for the year was $92,989.83, which is 9.30 per cent of the paid up capital. The amount carried forward from last year was $18,[illegible], making a total of $111,140.50 for distribution. Of this amount $60,000 was paid during the year in four quarterly dividends. There was added to the Reserve Fund $30,000 and carried forward to profit and loss, $21,140.50. The reserve fund is increased by the above addition to $400,000, which is nearly 40 per cent. of the paid up capital of one million dollars.

NEW LABOR UNION

Socialists Contemplate an Alliance With the [illegible]

Chicago, Jan. 26—There is forming in Chicago a new central labor body, to rival the Federation of Labor, and its promoters hope to spread the movement all over the United States and Canada. The organization will be under the wing of the American Labor Union, the western organization, until it is strong enough to strike out for itself.

Nineteen delegates from 18 local unions will meet next Sunday to perfect the organization. National officers of the American Labor union will be present. The new organization will be socialistic in character and will offer a haven for all dissatisfied labor unions. The Socialists are expected to turn their full strength to the new organization.

TO FIGHT THE UNIONS

German Employers Have Organized to Fight The Strikers

Berlin January 26—A compact organization of all employing manufacturers in Germany for the purpose of winning strikes is the sensational and unexpected result of the Crimmitschau textile fight which ended suddenly yesterday in the unconditional surrender of 8,000 strikers after five months stand. The defeat of the workers is a hard blow to the social democracy which engineered the strike and up to Monday night strongly opposed conciliation. Supported by manufacturers all over the Empire, the Crimmitschau employers were prepared to remain closed down indefinitely. When the strikers realized the hopelessness of combating such odds, they gave up. This success of the mutual support scheme has led to initial steps for a general combination of manufacturers who are confident of defeating any strike by similar means.

DOOM OF WESTERN RACE

PROF. H. J. DAVENPORT PREDICTS EXTINCTION OF CIVILIZATION

Difficulties Between Russia and Japan are Harbingers of Death Grapple

Chicago, Jan. 26—"The hordes of Asia threaten the extinction of western races and western civilization," was the keynote of a lecture which Professor H. J. Davenport, of the University of Chicago delivered yesterday morning before his class in political economy. The present difficulties between Russian and Japan are, according to the instructor, but the harbingers of a "death grapple" between the civilizations and races of the east. He asserts that the events now taking place in the Orient constitute the first chapter in the fulfillment of a prophecy which he made several years ago when teaching in another institution and which he renewed yesterday.

Russia's Menace to Europe.

"With Russia's increase of [illegible] in numbers each year, with the spread of its population over Russian Asia, and with its warlike and imperial traditions, one understands the reason for the fear which reaches over western Europe," he said. "When Russia has perfected its Siberian railway system and when it has established its back door basis of supplies in the civilization and workshops of America, its population may again bestir itself and roll westward just as they did 2,000 years ago.

"The contest of civilization against the Asiatic hordes will hardly be one of arms but a struggle for the survival of the fitness of living. Western gunboats have foolishly broken down the barriers about the Chinese and have forced western civilization on Asia.

Predicts Industrial War.

The present fear of a general war in which all European countries and the United States will be entangled, indicates that the Caucasian will find himself engaged in an industrial death grapple with a people of marvelous industrial efficiency of swarming productive fertility and of ability, through centuries of poverty, to thrive upon the minimum of existence.

The west has but small reason to disturb the Asiatic hive. The marvelous reproductive powers of the Chinese will threaten the very existence of occidental races. When the Chinese swarm over the world western civilization may endure, but western races will hardly be able to do so.

"The outcome of the present difficulties in the far east, whatever that may be, can scarcely operate to do more than postpone the consummation of these results."

STATIONERY

When in need of anything in the line of commercial stationery, visiting cards, etc., leave your order at the Times job department. Workmanship unexcelled.

—The Winnipeg Free Press says Miss Flora Higgins, a Toronto contralto, displayed a well trained deep contralto voice. Plan opens at Edmison's drug store Friday morning at 10 o'clock.

ATLANTIC COAST ICEBOUND IN WINTER

Ridiculous Ignorance of Canada Shown in English Geographies

MAINE PART OF CANADA

Geographer Ignorant of the Ashburton Treaty--Transvaal's Reply to Seddon and Deakin

London, January 26—The following selections are from the geography books used in the English schools:—"Manitoba is treeless." "Halifax has almost all the essentials of a successful harbor." "The chief States at present are Quebec, Maine and New Brunswick." "The Victoria bridge is over 3,000 yards long, and connects Montreal with the mainland to the south." "The Niagara Suspension bridge has two storeys." "The Atlantic coast is the most useful at present for several reasons, and has splendid communication inland by railways. But it has one great drawback, most of it is frozen up in winter." "Ottawa, though quite a small town, is a suitable place for the capital of the Dominion."

REPLY OF THE TRANSVAAL.

The Transvaal Government, in its reply to the Premiers of Australia and New Zealand said that, owing to the inadequacy of the local labor supply, the differences of conditions in the respective Colonies, and the restrictions imposed on the importation of labor. It considers the importation of colored labor fully justified.

THE BLACK WATCH BAND.

Lord Roberts, in an interview by Manager Orr, of the Toronto Exhibition, expressed sympathy with the object of Dr. Orr's visit, and said that permission for the Black Watch Band to visit Canada only awaited the usual sanction of the King in such matters.

London, Jan. 26—A chemist named Brotherton claims to have discovered in the course of some experiments in the treatment of metals with a view to finding a method of imparting to common substances an attractive, untarnishable surface, a new poison of so deadly a character that a single whiff of it would cause death and leave no trace. Mr. Brotherton, speaking of his discovery, said:

"The possibility of manufacturing such a poison has been long known to chemists.

"It is in the form of an arsenious gas but no other investigator has, so far as known, discovered how to make it. I hit upon it entirely by accident, and might easily have lost my life in the discovery.

"As it was the only sufferer was a favorite cat, which was very fond of sitting at my bench when I was at work. She took a single breath of the gas and died instantly."

Mr. Brotherton has been besieged by inquiries and some of these have been of a character to suggest that the possession of this deadly secret is coveted by a large number of persons who are apparently of good social status.

Effect of Food Tax.

Dr. Cunningham, addressing the Ely Chamber of Commerce, said food taxation would widen the basis of taxation, reduce the taxation of land, and give the manufacturers a basis for bargaining in foreign markets.

The Counterstroke.

The Chronicle's Berlin correspondent writes that a large number of people in Germany hold that Britain's adoption of protection would be the signal for Germany and America to adopt free trade.

Wish Fathers Thought.

Secretary Cox, of the Cobden Club, has resigned on the ground of ill-health. The Express says this means the breaking up of the famous club.

London, January 26—The newest form of health treatment is to walk on all fours. A leading medical journal of Berlin announces that a distinguished professor in that city has discovered that the chief cause of abdominal trouble in man, and especially that of appendicitis, is the habit of walking erect. He declares that nature never meant her highest effort in the animal kingdom to "assume a position so obviously illogical and even grotesque" as walking erect. The strain of the whole weight of the upper portion of the body, he points out, as well as that of the operations of lifting and carrying, are almost entirely borne by the abdominal muscles, which, because they were never intended by nature to bear any form of severe strain, "take their revenge upon the individual as such manifestations as are expressed in the whole gamut of inflammations and functional derangements."

Clearly, then, the only thing to be done is to get back to the first principles again and accordingly the professor has established a small private hospital where seven patients at present walk about on all fours for twenty minutes at a stretch four times a day. On the whole, however, it seems a pretty stiff price to pay for immunity from appendicitis.

GERMANY AND RUSSIA

The German People Deeply Incensed Against Russia

Cologne, January 26—German public opinion is offended by the revelations made in the Reichstag concerning the organized activity of Russian police spies in Germany and the readiness of the Berlin Government to comply with the desire of the St. Petersburg officials to have alleged Russian anarchists thrown back across the Russian frontier. A declaration made by Baron von Richthofen, Foreign Minister, that Germany would continue to conciliate Russia in this matter, is nearly deplored. German patriots approve the policy of the Imperial Government to avail itself of every legitimate opportunity to strengthen good relations with Russia, but the national sense of justice rebels against the principle of suffering so-called anarchists to be hustled out of German territory, without trial and without due process of extradition. Much more will be heard on the subject in the Reichstag before the social democrats let it rest.

CRISIS IN RUSSIA

General Says She Is Ready to Fight Japan but Both Are Afraid.

REPLY TO TOKIO IS DUE

Report That Korean Soldiers Are Causing Trouble. Outbreak Threatened

Washington, Jan 26—The situation in Corea is arousing fresh apprehension of renewed trouble in the far east. It has been the opinion of the military experts here that in the event of war between Russia and Japan, Corea would be made the battle ground, at least in the beginning. Mr Allen, the American Minister at Seoul, cabled the state department, as follows; "Considerable disturbances throughout Corea. The Japanese have been attacked in many places."

It is learned that in view of the possibility of Corea being unable to afford proper protection to Japanese subjects the Tokio authorities have dispatched a Japanese military officer of the highest rank to Seoul, where he will be in a position to direct any military operations that Japanese troops may undertake. The Corean government has 3,000 men under arms, but they have not been trained in a modern school of war and rather resemble constabulary than soldiers.

It is anticipated here that Japan in Corea will repeat the performance of Russia in Manchuria and make the disturbances on the Japanese railway the ground for a military occupation of the line in great force, corresponding to the Russian occupation of the Manchurian railway.

Japan Against Mediation.

London, Jan. 26—It is learned that the Japanese government will not accept the mediation of any of the foreign powers.

A special despatch from Seoul, Corea, says Japanese railway men have been attacked by Coreans at several points along the Seoul-Fusan railway and that the Corean authorities have been notified that unless they prevent a recurrence of these disorders necessary measures to do so will be taken by Japanese troops.

China Will give Aid.

The correspondent adds that the dowager has been informed that some of the foreign powers are willing to give the Manchus a final opportunity for rehabilitating themselves, even to the extent of aiding them by force, if necessary, provided the Manchu government is sincerely favorable to reform.

SAYS THAT PREFERENCE WOULD KILL THE WEST

More Trouble for Britain Unless She Occupies Somaliland Permanently

London, Jan. 26—A London firm, protesting against the rigorous duty being collected on all catalogues sent for distribution to Australia, provokes the Chronicle to say, "Thus Australia encourages British trade."

Tariff to Cheapen Wheat.

The People's Newspaper says Britain will never be free from the menace of the Chicago wheat gamblers until Canada and Australia are given a preference on wheat, which will then, it argues, be cheaper in London than now.

Mad Mullah Is Done For.

Major Leckie, the well known Canadian engineer, who was recently surveying in Somaliland, says the present Mad Mullah is done for, but unless Britain permanently occupies Somaliland other Mullahs will spring up.

Will Kill the West.

W. Tram, of Regina, writes to the Chronicle, saying that the Chamberlain policy will kill Western Canada's ranch trade. The prosperity of Medicine Hat is due to the fattening yearly of herds of cattle driven from Texas and Mexico.

Will Supply South Africa.

South African exporters say a powerful ring of British manufacturers has been formed for the purpose of supplying South African trade.

Americans Could Starve Us.

The Duke of Bedford, speaking before the North Bedfordshire Liberal-Unionist Association on Saturday announced that he had become a Chamberlainite. He said the new fiscal system would help the British farmer until the great corn fields of Canada, India and the Soudan began to supply Britain. The Americans could starve us into submission without firing a shot if we were engaged in war.

MAYOR ROGER DINED ALDERMEN AND OFFICIALS

Municipal Matters Discussed in Detail Around the Festive Board

His Worship, the Mayor, dined the aldermen leading town officials and a few representative citizens at Harry Long's Palm Parlors last evening. At 8.30 o'clock host and guests sat down to a recherche dinner served in an exceedingly acceptable manner. But one toast was proposed, that of "The King." Which was responded to in the usual way, and then the company launched into the evening's program, consisting of informal speeches on matters municipal. The ways and means of securing new industries was gone into by Ald. Morrison, who in a very able discourse, pointed out the great factor, the Trent Valley Canal, when opened, would prove in inducing manu- [illegible] Peterborough. Ald. Morrison received substantial support from Messrs. D. W. Dumble and John Carnegie. Mr. T. F. Matthews gave some interesting figures on the present status of the Waterworks, and promised a revised tariff of rates shortly in the consumers interest. Mr. W. H. Moore advocated cleaner streets and salaried aldermen, Alderman Frank Adams deplored the fact that Peterborough is handicapped by abnormally high freight rates; Ald. McWilliams expressed his views in very clever manner on the need for municipal reform, while Mr. D. Hughes-Charles enlivened proceedings in a suf- happy speech on matters general, and fluently enlivened with humor to arouse the mirth of the assembly, and awaken them to the fact that it was not exactly a council meeting behind closed doors at which they were present.

His Worship must be congratulated on the fact that in banqueting his guests last night he did it handsomely, and the subsequent program, although of a rather serious character for such a function, elicited much food for deep thinking on matters of moment. The council's wisdom in throwing out from the town's bill the clause asking incorporation as a city was very much questioned and freely characterized as an unpopular move.

THE GUESTS

Present were Ex-Mayors Jas. Stevenson, A. L. Davis, Wm. Yelland and John Corkery Aldermen Frank Adams, Mason, H. Rush, Johnston, R. F. McWilliams Morrison, Batten, Hicks, Tinkscale, Edgecumbe, D. Hughes-Charles, President of the Board of Trade; R. A. Peck, County Councillor, and probably warden for the next term, Water Commissioners T. F. Matthews and W. H. Moore J. J. McBain, President Children's Aid Society; Police Magistrate D. W. Dumble, and Chief of Police Geo. J. Rossel; Town Clerk Armstrong, Town Treasurer Felix Brownscombe, R. Innes and John Carnegie of the Town Trust; Town Solicitor F. D. Hall, Town Engineer T. A. S. Hay, Tax Collector W. J. Green; Wilson Henderson, Superintendent Water Works; Harry Evans, Street Commissioner F. H. Dobbin, Manager Review; F. W. Miller, Relief Officer; and the local press.

PETERBOROUGH'S PROGRESS

Ald. Morrison was first on the program. He congratulated His Worship, the Mayor, on being elected twice in succession unopposed. He pointed out that Peterborough being essentially a manufacturing town depended upon retaining what manufactories she has and securing others for her progress in the future. We must ascertain the needs of manufacturers before they can be expected to locate here; they must be reasonably sure of their money invested returning good dividends. Canada at present is unfortunately a dumping ground for surplus goods of old mould and obsolete pattern. The first thing a manufacturer needs is good railway accommodation right at his doors, with reasonable freight rates. There are people in Hamilton getting better freight rates to Montreal than manufacturers here. We must be able to offer good water power, up-to-date fire protection and cheap power—we have probably as cheap power as any developed in Canada to-day. A low rate of taxation is also imperative and he hoped our new finance chairman Ald. Frank Adams, would see his way clear to reduce the rate of 19 mills to 18 this year. Ald. Morrison commended the Water Commissioners for giving us cheap water, but he trusted they would be able to deal more liberally with the consumers shortly. Freight rates, he considered the great drawback to the town's progress, the only remedy for this is the completion of the Trent Valley Canal, which event would also save the people $25,000 a year in fuel bills. He believes in educating the people up to the advantages of the Trent Valley Canal through reports in the press of the Dominion from an expert's knowledge of the subject. He advocated having the Transportation Commission to go over the whole route of the canal, and getting the Ministers at Ottawa thoroughly acquainted with the subject. In conclusion Ald. Morrison opined that Peterborough should be speedily incorporated as a city, as manufacturers seeking location do not place town on their list of prospective sites.

Mr. D. W. Dumble eulogized Ald. Morrison's report last year on the Street Railway and lighting question, and said it was a satisfaction to our citizens to know that their business is so intelligently handled. He endorsed Ald. Morrison's opinion as to the canal, and went into a lengthy review of the obvious reasons for its speedy completion to the lake. He wished the electorate on the canal's course would drop their confounded cussed politics and send a man to Ottawa who will talk nothing but Trent Valley Canal.

Mr. John Carnegie also talked canal at length but feared he'd not have the pleasure of seeing its completion from the Georgian Bay to the Bay of Quinte. He had good reason to believe that Mr Stuart would not have located the Cereal Works here had he not reason to believe that the canal would be completed at an early date. The Government should spend money in conserving our back waters. Supposing we do ask $100,000 or $200,000 for this purpose, we have a right to it to develop our district. Toronto's interest also lies in getting the canal finished, they would be largely benefited in many ways by the building up of this district.

WATER RATES.

Mr. Frank Matthews gave an exhaustive account of the condition of the Water Works and its tariff. The sinking fund he claimed, should be paid out of the general rate and not by consumers only. The commissioners are now working on a new tariff, which will reduce the rates 30 per cent., and will put out present and all new industries on [illegible] ground.

SALARIED ALDERMEN.

Mr. W. H. Moore claimed that aldermen should be paid like those of any city. He thought it a mistake our City Fathers did not apply for incorporation as a city and urged that sanitation is given considerable importance to by manufacturers seeking location. He urged a better cleanliness of our streets and emphasized the existing filthiness of some back lanes, which are a menace to good sanitation, paper and waste materials should be cleaned off every day. He also advocated a system of civic fire insurance.

GREATER PETERBOROUGH.

Ald. Frank Adams congratulated His WWorship on being the first Mayor of greater Peterborough. He regretted that the Water Commissioners had raised the town's rate for water consumption as the people had expected that all water rates would be lowered rather than increased. He thought the town should carry out its agreement with manufacturers which the Committee of the Whole had not done in voting down the Dickson Company's, the Ultimator Company's and the Weaving Company's by-laws. We should encourage newcomers and treat those at present here as fairly as possible.

$2 FOR $1.

In answer to Ald. Adams re increasing the town's rate for street flushing, street sprinkling, etc., Mr. T. F. Matthews explained that the Commissioners found that while the rate for hydrants was reasonable, that for the purposes above mentioned was not proportionable. We asked, he said, for $1,500 and gave back more than $2 to $1 in surplus to reduce the general taxation. In addition to this we decreased the discount to consumers from $700 in 1902 to $2,000 in 1903.

GRATIFYING RESULTS

His Worship congratulated Ald. Adams on being appointed to so important an office as Chairman of the Finance Committee. Referring to the Water rates, he thought it a hardship to some extent that in acquiring the Water Works the ratepayers should have incurred an increased burden of taxes, but he himself had never yet had the pleasure of passing his door, and there were many others similarly situated. However, he must congratulate the Water Commissioners on their excellent showing, and he thought all were agreed that in the aggregate the result of taking over the Water Works has been most gratifying to Peterborough.

COALS OF FIRE.

Ald. McWilliams and Mr. D. Hughes-Charles and Mr. R. A. Peck also gave interesting speeches, the text of which will be published to-morrow.

Mr. D. Hughes-Charles endorsed the Council's action in regard to the Street Railway and Street Lighting by-laws, and expressed the wish that Mr. Meldrum and his talented advocate, Mr. R. R. Hall had been present in order that His Worship and his supporters might have had the opportunity of heaping coals of fire on their heads.

An Unpopular Appointment.

London, Jan. 25.—The correspondent of The Times at Seoul says the appointment of Yamongik as Minister of War is unpopular with the army, the [illegible] being afraid of possible changes. Many robberies with violence are occurring in the country districts.

The Russian minister at Pekin, the correspondent continues, has learned of the result of these conferences and is convinced that in the event of war China will be forced to participate, with the result that the whole world will practically become involved.

"In the meantime," the correspondent concludes "Japan, though ostensibly engaged with her own quarrel, is really the spokesman of the whole group of powers devoted to the policy of antipartition and who have virtually agreed together to defend China."

The Dowager Empress of China is thoroughly alive to the peril threatening China as a result of the Russo-Japanese crisis and has, according to a Shanghai correspondent, determined at all costs to fight for the freedom of Manchuria from foreign control. Conferences between the dowager and the leading statesmen, it is added, have convinced her that any other policy would be tantamount to dynastic suicide, as the dishonor of the ancestral tombs, implied by foreign domination, would be unpardonable in the eyes of the Chinese and unless a vigorous effort is made to reassert Manchu authority the Taipings and Kolashui will attempt to restore the Ming dynasty, with the result of the complete destruction of China.

Japan Is Determined.

London, Jan. 25.—The Times correspondent at Tokio says the rumors of Russia's pacific intentions produce no effect in Japan, which is absolutely determined to insist upon a thoroughly satisfactory settlement.

HIS ARM TORN OFF

Caught in Belt of Carpentering Dept of the Goldie McCulloch Co

Galt, Jan 26—A serious, if not fatal, accident, happened to William Echlin, belt repairer for the Goldie-McCulloch Co. Mr. Echlin was engaged in the carpentering department, going about his usual duties, when his left hand and arm was caught in a belt, and he was thrown with tremendous force. The injured man was freed by the revolution of the pulley. He did not lose consciousness. The ambulance was summoned, and he was taken to the hospital, where Drs. Vardon, Thompson, Hawk, and Lockhart attended to his injuries. The arm was so nearly torn from his body that only a few shreds of flesh remained. Under the chin there is a gash, large, though not seriously so.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG.

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

trangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month, and to outside points at $3 per year strictly in advance.

PETERBOROUGH, JANUARY 26, 1904

JAPAN AND RUSSIA

If Japan's navy gets a chance it is expected to do great work. It consists of six battleships, which are new and up to date; one second-class battleship; two armored coast-defence vessels, six armored cruisers of the first class, almost equal to battleships; ten protected cruisers of the second class, eight protected cruisers of the third class, nine unprotected cruisers, twenty torpedo boat destroyers, four torpedo gunboats and forty-seven torpedo boats. To these may be added two efficient cruisers, the Moreno and Rividavia, built at Genoa for Argentina and recently sold to Japan. Russia has about the same number of battleships and large cruisers in Chinese waters, but her vessels are mostly old vessels and inferior to the Japanese in size, impenetrability and armament. Ship for ship, the new Japanese battleships are as a rule better than the Russian ships of the same class opposed to them in the Far Eastern seas. The Japanese merchant fleet available for the transportation of men and supplies and for conversion into swift cruisers is large and efficient.

The Japanese fleet is manned by 35,356 officers and men, consisting, as respects rank and file, of conscripts drawn from a fishing population of about 2,000,000. The men are said to be "sailors by instinct," and quick to acquire the mechanical skill required to control the mechanism of the modern man-of-war. They are hardy, want simple rations and are content with plain accommodations. While ardently patriotic and spirited, they have the stoical calm of the Mongol, facing danger nonchalantly. Their quick intelligence makes them superior, in the opinion of some observers, to the crews of Russian warships. A decided advantage of the Japanese fleet lies in the fact that its scene of operations will be near its base, where injuries sustained by vessels in battle or storm can be repaired quickly in well appointed dockyards and machine shops.

THE MILITIA [illegible]

Ottawa, Jan. 24.—There will be another good sized appropriation next session for military expenditure, for the furtherance of the plan that the Minister of Militia has in view. There will be in round figures two million dollars for the maintenance of the force and $1,200,000 on capital account for further purchase of guns in the Old Country, to secure several more rifle ranges, and to pay for reserve stock of arms, ammunition, and clothing such as would be essential in the event of a call to active service. A similar outlay for 1905 and 1906 will complete the scheme that Sir Frederick Borden has now in contemplation.

EVERYBODY READS THE TIMES.

THE ANAEMIC YOUNG GIRL

Easily Noticed by Her Blanched Cheeks, Bloodless Lips and Dull Eye

Perhaps she is sixteen. Suddenly she seems to lose strength. Her beauty fades because her vitality is steadily decreasing. Dark circles appear under the eyes which become lustreless and dull. Her spirits droop, for no girl can be contented and happy in such condition.

This may be quickly corrected by taking Ferrozone. It supplies what is lacking in the blood, purifies and strengthens it, and keeps it in perfect order. Ferrozone makes plenty of red corpuscles that manifest themselves in a healthy ruddy complexion. It aids the stomach to do all its work, and creates a natural healthy relish for food.

Every organ of the body is benefited by Ferrozone. It rebuilds the entire system, makes new tissue, strengthens weak flabby muscles, makes thin people fat and sick people well.

No case of Anaemia is too chronic for Ferrozone. It may take time, but if persistently used will cure in the end. It will give you a well developed form, clear complexion, pure breath and will restore the bloom to faded cheeks and color to the lips more quickly than any other remedy.

Every woman who desire a vigorous constitution, and the good looks that come with good health, should take Ferrozone after each meal regularly. It is a wonderful tonic for the brain, the nerves and the blood, and acts also as an efficient but harmless regulator of the menstrual flow. In fact for all diseases peculiar to women and growing girls, Ferrozone has no equal as your druggist can tell you.

Three weeks treatment costs 50c., or three boxes for $1.25. Sold by druggists and dealers in medicine everywhere, or sent by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont.

HEAVY LOSS BY RAINS

Lorain Ohio, Jan. 24.—Great loss has been caused here by heavy rains. The [illegible] Plate Railroad bridge has been washed away. Many vessels have been wrecked. The Baltimore and Ohio Railroad will be a heavy loser.

A DASTARDLY ATTACK

London Ont., Jan. 24.—A dastardly attack was made yesterday afternoon upon Mrs. Parker, a woman aged 60 years, who keeps a small grocery at the corner of Colborne and Simcoe streets. An unknown young man entered and asked for a plug of tobacco. When Mrs. Parker turned to get it for him he reached forward and struck her on the head with an iron bolt. Half stunned by the blow, she turned to face her assailant, and received a second blow, this time in the face. Evidently the man was frightened by his work, for he turned and made off as quickly as he could. Mrs. Parker is expected to recover.

THE STONY PASS COMPANY

Description of the Rich Properties Owned by This Mining Concern of Which Mr Robt. Harrison is Agent.

The Miner, of Silverton, Colorado, states "We are in receipt of a handsome booklet, "An Eastern Man in a Western Experience," being a description of the Golden San Juan and its famous gateway, the most picturesque region on earth, and the peer in mineral wealth. The book is designed particularly to describe the properties of the Stony Pass Mining Company, but contains a large amount of information in relation to the entire district. It is handsomely illustrated and tastefully designed. The book will have a wide circulation, and will attract much attention, especially of eastern people to Silverton and the San Juan. Such advertisements bring in big rewards and do much good, not alone to the company getting out the pamphlet, but to all of our mining interests.

The property of the Stony Pass Company will bear the fullest and most exacting scrutiny and the company is acting wisely in thus setting its merits before the public. Located as it is in different sections of the camp, and all the properties being in localities surrounded by the best mines of the camp, there can be no doubt but that the future will show it to be one of the greatest mining properties of the San Juan. The company is now patenting eight claims of the Lead Carbonate group, lying in the gold belt near the Gold King and the Hercules group, in prospect basin, and the Stony Pass group have each been surveyed and will be patented during the coming season. The following paragraph taken from the book indicates the extent of the company's holdings:

"We have the largest acreage of rich mineral ground of any company in the United States. We own our ground. We are not looking for the ore or veins, we already have the ore in vast quantities. We have spent thousands of dollars in opening it up and determining its extent and value. We know our stock is as safe as government bonds and will bring you in a hundred times more profit. We have passed the experimental stage and know that big dividends are only a question of time, the length of which depends on how long it will take the company to run drifts on the ore, put in stopes and shoots, so as to enable the company to take out the ore in large quantities at the cheapest possible cost."

Mr. Robert Harrison, whose offices are situated in the China Hall block, is the local representative of the Stony Pass Company.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Armoury, at Cobourg," will be received at this office until Tuesday, February 9, 1904, inclusively, for the construction of an Armoury at Cobourg, Ont.

Plans and specifications can be seen at this Department and on application to John Boyd, Caretaker Public Building, Cobourg, Ont.

Tenders will not be considered unless made on the printed forms supplied, and signed with the actual signature of tenderers.

An accepted cheque on a chartered bank, payable to the order of the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, must accompany each tender. This cheque will be forfeited if the party tendering decline the contract, or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,
FRED. GELINAS.
Secretary

Department of Public Works,

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough — necessity knows no law — the stock can't be moved or kept for another season.

MEN'S SUIT SLAUGHTER

Men's Black and Blue Worsted Serge Suits, Regular $10.00, for	$5.75
Men's Black and Blue Worsted Serge Suits, Regular $8.00, for	$4.50

FRED'K DALTON PARKER, LAWYER, -	LOS ANGELES, CAL.
GEORGE T. ORDWAY, COMMISSION BROKER, -	CHICAGO, ILL.
EGBERT CHAMBERLAIN, - - - - - - Dry Placer Miner, formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. W invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

"Yes, but it must be wrong, and I hope some other way can be found."

"So do I," said he, "and I hope they will find the way for all men to earn an honest living."

"The rule is," said Mr. Dowling, "that men do have a way, but I suppose there are exceptions. Most of the needy people are to blame themselves, or their ancestors."

"But I——"

"Wait a minute," continued Mr. Dowling. "I don't say that you are to blame, only that I think that there are not many exceptions to the rule in this great city."

"Yes, more than you think, and it makes a man almost believe there is no right and no God, or anything like I used to think."

"Hold on, there is a God, and He is caring for you. Out of all these troubles and reverses there will come some good and a speedy relief."

"It has been a long time coming," said he. "There must be something wrong with either society or with me. Perhaps it is with me, but I know it is not with Mery and the babies," and then the great tears rolled down his face.

Grace took a step nearer to him, and said:

"Now, you know me, and you will not starve. Just cheer up, and there will be a better day."

"Yes," spoke out Henry, "I am in with the workingmen, and perhaps I can help you in some way. I have not much, but here is two dollars for you to-night," and he laid it on the table by the hand of Mrs. Robbins.

David Dowling had been in many a dilemma in his life, but at no time more so than now. He wanted to say and do the helpful thing, but he did not know what it was.

That is the old problem for the earnest soul.

At last he took hold of the man's hand, and said:

"I am your friend, and I will see you again. I will pray for you when I am not here, but I would like to pray for you now. God does live, and He lives for you. Trust Him. I have been in the dark, too— not just as you are now, but in another way, and just as dark for me. I can sympathize, but there is no relief—only in God. Do you want me to pray?"

It was not a very hearty reply which came from the sick man, but he half whispered, "Yes, I would like to have you."

They all kneeled, and one of the most earnest prayers arose from those poor surroundings. It seemed as if Christ was there. It was so much like some of His work when upon earth.

One minister was coming to learn the art of the Christ— coming to receive the joy and satisfaction of Christ.

They had tarried so much longer than Grace expected, and most of the evening had passed already, but they hastened on another block and a half, and stood in front of a dilapidated old building of five stories in height, with a very narrow stairway to reach the upper floors.

Grace said: "Here is another one of my families. I want you to see them."

"I am afraid it is too late," replied Mr. Dowling, as he looked at his watch, and said: "It is almost nine o'clock."

"Oh, that won't make any difference. I am sure we can find her," answered Grace. "She sews half the night, and I want you to see how some people have to work."

They were already on their way up the stairs, and Henry called out to the leader to ask if there was no end to the climb, or if they were ascending an Eifel tower.

When they reached the fifth floor, the single roomed home was opened for them, but it was almost too crowded to receive them all.

A small woman, with bright but worn appearance, arose from her sewing machine as her child of twelve years opened the door, and told her that Miss Chalmers was there.

She could not understand the late visit, or the coming of so many, until Grace had explained it by saying that she wanted her to know Mr. Dowling and her other friends, who could not come any other time, and this was later than they had planned, but she added:

"I know you would be at work, and would not mind the hour, or so many of us coming, either."

There were only two chairs, and another with the back broken, also a lounge, which another child of eight years occupied.

They could not all sit down if they had desired to do so, but that was not necessary now, and Grace said she need not apologize, because they would not sit down if she had twice as many chairs. They must not stay, only a moment or two.

It was a room, clean, but oh, so small and close and poorly lighted. It was ruin to eyes and health to work so many hours each day in a place like that, and then to sleep in it for the few remaining hours of the night.

The dream which many people in the great city have concerning heaven is that there will be room enough. So crowded here, "room" is another name for heaven in the tenements.

David Dowling and Henry Fielding stood speechless, and had each his own thoughts and feelings, but they were not so very far apart.

Grace was explaining to them that this woman had cared for her husband in this same room for two years, while he was dying daily of consumption, and that she was such a hero that she not only looked after him, but supported the little family and paid the rent. The doctor did not come very often, but even he had never lost a farthing by her.

"I do not see how it is possible," said Henry.

"Well, she is doing the same now. Tell them, Mrs. Mason, how much you get for your sewing."

The color in her face deepened, and she hesitated for a moment, but then said:

"Well, I am almost ashamed of it."

"You need not be the one to be ashamed," said Grace. "The people who make you do it for them are the guilty ones."

"Yes," said Henry, "and society ought to make them blush more than it does."

"I am thankful," she replied, "to get it at all. It is my living now, and I don't know what I would do if they stopped me."

"What do they pay you?" queried Mr. Dowling.

He was afraid she was forgetting to tell them, and he was anxious to know and hear the story of a poor sewing woman, first hand and for himself.

She looked up at him and said: "I am making vests now, and I get for my work on them six cents apiece. I can make five of them in a day, and if I work at night until twelve o'clock, I can make eight. Sometimes Minnie and I work until later than that and make ten. She does what work is done here about the room and the cooking. Of course, that is not much, and then we work together. I furnish my own thread and machine. Fifty cents, sir, is a good day for us, and we are ready to sleep on that. I make cheap trousers, too, and get for them one dollar and a half a dozen pair. It takes me almost three days for a dozen."

Mr. Dowling never moved his eyes from the woman's face.

He was almost transfixed at hearing such a revelation of the real truth, and seeing it all for himself. He could not help feeling that there were many wrongs to be righted in the present system, and that his Gospel must having a bearing upon it.

"But you know," she continued, "we are glad and anxious to get it at that price. Many women right in this tenement would be willing to take my work if they could get it, and some of them, too, would do it for less."

"I don't know who is to be blamed," said Henry. "I hope it will be better for you, anyway, very soon. I work every day, and work hard, but I am sure that I do not know yet what you know about it."

"I wanted you to know," said Grace, "that you had friends, and we will not forget you, will we?" she asked with a glance and turn toward them all.

They all nodded, and Elsie asked if there was anything she needed now especially.

The woman would not own that there was, and said they were getting along very comfortably.

They all bade her good-night, with the assurance of their friendship and interest in her, and promised to come again.

Some money had been left on the table without a word, and Christ whispered "inasmuch" again.

Another life and family had been touched by real Christianity. Less toil that night, and sweeter rest — some light through the cloud.

Mr. Dowling remarked with a sigh, as they reached the last step of the stairway:

"One half of the world does not know how the other half lives."

"Unquestionably," said Henry, as they passed on toward the car.

"Much of the poverty and suffering comes directly and indirectly from sin, but we have seen at least some to-night which apparently does not. Yes," continued Mr. Dowling, "it has been a revelation to me. Christ would have been helping this class of people more than I have, and I am going to do my part in the future. I do not believe that any man knows the real Christ- life who simply preaches to a rich congregation, and is satisfied with that. My life in the ministry has not been satisfactory to myself. I have had many a thought of going out of it, and other unholy suggestions. It is just because I have not gone at it in the Christ way."

He almost stopped as he said:

"Henry Fielding, these have been wonderful weeks in my life. It seems as if I had lived years in these days. I have been praying that it might be the same with you."

Henry looked at him, and replied:

"Your prayer has been answered."

They were about to part, and Mr. Dowling said:

"I have my sermon for next Sunday. You will have to be there."

CHAPTER IX.

A Hero in the Pulpit.

David Dowling was more truthful than his conscience made him believe, after he parted from his friends. He had said to them that the experience of the evening had given him his sermon for the next Sunday.

While the statement was not literally true in letter, period and comma, yet it was the very heart of the truth.

He had his sermon for Sunday morning planned before this, and was ready to announce in the paper and church bulletin the next morning, but now it was charged with new life. It was practically a new sermon. He must change it and fill it in and preach it entirely different from the original plan.

Most of the time in his life when he had mapped out and written his sermon, he laid it away to rest sweetly until Sunday morning, and hardly awakened it long enough for a half hour's sensation in the church, and then usually it went to eternal rest.

Now it was his own blood and own heart which was to make the sermon. It was the result of a holy compulsion.

He had convictions and consecration, but they were more than sentences and words.

VARICOCELE NERVOUS DEBILITY CURED.

If you have transgressed against the laws of nature, you must suffer. Self abuse, later excesses and private diseases have wrecked thousands of promising lives. Treat with scientific physicians and be cured. Avoid quacks. E. A. Sidney, of Toledo, says: "At the age of 14, I learned a bad habit and at 19 contracted a serious disease. I treated with a dozen doctors, who all promised to cure me. They got my money and I still had the disease. I had given up hope when a friend advised me to consult Drs. K. & K., who had cured him. Without any confidence I called on them, and Dr. Kennedy agreed to cure me or no pay. After taking the New Method Treatment for six weeks I felt like a new man. The drains ceased, wormy veins disappeared, nerves grew stronger, hair stopped falling out, urine became clear and my sexual organs vitalized. I was entirely cured by Dr. Kennedy and recommend him from the bottom of my heart."

IS THERE CERTAINTY IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.

2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.

3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.

4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.

5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.

6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.

7th—By being able to ease a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information. If you are looking for an investment that will pay you good returns.

ROBERT HARRISON

Manager.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 5 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.22 ore 3 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.22 to $13,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

PETERBOROUGH BROKERAGE CO., Local Fiscal Agents, Peterborough

A HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock, but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to,

MEDICINAL QUALITIES.

Asparagus is very cooling and easily digested.

Cabbage, cauliflower, Brussels sprouts and broccoli are cooling, nutritive, laxative and purifying to the blood, and also act as a tonic, but should not be eaten too freely by delicate persons.

Celery is delicious cooked, and good for rheumatic and gouty people.

Lettuces are very wholesome. They are slightly narcotic, and lull and calm the mind.

Spinach is particularly good for rheumatism and gout, and also in kidney diseases.

Onions are good for chest ailments and colds, but do not agree with all.

Watercresses are excellent tonic, stomachic and cooling.

Beetroot is very cooling and highly nutritious, owing to the amount of sugar it contains.

Parsley is cooling and purifying.

Turnip tops are invaluable when young and tender.

Green nettle shoots, if gathered in Spring and cooked as spinach, form a most delicate and wholesome blood-purifying vegetable.

Potatoes, parsnips, carrots, turnips and artichokes are highly nutritious, but not so digestible as some vegetables. Potatoes are the most nourishing and are fattening for nervous people.

Tomatoes are health-giving and purifying, either eaten raw or cooked.

Chili, cayenne, horse-radish and mustard should be used sparingly. They give a zest to the appetite, and are valuable stomachics. Radishes are the same, but are indigestible, and should not be eaten by delicate people.

WISE MAXIMS

There are no elevators in the house of success.

The "bad boy" often makes the best man.

A man can be too confiding in others, but never too confident in himself.

A college education is a good thing, but many a graduate finds himself over trained.

Clothes don't make the man, but good clothes have got many a man a good job.

A bad man with good manners often outdoes a good man with bad manners.

A WORTHY OBJECT

Is the Lady Minto College Hospital System—Introduced by Her Excellency Lady Minto

The chief object of the Lady Minto College Hospital system, introduced, as the name implies, by Her Excellency Lady Minto, is for the purpose of providing hospital centers in places where no hospitals exist, and where there is need for institutions of this nature. It is proposed to establish hospitals in such places as Shoal Lake, Swan River and Dauphin, in Manitoba; Fort William and Thessalon in Ontario; Regina and Yorkton in the Northwest, and provide medical care and comfort for the sick and the injured.

The concert to be given in the Market Building on February 2nd should be largely patronized by those who desire the welfare and happiness of hundreds and thousands, who are far removed from the cities and towns where hospitals exist.

The Industrial Exhibition

The Times is in receipt of a letter in regard to the unpaid prize money of the Agricultural Exhibition of 1903. The writer forgot to append his name and the letter therefore will not appear. He claims to be a prize winner, and states that it is the duty of the present association to clear off the slate, if at all possible. He thinks that all the prize winners as well as the leading citizens, will gladly subscribe funds for this purpose, and remove what appears to be a bad handicap to the future prospects of fal fairs held in Peterborough.

HIGH PRAISE FOR THE INTERCOLONIAL RAILWAY

Its Equipment, Scenery and Literature Most Favorably Commented Upon

Mr. D. Pottinger, General Manager of the Government Railways has received the following letter dated Dec. 3rd, from the office of the Board of Trade, Montreal, which speaks for itself.

D. Pottinger, Esq., General Manager Intercolonial Railway, Moncton, N.B.

Dear Sir,—I have pleasure in communicating herewith a resolution adopted by this committee conveying to your management an expression of gratitude for the tour over the Intercolonial Railway, provided for the over-sea delegates to the Fifth Congress;

"Resolved, that the Canadian Committee of Arrangements tenders to the Intercolonial Railway Management its most sincere thanks for having, at this Committee's request, afforded the over-sea delegates to the Fifth Congress of Chambers of Commerce of the empire, a complimentary tour over its line, and for the added courtesy in providing special trains for the two parties.

"That the lovely scenery of the Matapedia River together with the beautiful valleys of the Miramichi and Nashwaak rivers, seen when the autumnal tints were at their best

WAS GREATLY ENJOYED

BY THE DELEGATES

as were also the visits to the cities of Fredericton, Halifax, St. John, and Sydney, with the local trips provided by the citizens thereof, while the ride along the shore of the beautiful Bras D'Or Lakes was declared to be a worthy conclusion of the glories of the All Canadian tour.

"That the delegates greatly appreciated the illustrated volume, "Forest, Stream, and Seashore," which the Intercolonial Management so kindly presented to all who took the tour over its lines.

"That the Committee of Arrangement is convinced that the circumstance, that, with the assistance of the Dominion Government and by the kindness of the Railway and Inland steamboat companies it was able to tender to the over-sea delegates these extended tours through Canada added largely to the success which has attended the holding of the Fifth Congress in this City, and it is most gratifying to know that these tours have resulted in impressing the delegates most favorably.

WITH THE GREAT RESOURCES OF THIS COUNTRY

the vast opportunities it affords for the investment of capital, and its superior advantages as a home for the surplus population of the motherland;

"That the committee has been gratified to learn that the knowledge of the resources and beauties of our country thus obtained by the delegates will be widely disseminated by them through various parts of the Empire from which they came, for it is the intention of many of the delegates to communicate to the members of their respective Chambers and to other audiences, by illustrated lectures and other means, the information they have gathered during their visit to Canada;

"That the Committee records its belief that the tours through Canada have filled in the highest degree the hope in which they were planned that in addition to affording much enjoyment to

THE OVER-SEA DELEGATES

TO THE CONGRESS

that would result in great and lasting good to our country, and that the railway and steamboat companies who gave the transportation privileges deserve and enjoy the gratitude of all Canadians for their wise generosity in this connection."

The recent Congress of Chambers of Commerce of the Empire being the first of these Congresses held outside of the Mother Country, this Committee caused a medal to be struck in bronze to commemorate that fact, and it subsequently had a few struck in silver for special presentation purposes, one of which is now sent you under another cover in token of the Committee's appreciation of your kindness in connection with the complimentary tour given over your line to the over-sea delegates.

I am Dear sir, yours truly,

(Sgd.) Geo. Hadrill,

Secretary.

A copy of a resolution passed by the Chamber of Commerce and Manufactures (Incorporated) of Sheffield, England, has also been received and which reads as follows:

"At a meeting of the Council of the Sheffield Chamber of Commerce and Manufactures (Incorporated) held on Oct. 27, 1903, it was resolved that the best thanks of this Chamber be and they are hereby awarded to the Intercolonial Railway for their great courtesy and hospitality extended to the delegates from the Sheffield Chamber on the occasion of the Fifth Congress of Chambers of Commerce of the Empire at Montreal.

(Signed)

HERBERT HUGHES,

Secretary."

Before leaving for home Lord Brassey paid a warm compliment to the Intercolonial Railway. "I have never travelled," said he, "more comfortably nor on a better appointed train than that which conveyed me out of Halifax today." He alluded to Canada's Famous Train, the "Maritime Express."

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.66 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.65 and $70.46 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in that district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.

PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. F. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $4.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 300-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle s ore.

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-[illegible]-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS. Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS. Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS. Cincinnati, O. Prescott, Ariz, 7-23-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS. Cincinnati, O. Prescott, Ariz., July 21, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

For the Ladies.

Knives.

The loosening of the handles of knives is due to the fact that the knives have been tossed into a pan of hot water, together with the forks and spoons, and, in consequence, the cement has melted away. Knives when brought from the table, should be scraped against the edge of a plate to remove as much soil as possible, and the blades should then rest in a jug, not a pan, of hot water, into which a little bit of soda has been melted, care being taken that the water does not reach the handle, where it joins the blade.

Bookish Women.

Bookishness is an unreliable test of ability. I have known bookish women who were profuse readers and delighted in study, but were not of much use for anything else, and I have known other women who took books rather hard, but amply made up for that disability by their closeness of observation and mental energy. As between persons who read to save themselves the trouble of thinking, and persons who observe and think, but find reading laborious, the latter are likely to be best worth while. But reading, observation and thought ought to work well together and to make for practical efficiency. A mind that is capable of Greek and analytical geometry is usually capable also, under proper training, of omelets, good coffee and household administration.—E. S. Martin, in Harper's Bazar.

Hindu English.

Lady Curzon, who was Miss Leiter of Chicago, gets a lot of fun out of her life in India. Among other fads, it is said that she makes a point of collecting any amusing attempts made by Hindus to write English that may come under her notice, and has many ludicrous specimens in her scrapbook. Recently she got from Bombay a letter that two brothers sent out to their patrons on the death of their father, who had been the head of the firm. The letter ran: "Gentlemen,—We have the pleasure to inform you that our respected father departed this life on the 10th inst. His business will be conducted by his beloved sons, whose names are given below. The opium market is quiet, and mal. 1,500 rupees per chest. O death, where is thy sting? O grave, where is thy victory? We remain, etc."—Leslie's Weekly.

Care of House Plants.

The advent of colder weather means increased fire heat, the latter also meaning an increased aridity or dryness of the atmosphere. The latter condition will probably induce a visit from insect pests, unless precautions are taken to prevent their appearance. Green fly and red spider are most to be feared, especially the latter, as their appearance is not so easily detected as that of the aphis, or green fly.

Copious sprinkling and syringing with cold water is the best preventive for the attacks of the so-called spider. Salvias, fuchsias, roses and carnations are first favorites with this little pest. When first attacked, the leaves of these plants present a whitish, dusty-looking appearance, especially on the underneath side, and the leaves will soon commence dropping twice every day. Tobacco water is the best remedy for green fly, although tobacco leaf stems, or even a cigar thoroughly dried and rubbed into a fine powder and sprinkled on the plants infested with green fly will generally rid the plant of them. The latter application is best made after the plants have been recently sprinkled or syringed, as the tobacco dust adheres better when the foliage of the plant is moist.—William Hunt, Guelph, Ont.

Keep the Windows Open.

You would not think of drinking stale or poisoned water, would you? You know that if you were to be shut in an air-tight compartment death would result. Of all the necessities of life, you can live longer without any of them than air. Impure air and darkened apartments are the cause of an untold number of deaths annually. You know that on a sunless day, with a close atmosphere, you are out of sorts at the best, if you are lucky enough to escape physical ailments, while you are mentally depressed. But once let the sun shine brightly, and clear the atmosphere, how different how much better you feel in every way.

Cold weather is coming, and when you are tempted to close up the house as tight as it can be made, remember these things, and don't do it, especially at night. Keep the windows in the sleeping apartments open enough to at least give you sufficient fresh air. A cold room does not indicate that it is healthy, far from it. A sleeper will soon breathe up all the fresh air in a room, and if there is not a constant supply of fresh air, he simply breathes over and over again the poison thrown off by his lungs. And the breathing of this vitiated air only tends to lower the temperature and vitality of the system, so that it is not as capable of withstanding the rigors of winter. Fresh air is heating to the body; in fact, upon it depends the combustion of the fuel in the body and by which we are kept alive, which we should always bear in mind.

Even with open windows during the night, bed chambers and bed clothing should be thoroughly aired each morning, and allowed all the sunlight possible. During sleep, not only do the lungs throw off more poison than during the day, but it is especially so with the body in its relaxed condition and when the pores are all open. During sleep the body should have plenty of covering; better to have too much than not enough, both to induce deep slumber and to keep the skin moist and the pores open that they may have the opportunity to rid the system of poison. Bear in mind that death would follow the closing of the pores.

Fresh air in cold weather will cost money, as more fuel will be required, but it will be economy, for if it does not save sickness and doctor bills, and which it most likely will do, you will feel better and the stronger for it.—Cooking Club.

Facial massage is a popular treatment for wrinkles. I know a better—contentment.

The "summer girl," like some enthusiasms, is not always [illegible]

For the Farmer.

Beets, turnips and carrots can be kept in bins in the barn or cellar. A layer of carrots and a layer of dry oats or corn, or even of sand, will dry them at an even temperature and prevent sudden freezing and thawing. The same applies to potatoes or other root crops. Cold does not do them as much damage as warmth. It is when they thaw suddenly that they begin to decay.

Cows That Are Thieves.

"If the 'man behind the cow' in Kansas would do his part no unprofitable animal would masquerade under the fictitious appellation of 'milch cow,' and she would either go to the butcher's block or be made to return a profit by more intelligent care and management," says Secretary Coburn in the last quarterly report of the Kansas Board of Agriculture. "It passeth understanding why theft by a cow should be tolerated more than theft by a human. In effect the result to the loser in either case is the same. Our Government has found it wisdom to study and establish far-reaching methods for the detection and the repression of the latter; and by the same token why should our farmers and dairymen be less vigilant is regard to this possible proclivity in their cows—beasts described as dumb, yet outwitting their owners? So long as cows of this class are permitted in the dairy herd, so long will there be dissatisfaction and failure. Improvement is the route to success, whether by breeding, better management, or other ways, and intelligence in our cowmen is the power that will force advancement in the right direction. Dairying has come to be one of the most important factors in Kansas agriculture, and, rightly conducted, is one of the surest money-makers of our varied industries. It is incomparably more rational than any one-crop system, or even general farming, as its practice tends to rotation of crops, maintains or increases the fertility of land, and affords steady employment with returns remunerative according to the brains mixed with the business."

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully."

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

MONEY TO LOAN ON STOCK

and Debentures on convenient terms

Interest Allowed on Deposits

The Home Savings and Loan Co., Ltd

[illegible] Church Street, Toronto, Ont.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA

—AND—

BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and non-assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over [illegible] feet in addition to other claims approximating a total acreage of 240 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $16 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,300,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 195 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS.*

C. L. ARZENO, General Manager.

603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid fo no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,

SOAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY,

IF YOU HAVE
CATARRH

Remember the best Catarrh medicine that money can buy is Catarrhozone; it cures quickly and permanently when all else fails

The remedy doesn't exist that will cure Catarrh as quickly as Catarrhozone. It relieves the most stubborn cases in a short time, and drives the disease so thoroughly from the system that it never returns.

Druggists boldly recommend Catarrhozone in preference to other remedies, because they know it is the best, and every progressive doctor prescribes it for the same good reason.

Catarrhozone is a rational, common-sense treatment that finds favor with everybody. It cures by the inhalation of medicated air, which comes into contact with the mucous surface of all the breathing organs. It gets at the source of the trouble, kills the germs and drives every vestige of catarrh right out of the system.

It doesn't matter how deep-seated or chronic your case may be, Catarrhozone can cure it. Even though a thousand other remedies have failed, don't give up hope till you have used Catarrhozone. It has cured other cases probably worse than yours, and will cure yours if it gets a chance.

Mr. Dutcher Law, a prominent citizen of Italy Cross, N.S., says: "I experimented with hundreds of catarrh remedies and found the majority to be worthless, dismal failures. Catarrhozone was the first to give lasting relief; it cured me and I am with pleasure testifying to its merits as a cure for Catarrh of the nose or throat.

(Signed) DUTCHER LAW.

You are sure to derive the most pleasant results from Catarrhozone. It has been tested many times and never found wanting. Every druggist in Canada sells it. Complete two months' treatment, guaranteed to cure, costs $1, or a trial size 25c. By mail from N. C. Polson & Co., Kingston, Ont.

DASHES HERE AND THERE BY TIMES' REPORTERS

Route Boys Wanted

We require a couple of route boys at once. We pay from $1 to $1.50 per route per week.

Old Newspapers for Sale

Old newspapers, suitable for putting under carpets or for wrapping parcels for sale. Times Bookstore.

Died at the Hospital

There passed away at Nicholls Hospital on Sunday Mrs. J. Wallace of Lakefield. She leaves a husband, a son and a daughter. The funeral will take place to-morrow afternoon from the family residence, Lakefield, and proceed to the Lakefield cemetery.

A New Cement Co.

We notice by the Gazette that papers of incorporation have been given to the Lindsay Portland Cement Co., capital, $500,000; provisional directors, J. D. Flavelle, T. Sadler, R. Sylvester, J. B. Knowlson, J. M. Squier, R. Kennedy, Alex. Ross, T. Stewart.

Will Start a Factory

Mr. Richard Chowen and Mr. W. G. Hartley, who recently patented a device in connection with weaving, have, we understand, sold their Canadian patent, and propose to move to Lowell, Mass., where they will start a factory for the manufacture of their machines.

A Blaze at Havelock

The English church rectory at Havelock, occupied by Rev. Mr. Tandy, so well known in Peterborough, was the scene of a blaze yesterday, which fortunately did no very great damage. The fire started from a defective chimney and secured a hold on the woodwork. A bucket brigade set to work and in very short time had the devouring element under control and extinguished. The damage including that to furniture, was chiefly from water, and is estimated at about $100 covered by insurance.

Mr. Ashe's Promotion

Mr. F. W. Ashe has been chosen to succeed Mr. Balfour as manager of the Montreal Branch. The wide experience which Mr. Ashe has attained in banking circles eminently fits him for the broader field he now enters, his connection with the Union Bank dating back to 1881, since which time he has filled the position of manager at Smith's Falls, Carleton Place Norwood and Hastings, Ont., and also in the Northwest. Mr. F. W. Smith has been appointed assistant manager at Quebec.

It is desirable that all who purpose entering the school should do so on the above date.

WM PRINGLE,
Opposite Post Office Principal

THE LATE ADAM THOMPSON

Death of One of Otonabee's Most Esteemed Citizens

There passed away at the family residence in Otonabee on Sunday last Mr. Adam Thompson, one of the most esteemed citizens of the township. Mr. Thompson had been in rather poor health for some months, and his demise was not unexpected.

Deceased leaves a wife, a daughter and seven sons to mourn his loss.

The funeral will take place this afternoon, at 1.30 o'clock, from the family residence lot 22, concession 12 Otonabee, and proceed to the Little Lake cemetery.

Excellent Work Being Done

Mrs. McAllister received a letter from a gentleman in which he says, "I certainly appreciate the importance of having these hospitals established at the different points indicated. While I was at Arrowhead and Revelstoke, B. C., recently I heard the greatest amount of interest taken in the establishment of these hospitals and the excellent work that they had done for the benefit of the unfortunates. I enclose you a check for $25.00 as my subscription. I certainly wish you every success in being able to make a good showing from this district." Mrs. McAllister, the secretary, will be delighted to receive some other such subscriptions.

OF PUBLIC IMPORTANCE

To the Editor of The Times,

Sir,—Under the Succession Duties Act a statement of the assets of the late Thomas Bradburn was duly forwarded to the Ontario Government in order that the Government dues might be ascertained as required by law. It is stated that at about the time of the Ontario elections, the Government considered the valuation too low, and in the interests of the public Mr. Wm. Fair, by the grace of the Hon. J. R. Stratton, was duly appointed to make the appraisement. It is believed that Mr. Fair had performed his duties in an impartial and fearless manner as a public servant. As the dues belong to the public, the public would like to know what the respective valuations were and which one was acted upon, and if a compromise, how much the compromise was, and how arrived at, and the amount of the dues.

Yours &c.
PRO BONO PUBLICO

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporter on Their Rounds

—A cocking main is said to be on the tapis.

—The County Council will meet this afternoon at two o'clock.

—Hear Frank Blatchford of Toronto, the favorite violinist.

—A great deal of sickness exists in town at present, due to the intense cold.

—A couple of route boys are wanted at The Times office. We pay from $1 to $1.50 per week.

—A leap year dance is on the tapis, to be given by several of the young ladies of the town.

—Hear Mr. Firth, the baritone singer and composer, in his own songs, at the concert Tuesday, February 2nd.

—Two citizens were each fined $2 and costs, $4.00 altogether, for neglecting to clear the sidewalks in front of their premises of snow.

—The Ransford Milling and Chopping business at Fenelon Falls has been put into a joint stock company with capital of $20,000.

—G. E. Whitten, the artist, is having his studio remodelled and refurnished. When completed it will be one of the most up-to-date studios in Ontario.

—There will be no Band practice tonight, on account of the Picton vs. Peterborough hockey match.

—On Saturday one of the old residents of Cavan, Walter Petty, passed away, at the age of 76 years. The funeral took place from his late place of residence, lot 21, concession 16, Cavan, yesterday afternoon, to Emily Presbyterian cemetery.

—Don't miss the treat of the season—S. Homer Paxson, entertainer of Boston, on his costume characters.

—Bowmanville council has decided to trim expenditures to the lowest notch this year and begin by reducing the salaries of the auditors from $25 to $15. The offer was refused by the old auditors and two new ones were promptly appointed at the reduced salary.

—Mr. T. Ludgate, formerly of Peterborough, has completed the erection of a large sawmill near Chemainus, on Vancouver Island. This is one of several mills recently put up in different parts of the province, in spite of the talk of depression in the logging business.

—The Ontario Game Commission held a meeting in Toronto recently to consider their annual report. The reports from the deputy wardens indicated that the past year had been a good one for sportsmen as game was plentiful. The complaints for illegal hunting were not so numerous as usual.

—Picton Times: The congregation of St. Mary Magdalene's church, Picton, are delighted with the personality and preaching of their new vicar, Rev. Mr. Armitage. They have turned out in large and increasing numbers at each service Mr. Armitage has conducted thus far. The word has gone round that he is the right man in the right place at the right time.

—Cobourg Post: The disposition of the two or three millions left by Miss Duncan, of Montreal, has not benefited the local relatives in the least. Of the large amount left by deceased a little over one hundred thousand dollars was given to distant relatives and charitable institutions and the balance of the estate was given to an adopted daughter, with power to distribute the "old china" and furniture among the other relatives. The division of the estate is very much one-sided and disappointing.

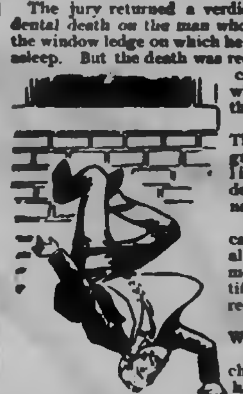
ACCIDENTAL?

The jury returned a verdict of accidental death on the man who fell from the window ledge on which he had fallen asleep. But the death was really due to carelessness which made the accident possible. There are a great many lives suddenly terminated as a result of carelessness, although the medical certificate may read "heart failure." When a man takes chances with his stomach and neglects the warning symptoms of disease, he is carelessly inviting calamity.



Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It enables the perfect digestion and assimilation of food, which makes strength. It stimulates the liver, cures biliousness, and removes bilious impurities from the blood.

"I had been troubled with a pain in lower part of my stomach for three years, so severe I thought it would kill me in time," writes Mr. Aaron Van Dam of (Kensington) 2349 116th St., Chicago, Ill. "I could hardly work, it felt like a big weight hanging on me and got so bad that I had to take medicine. I used Stomach Bitters for a time, but it did no good so I wrote to Dr. R. V. Pierce for advice, which he gave me immediately. I followed his directions; used two bottles of his medicine and was cured. I had a torpid liver which was troubling me instead of cramps as I thought; so Dr. Pierce told me. I have pleasure in living now; have gained in weight 11 pounds since then."

Dr. Pierce's Pleasant Pellets cure constipation. They do not beget the pill habit.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Nellie Minore, of Belleville, is the guest of Mrs. A. Martin, Reid street.

—Miss Gerty Grundy, of Omemee, spent Sunday in Peterborough, the guest of Miss Gertrude Pollard.

—The many friends of Mrs. M. McFadden will regret to hear that she is ill with pneumonia.

—Mr. George Meredith, of Orillia, has taken the place of Mr. Howard Taylor at Frost's jewelry store.

—Mr. A. R. Kidd's condition is better to-day and he is now on a fair way to recovery.

—Rev. Dr. Wilson, who is conducting special services in Bethany Tabernacle, is the guest of Mr. and Mrs. H. C. Winch.

Peterorough Seniors vs. Picton To-night

PICTON TO-NIGHT.

The fast Picton Pirates will be on hand to-night to play the Peterborough seniors, who are bound to redeem themselves of the defeat received at Picton at the opening of the season. Peterborough has to win this game or be entirely out of the running for the championship of this district. The visitors are a fast bunch and will set a hot pace for the locals. There will no doubt be a large crowd to witness the game as many are coming from Lakefield and other points. It would be advisable to secure tickets as early as possible to prevent crowding at the doors.

In a very one-sided game of hockey the Iroquois II defeated the Young Maple Leafs by a score of 15 to 1. For the Iroquois II. Capt. V. Runnels and H. Garcus played a star game, while for the Maple Leafs H. Moore played a star game. The game was free from roughness, only one man decorating the fence. The Iroquois II are open for challenge to a game of hockey. Average age 12 years. V. Runnels, captain.

CHALLENGE.

The Iroquois II hereby challenge any team to a game of hockey. Average age 14 years. F. Buller, captain.

—The Picton Hockey team are running a big excursion for the game to-night.

FRIDAY NIGHT'S GAME

The T. A. S. are determined to turn the tables on the Peterborough II.'s on Friday night and are putting in some hard work. It will be a great game.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 29th, 1903

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble on my hands for 14 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peake Station, P.E.I.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same price. $100 will be paid for any case that it will not permanently cure.

THE
TORONTO SAVINGS
AND LOAN COMPANY

The Nineteenth Annual General Meeting of the Shareholders of the Toronto Savings and Loan Company was held at the Head Office of the Company, No. 437 George Street, Peterborough, on Friday the 22nd day of January, 1904, at two o'clock p.m.

The President, Hon. Geo Cox, having taken the chair, the Manager, Mr. W. G. Morrow, was requested to act as Secretary to the meeting.

After reading the notice convening the meeting, the Secretary read the Nineteenth Annual Report and the accompanying Financial Statement.

DIRECTORS' REPORT

The Directors submit herewith their Nineteenth Annual Report, showing the result of the business for the past year, accompanied by the balance sheet, to the 31st of December, 1903. The gross earnings for the year amounted to $152,439.56, and after the payment of interest on deposits and debentures, expenses in connection with money borrowed or loaned, and all expenses of management, there remained a net profit of $92,989.82. To this amount has been added $18,150.68, the amount carried forward from last year, which makes a total sum for distribution of $111,140.50. This amount has been disposed of in the following manner:

(1) By payment of four quarterly dividends of 1 1-2 per cent. equal to 6 per cent for the year and amounting to	$60,000 00
(2) By addition to the Reserve Fund	30,000 00
(3) By amount carried forward to profit and loss account	21,140 50

The above addition to the Reserve Fund increases that account to $430,000.

All payments maturing during the year on the Company's investments have been most satisfactorily met, and the rentals from the property owned by the Company have also been promptly paid.

The books, accounts and securities of the Company, have been carefully examined by the Auditors, and their report is appended to the Financial Statement.

Respectfully submitted,

Geo. A. Cox,
President

WILL JAPAN MAKE A DEMONSTRATION

Important Military Operations May be Undertaken in Corea by Japan

London, Jan. 26.—A Russian correspondent of The Times says: "The official gazette of Saturday published another expression of the Czar's wish for peace in the form of a telegram to Admiral Alexieff, the Russian Viceroy, in the far east. The Czar's message, which was read to all the troops in Manchuria, concluded, "May the Almighty bless Russia with peace and prosperity during the coming year."

What Russia Needs.

London, Jan. 26.—The correspondent of The Times at Moscow says most of the leading provincial organs counsel moderation in regard to Russia's far eastern policy. The majority of Russia's millions are ignorant of and indifferent to the question, while the bulk of the really interested urban people oppose any military campaign. Economic and not political considerations influence the latter. Trading circles say that Russia needs economic stability more than imperial expansion.

Russian Brutality.

London, Jan. 26.—The Tokio correspondent of The Times says letters from Vladivostok say that a party of Russian marines landed on the 9th instant and subjected the Japanese residents to great violence. They wrecked twenty-four houses, maltreated the young women and wounded the old women and children. The riot lasted twenty-four hours, and the rioters who were accompanied by their officers, were not restrained by the civil authorities. The Japanese press asks what can be expected during war when such things take place in times of peace, and they urge the withdrawal of all Japanese residents from Siberia.

Corea's Declaration.

London, Jan. 26.—The correspondent of The Times at Tokio says Corea's declaration of neutrality is not taken seriously in Japan. It reached Tokio in a despatch which said that in view of the Russo-Japanese complications, which apparently were not yielding to diplomatic negotiations, Corea had decided to maintain strict neutrality in the event of war.

The Russian Way.

London Jan. 26.—The Times correspondent at Shanghai says a Neuchwang correspondent writes that the Russians have removed a member of the maritime custom staff from the administration of the native customs revenue, which is part of the security for the Boxer indemnity and have put a nominee of their own in his place. This is only one of the many indications of the value of the Russian Government's renewed assurances that the rights of the other powers and Chinese sovereignty will be recognized in Manchuria.

DELEGATES MAKE STRANGE REPORTS

Saw Surprising Things While Touring Canada After Congress

LORD SALISBURY'S STAND

Did Not Favor Chamberlain's Plan, Says Member of Cecil Family

London, January 27— Messrs. Harvey Daw and A. Latimer, represented Plymouth at the Montreal Congress. Mr. Daw lecturing at Plymouth re Canada said that after leaving Ontario they went into the ranching country, in which no sign of man, beast or bird could be seen, nor any sign of cultivation, but simply the same monotonous expanse of prairie until the Rockies were reached. Montreal streets would disgrace the oldest parts of Plymouth. Montreal was managed by a mayor and aldermen, and the only parts of the roads kept were in front of their houses.

Mr. Latimer speaking, said that the influence of the United States was seen throughout the Dominion. He saw only two British machines in the G. T. R. workshops. He understood that Canada gave no preference, desiring no return, but he (Daw) had been asked to demand some reciprocal advantage from England.

LORD SALISBURY'S ATTITUDE.

In regard to Lord Hugh Cecil's letter denying that Lord Salisbury approved of Mr. Chamberlain's scheme; a member of the Salisbury family writing to a friend at the beginning of last August, doubted whether the house of Lords would see Lord Salisbury's face any more. "Chamberlain's Birmingham speech and the opening of the campaign against free trade for a while roused him from the lethargy with which he regarded public affairs. He expressed the intention, if ever the matter came before Parliament in a practical form, at the instance of the Government, of returning to Westminster to deliver his very last speech against it. 'I am not,' said Lord Salisbury, 'disposed to have a finger in the pie, unless I have full control in the making.'"

GOING TO JAMAICA.

Mr. C. A. Duff Miller, the Agent-General for New Brunswick, will sail on the thirtieth inst., for Jamaica to endeavor to stimulate trade with Canada.

KNEW IT IN ADVANCE.

Mr. Charles Devlin, M.P., speaking at Galway on Saturday, said he had reason to know that his predecessor in the seat, Col. Lynch, would soon be released.

BRITISH WORKMEN

Protest Against Importation of Garment Workers

Hamilton, January 27—A mass meeting of garment workers was held on Saturday to protest against the proposal of the British Women's Immigration Association to send a thousand garment workers to Canada, which included among the speakers Rev. Father Whitcombe, Ald. Church, and President Berry, of the Trades and Labor Council. All of them laid the blame at the door of the Dominion Government. It was claimed that the Government's agents were advertising in foreign papers for help, and in order to get people to emigrate to Canada were misrepresenting the facts. A strong resolution protesting against the Government's course and pointing out the true condition of affairs was passed, and copies of it will be forwarded to the British labor press.

STATIONERY

When in need of anything in the line of commercial stationery, visiting cards, etc., leave your order at the Times job department. Workmanship guaranteed.

THE CAPTURE OF CASHEL

Mounted Police Forced to Burn Him Out

NEVER LEFT CALGARY

Stayed around, He Says, to Help His Brother John

Winnipeg Jan. 26.—Ernest Cashel, the murderer who escaped from Calgary police barracks a few days before the date set for his execution in December, was caught by the police to-day a few miles from that city. He is supposed to have been hiding in an old cellar since his escape. Cashel is now in the guardhouse.

During his liberty Cashel has not been more than eight or nine miles away from the city, and during a portion of the time was in the city. The police learned two weeks ago that he was lurking about the eastern suburbs. They found that he was well informed of all that was going on, and that he was in Calgary for the purpose of rescuing his brother, John Cashel, in case the latter was convicted for assisting in securing his release. Two weeks ago the police informed the Calgary papers of this fact, and as it was learned that Cashel was in some way kept informed of all that was being done a request was made that nothing be published. This was agreed to, and gradually the meshes of the law were woven about the condemned man. On Tuesday last Cashel stopped at the house of a man named Wigmore, a few miles from Calgary. He remained there during the night, and confessed that he was Cashel. He ordered Wigmore not to leave the house that day, saying he could get out of the country if he wanted to, but that he did not want to leave without his brother.

A SYSTEMATIC SEARCH.

The police sent men in plain clothes to several houses in the district to await developments. After the conviction of John Cashel on Friday the authorities decided to take an offensive position, and thirty-two men were detailed to search every house in the entire district. They were detailed in squads of eight. Inspector Duffis with his party went north having in his squad Mr. Chamberlain, of the Secret Service Department, Toronto; Constables Biggs, Peters, Stark and Rogers. They searched houses and haystacks up to noon, but found nothing. Then they separated into two parties. One, under Constable Biggs, in examining a house owned by Wm. Pitman, came upon a den in a haystack, about 100 feet from the house. In the pit were found clothes and other articles resembling what Cashel had worn. Cashel was not found in the den, and search was made of the house.

A BRISK FUSILADE.

In one corner of the cellar Constable Biggs found a hole where a man might conceal himself. He secured a light and held it to the hole. He caught sight of a man and had hardly done so when a random bullet whizzed past his head, quickly followed by another shot. He was not armed and made a retreat up stairs. He secured a revolver, and returning to the cellar door, met Cashel coming up. Two shots were exchanged, one by Cashel tearing off the inside of the door behind which Biggs had taken cover. Biggs returned with a shot which tore into Cashel's heel. Cashel fired again and Constable Stark came to the rescue. Then the murderer dropped back into the cellar, and the police retired from the building to await the arrival of Inspector Duffis. When he arrived it was decided to fire the building.

THE BUILDING FIRED.

The contents were carefully removed and the torch applied. When Cashel smelled the smoke he gave signs of a parley. A revolver shot was heard and Cashel called out that he was going to kill himself, but wanted some one to [illegible] from his mother. This had no effect on the police and he was ordered to come up and hold up his hands. Cashel then cried out he would kill himself, and said the letter from his mother would be found in a corner of the cellar. Another shot was heard, but no one moved from above, and the inspector again ordered him out. A minute later Ernest Cashel, haggard, unkept, bearded and sleepy came up, put up his hands in the air and gave himself up. He was soon afterwards in the cells at Calgary. [illegible] the way in, and said he could have escaped frequently but that he would not leave his brother, who had dared so much for him. Cashel was thoroughly up to date on all the doings in his case, knew that he was to be hanged on the 26th, and of the conviction of his brother.

FIGHTING THE REBELS

Succeeds in Joining Hands With Okahandja Garrison—The Rebellion in German Southwest Africa

Swakopmund, German Southwest Africa, Jan 26.—Lieut. Zulow's force of 120 men, which, as announced on January 16, appeared to be in a dangerous position near Wajdau, has fought its way through the rebels besieging Okahandja and has joined the garrison, which occupies a strong position. About 25 miles of the railroad are reported to have been destroyed.

CZAR STILL FOR PEACE.

REASSURING MESSAGE TO VICEROY IN THE FAR EAST

Brutal Conduct of Russian Marines at Vladivostock Toward the Japanese Residents—Alarming Rumors

London, January 27.—A Russian correspondent of The Times says; "The Official Gazette of Saturday published another expression of the Czar's wish for peace in the form of a telegram to Admiral Alexieff, the Russian viceroy in the Far East. The Czar's message, which was read to all the troops in Manchuria, concluded, 'May the Almighty bless Russia with peace and prosperity during the coming year.'"

The correspondent of the Times at Moscow says. Most of the leading provincial organs counsel moderation in regard to Russia's Far Eastern policy. The majority of Russia's millions are ignorant of, and indifferent to, the question, while the bulk of the really interested urban people oppose any military campaign. Economic and not political considerations influence the latter. Trading circles say that Russia needs economic stability more than imperial expansion.

The Times' correspondent at Tokio says the rumors of Russia's pacific intentions produce no effect in Japan, which is absolutely determined to insist upon a thoroughly satisfactory settlement.

The Tokio correspondent of the Times says letters from Vladivostock say that a party of Russian marines landed on the 9th inst., and subjected the Japanese residents to great violence. They wrecked twenty-four houses, maltreated women and children. The riot lasted twenty hours, and the rioters, who were accompanied by their officers, were not restrained by the civil authorities. The Japanese press asks what can be expected during war, when such things take place in time of peace and they urge the withdrawal of all Japanese residents from Siberia.

The correspondent says Corea's declaration of neutrality is not taken seriously in Japan. It reached Tokio in a despatch which said that, in view of the Russo-Japanese complications, which apparently were not yielding to diplomatic negotiations, Corea had decided to maintain strict neutrality in the event of war.

The Times correspondent at Shanghai says a Neuch Wang correspondent writes that the Russians have removed a member of the Maritime Customs staff from the administration of the native customs revenue, which is part of the security for the Boxer indemnity and have put a nominee of their own in his place. This is only one of the many indications of the value of the other powers and that Chinese sovereignty will be recognized in Manchuria.

The correspondent of the Times at Seoul says the appointment of Yetongik, as Minister of War, is unpopular with the army, the sinecurists being afraid of possible changes. Many robberies with violence are occurring in the country districts.

PROPOSED DEMONSTRATION.

On Wednesday next a fortnight will have elapsed since Japan sent her rejoinder to the last Russian note. Reports from Tokio and Paris speak of the possibility of Japan making an important military demonstration in Corea, if Russia does not tender a reply by that date. The Paris Matin says it hears the four Japanese divisions will be landed in Corea. All reports from the Far East, both from Russian and Japanese sources describe the continuance of war preparations which are unabated, despite the general idea that Russia is inclined to peace. Paris newspapers assert that Foreign Ambassador Delcasse has declared that he hoped to be able, within a few days to publish a definite statement that the danger of war was ended. This assertion is believed to be the result of the exchange of views between the various chancellories.

Reports from Tokio say that serious defects have been discovered in the construction of the Russian battleships Tzarevitch and Sevastopol, and the cruisers Bayu and Variag, and that the naval authorities at Port Arthur are greatly embarassed by the discovery.

A despatch from Che Foo reports a fight on the Manchurian Railway between Russian troops and Chinese marauders. Three soldiers were killed. Ten Chinese were captured and handed over for execution.

The Government at Port Arthur has put an embargo on all dealings in horses and provisions. Troops are pouring into Port Arthur from the north.

Admiral Alexieff, Viceroy of the Far East, was absent from the last council owing to an attack of Angina pectoris.

TWO ARE DEAD

Quebec January 27— A wire from Chicoutimi records the death of two carpenters named Bouchard and Boulet, and the critical condition of another named Morin, who were poisoned on Saturday by drinking methylated alcohol which they had in their shop.

VIEWED AS WORK OF LABOR UNIONS

Campaign Against Emigration to Canada From Britain Grows

REPORT SENT TO OTTAWA

Meanwhile Emigration Authorities in London Are Making Battle to Counteract it

London, January 27. — A persistent propaganda is still being carried on in this country to prevent emigrants under any circumstances from proceeding to Canada. The officials here declare that this is being done under the auspices of United States labor bosses, who control the Canadian labor unions. The design presumably is to destroy the entire emigration movement throughout Great Britain. That, of course, is impossible, but, nevertheless, the propaganda is capable of doing much harm to emigration to Canada.

The matter has been fully reported to the Government at Ottawa. It remains to be seen what official action will be taken.

COMBATTING THE CAMPAIGN.

Meanwhile the Canadian Emigration Department is meeting the onslaughts upon Canada as a field for settlement by the publication of letters from successful settlers, and also by arranging interviews between intending emigrants and successful Canadian farmers now visiting this country. The department has also circulated one quarter of a million of pamphlets containing remarkable testimonies of members of the recent Chambers of Commerce Congress at Montreal to Canada's fertility and entire suitability for settlement. Much activity is also being displayed in disseminating Canadian literature and maps through schools. One ingenious method of advertising Canada is being eagerly adopted by the grocers and other small traders throughout the country. Their wrappers for goods now bear an excellent picture of Canada's arch of the Coronation year, with a pithy description of its evidence of Canada's resources.

ONTARIO RAILWAY EXTENSION

Important Lines to Be Built Throughout Eastern Ontario

Some important schemes of railway extension in Central Ontario are foreshadowed in notices of applications which are to be made to Parliament for charters. One of these is styled "The Central Ontario Counties Railway Company" and the proposition is to construct and operate a line from Ivanhoe through the township of Rawdon, in Hastings county, the townships of Seymour, Percy, Cramahe, Haldimand and Hamilton in Northumberland county, the townships of Hope, Clark and Darlington, in Durham county the townships of Whitby and Pickering in Ontario county, and the township of Scarborough in York county to Agincourt on the C.P.R.

The second enterprise is termed "The Campbellford, Lake Ontario & Western Railway." The proposed route is from a point between Plainton and Ivanhoe to Cobourg, and thence to a point between Locust Hill, and Leaside Junction on the C.P.R. The first part of the line will run in a southwesterly direction through the counties of Hastings Peterborough and Northumberland. From Cobourg the line will proceed in an easterly and northwesterly direction through the counties of Northumberland, Durham, Ontario and York. The company will seek to have it declared in their charter that the line is one for the general advantage of Canada.

LAKE SUPERIOR CONSOLIDATED

A Forecast of Plan Proposed by Speyer and Company

Philadelphia, January 27— There is every reason to believe that Speyer & Co. will this week announce whatever plans they have for the reorganization of the Lake Superior Company. Unless the plan shall be deemed equitable and fair by the Moffly reorganization committee it will not be recommended for acceptance. Should no recommendation be made the property will be handled entirely by the Canadian liquidators.

The delay on the part of Speyer & Co. in announcing their plan to allow stockholders to participate in the reorganization, or in the liquidation of the collateral held as security for the loan that is said to be due to the failure, until a few days ago, of a number of the members of the Speyer Syndicate to sign the agreement, vesting New York bankers with absolute authority in the premises. Ten days ago all the signatures were affixed to the syndicate agreement, which binds members to subscribe an amount equal to one-third of the sum they advanced in the loan should Speyer & Co. declare its necessity for reorganization purposes. Should the Speyer plan be rejected thousands of stockholders who invested millions in the industries at the Soo will lose virtually all their investment. If the plan proves equitable, the money deposited in the Fidelity Trust Company under the terms of the Moffly committee plan will be turned over to the bankers. Much interest centers in the stock assessment feature of the proposed Speyer plan. It is believed it will call for a $6 share assessment, taking in the $3 already paid and calling for $1 a share a year until $2 shall be paid. It is also believed that the capital of the new company will exceed $40,000,000 the figure set in the Moffly Committee plan. This will be increased, it is believed, in order to make a more equitable exchange of shares.

C. P. R. LOSES A FINE BRIDGE

Winnipeg January 27— A fine C.P.R. steel bridge, with two long spans resting on stone piers fifty feet high, which was known as "Snow Bank Bridge," and spanned a deep gulch, was swept away by a snow slide some days ago, not a vestige of it being left. A temporary bridge was erected over the gulch in two days.

BURIES SISTER AT JOLIET

Sir William Van Horne Accompanies the Remains from Montreal

Joliet, Ill., Jan. 27—Sir William Van Horne, the well known railroad builder and former president of the Canadian Pacific arrived here this morning from Montreal, accompanying the remains of his sister, Miss Mary Van Horne, who died in Montreal Sunday. The funeral was held at 10 a.m.

JEWS ARE SUFFERING

Optimistic Reports Circulated in Britain Conceal the Real and Alarming State of Affairs

London, Jan. 26.—The Times has the following to-day from Tangier. Twelve hundred Jewish refugees have arrived at Casablanca in absolute destitution, having lost everything through the depredations of the neighboring tribes. Local assistance has been rendered to them, but this is totally inadequate, and $10,000 is needed to relieve their sufferings. The optimistic reports of the condition of Morocco which are methodically circulated in the British press in order to conceal the real state of affairs, have prevented the miserable plight of the Jews of Teza, Arzeila and Shawia becoming known.

MR. EDWARD A. PECK IS ELECTED WARDEN

COUNTY COUNCIL MET IN THEIR SEMI-ANNUAL SESSION

The New Warden's Address to the Council—The Standing Committees for the Year Struck

The County Council began their January session yesterday afternoon, the Warden, Richard Crowe, Esq., in the chair. There were present Messrs. T. J. Johnston, E. A. Peck, G. W. Fitzgerald, T. M. Humer, John Menogue, W. T. Curtis, W. T. Buck and D. Moloney.

The first business was the selection of Warden for the year 1904. Mr Fitzgerald moved and Mr. Curtis seconded, That Mr. E. A. Peck, be Warden for the year 1904. This was carried unanimously.

Upon being escorted to the chair, Mr. Peck thanked the council, in well chosen words for the honor done him. He would endeavor to perform the duties to the best of his ability. There were two matters a little out of the ordinary which he chose to refer to. Since last session, the important village of Ashburnham had united with the town, and an adjustment of accounts between the town and county, and of debentures, as relating to the village would be necessary. The other problem was the necessity that a House of Refuge be constructed by the town and county. The Legislature, however, did not require the work to be undertaken until the first of January, 1906, but the Warden referred to the question as one which this year's council might wish to deal with. He said he would further discuss county matters, and more properly, he considered, at the June session.

The minutes of the last meeting of council were read and confirmed.

A communication was read from Mr. T. E. Bradburn, Treasurer of the Township of North Monaghan, stating that he had paid in 1903, for the township, to the County Treasurer, the sum of $3116.69. Another from the Treasurer of Northumberland and Durham, stated that he had paid the County Treasurer $161.93—Received.

Mr W. E. Roxborough, of Norwood, forwarded his resignation as School Trustee.—Referred to the Committee on Appointments.

On motion Wednesday afternoon was set apart for the purpose of receiving deputations.

It is generally customary at the opening session to appoint auditors but this was deferred until this morning.

On motion the council went into Committee on the Whole to strike the Standing Committees for the year. Mr. Fitzgerald in the chair.

The council then adjourned until this morning at ten o'clock.

CHICAGO MILLIONAIRES PROMOTE GIGANTIC PHILANTHROPIC WORK

Chicago, January 27.—Chicago millionaires are organizing to promote a gigantic philanthropic work, no less than the colonization of the slum population of the great American cities upon farms. The field and workshop society is the corporation which has been formed to work out the details. The organization will be national. Fifty thousand dollars will be spent in organization. When societies are organized in all the cities, delegates will meet in convention and elect trustees to conduct the business of the society.

The embryonic organization in Chicago consists of an advisory board of 100 members. Its officers are, John Lambert president; Medell McCormick, vice-president; George Lytton, general secretary; George Dixon, financial secretary.

DOLLAR WHEAT SURE

Chicago January 27—Important covering of short May wheat was a leading feature of last week's western grain markets. As a result of this covering, which was prompted by threatening moves on the part of the powerful Armour crowd, the price for May wheat easily went beyond 95 cents. A significant feature in connection with the market was the ease with which the advantages were made after 90 cents was touched. There is an army of Chicago traders, who now confidently expect dollar wheat, war or no war, in the Far East. Domestic conditions, with what seems to be a substantial improvement in the demand from Continental Europe, are expected to result in boosting the cereal to $1 a bushel.

THE STRIKE OF HULL PAPERMAKERS

Ottawa January 27— Today marks the beginning of the third week of the Eddy paper-makers' strike without any material change in the condition. The men are holding out for shorter hours, while Mr Eddy persists in his determination to maintain "open shop." He says he has three of his seven machines in operation and will start the others as soon as he can secure the men. Beginning today the men will draw strike pay at the rate of $3 per week for single men, and $5 for married.

EVERYBODY READS THE TIMES.

TERRIBLE EXPLOSION NEAR PITTSBURG, OVER ONE HUNDRED DEAD

One Hundred and Twenty-Five Men Lyin Dead in Passageways of the Harwick Mines

Pittsburg, Jan. 26.—From all that can be gathered at a late hour to-night, between 100 and 120 men were lying dead in the headings and passageways of the Harwick mine of the Allegheny Coal Company at Cheswick, the result of a terrific explosion to-day.

Cage after cage has gone down into the mine and come up again, but only one miner of all those who went to work this morning was brought to the surface. The man rescued is Adolph Gunia and he is still in a semi-conscious condition at the temporary hospital in the rude schoolhouse above the mine.

The death list was up to midnight supposed to be 184, but shortly before 12 o'clock a rescue party came to the surface and reported that 75 miners had been located, the majority of whom it is believed, are alive.

Of those in the mine all are probably dead.

The explosion occurred about 8 o'clock this morning. The first warning was the sudden rumble. A sheet of flame then rose from the deep shaft.

Both mine cages were hurled through the tipple twenty feet above the landing stage and the three men in the tipple were hurled to the ground. A mule was thrown high above the shaft and fell dead on the ground.

The rumble of the explosion and the crash at the pit mouth started the little village, and the wives and children of the men below rushed to the scene of the disaster, but found little encouragement. There was no way to get into the deep workings.

The cages that let the men into the mine and brought them out again when the day's work was done, were demolished.

All day long there was a jam of waiting women and children about the mouth of the pit.

There were calls for assistance and for surgical aid from the men in charge of the mine, but it was not until four o'clock this afternoon that the first attempt at rescue was made. This was a failure as the two men who volunteered to go down were driven back by the foul air.

FIRST TO THE RESCUE.

Shortly after 5 o'clock, Selwyn Taylor, a mine expert, and one of his assistants, signalled for the engineer to lower them into the shaft. Taylor is still down there. Three times efforts have been made to reach him, but so far without avail. Thomas Wood, one of the first of the rescue party hauled to the surface, told this story of his trip through the mine:

"I was with Taylor, and we clambered over three or four falls. Taylor layed out the mine, and seemed to know the way. There was one man alive at the foot of the shaft. He was sent up and then we took the mule path to the south love. We saw two men who were alive and notified those who were back of us, and then went on. We passed the third, fourth and fifth heading, and then through an overdrift into the air shaft. I began to feel sick and dizzy, and then I saw Taylor stagger and fall. His lantern fell. We tried to lift him up, but could not carry him up, and I made my own way to safety."

F. W. Cunningham, the mine inspector of the fourteenth district, reached Harwick to-night. He said: "The mine where the explosion took place was inspected I think, about the first of December. There was something in here then, but I never considered the mine dangerous."

Among the rescue party in the mine at a late hour, in addition to Inspector Cunningham, were Jack McCann, Bob North, Robert Carney, Henry Beckam, [illegible] Walkenerst.

An additional party of twenty went down shortly after midnight.

Three of the rescuers, Becker, Smith and Walkenerst, when they returned to the surface declared that, in their opinion, all in the mine, outside of the rescue party are dead, including Taylor, the engineer.

H. F. Hutchinson, who gave out the lamps to the miners before they went to work in the pit this morning, said: "At 7.15 o'clock I had given out between 18 and 190 lamps."

There is a light in every cottage in the little hamlet above the pit mouth. There was still a crowd about the mouth of the pit late to-night, but it will probably be hours before the full extent of the catastrophe is known.

LIBERAL CANDIDATE ELECTED IN NORTH OXFORD

Colonel Munro Has a Majority of 700--With Several Places to Hear From

Woodstock, Jan. 26.—Col. Munro, the Liberal candidate, was elected in North Oxford yesterday over J. R. Butler, the Conservative candidate, by a large majority. The drifted state of the roads prevented returns from many country polling places, which will probably increase the majority.

JAPAN IS DETERMINED WHAT RUSSIA WANTS

Brutal Work of Russian Marines at Viadivostock

London Jan. 27.—The Tokio correspondent of the Daily Telegraph says The Russian reply to the Japanese demands has not yet been received. There is no new developments in the situation. The Official Gazette publishes an ordinance empowering the Government to take over the control of all private railroads for military purposes. The situation is very grave and developments are hourly expected.

A despatch to the Daily Mail from Warsaw says that arrangements have been concluded for calling out 80,000 more reserves in the Kharkoff, Kieff and Odessa districts if necessary.

Considerable tension is again observable in Governmental quarters concerning the Russo-Japanese situation. This is due principally to the fact that the efforts towards a pacific adjustment have not made the progress which the officials hoped and expected. Those highest in authority say the negotiations have reached a point where practically no progress is occurring in any direction.

It appears that one of the most difficult features in the mutual distrust and hatred which have grown up between the parties. It is said that every stage of the present exchanges develops Japanese suspicion of Russia's good faith and Russia's antipathy to Japan. Owing to the bitterness diplomatic efforts to secure a middle ground are proving unusual difficult.

The St Petersburg correspondent of the Daily Mail reports that the first reserves resident there have been warned to hold themselves in readiness for active service. This is possibly a step taken with the object of preparing the public for eventualities, the correspondent says, and for obtaining the support of public opinion, which the war party hitherto has lacked. Nothing approaching a war, however, is yet discernible.

London, Jan. 27.—A despatch to Reuter's Telegram Company, from St. Petersburg says that the principal danger now is [illegible] to be confined to the disorderly elements in Corea. The latest news received here represents a great majority of the Coreans as sympathising with Russia and hostile to Japan. Other despatches say that the Japanese are embarking 10,000 laborers at Tien-Tsin, in order to hasten the completion of the Seoul-Fusan Railroad.

Some anxiety has been expressed in St. Petersburg regarding the military movements in China.

THE RUSSIAN REPLY.

St. Petersburg, Jan. 26.—The exchange of communications between the Foreign Office the members of the Committee of the Far East, Viceroy Alexieff, and Baron de Rosen, the Russian Minister at Tokio is still going on. No official indication has been given of when a conclusion will be received, but a diplomat who is close to such negotiations expresses the opinion that the Russian reply will possibly be ready this week. An authorative denial is given to the report that Russia ever contemplated requesting the United States to explain the attitude attributed to the United States.

The Corean Minister has received advices that his Government will soon open the port of Wiju, on the Yalu River, at the request of the United States, to the commerce of the world.

Tokio, Jan. 26.—Takashima, the Japanese interpreter for the Russian attache, was arrested on Saturday last on the suspicion of acting as a spy in the Yokosuka fortified zone. He has been taken to Yokohama for trial. It is reported that conclusive evidence has been obtained regarding other suspects. Such treachery is a capital offence in Japan.

WEATHER NOTES

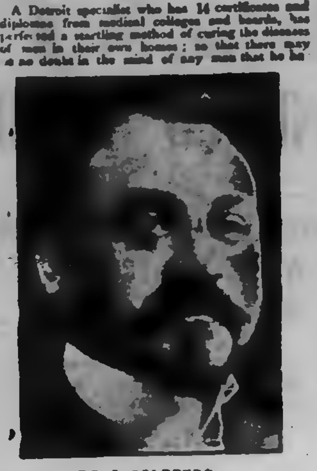
CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has



DR. S. GOLDBERG.

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, 208 Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

The Morning Times paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 10c per month, and to outside points at $3 per year strictly in advance.

PETERBOROUGH, JANUARY 27, 1904

EPIDEMIC OF PNEUMONIA

Pneumonia is a winter disease, and one which is becoming more and more prevalent in Canada. The record of its ravages in New York is alarming. Hundreds of deaths from it have occurred and with each cold spell the number seems to increase. The disease is, however, epidemic in form, and it is said to be natured by contagion.

Former Surgeon-General Sternberg of the United States army and other eminent bacteriologists declare that the germ of pneumonia is able to live in the salivary secretions, and then attack the lungs as soon as they become vulnerable as a result of catching cold, and Dr. Sternberg also says that the micrococcus "is present in the salivary secretions of a considerable proportion of healthy persons, both in this country and Europe."

"In my opinion," says one of the experts of the New York department of health, "the habit of expectorating in public places has much to do with spreading the disease." The care of persons sick with pneumonia is in the highest degree important. It seems to be conceded that the micrococcus of pneumonia will not stand direct exposure to the sun for more than a few hours and can be destroyed by a temperature of 140 degrees, but under certain conditions it will retain its vitality in dried sputum, so that the sputum of persons sick with pneumonia should be disposed of with great care.

The doctors, fortunately, are not at [illegible] subject. They say that fresh air is essential to good health, and living and sleeping rooms and that it is a protection against pneumonia, but draughts must be avoided. The body, too, should be warmly clothed, and nourished with plain, healthy food. Liquor is not a good thing, and should be avoided. Care and discretion generally are invited. The human organism is not something which can be abused.

TUBERCULOSIS IN ONTARIO

According to a report just issued by the Ontario Board of Health, there were 137 deaths from consumption in November last in Ontario.

From all other contagious diseases put together, the deaths numbered 122. Consumption outdid all the others, combined.

The detailed list of deaths was this;

Consumption	137
Diphtheria	64
Typhoid	28
Whooping Cough	14
Scarlet Fever	9
Measles	6
Smallpox	1

The mortality from diphtheria was very much larger than usual from that disease. As a rule, there are but about half that number of deaths monthly from diphtheria, so that the excess of the deaths from tuberculosis above those from other diseases was not so large in November as usual. For the three months, September, October, and November, the total of deaths from consumption was 455. From diphtheria, 140 died. The total for all contagious diseases, other than tuberculosis including diphtheria, was 323. Consumption distanced the whole of them together by nearly 40 per cent.

Grim figures! Recalling them is no pleasure: it is a duty; for consumption can be checked by public effort and expenditure, if the public will awake to the fact.

In the city of Ottawa, there were seven deaths in November from contagious diseases. Five of these were from consumption.

EDITORIAL COMMENT

The Interior Department have issued a colored book of cartoons to be used for the purpose of influencing immigration to Canada. The general theme of the illustration is the enormous capacity of the Canadian northwest for wheat production and the possibilities which it holds for intending settlers. The idea that Canada is the granary of the empire is well brought out, as well as the movement of farmers from the United States to the fertile prairie.

A curious incident occurred in an English police court recently where a man named Travis was sentenced to a month's imprisonment for obtaining a postal order by false pretenses. He pleaded that he was "officially dead," and his story was that when with the British army in South Africa he deserted, obtained some clothes from the Kaffirs, made his way to the coast, and worked his passage home. He then discovered that he was reported dead, and though he subsequently gave himself up as a deserter the war office gave an official assurance that he had "died at the front" and would not arrest him.

On the United States pension roll of the Topeka agency is the name of a man who has served in three wars and is one hundred years old. He is Thomas E. Sauls of Webb City, Missouri, where he conducts a little shoe shop and makes his living in spite of his one hundred years. He was born in Tennessee in 1803. He was a soldier in the Seminole, the Mexican and the Civil wars. In the Civil war he was a sergeant of the Sixth Kansas cavalry. That was after he had passed fifty.

After the Mexican war he represented the country of his nativity in the Tennessee legislature. While he lived in Tennessee he was a lawyer. His pension is $30 a month and was granted by a special act of congress.

Lost Appetite Quickly Revived

A Fitful Appetite is generally associated with a general weakness of the system. Ferrozone the best tonic and appetizer should be taken after each meal and a rapid improvement is sure to follow

Distaste for food often follows La Grippe and fever, or is brought on by over excitement or worry. It is a dangerous condition and paves the way for more sickness. On this account it should be at once corrected by the regular use of Ferrozone.

A new and wonderful medicine is Ferrozone. It instantly imparts a real zest for food, and gives power to the stomach to digest and assimilate all that is eaten. Dyspepsia and indigestion are quite unknown to those who use Ferrozone, simply because it digests food so quickly, that it has no time to ferment or sour on the stomach.

Ferrozone regulates the bowels, quickly remedies urinal disorders and causes all the organs of the body to perform their functions with proper regularity. If the liver is torpid, or the kidneys not eliminating as they should, they are soon restored to normal action, and the poisons that might otherwise be retained in the body to cause disease and ill health, are carried off through natural channels.

The surest road to perfect health is Ferrozone. Young girls who have been accustomed to eat almost nothing at breakfast, soon get over the bad habit by using Ferrozone, and as a result grow into healthy vigorous womanhood. When people get up in years and loose the strength and vim of youth, they need a good tonic and blood builder to enable them to resist the trials of our vigorous winter, and this is where Ferrozone can be used to great advantage.

Both the young and the old, the weak and the strong, male and female can derive untold benefit from Ferrozone. It is guaranteed to contain no opiates or injurious drugs, and will do just what is claimed for it.

Druggists recommend and sell it price 50c. per box or three boxes for $1.25. Sent to your address by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont.

Ayer's Cherry Pectoral for hard colds, chronic coughs, consumption, old cases, severe cases. Ask your doctor if he has better advice. J. C. Ayer Co., Lowell, Mass.

A DOLLAR DRAFT WITH EVERY BOTTLE

Professor Marvell's Honest Plan to Have His Remedy in the Hands of Every Man and Woman in Canada who Suffers f om

CATARRH

Recognizes the Fact That Scores of Sufferers Outside of Toronto Cannot Avail Themselves of Free Trial Treatment at His Offices.

A ECNA-IID DOLLAR DRAFT

Is Enclosed with Each Bottle of the Remedy, and the Buyer is Invited, in Plain Language, to Fill in His Name and Present it for Payment Should the Treatment not Prove Satisfactory.

Professor Marvell is nothing if not original. With his originality he also practices what he preaches. He is the discoverer of an entirely new method of

Noises and Asthma. He dispenses with the old fogey inhalers, blowers, atomizers, snuffs, powders, and noxious stomach nostrums. None of these are used in his principle of cure. He believes all these have had their day, and, best of all, proves it by testimony from treatment for Catarrh, Deafness, Head the people who have used his new system of treatment. Prof. Marvell says: "The people who suffer from this loathsome disease have been living in a kind of natural faith, a natural hope and expectation that, some day, if they lived to see it, some new method of treatment would be discovered and the end of the old system would come suddenly. And it has come. Marvell's method of treatment for Catarrhal trouble is as far ahead of the older systems as the electric light is over the tallow dip, or the electric car over the old stage coach. The hope of thousands of victims of this ever-increasing and loathsome malady has come at last. It has set the people of Canada talking as never before. Hundreds of men and women who had failed to secure benefit under the old fogey nostrums have crowded Marvell's offices from the first day of opening. They have taken the remedy home, have been given free treatment, and have come back to praise it, as honest men and women should praise a meritorious article after benefits received. The testimony is on file in Marvell's offices. The names and addresses of a score of people who say they have been cured of Catarrh of the Head, of the Throat, the Stomach, Deafness, Head Noises and Asthma. Marvell knew it! Knew what his remedy would do for every sufferer.

PULLING UP STAKES IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

MEN'S SUIT SLAUGHTER

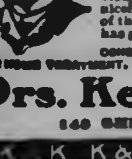
BLOOD DISEASED MEN

If you ever contracted any blood disease you are never safe unless the virus or poison has been eradicated from the system. Have you any of the following symptoms? Sore throat, ulcers on the tongue or in the mouth, hair falling out, aching pains, itchiness of the skin, sores or blotches on the body, eyes red and smart, dyspeptic stomach, sexual weakness—indications of the secondary stage. Don't ruin your system with the old fogy treatment—mercury and potash—which only suppresses the symptoms for a time only to break out again when happy in domestic life. Don't let quacks experiment on you. Our New Method Treatment is guaranteed to cure you. Our guarantees are backed by bank bonds, that the disease will never return. Thousands of patients have been already cured by our New Method Treatment for over 20 years. No names used without written consent.



Mr. E. A. C. writes: "Your remedies have done me more good than Hot Springs and all the doctors and medicines I had previously tried. I have not felt any of those pains or seen any ulcers or blotches for over seven years and the outward symptoms of the loathsome disease have entirely disappeared. My hair has grown in fully again and I am married and happy."

IS THERE CERTAINTY IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.

2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.

3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.

4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.

5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.

6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.

7th—By being able to erect a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 5 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $20.22 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $20.22 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

MEDICINAL QUALITIES.

Asparagus is very cooling and easily digested.

Cabbage, cauliflower, Brussels sprouts and broccoli are cooling, nutritive, laxative and purifying to the blood, and also act as a tonic, but should not be eaten too freely by delicate persons.

Celery is delicious cooked, and good for rheumatic and gouty people.

Lettuces are very wholesome. They are slightly narcotic, and lull and calm the mind.

Spinach is particularly good for rheumatism and gout, and also in kidney diseases.

Onions are good for chest ailments and colds, but do not agree with all.

Watercresses are excellent tonic, stomachic and cooling.

Beetroot is very cooling and highly nutritous, owing to the amount of sugar it contains.

Parsley is cooling and purifying.

Turnip tops are invaluable when young and tender.

Green nettle shoots, if gathered in Spring and cooked as spinach, form a most delicate and wholesome blood-purifying vegetable.

Potatoes, parsnips, carrots, turnips and artichokes are highly nutritous, but not so digestible as some vegetables. Potatoes are the most nourishing and are fattenning for nervous people.

Tomatoes are health-giving and purifying, either eaten raw or cooked.

Chili, cayenne, horse-radish and mustard should be used sparingly. They give a zest to the appetite, and are valuable stomachics. Radishes are the same, but are indigestible, and should not be eaten by delicate people.

WISE MAXIMS

There are no elevators in the house of success.

The "bad boy" often makes the best man.

A man can be too confiding in others, but never too confident in himself.

A college education is a good thing, but many a graduate finds himself over trained.

Clothes don't make the man, but good clothes have got many a man a good job.

A bad man with good manners often outdoes a good man with bad manners.

The writer, a Manitoban, and an Anglo-Indian bound for Penang were seated in the smoking-parlor of a Canadian Pacific Pullman car. The Manitoban was a cheery optimist; the Anglo-Indian a pessimist with a liver, who said he believed Canada's future lay with the United States. This my Manitoban resented, and when the Anglo-Indian ended a remark with a pious hope that Manitoba might some day be a desirable country, in spite of her severe winter, my Manitoban did not try to conceal his contempt.

"Huh!" he ejaculated. "I tell you, it's pretty prosperous right now, sir, winters and all, and don't you forget it. A fur coat's a lot cheaper than malarial fever anyway." (The Malay peninsula had been described.)

"Oh, yes! it's prosperous enough I dare say," replied the Anglo-Indian disdainfully; "but really when you talk of the Canadian North-West supplying the British wheat market . . ." and he shook his head pityingly.

"See here," said my Manitoban, "how much wheat did Great Britain import in 1902, anyway?"

The Anglo-Indian shook his head again. "Really," he began, "I'm not able to state offhand——"

"Well, I am," interrupted the other. "Great Britain imported in 1902 one hundred and fifty-one million bushels of wheat. In 1902 Manitoba's crop of all grains was one hundred million bushels, and the total wheat crop was fifty-three million bushels."

"And how much of that fifty-three million bushels found its way to England?" asked the Anglo-Indian sarcastically.

"That's all right," nodded the Manitoban; "little enough, maybe. But I'm coming to that. During the year ending June 30, 1902, the whole Dominion exported to Great Britain twenty-five and one-quarter million bushels of wheat and three-quarters of a million barrels of flour out of a total export of twenty-six million bushels and one million barrels. Now, sir, that fifty-three million bushels was raised on two million acres of land. By 1910 Manitoba may have six million acres of land under wheat cultivation—the land is there all right—and similar conditions to 1902 would mean a crop of one hundred and fifty-nine million bushels, or the total consumption of wheat in Great Britain for last year. And take notice, please, I am not saying a word about the millions of acres of rich soil in the North-West Territories awaiting colonization."

"Why is there so much unoccupied land in Manitoba?" I asked, watching the Anglo-Indian ponder on the figures quoted as I spoke. "Are they 'free' lands?"

"No, sir," replied the Manitoban; "you bet most all the free land that's any good has been taken up in Manitoba. The railways, the land companies, syndicates, private individuals, own thousands of acres of land in Manitoba, and they are selling them every day, cheap, too."

"What do you call cheap?" asked the Anglo-Indian.

"Ten dollars to twenty dollars, £2 to £4 per acre," replied the other. "Why, land which is not nearly so productive in Ontario sells from $40 to $60 per acre. The West is still supposed to be 'wild,' I guess," and he laughed merrily. "Last year the official average of wheat per acre in Manitoba was given at 26 bushels. Take an average price of 50 cents per bushel, and you have a gross return of $13 per acre. Farming by figures is easy—and delusive—so let's cut this return in half (and that provides for every contingency except annihilation) and you have a gross return of $7.50 per acre, which leaves a profit, after expenses, sufficient to warrant the price of good lands going to $50 per acre within a year or two."

"And what is the reverse side of this picture?" asked the Anglo-Indian, interested in spite of himself.

"Oh, that's there all right," laughed the Manitoban. "We've had bad crops, frozen crops, dry seasons. We get a six months' winter, which is gen-u-ine winter, all right. In the early days we had to team our wheat twenty-five to fifty miles to market, and that was no picnic when the thermometer was at 40 degrees below zero. Then the mosquitoes in summer, they worry a tenderfoot some, and . . . oh, dang it! that's about all, I reckon. But still," and he waved his hand out towards the darkness, "I tell you, sirs, it's a fine country, whether it's yellow with ripening wheat or white under the bright winter stars. Its men are mostly men—those who count are—and its women know how to make a farmhouse on the prairie a pretty good place for a fellow to get home to. It's a clean, healthy life, gentlemen, and a man keeps young on the prairie a long time after he has passed the 50-mark.

"We're a long way from the center of things up here, I guess, and maybe we are a bit rough, but that doesn't count. I've often watched the twilight steal along so gently it's like a dream, and the Northern Lights shoot across the sky like a mist of flame. And it's good to smell the spring rains when they start the old earth into greenness, and to hear the houk! houk! of the geese overhead, saying they are pleased to get home to the Northland again. You bet, gentlemen, it's a good country to live in and work in, and I guess it's all right to sleep in when the work is well done. Here's my station, and I'll bid you good-night, and I hope I haven't tired you with my talk."

And the Manitoban stepped off the car as we pulled up at a station.

The moving train had resumed its steady thud! thud! thud! before the Anglo-Indian spoke.

"The Canadian Government mayn't know of him," he said, "but that man is the best sort of emigration agent they have got." He rose and yawned. "I think I'll turn in," he said. "Good-night."

But I sat and smoked for a while, thinking of the Manitoban and the life he had sketched. And the train rushed steadily forward through the night, and I thought of the unseen and as yet untilled prairie stretching to the horizon on either hand, and tried to imagine its broad acres peopled with "men who were mostly men."—H. T. Munn in "Outlook."

The Prodigal.

I bought my laughter with the coin of grief,
I paid for happiness as kings might do,
Yet, though I beggared go beyond relief,
Oh heart, the glad, mad spendthrift hours we knew!
—Theodosia Garrison in "Harper's Bazar."

MAN WAS BOILED TO DEATH

Vancouver, B. C., January 26— James McLennan, while working near a vat of scalding water used for loosening bark on logs in the British Columbia Manufacturers box factory on Lulu Island, fell into the vat, and before he could be extricated, he was boiled to death.

EVERYBODY READS THE TIMES.

HIGH PRAISE FOR THE INTERCOLONIAL RAILWAY

Its Equipment, Scenery and Literature Most Favorably Commented Upon

Mr. D. Pottinger, General Manager of the Government Railways has received the following letter dated Dec. 3rd, from the office of the Board of Trade, Montreal, which speaks for itself;

D. Pottinger, Esq., General Manager Intercolonial Railway, Moncton, N.B.

Dear Sir,—I have pleasure in communicating herewith a resolution adopted by this committee conveying to your management an expression of gratitude for the tour over the Intercolonial Railway, provided for the over-sea delegates to the Fifth Congress;

"Resolved, that the Canadian Committee of Arrangements tenders to the Intercolonial Railway Management its most sincere thanks for having, at this Committee's request afforded the over-sea delegates to the Fifth Congress of Chambers of Commerce of the empire, a complimentary tour over its line, and for the added courtesy in providing special trains for the two parties.

"That the lovely scenery of the Matapedia River together with the beautiful valleys of the Miramichi and Nashwaak rivers, seen when the autumnal tints were at their best

WAS GREATLY ENJOYED

BY THE DELEGATES

as were also the visits to the cities of Fredericton, Halifax, St. John, and Sydney, with the local trips provided by the citizens thereof, while the ride along the shore of the beautiful Bras D'Or Lakes was declared to be worthy conclusion of the glories of the All Canadian tour.

"That the delegates greatly appreciated the illustrated volume, "Forest, Stream, and Seashore," which the Intercolonial Management so kindly presented to all who took the tour over its lines.

"That the Committee of Arrangement is convinced that the circumstance, that, with the assistance of the Dominion Government and by the kindness of the Railway and Inland steamboat companies it was able to tender to the over-sea delegates these extended tours through Canada added largely to the success which has attended the holding of the Fifth Congress in this City, and it is most gratifying to know that these tours have resulted in impressing the delegates most favorably

WITH THE GREAT RESOUR-

CES OF THIS COUNTRY

the vast opportunities it affords for the investment of capital, and its superior advantages as a home for the surplus population of the motherland.

"That the committee has been gratified to learn that the knowledge of the resources and beauties of our country thus obtained by the delegates will be widely disseminated by them through various parts of the Empire from which they came, for it is the intention of many of the delegates to communicate to the members of their respective Chambers and to other audiences, by illustrated lectures and other means, the information they have gathered during their visit to Canada;

"That the Committee records its belief that the tours through Canada have filled in the highest degree the hope in which they were planned that in addition to affording much enjoyment to

THE OVER-SEA DELEGATES

TO THE CONGRESS

that would result in great and lasting good to our country, and that the railway and steamboat companies who gave the transportation privileges deserve and enjoy the gratitude of all Canadians for their wise generosity in this connection."

The recent Congress of Chambers of Commerce of the Empire being the first of these Congresses held outside of the Mother Country, this Committee caused a medal to be struck in bronze to commemorate that fact, and it subsequently had a few struck in silver for special presentation purposes, one of which is now sent you under another cover in token of the Committee's appreciation of your kindness in connection with the complimentary tour given over your line to the over-sea delegates.

I am Dear sir, yours truly,
(Sgd.) Geo. Hadrill,
Secretary.

A copy of a resolution passed by the Chamber of Commerce and Manufactures (Incorporated) of Sheffield, England, has also been received and which reads as follows.

"At a meeting of the Council of the Sheffield Chamber of Commerce and Manufactures (Incorporated) held on Oct. 22, 1903, it was resolved that the best thanks of this Chamber be and they are hereby awarded to the Intercolonial Railway for their great courtesy and hospitality extended to the delegates from the Sheffield Chamber on the occasion of the Fifth Congress of Chambers of Commerce of the Empire at Montreal.

(Signed)
HERBERT HUGHES,
Secretary."

Before leaving for home Lord Brassey paid a warm compliment to the Intercolonial Railway. "I have never travelled," said he, "more comfortably nor on a better appointed train than that which conveyed me out of Halifax today." He alluded to Canada's Famous Train, the "Maritime Express."

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.65 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values, $12.50. This being a general sample taken from the dump. The other two assays are $62.65 and $70.65 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1879, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.

PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS

"I must—and I ought," were more than many sentences to him now.

They had enlarged into the most important words in his vocabulary.

The great strike had continued in the city, and it had come to the hour when everybody was being affected by it, and intensely interested in it.

He said: "The church is one of the places, if not the first place, in which to discuss it, and help to furnish the remedy. If this does not vitally affect the Kingdom of God, I would like to know what does. Christ had something to say about the most important elements in the society of His day, and I am His representative today. God helping me, I will bring the light of the Gospel into this darkness, and the peace of Jesus into this strife between capital and labor.'

This righteous resolution was being carried into effect each day of the week by most earnest prayer and preparation.

The announcement of his intention had spread among his own people, and among the union men. Most of them who did not know him only said: "Oh, he is on the side of his parishioners, and will only touch the surface of it, and will leave the men to suffer the same injustice."

There was excitement in the church, because two of the officials in one of the street car companies were members of his church, and several other people who were regular attendants at the service, were known to own stock in the railroads of the city.

The building was crowded when the hour for the Sunday morning service arrived, and some were going away rather than stand up the whole hour.

There was a cry which only angels and the ear of God heard this morning in the pastor's room just as the organ began to play and the choir to take their places.

"Oh, God, help me to be true to Thee, and to every man this morning, even if it costs my position or my life."

And then a man appeared on the platform, whose face shone like the faces of his companions in the private room.

Those who had known him best and longest said they had never seen him look so noble and almost divine.

A clear, courageous conscience changes any man's face.

What is it but the index of the soul?

The most interested and attentive listener was Henry Fielding, and, strange to say, he heard scarcely any of the opening service. He was otherwise engaged. Prayer became a reality to him again. He was buttressing and barricading the sermon and making it a mighty fortress of power. That is largely the strength in the sermon.

You can plant the seed in a cave, and not have flower or fruit. The sermon is planted, but needs the warmth and light of sunshine and necessary environment.

After a pause, which brought perfect quiet all over the building and arrested attention, David Dowling arose, walked to the edge of the platform, and stood one side of the pulpit, with his hand on the open Bible.

At any other time he would have trembled and found his introduction the hardest part of the sermon. Now he seemed conscious of the presence of Christ, and recognized that he was simply his mouthpiece. He raised his hand slowly, and then dropped it upon the Bible again, as he said:—

"Here is the constitution for every labor union, and the only rule of life for every employer. The question which I am to discuss this morning is of vital import to society and the church, and the Kingdom of God. While I propose to speak unhesitatingly the truth, and nothing but the truth, I will not intentionally be personal, but want it to have its application to my own life as well as to that of every other man.

"I understand the union man and his object better than I ever did. I have seen the sufferings of the poor more than I ever have. I am convinced of certain injustices in modern society and the duty of the church of Jesus Christ to assist in making the wrong right. We cannot be silent beholders of oppression in any form, and the ravages of selfishness without bringing upon ourselves just condemnation, and making our precious Gospel to lose the last vestige of power over the individual and his society. I would give my very blood at this instant if I could only show the spirit of Christ through His church, to every workingman in this city.

"We are nearer right and nearer to His cause than they think, but we are not all up to the point where the Saviour of man stands.

"If the Gospel in the heart of the employer does not kill selfishness, I will never preach it again.'

There was an evident effect produced by this sentence, and after a pause, Mr. Dowling continued

"Understand me, I did not say that it did not have that effect, and that there are not genuine Christian employers. There are many of them, but I do declare that that is what the Gospel does do for every man who has the right to be a member of the church.

"Before I proceed with the sermon, I must tell you what my eyes saw this last week, and if I could, I would reveal to you what my heart felt."

Then he gave the audience a vivid and touching picture of the scenes in the homes of the poor, and told the sorrow of the man who had been called "scab" and injured, and yet did not blame the men who had beaten him. As he finished the pathetic account, some handkerchiefs were seen, and some members were nodding to each other.

One man, who was presumably a union man, and sat near the door, spoke out in a subdued and almost frightened tone, "He is right."

Mr. Dowling gave no heed to any movements or sound, but went on to say:—

"There is no question before the public more important than this one. It has so many radii reaching out from its center to the very circumference of society. Discussion of it is valuable, but the day has dawned for Christian activity.

"In our greatest prosperity there are thousands in want of food and clothing. Thousands who are honest and industrious. They may not have great ability, but they are not lazy, nor are they criminals.

"Witness every strike we have in these great cities. Why are they nearly always ineffectual and result in greater loss to the employed? Because there are waiting ten times as many men as are needed to take their places. A strike has come to be almost of no avail, unless it is backed up by force, and then we cry 'outlaws' and 'criminals,' 'barbarism,' ought not to succeed.'

"And this is also true, that most of the men who do come to take the places of the strikers are simply willing to take their lives in their hands in order to feed their wives and starving children. They are not rushing into this hazardous work because they like its danger or find pleasure in the labor. It is often not even to earn wages for themselves, but the sublime struggle and sacrifice for others. What will the workingmen do under existing conditions? Is it right to strike? Does the strike furnish the remedy? Every man who is a patriot or a Christian ought to help furnish an answer to these questions.

"What will the man or body of men subjugated to oppression do? There is a real question in the world of labor. It is not all imaginary. It is the most vital element in our city's life now. If there is want of work and want of justice, something is wrong somewhere.

"It is not caused by the introduction of new machinery. At the first reception of new machines there is a displacement of labor, and oftentimes with such rapidity that much hardship results. Then come strikes and the destruction of property. But all the history of this tells one story, that within a short period of time several men are employed in the place of every man deprived of work by these victories of inventive genius. Every time society gets a service rendered with less of human effort, blessing immeasurable results. No man can trace its ramifications through society.

"Stage drivers and hostlers and waiters and farmers lose occupation when the stage coach is stopped, but that number has been multiplied a thousand times by the vast number of railroad employes, and at far better wages. Progress means new demand, but patience must be exercised. After the machine has done its momentary work and apparent injury, the years pass on to bless it. Nor is the present condition of want of food and want of work due to the poor country in which we live. There is an abundance for all. There is enough in this rich land for more than one hundred times as many in the family. We can waste a hundred million of dollars a year in tobacco and one billion, five hundred million a year in rum, and just here is the great burden of sin upon the workingmen. The larger part of that enormous expenditure and worse than waste is from his scanty store. He is guilty, and he has suffered the penalty. By economy and temperance the workingman could save and become independent, and perhaps employers themselves. If one man drinks up his money, he ought not to curse the other man who saves it. Let every man bear his own just share of responsibility. The workingman ought to rise rise up against this startling waste and sin. He ought to declare it as his greatest enemy and fight it to the death.

"Neither is the present condition produced by the influx of foreign labor. This is not great enough as a factor. The poor and unskilled labor has been hindered, and it should be. The incompetent and criminal element of old world population should not be permitted to land on these shores to take the place of skilled and faithful men by accepting less pay.

"Blame the laboring man as you will, I say he must protect his wages. That is one purpose of his union, and it is not his fault. His skill and his reward are his property. Why not insure it and protect it? It is more sacred property than real estate or the steel rails of street car companies. He ought to use every legitimate means to keep it?

"What right has a street car company to thrust a faithful employe's wages down and increase his hours of toil, and do it by the force of placing the lives of our citizens in the keeping of another ignorant and careless man who turns an electric motor for less pay? This is the problem, but it is not the supreme factor or the real producing cause. Neither has the monopoly or combination of the present day as tyrannical a power over man and society as many have supposed. They have lessened the working forces in some directions, but have increased it in others, and in time there will arise out of these changes new new demands.

"They cannot do as they please, nor charge what they will. The element of competition has not been silenced. The moment the price is raised where there is a profit in it for others, many will grasp the opportunity. Labor was practically in the same condition and struggle before this new feature in the social world.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC. . . .

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be us.d for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS. Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS. Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS. Cincinnati, O. Prescott, Ariz, 7-31-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS. Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

A FORTUNE AWAITS YOU

INVEST NOW IN THE

North Carolina Gold Fields

BUY

Rodman Mining & Milling Co's Stock

AT 50 CENTS PER SHARE

DIVIDENDS IN SIGHT

Three developed mines with more than $500,000.00 worth of ore on the dumps and an inexhaustible supply in the mines, assaying as high as $160.00 per ton, with an actual mill test of seven tons running

$24.65 PER TON IN GOLD

One mill completed ready for operation and another being built. One and one-half miles from the main line of the Southern Railroad, cheap labor, cheap fuel. Plenty of water and a climate allowing operations 365 days per annum, are a few of the advantages that go to make this one of the most valuable mining properties today in the country.

Send for free copy of the "Gold Nugget" and learn something about the North Carolina Gold Fields that produced all the gold in this country before '49 and that are today attracting the attention of the world.

Rodman Mining and Milling Company.

367-373 FULTON STREET, BROOKLYN, N. Y.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price tha will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

A HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been shown for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable oppportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully."

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the disease have been standing for many years; the most stubborn cases will yield." For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $500 will be paid for any case that it w no [illegible]

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
AND
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00.
Par value $1.00. Full Paid and non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 4000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a smal block of stock will be sold at 15 cents per share. When machinery is paid fo no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of mady companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY.

DEAF

FOR THIRTEEN YEAR

Mr. Geo. Warner, publisher of the Masonic Register Toronto was almost totally deaf in both ears for a number of years. He experimented with a thousand different remedies and only got relief by using Catarrhozone and it cured

Mr. Warner says: "For the past thirteen years my hearing has been badly affected. The streets were as as quiet to me as if I lived in the city of the dead. I could neither hear the noise of the street cars or sound of horses feet on the pavement. Before I had used Catarrhozone Inhaler three days I was able to notice a great change in my condition, which gradually improved until now I can hear a whisper across the room. I cannot tell you how much I appreciate Catarrhozone, or of the wonderful results I have derived from using it. Catarrhozone has my strongest endorsement and I am quite willing that you should use it."

Mr. Warner's unsolicited testimonial furnishes abundant proof that deafness can be cured, even in old age, if Catarrhozone is used. This remedy is scientific in its application and meets with the endorsement of prominent ministers and doctors all over Canada. Our best equipped health institutions always keep it on hand, and cases are recorded where it has been used with great success in the Government deaf and dumb institutions where other means proved futile.

If your hearing is poor, if you have head noises or ringing in the ears, be sure and use Catarrhozone. It is a regular miracle worker and is sure to help you. Complete outfit costs $1; trial size 25 cents. Sold by all druggists and N. C. Polson & Co., Kingston, Ont.

Morning Times
PETERBOROUGH, JANUARY 27, 1904

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Route Boys Wanted

We require a couple of route boys at once. We pay from $1 to $1.50 per route per week.

Old Newspapers for Sale

Old newspapers, suitable for putting under carpets or for wrapping parcels for sale. Times Bookstore.

Fined $20 and Costs

At the police court yesterday morning M. A. Attalla was fined $20 and costs for violation of the transient trader's by-law. Total $23.35.

A Members' Evening

Last evening a very enjoyable evening was spent by the young ladies connected with the Y. W. C. A. An impromptu musical programme was rendered, after which refreshments were served.

County Police Court

At the County Police Court before County Police Magistrate Edmison, Sam Windover was charged with stealing a watch and chain. Windover was boarding at Lakefield, and his landlady charged him up for board, which he had not paid. He then stole the watch. Prisoner was allowed to go on suspended sentence, after paying the costs.

A Returned Missionary

Rev. Mr Hagberg, a returned missionary, spoke on India at Bethany Tabernacle last night, delivering a most interesting address. There was a large number present, despite the storm. The services are being largely attended. This evening Evangelist Stephens, of Toronto, will begin a series of special services at the same place. The public generally is cordially invited.

To Commemorate the Event

St. Andrew's Y.P.S.C.E. has arranged to celebrate the origin of the Christian Endeavor movement by special services the first Sunday in February, to be followed on Monday, February 8th, by a rally, to be addressed by the Rev. Alex. Esler, M.A., of Cooke's church, Toronto. An invitation has been extended to Endeavor Societies in the county to join in the rally.

All the Patients Need

A local physician, at the risk of giving away the secrets of his profession, stated to The Times yesterday that in the course of thirteen visits to a victim of the grip he could do but two things of positive value. The first was to pull up a window and the second was to pull off three of the six blankets under which the patient was sweltering. The moral is that sick people need fresh air even more than well people do.

Marvell's Dollar Draft

Attention is directed to the advertisement of the Marvell Remedy Company, appearing in another column. For the last two months now Professor Marvell has been treating hundreds of catarrh sufferers at the Toronto office. His new method of treatment has created intense interest in all sections of the city and scores of men and women have given testimony to the remarkable curative properties of his wonderful discovery. We advise our readers to read the generous offer made by Professor Marvell in our columns to-day.

—There again the weather man may be laboring under the delusion that the ice crop is not yet out of danger.

In olden days wise ones agree
That men went on all fours;
They do it now quite frequently
When they go out of doors.

EVERYBODY READS THE TIMES.

WARDEN E. A. PECK

By the unanimous election of Mr. E. A. Peck to the position of Warden of the County of Peterborough, the Council has shown its appreciation of the splendid services rendered by that gentleman during the seven years he has sat in the Council. Mr. Peck, during his term at the Council board has proved himself to be an able administrator of county affairs, and will without a doubt as ably fill the higher office to which he has been called. Mr. Peck has been a resident of Ashburnham since 1869, and is a son of Mr. A. H. Peck, until a few weeks ago the treasurer of Ashburnham. He was educated at the Peterborough Collegiate Institute and matriculated from the Toronto University in 1876. Admitted to the bar in 1881, he entered into partnership with Mr. H. H. Smith in the practice of law, which partnership was dissolved on Mr. Smith's departure from town. After conducting the business alone for some years, he entered the firm of Messrs. Dennistoun, Peck & Stevenson, where, with the other members of the firm, including Mr. F. D. Kerr, he enjoys a lucrative practice.

The Times heartily congratulates Mr. Peck on his promotion, and can with equal force congratulate the county on securing an officer so highly esteemed and so well fitted for the duties devolving upon him.

The Price of Eggs

It is bad enough to pay 30 cents a dozen for eggs in Peterborough, but in Australia they are worth $1.82 a dozen, and worse still, at Dawson City they sell at $50 a pound. What has got into the hen fruit business? Time was when 10 cents a dozen was considered the top of the market, and eggs were so plentiful here in Canada that the United States Government put on a tariff of 5 cents a dozen to keep Biddy Canada competing with the Yankee hens. Here is an industry that is underdone. Poultry of all kinds always commands high prices, and for the past three or four years eggs have kept up in price that to eat a fresh egg for breakfast seems the height of extravagance. Evidently the raising of chickens and eggs is one of the lost arts.

ALL ABOUT DUCKS

A schoolboy in the Central School was assigned to prepare an essay on the subject of "Ducks," and this is what he wrote: "The duck is a low, heavy-set bird, composed mostly of meat and feather. He is a mighty poor singer, having a hoarse voice caused by getting so many frogs in his neck. He likes the water and carries a toy balloon in his stomach to keep him from sinking. The duck has only two legs and they are set so far back on his running gears by nature that she came purty near missing his body. Some ducks when they get big have curls on their tails and are called drakes. Drakes don't have to set or hatch, but just loaf, go swimming and eat. If I was to be a duck, I'd rather be a drake every time."

Port Hope Canal Route

Port Hope Times—The editorial from the Toronto Star on the subject of the Trent Valley Canal, which we re-publish elsewhere, is gratifying to the champions of the Port Hope route. It indicates that the Star, one of the foremost organs of the Laurier Government, is seized with the facts of the situation and shows that it is pretty well convinced that the Port Hope route for the canal is, for many reasons the one, that should be adopted. The advocacy of the Port Hope route by so influential a journal as the Star would be of the greatest assistance to those who are working on behalf of that route, and, although at present the Star refrains from directly advocating the adoption of that route, it shows that it has faith in the advantages which the route offers, and that it is disposed to raise its voice in protest against any scheme to divert the canal, for purely local and private reasons, to an outlet which, in the public interests, is far less advantageous.

—The Winnipeg Free Press says Miss Flora Higgins, a Toronto contralto, displayed a well trained deep contralto voice. Plan opens at Edmison's drug store Friday morning at 10 o'clock.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Rev. W. L. Armitage, of Picton, is in town.

—Mr. John Hewie, of the Township of Fenelon, is in town, visiting with his uncle, Mr. W. Henry, Charlotte street.

—Mr. W. R. Henderson, of the Peterborough Book Store spent Sunday in Lindsay.

—Miss Norah Pethick, of Port Hope, was in town last week attending the funeral of her brother-in-law, Mr. Jas. Pilling.

—Mayor Boulton, of Picton, a red hot hockey enthusiast and supporter of the "Pea Canners" accompanied the Picton boys to town last night.

—Mrs. J. L. Wood (nee Elsie Glover), Toronto, will be at home at the residence of her parents, Mr. and Mrs. F. Glover, Ashburnham, this afternoon.

—Hear Frank Blatchford of Toronto, the favorite violinist.

DIFFERENT NOW

Since the Slugger Coffee Was Abandoned

Coffee probably causes more biliousness and so-called malaria than any one other thing—even bad climate. A Ft. Worth man says:

"I have always been of a bilious temperament, subject to malaria and up to one year ago a perfect slave to coffee and at times I would be covered with boils and full of malarial poison, was very nervous and had swimming in the head.

"I don't know how it happened but I finally became convinced that my sickness was due to the use of coffee and a little less than a year ago I stopped coffee and begun drinking Postum. From that time I have not had a boil, not had malaria at all, have gained 15 pounds good solid weight and know beyond all doubt this is due to the use of Postum in place of coffee as I have taken no medicine at all.

"Postum has certainly made healthy red blood for me in place of the blood that coffee drinking impoverished and made unhealthy." Name given by Postum Co., Battle Creek, Mich.

Postum makes red blood. There's a reason.

Look in each package for a copy of the famous little book, "The Road to Wellville."

THE BOARD OF HEALTH

Mr. R. Neill was Re-Elected Chairman for the Ensuing Year

A meeting of the local Board of Health was held yesterday. Mr. Neill Neil was re-elected chairman of the Board for the ensuing year.

Dr. Burnham and Dr. McNulty were re-appointed members of the Board.

An account of $181.60 was received from the Nicholls Hospital. The secretary was instructed to communicate with the council, asking them to take action re the hospitals.

It was moved and seconded that another communication be sent to Alexander & Clotworthy, asking if any provision had been made to obtain other water, and if not, that steps be taken to enforce the order of the Board.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—The County Council are in session this week.

—Hear Mr. Firth, the baritone singer and composer, in his own songs, at the concert Tuesday, February 2nd.

—The matter of the withdrawal of Ashburnham from the county, will be dealt with at the present session of the County Council.

—The fire brigade were called out about 1.30 to extinguish a blaze from a defective chimney at White's Hotel.

—Evangelist R. L. Stephens, of Toronto, will begin a series of special services at Bethany Tabernacle to-night. The public generally is cordially invited.

—The Times is requested to state that there will be a meeting of the Ladies Auxiliary of the Y.M.C.A. on Thursday afternoon, January 28th, at half-past three o'clock. All members are requested to attend.

—Lindsay Post: Lindsay is fast becoming famous for producing expert crokinole and checker players. Within its borders it has men who can down the best of them at these games. During the past month the players of Palmerston figured in a crokinole contest with the grit players of Lindsay in the former town and were easily defeated.

—Don't miss the treat of the season—S. Homer Eaton, entertainer of Boston, in his costume characters.

—The Orillia News-Letter, in commenting on the press criticisms anent the Grand Trunk's lack of motive power, says: This brings back to us Conductor Jack Lethbridge's old story of the cow. On one occasion the Midland train stopped short and a passenger asked the cause. "Cow on the track," replied John. Half an hour later they ran into another cow and stopped. The passenger again asked and was told the cause. "What," he exclaimed, in surprise, "have we caught up to that blamed cow again."

A Fast Game.

The Fastest Game of the Season
Will Take Place To-night
PETERBOROUGH
vs.
PICTON
In Brock Street Rink
Game at 8.15

A BAD GANG

Ottawa, January 27—The North-West Mounted Police authorities are at present without particulars of Cashel's capture. The earnest hope is expressed here in official quarters that the sentence upon John Cashel, for effecting his brother's escape, will be the heaviest that the law allows. The authorities have plentiful evidence of the existence of a gang, composed of the worst elements imported from the United States, in the neighborhood of Calgary. There is also excellent evidence that a gang of desperadoes has been making its headquarters in or near the old tannery at Calgary, and that it was their intention to raid the guard room at the Mounted Police headquarters in that town and release John Cashel. This, however, was prevented by the prompt action of the police officers.

EVERYBODY READS THE TIMES.

Local Sporting News.

On account of the trains being delayed by the big storm yesterday the Picton hockey team were unable to get here in time for a game last night. The train which was due here at 5.30, did not reach here until 11.30 last night. The rink was crowded with a very patient lot of spectators—over 2000—and the management learned the fact that it would be useless to keep the people in the cold rink until a late hour very wisely dispersed the crowd and handed out tickets for the game to-night which will take place sharp on time.

CURLING.

An excursion will be run to Toronto on Tuesday of next week over the Canadian Pacific Railway by the Peterborough Curling Club, who are sending representatives to play in the tankard series for the Ontario championship. Fare for the round trip will be $2.05; children under twelve years $1.05. Tickets will be good only on special train leaving at 8 a.m. of February 2nd, arriving in Toronto about 10 a.m. and good to return up to and including all trains on Wednesday, February 3rd. Tickets at Ormonde & Walsh's, Kingan Hardware Co. and C. P. R. uptown office and station.

Vancouver, B.C., January 27—Edward Wallace who originally hailed from Halifax, N.S., has announced his intention of challenging for the America's Cup. He wants to have the classic emblem held by Canada for a while, and will spend a heap of the dollars he made out of mines in New South Wales in an attempt to better Sir Thomas Lipton's efforts to lift the trophy.

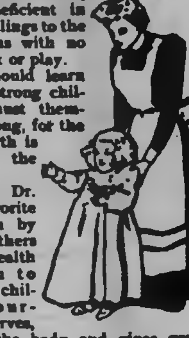
On a visit to Halifax about eight months ago Mr. Wallace obtained designs on the framework of the proposed vessel. At that time he merely wished to have the yacht as a pleasure cruiser, but of late has become infatuated with the idea of putting his craft into racing.

The new challenger will be 130 feet long, with a waterline of 90 feet, beam 25 feet and draught 16 feet. The total cost will be not less than $500,000.

Lost

On Wednesday on George street, hand satchel, containing a sum of money, $3, T. R. ticket and a gold locket. Finder will please leave same at this office.

THE FIRST STEP



Of the child is an event in the mother's life. How proud she feels when the attempt to walk is begun so early as to evidence childish courage and sturdy strength. Such pride should be enjoyed by every mother. But it often happens that the child is timid, weak and deficient in vitality, and clings to the mother's arms with no desire to walk or play.

Mothers should learn that to have strong children they must themselves be strong, for the child's strength is the gift of the mother.

The use of Dr. Pierce's Favorite Prescription by expectant mothers gives them health and strength to give their children. It nourishes the nerves, strengthens the body and gives great muscular strength and elasticity, so that the baby's advent is practically painless.

"I have been using Dr. Pierce's Favorite Prescription, and can say it is just what you advertise it to be, and can cheerfully recommend it," writes Mrs. Victor J. Hadin, of Leonardville, Riley Co., Kansas. "I began taking it just two months before baby came and was greatly benefited by its use. The doctor who attended me said I did about as well as any one he had seen (as I was sick only about three hours), and also that your 'Favorite Prescription' was the one patent medicine which he did have faith in.

"We now have a darling baby boy, strong and healthy, who weighed nine pounds when born (July 8th). During this month he has gained three and one-half pounds."

"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women.

The Common Sense Medical Adviser, a book containing 1008 pages, is given away. Send 31 one-cent stamps for expense of customs and mailing *only*, for the book in paper covers, or 50 stamps for the volume bound in cloth. Address Dr. R. V. Pierce, Buffalo, N. Y.

TO THE AFFLICTED

The following testimonial may be read with interest to sufferers from skin eruptions or eczema:

January 29th, 1903.

Dear Sirs,—I notice your advt. in a paper about your wonderful eczema cure and I feel it my duty to tell you, that I was induced to try it as I had been afflicted with skin trouble in my hands for 15 years. I have tried several doctors and they done me no good. I only used one box of Dr. Clarke's Sure Cure for Eczema. It has made a complete cure. I recommend it to all suffering from skin disease. My hand was so bad that the nails used to come off. You can use my name if you wish.

Yours truly,
MR. JOHN WOOD,
Peake Station, P.E.I.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or boxes for $1.00.

Peter D. McFayden, Riverdale, P. E. I. writes: "I am very busy, but just drop a line to say I highly recommend your catarrh cure. It has done grand work for me. I am so much better."

Dr. Clarke's Sure Cure for Catarrh is also one of the best remedies on the market. We are daily in receipt of letters telling how much they have done for the afflicted. Miss Sarah Hill, 412, Front Street, Traverse City, Mich., writes "I have been wonderfully helped by the use of your catarrh cure; send me another dollar's worth."

Dr. Clarke's Sure Cure for Catarrh and Clarke's Sure Cure for Eczema, same price. $100 will be paid for any case that it will not permanently cure.

Moody's Vote of Thanks.

Possibly the most novel response ever made to a request to return a vote of thanks to a chairman was made by Mr. Moody during his first visit to England.

He had attended a meeting at which the Earl of Shaftesbury was chairman. The duty of proposing a vote of thanks was assigned to him, and the announcement made.

"Our American cousin, the Rev. Mr. Moody, of Chicago, will now move a vote of thanks to the noble earl who has presided on this occasion."

The whole thing was quite out of Mr. Moody's line. English formalities might or might not have come gracefully from his lips had he attempted them, but he did not. With an utter disregard of conventionality he burst upon the audience with the bold announcement:

"The speaker has made two mistakes. To begin with, I'm not the Rev. Mr. Moody at all. I'm plain Dwight L. Moody, a Sunday school worker. And then I'm not your American cousin; by the grace of God, I'm your brother, interested with you in our Father's work for His children.

"And now about this vote of thanks to the 'noble earl for being our chairman this evening.' I don't see why we should thank him any more than he should thank us. When at one time they offered to thank our Mr. Lincoln for presiding over a meeting in Illinois he stopped it. He said he'd tried to do his duty, and they'd tried to do theirs. He thought it was about an even thing all around."

That opening fairly took the breath away from Mr. Moody's hearers. Such a talk could not be gauged by any known standard. Mr. Moody carried his English audience with him from that beginning to his latest labors.

Why Willie Wails With a Tired Feeling.

"Hoo, hoo, hoo," rang through the house at 2 a. m.

"Great Governor! What is that?" and the head of the house sat up in bed and blinked at an electric light shining through the window.

"John, stay right where you are; I'll not let you go down stairs to be killed. Did you ever hear such a noise?"

"Mama, what is it?" came in an agitated whisper from the next room, and then the daughter rushed wildly into the parental bedchamber.

"Keep cool, now. Don't go into no highstrikes. I'm going down to see what that is," and he dug up an old muzzle-loading pistol he had carried in the civil war and that had been loaded since 1872. "I'll show 'em. Every man's house is his own cast—"

"Hoo, hoo, hoo."

The father dropped the gun and it blew a whole corner off the bureau. The daughter dived under the bed and the mother yelled "Murder!" at the top of her lungs.

"Shut up!" ordered the veteran, as he reached for his artillery. "Stay right where you are. I'll fight my way to the telephone and get the police. If they get to shooting down there don't show a light. I know the house and they don't."

"Hoo, hoo, hoo," just as the old gentleman reached the top of the stairs. He went down like a cartwheel and shot a hole in the ceiling as big as the bottom of a tub.

"Did you hear my owl?" shouted Willie, as he dashed from the third story. "Got him in the country yesterday and hung him in the dining room when I got home last night. Hain't he a dandy?"

Poor Willie! He walks like a boy with inflammatory rheumatism, and the last he saw of his owl it was flying over the barn toward Redfield.—Detroit Free Press.

NEW ASSESSMENT BILL WILL PASS THE HOUSE

Revolutionary Changes in the Moode of Finding Mnnicipal Revenue

THE BUSINESS TAX IS THE MAIN FEATURE

One Of the Most Important Bill Ever Before Ontario Legislature—Exciting Widespread Interest

The proposed amendments to the assessment law is exciting widespread interest throughout the Province. The amendments proposed are as follows:

Land is defined as including all buildings, structures, machinery, fixtures erected or placed upon, in, under or affixed to land or any highway, road, street, lane or public place or water; but not the rolling stock of any railway or street railway.

The effect of this is that all machinery except that owned by companies having rights and powers upon the streets is exempt from taxation; this is an exemption not granted at present, as all machinery is subject to at least school rates.

The following is the substitution for the present personal property tax, and also in lieu of the business tax, as defined in the Act as first submitted:

Irrespective of any assessment of land otherwise under this Act, in cities, towns and villages every person occupying or using lands within the municipality for the purpose of any business, mentioned or prescribed in this section, shall be assessed for a sum to be called Business Assessment, to be computed by a reference to the assessed value of the land so occupied or used by him as follows:

A. Every person carrying on the business of a distiller, a sum equal to 125 per cent. of the said assessed value.

B. Every person carrying on the business of a brewer, for a sum equal to the said assessed value.

C. Every person carrying on the business of a wholesale merchant, insurance company or a loan company, or a trust company, as defined by this Act, or of an express company or of a land company or of a bank or banker, or of any other financial business for a sum equal to 75 per cent. of the said assessed value.

D. Every person carrying on the business of what is commonly known as a departmental store, or of retail merchant dealing, in more than five branches of retail trade or business in the same premises, or in separate departments of premises, under one roof, or in connected premises, where the assessed value of the premises exceeds twenty thousand dollars, and every person practicing or carrying on business as a barrister, solicitor, notary public, conveyancer, physician, surgeon, occulist, aurist, dentist veterinarian, medical electrician, civil, mining, consulting mechanical or electrical engineer, surveyor or architect, and every manufactory, hotel club, lithographic and printing establishment for a sum equal to fifty per cent. of the assessed value.

E. Every person carrying on the business of a retail merchant, or of a photographer, theatre, concert hall, curling or skating rink, or other place of amusement, or of a boarding stable, or of a livery or the letting of vehicles, or other property for hire, or of a restaurant or eating house, or any house of public entertainment, or of any trade or commercial business not before in this section or in clause (C) specially mentioned for a sum equal to 25 per cent. of the said assessed value.

G. Every person carrying on the business of a telegraph or telephone company, or of a street railway, or of the transmission of oil or water, or of steam, heat, gas, or electricity for the purposes of light, heat or power, for a sum equal to 25 per cent. of the assessed value of the land (not being a highway, road, street, lane, public place or water) occupied by such persons exclusive of the value of any machinery, plant or appliances erected or placed upon, in, over, under or affixed to such land.

No person shall be assessed in respect of the same premises under more than one of the clauses, and where any person carries on more than one of the kinds of business mentioned in any of the sub-sections on the same premises, he shall be assessed by reference to the value of the whole of the premises for the highest sum under sub-section 1 in case of any kind of business so carried on.

Where the amount of the assessment of any person assessable under these sections, would, under the foregoing provision be less than $100, he shall be assessed for the sum of $100.

Where any person mentioned in sub-section 1, occupies or uses land, partly for the purpose of his business, and partly for the purpose of a residence, he shall be assessed in respect of the part occupied for the purpose of his business only, but this provision shall not apply to persons assessed under clause B of sub-section 1.

A financial or commercial business in sub-section 1 shall not include a business carried on by operating vessel property of the following description, viz., Steamboats, sailing vessels, tow barges, or tugs, nor the business of a steam railway, nor the business of a broker or financial agent, or of a manufacturer's agent, or other agents, or intermediary in the sale of goods, who has not the actual custody of the goods or has the custody of samples only.

Every person liable to assessment in respect of business under sub-section 1, shall not be subject to assessment under ers hence he is liable for the income derived from such business.

The effect of the foregoing is that every person doing business within the municipality shall be assessed for a business assessment, and that no person shall be assessed for a less sum than one hundred dollars. Every person carrying on a business of whatever kind would contribute in Peterborough under the present rate of taxation at least two dollars. The assessment of the professionals as named in Clause "E," for a business assessment relieves them from the payment of income, as at present, but this, strange as it may seem, will yield more taxes than the present method. Income as against all others, or even as against those in business derived from sources other than the business for which they are particularly assessed, is to be taxed as at present. This will also yield a greatly increased assessment, as it means that holders of stock in any corporate company shall be assessed for the income derived from said stock. The reason of this is that the company is assessed for the business assessment, and not the stockholders hence he is liable for the income derived therefrom.

The exemption from income is to be one thousand dollars, as at present.

The general effect of the changes as proposed, it is claimed, will be to distribute more evenly the burden of taxation, and make it very difficult for any person to avoid payment of the same. It will also have the effect of working automatically, for as the value of business premises increases, so will the business assessment increase, and instead of having less personal property in each succeeding year as has been the case for some years past, the business assessment will steadily increase.

As far as Peterborough is concerned the changes will probably add to the revenue, although retailers, wholesalers and manufacturers will as separate classes pay in the aggregate less taxes than they do at present. (The deficiency will be made up by the revenue derivable from the business assessment of banks insurance and loan companies, hotels, and the public utilities companies which in the past have paid very little, and in the case of banks, and the public companies, none at all.

In regard to the assessment of lands generally, the following are the provisions.

1. Real property shall be assessed at its actual value.

2. In assessing land having any buildings thereon, the value of the land and buildings shall be ascertained separately, and shall be set down separately in columns 13 and 14 of the Assessment Roll, and the assessment shall be the sum of such values. The value of the buildings shall be the amount by which the value of the land is thereby increased. This is very much the same as is the practice at present, the bill not contemplating any additional burden on the real estate.

In respect to the provisions of the present Act, whereby large blocks of land are now assessed as farm lands, this has been altered, so that an assessment of that kind shall not be made except the municipality provides for such a kind of assessment by by-law.

The house tax as originally provided by the bill has been struck out, as has also the provision for a Provincial Board of Tax Commissioners, the assessment of public utilities corporations for a franchise tax has been eliminated, but a provision has been inserted whereby they shall pay a business assessment on all their premises, with the exception of that on the highway, and in addition the steam railroads are to be entirely exempted form any business assessment.

There are several other minor changes which do not affect the principles of the bill.

BRITISH CABINET IS SHAKEN TO PIECES.

LANSDOWNE, LONDONDERRY AND BALFOUR MAY RESIGN

The Big Fire in Norway Swept Away Every Building - Terrible Suffering

London, January 26.—The London Daily News this morning publishes a rumor that further Cabinet resignations are imminent, saying the officers to resign probably are Lord Lansdowne, Secretary of State for Foreign Affairs, Lord Londonderry President of the Board of Education, and Gerald Balfour, President of the Board of Trade.

Aalesund, Norway, Jan. 25.—The fire which swept over this town yesterday destroyed every building in it, with the exception of the hospital. The 11,000 inhabitants of Aelsund were compelled to camp in the open. The children were housed temporarily in the church of Borgund. The panic among the people was so great after the outbreak of the flames that all attempts at leadership or discipline became out of the question. No excesses, however, were committed. The people first endeavored to save some of their property, but they soon found that they had quite enough to do to save themselves.

The destruction of the town was complete within a couple of hours from the time the fire started. Over twenty steam fishing boats and many sailing smacks were sunk in the harbor to save them from the flames, but three steamers and many other boats were burned. It is now believed that only three persons lost their lives. Sucor has arrived from Molio, Bergen and other places and provisions are being distributed.

London, January 26.—A despatch to the Daily Mail from Sydney, says that the Board of Health of Victoria, has decided to treat consumption as an infectious disease, and completely isolate all sufferers. It has arranged to accommodate a number of consumptives at the quarantine station.

Christiania, January 26.—King Oscar will establish a new princely order to be known as the order of the Norwegian Lion, on the occasion of his seventy-fifth anniversary Thursday. All Monarchs belonging to the Swedish order of Seraphim will be decorated. Only twelve Norwegians or Swedes may belong to the order simultaneously. The new order has been established because the Swedish order of the Seraphim has hitherto been used as the highest reward of merit, even when Norway was concerned, thus placing that country under the shadow of Sweden.

NEW TEMPERANCE PLAN

Philadelphia, January 27.—Joshua L. Bailey, a well known merchant, in delivering an address on total abstinence last night, said:

"While in Washington a week ago, I met Andrew Carnegie, who, upon hearing I was connected with the National Temperance Society, said: 'That's a splendid movement. I'm not a total abstainer myself, but on my estate in Scotland at the end of every year, I call all my men up, and everyone who can swear he has not taken a drink of liquor during the year gets ten per cent. added to his wages. I find that five-sixths of the men get additional money.'"

Mr. Bailey suggested that perhaps if Mr. Carnegie set the example by abstaining himself, the other one-sixth might come around.

—The Winnipeg Free Press says Miss Flora Higgins, a Toronto contralto, displayed a well trained deep contralto voice. Plan opens at Edmison's drug store Friday morning at 10 o'clock.

FARMERS' TRUST INCORPORATED.

IT WILL PROBABLY DO BUSINESS IN CANADA

CAPITAL OF $100,000,000.

Control of Grain and Live Stock to Enhance Prices is the Scheme

Chicago, Jan 27—By the incorporation under the laws of South Dakota of the Farmers Grain and Live Stock Commission Company a scheme for a gigantic "farmers trust" has been launched. The project is promoted by Chicago men, and a majority of the incorporators are residents of this city.

It is the intention of the organizers of the new trust to do business on a large scale. The capitalization of the company has been fixed at $100,000,000, the larger portion of which is to be furnished by the farmers whom the promoters expect to interest in their project. The plans contemplate the formation of what is practically a cooperative organization of farmers.

Broker For The Farmers.

The farmers are to allow the company to do their buying and selling and to act for them as commission merchants, packers and brokers at the present time. The new company intends to control the sale of the grain raised on the farms and to ship it to the markets. Cattle shipped are to be fed by the corporation and to be disposed of by it to the markets. It will do business in Canada.

It is expected by the incorporators that the farmers, by joining the new organization, will find their profits increased. The sponsors say the growers will be able to get better prices for their produce, as the corporation can sell at a favorable time and influence the markets, while the farmers as individuals are now practically at the mercy of speculators.

The promoters also believe that the farmers can obtain advantages by buying through the corporation. It will be able, they say, to buy farming implements and machinery at prices much lower than the farmers can obtain as individuals.

In other ways the new concern expects to increase the profits of the agriculturalists and cut down those of the men with whom they deal. It is its avowed purpose to put out of business the middlemen who now share the profits of the farmer.

Promoter Talks of Plans.

As yet the corporation is in rather an embryonic state and it is admitted by its incorporators that the success of their plans depends on the manner in which they are regarded by the farmers.

"The new company believes that the farmers will take kindly to the scheme by which it is proposed to increase their profits and wipe out those of the middleman," said D. M. Kirton, one of the incorporators, last night. "At present the farmers are obliged to sell their grain as soon as they harvest it, no matter what price rules at that time. If the farmers were members of our company they would be able to get more money for their produce, as the company could dispose of grain when they chose to do so, and when the markets were favorable. In a hundred other ways the farmers would reap advantages from the company.

"At present, however, little has been done to further our objects, except to file the incorporation papers. There is no question of the success of the company if the farmers take kindly to our plans but it seems almost a herculean task to induce them to interest themselves financially in the corporation."

EVERYBODY READS THE TIMES.

BRITISH DEBATED COLONIAL POLICY

"FISCAL UNION WOULD MEAN DISUNION"

FREEDOM THE BEST POLICY

Day is Coming When Members for Montreal Will Sit Beside the Member for Paddington

London, Jan. 27.—"The Liberal party and the colonial policy," formed the subject of an interesting debate at the National Liberal Club last night. Lord Carrington was in the chair.

Would Mean Disunion.

The Right Hon. R. B. Haldane, M.P., declared that a fiscal union would be like thrusting a ramrod into delicate machinery. Unless each component part was complete the freedom of the Empire would not last ten years. As one of the links of Empire he suggested a temporary enlargement of the Cabinet by the addition of colonial advisers, the frequent summoning of the Committee on Imperial Defence, and the transforming of the House of Lords into a great imperial chamber for the discussion of imperial questions where the Agents-General could sit and the colonies bring their difficulties.

Absolute Freedom.

Mr. Channing, M. P., believed the best colonial policy lay in the absolute freedom of every unit.

Mr. Hawksley, solicitor for the Cecil Rhodes estate, argued that the House of Lords, were it to become an imperial chamber, needed an amendment which would be impossible unless backed up by the country. The proposals for an enlarged Cabinet would be of no value unless carried by the House of Commons.

Into the Future.

Mr Samuel, M.P., said the day was far distant when a member for Montreal would sit side by side with a member for Paddington. The links of empire were an imperial law tribunal, the Committee of Imperial Defence and imperial sentiment. Colonials had avoided the fetid atmosphere of the House of Lords. The colonials fighting in South Africa themselves outnumbered the Boers, and Australia would be able to throw 100,000 men into India in the time of need.

Favor Preference.

Premier Deakin, of Australia, says the whole Ministerial party, a majority of the Labor members, and a large minority of the Opposition are in favor of a preference to Britain. The Customs Department has estimated that £7,000,000 yearly could be diverted to British manufacturers without injury to Australian industries.

Hits the French.

The Times Newfoundland correspondent wires that the export of codfish from the French islands has been the worst in their history, proving the efficiency of the Newfoundland Bait Act.

Canada the Eldorado.

The Italian Vice-Consul at London has advised his Government that there are no opportunities for the employment of Italians in English agriculture, but they could emigrate to Canada with advantage.

Canadian's Good Notes.

Miss Ireno Foster, of Pictou, N.S., and M. MacKay also a Canadian, delighted a large audience in Steinway Hall last night. The London dailies praise Miss Foster's brilliant notes.

Order of Druids.

Colonial Secretary Lyttleton was yesterday initiated at Leamington into the mysteries of the Order of Druids.

Storehouse of Empire.

Sir Horace Tozer, speaking at the London Institute last night, referred to Canada and Australia as the storehouses of the Empire. Canada was able to turn out ten times as much wheat as she did now and while she did that Australia would look after the butchers trade.

BOTH PARTIES ARE WELL PLEASED WITH THE VOTE IN NORTH OXFROD

Result an Evidence of the Feeling in the Country, Says Mr. Whitney

Toronto, Jan. 27.—Politicians of both parties are extracting a good deal of comfort from the North Oxford returns. The Liberals are pleased that the "grand old riding," the stronghold of Ontario Liberalism, has continued in the faith by a substantial majority. They had entertained no fear, although some of them confessed to a slight feeling of anxiety, owing to the reports sent out from Woodstock that things were not as they used to be. The Conservatives, on the other hand, claim a great moral victory, admitting at the same time that moral victories will not immediately dislodge the government. Mr. Whitney was asked to express an opinion on the result. He was in good spirits as were the leading men of the Conservative party who heard the returns at the Queen's hotel. "The vote is an evidence of the feeling in the country," Mr. Whitney observed. "The campaign lasted only a few days, and when we realized that the Dominion government threw all its weight on the side of Mr. Munro and Hon. James Sutherland had personal supervision of the campaign, the wonder is that the majority is not larger than it is. There has been a remarkable change of feeling since the general election of May 29, 1902."

"You did not expect a different result?"

"We knew that the government people feared the vote was going to change, but we had no hope that we would do more than cut down the majority."

R. R. Gamey returned yesterday very hoarse from speaking, having addressed several meetings during the last few days of the campaign. "I am delighted with the showing made by the Conservative candidate, the returns I have showing a large increase in the Conservative vote throughout the riding. I am particularly delighted with the figures from Woodstock and other places where I spoke—Plattsville, Bright and Embro. There was a big turn-over in these places. Of course there was scarcely a possibility that we could win North Oxford, which has always been overwhelmingly Liberal, but it is a satisfaction to know that there are many Liberals who are disgusted with their present leaders, Ross and Stratton, and who accept the truth of the charges I have brought against them. I met many of these in the few places I spoke.

"You might say that the words I used at Woodstock Saturday night were not the same as the report in The Globe. The impression I intended to convey was that Chief Justice Falconbridge was considering the social position of his family in agreeing to Chancellor Boyd's report. But objection has been taken to my statements. It seems we must consider Chief Justice Falconbridge's family. I have a family, and did Justice Falconbridge consider them."

Some of the cabinet ministers heard the early returns in the Parliament Buildings. There was a feeling of elation when the election of the government candidate was placed beyond doubt. Premier Ross was at home when he was assured of Col. Munro's election. He said he was satisfied with the healthy growth of his family, and expected that it would not stop growing, now that a good start had been made. He had not had time to analyze the returns.

OUR COUNTY PARLIAMENT IN SESSION.

INSPECTOROF COUNTY SCHOOLS SUBMITS REPORT

The Standing Committees for the Year—Other Business

The Council met at ten o'clock Wednesday morning, Warden Peck in the chair.

Mr. Fitzgerald, chairman of the Committee of the Whole, presented the following report as to Standing Committees:—

The committee appointed to strike the Standing Committees for 1904 beg leave to report as follows:—

County Property—Messrs. Johnston, Moloney, Hunter, Crowe, Menogue, Mr. Maloney to be chairman.

Appointments to Office—Messrs Menogue, Johnston, Curtis, and Shaw. Mr. Menogue to be chairman.

Roads and Bridges—Messrs. Johnston, Fitzgerald, Hunter, Shaw, Menogue, Buck, Curtis, Moloney and Crowe. Mr. Johnston to be chairman.

Schools—Messrs Johnston, Fitzgerald, Buck, Curtis and Moloney. Mr. Curtis to be chairman.

Petitions—Messrs. Johnston, Fitzgerald, Menogue, Shaw, Buck and Hunter. Mr. Shaw to be chairman.

Printing—Messrs. Shaw, Johnston, Menogue, Hunter and Buck. Mr. Buck to be chairman.

Finance—Messrs. Johnston, Fitzgerald, Hunter, Shaw, Menogue, Buck, Curtis, Moloney and Crowe. Mr Hunter to be chairman.

Equalization and Assessment—Messrs. Johnston, Fitzgerald, Shaw, Menogue, Buck, Curtis, Moloney and Crowe. Mr. Crowe to be chairman.

Joint Committee—Messrs. Menogue, Curtis, Fitzgerald, Moloney, Johnston and Shaw. Mr. Fitzgerald to be chairman.

The report was adopted.

COUNTY AUDITORS.

On motion of Mr. Curtis, seconded by Mr. Moloney, the appointment of auditors was left over until Thursday afternoon.

Mr. J. Coyle Brown, County Inspector of Schools, presented his annual report, which will appear tomorrow.

The Council then adjourned to go into committee.

BRITISH SLAIN IN AFRICA

News Recived of Massacre of an Expedition by Turkhana Tribesmen

London, Jan. 28.—The foreign office has received news of the massacre of a British expedition under the auspices of the East Africa syndicate by Turkhana tribesmen in the neighborhood of Rudolf lake east Africa. Several white men were murdered, but no details of the massacre have been received.

THE WRIGHT CASE

Government Refused to Prosecute Promoter of Big Swindle

London, Jan. 27.—The inquest over the remains of Whitaker Wright, who died suddenly yesterday after being sentenced to seven years penal servitude for fraud, has been definitely fixed for tomorrow morning.

The Opposition papers continue making trenchant comments on the Government, "which," they say, "declined to do its duty for reasons now shown to have been absurd in law, and which are always repugnant to common sense. The Government declined to prosecute Wright. Premier Balfour, acting on the advice of the law officers of the Crown, having announced in Parliament that the case was not one for the public prosecutor. Papers insinuate that the Government wished to shield Wright because he was a strong supporter financially and otherwise of the Conservative cause, and because he had influential friends.

The Daily News contends that the law officers, Sir Robert Finlay and Sir Edward Carson, ought to resign, and it refers to the "wicked insinuation" of Wright's friends that a prosecution of the case would involve the Duke of Connaught, who did invest in one of Wright's companies, but who was not even remotely involved in his misdoings.

Recoup Prosecutors

The Times says it would only be seemly for the Government to recoup fully to the prosecutors all the costs they have incurred "in bringing to justice a culprit of a kind that under our laws fortune generally favors."

"The handling of this matter," says the Westminster Gazette, "has reflected more discredit on the Government than its other mistakes, with even graver consequences. Distinguished people were involved, and some of them have had happy escapes."

The Financial News on these points says: "Wright might have made disclosures which might have seriously discomforted some people, but Wright was loyal as well as courageous, and he carried his secrets to the grave. To prevent others from divulging what he chose to conceal he destroyed many papers, thus completing his sacrifice."

A post-mortem examination has shown that Whitaker Wright committed suicide by taking cyanide of potassium.

It is reported that a loaded revolver was found in Wright's pocket by the police.

When in need of anything in the line of commercial stationery, visiting cards, etc., leave your order at the Times job department. Workmanship unexcelled.

PETERBOROUGH SENIORS WIN FROM PICTON SEVEN

In a Fast Game of Hockey on Brock Street Rink By a Score of 13 to 7

Picton's defeat last night by the Peterborough seniors still gives Belleville a lead of one game, having won three and lost one; Peterborough three and lost two; Picton two and lost two.

For both Picton and Peterborough to be in the running the Pirates have to defeat Belleville on their own ice, which seems very improbable, although the visitors are confident that they are equal to the task, claiming that the Bay City bunch, with the assistance of the referee robbed them of the game in Picton last week. No doubt, with fast ice the "Pea Canners" will make it warm for Belleville. Should they succeed in their efforts it would place the three teams in the same standing, each team having won and lost an equal number of games—won three and lost three—making a three-cornered tie.

Last night's game was a great exhibition of the winter sport, and the 1,200 spectators—about 500 more were present than on the previous night, numbers coming from nearby towns and villages, as well as a small number from Picton—who were on hand long before the game was called to start, were well satisfied with the goods put up to them.

The ice was never in better condition for fast hockey, and both teams had to go some to travel with the puck, which made the game intensely interesting for the spectators. Long before the time for the match to start the rink was packed. On the east side the people were put in almost on top of one another they were so hockeyfied and eager to see the game. The balcony was well crowded, and every available seat was taken in the reserve on the west side, and many were forced to stand in the 25c. portion of the rink; but the crowd was there to see the game and were prepared to see it at any odds.

The visitors are a well proportioned bunch and certainly are great individual men, but were deficient in combination work. They are fast skaters and clever stick handlers, and carry with them a man in the nets whose equal has not yet appeared on the ice in Peterborough. The whole team are a very gentlemanly lot of players and play very clean hockey.

The Peterborough seven were better in their passing and broke away faster although they were considerably handicapped in combination work by the loss of Fred Whitcroft, at centre, who was injured at the beginning of the second half and had to retire for the remainder of the game. The defence played a very strong game the first and the beginning of the second half, but after that period played very loose at times, with the result that the visitors got in with their individual work and passed with no one between them and the nets but Mercer, and more than once in this way the visitors tallied.

It would be hard to distinguish one player more than the other, for every man played his game. Mercer, in the nets stopped some red hot ones, and cleared well. Eddie Howell, at point, and Will Cavanagh, at cover point, played an excellent game, blocking many assaults made by the visitors, and more than once were very prominent in their rushes up the ice. On one occasion Howell succeeded in puncturing the net. Harold Armstrong, as rover, played his usual star game. Roy Armstrong on the right wing, and Chris. Graham, on the left wind, played great hockey, and landed in shot after shot. Fred Whitcroft, at centre, while he was in the game, played brilliant hockey, being busy all the time.

For the visitors, Embury, as rover, played a great game, and is very fast. Giroux and Seale also showed up well. Powell at cover point, figured in many of the rushes on the local's net, and is a great individual player. Croft, the visitor's point man, is a hard man to pass, while Rocque, in the nets, is a wonder and had it not been for his excellent work the score would have been tripled.

The locals went on the ice in white uniform owing to the fact that the visitor's suits—purple and white—resembled the regular uniform of the seniors—dark blue and white.

Promptly at 8.15, Referee Chaucer Elliott, who has won great fame as a referee, gave the boys their customary talk, and the puck was going, the visitors attacking the south net. Both teams started in at a terrific pace and just as things were going nicely Roy Armstrong planted a hot one at Rocque, who blocked, the puck going down the ice. Cavanagh brought it up with a rush passed to Whitcroft, who scored the first goal, after two minutes play, repeating the same on a pass from Roy Armstrong in four minutes. In the third game it was nip and tuck all the way. Harold Armstrong got in some good work at this period, but was sent to the boards for two minutes for loafing offside. Powell, of the visitors, also decked the fence for tripping. The puck travelled from end to end, some very speedy hockey being exhibited. Rocque stopped two hard shots in succession from H. Armstrong and Chris. Graham but after eleven minutes paly Graham scored on a pass from Whitcroft. The fourth goal and last for the locals in the first half was scored in a rush up the ice by Howell in six minutes. At this period the Peterborough forwards indulged in some pretty combination, and Whitcroft and Roy Armstrong figured in a streak nearly the whole length of the ice, but Rocque was doing great work for his team, and prevented a score. The next two goals went to Picton in five and two minutes respectively. Giroux, who worked in some fine individual play, locating the nets. This ended the scoring in the first half.

In the second half the visitors went at it hard, and landed two hot shots in succession at Mercer, who took care of them. Down there the rubber went, Whitcroft slamming it in on a pass from Roy Armstrong after about four minutes play. The game was just young when Whitcroft was injured on the head and had to retire. This caused a short delay. When play was resumed the visitors were playing determined hockey and after three minutes scored, Embury doing the trick, followed by one for Peterborough in one minute, the puck striking Chris. Graham's skate, as Rocque endeavored to clear the nets, and rolled back into the nets. Before one-half minute's play Embury tallied for Picton, followed by another in six minutes. The game grew very exciting at this stage, as the score six to five indicates. But Peterborough forward line, who, no doubt felt the loss of Whitcroft, pulled themselves together and poured in shot after shot on Rocque, some of which melted the snow off the puck they were so speedy, but the man in the nets seemed impregnable. Powell, of the visitors, went off twice for tripping and Embury followed. It was plugging now for Picton was bound to tie the score, but the locals could not have it that way, and Roy Armstrong, after twelve minutes' play, found an opening and put the rubber in. This was the hardest fought goal of the match. The seniors were evidently going to make the score a big number for in one minute Graham put one passed Rocque followed in one half-minute by one from Roy Armstrong on a very pretty shot. It was Picton's turn, and Embury scored in one-half minute, followed by three from Harold Armstrong, the first two in one-half minute each and the next in one-quarter minutes. To prevent Peterborough from doubling the score, Strike for the visitors, succeeded in putting one past Mercer. Harold Armstrong scored the final goal in one minute, making the score at the finish 13—7.

Following is the line up:—

Picton		Peterborough
	Goal	
Rocque		Mercer
	Point	
Croft		Howell
	Cover Point	
Powell		Cavanagh
	Rover	
Strike		H. Armstrong
	Centre	
Embury		Whitcroft
	Left Wing	
Seale		R. Armstrong
	Left Wing	
Giroux		Graham
	Goal Umpire	
Pope		F. Clarke
	Referee	
	Chaucer Elliott	

SUMMARY.

1st Half.

1. Peterborough, Whitcroft, 2 minutes.
2. Peterborough, Whitcroft, 4 minutes.
3. Peterborough, Graham, 11 minutes.
4. Peterborough, Howell, 6 minutes.
5. Picton, Giroux, 5 minutes.
6. Picton, Giroux, 2 minutes.

2nd Half.

7. Peterborough, Whitcroft, 4 minutes.
8. Picton, Embury, 3 minutes.
9. Peterborough, Graham, 1 minute.
10. Picton, Embury, 30 seconds.
11. Picton, Embury, 6 minutes.
12. Peterborough, R. Armstrong, 12 minutes
13. Peterborough, Graham, 1 minute.
14. Peterborough, R. Armstrong, 30 seconds.
15. Picton, Embury, 30 seconds.
16. Peterborough, H. Armstrong, 30 seconds.
17. Peterborough, H. Armstrong, 30 seconds.
18. Peterborough, H. Armstrong, 15 seconds.
19. Picton, Strike, 30 seconds.
20. Peterborough, H. Armstrong, 1 minute

The game was free from roughness, and the referee had very little trouble with the boys, although for the slightest offence they were given a rest.

Picton plays in Belleville Friday night, and here's that they may put it over the Bay City bunch and give Peterborough another crack at the championship.

After the game the Picton team were entertained by the officers of the 57th Regiment.

GORDON IN ELGIN

Ridgetown, Jan. 28.—Today the Liberals of West Elgin nominated D. A. Gordon of Wallaceburg, for the commons and M. K. Cowan, K.C., was the speaker of the day.

GIVEN ANOTHER BISHOP

Montreal, Jan. 27.—Word has been recieved here of the Pope's absolute decision to give Archbishop Bruchesi another suffragan bishop by the creation of a new diocese of Joliette. It is understood Mgr. Archambault of Montreal, will be the first bishop.

It never fails.

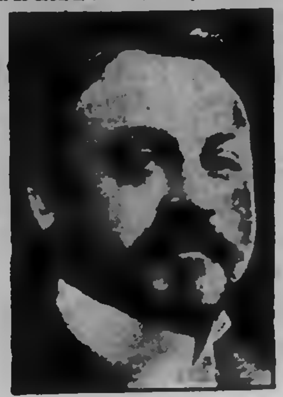
CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has



DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 10c per month, and to outside points at $5 per year strictly in advance.

ELECTRIC LIGHT PLANT

The use of the electric light has greatly increased in Canada during the past year. According to the report of the officers carrying out the Electric Light Inspection Act there were last year 324 plants in the Dominion with 14,730 arc lights and 1,2212,961 incandescent lights. Taking the arc as equal to ten incandescent lights, the country had on the 30th of June last 1,360,661 lights in use. This is an increase of 234,056 lights in use. This is an increase of 226,966 lights in the twelve months, or over 21 per cent. Where there were five lights in 1902 there were six in 1903. growth since 1898 has been;—Establishments (1903) 324, increase 65; arc lights 14,730, increase 4,396; incandescents 1,212,961, increase 742,246 showing an increase of 42 per cent. in the number of arc lights, and of 161,6 per cent. in the incandescents.

In the provinces, according to an Ottawa report, Ontario is the chief employer of the electric light, the province having 208 of the 324 plants in use in the Dominion. It has considerably more than one-half the total number of arc lights, and 47 in each hundred of the incandescents. All over the province, cities, towns, and villages are lighted with electricity, supplied either by companies firms, or the municipalities themselves. Of the latter thirty-four in the province supply themselves with electric lighting. Quebec, though possessed of enormous water power, has not adopted electric lighting to the same extent as the sister province. It has 53 plants, 4,063 arc lights, and 400,503 incandescents. It is, therefore, behind Ontario by 4,671 arcs and 168,200 incandescents. It has made, however, greater proportionate gain since 1898 than Ontario, the gain in arcs being—Ontario 36.2 per cent.; Quebec, 47.6 per cent.; and in incandescents, Ontario, 138.6 per cent., and Quebec, 212.8 per cent. During the period, 1898-1903, the number of plants in Quebec increased by 13.

The plants in Quebec are larger than those in Ontario, the average of Quebec's 53 being 15,400 arc and incandescents, and that of Ontario's being 3,215 arcs and incandescents. The largest single plant in the Dominion is that of Toronto, with its 170,640 lamps, arcs being taken as equal to 10 incandescents. The next largest is that of the Lachine Rapids Hydraulic Co., 153,503. The third in size is the Ottawa Electric Co., with 111,927 lights.

The other provinces have made considerable progress. To the west Manitoba has increased in 1898-1903, its arc lights from 162 to 272, and its incandescents from 19,200 to 31,995.

The North-West Territories have not increased as rapidly as the other parts of the Dominion, their arcs numbering 20, an increase of four, in the period named, and their incandescents numbering 6,677, an increase of 1,897.

British Columbia shows the largest proportionate increase of any of the divisions of Canada, its increase of arcs being 377, or 92 per cent., and of incandescents 74,297 or 357 per cent. In 1898 British Columbia and Nova Scotia had almost the same number, British Columbia having seven more arcs and 149 more incandescents; Nova Scotia has increased the number of its incandescents by 22,140. The Maritime Provinces had in 1898 961 arc lights and 46,977 incandescents, an increase of 33 1-3 per cent. for arcs and of over 96 per cent. for incandescents.

These figures show that increased use of electric light is general throughout the Dominion and that, proportionately British Columbia stands first in that increase, with Quebec second, Ontario third, Manitoba fourth, and Nova Scotia fifth.

SHORTER SCHOOL HOURS

In a lecture before the Literary club of Milwaukee, Dr. Walter Kempster earnestly opposed the system of forcing the minds of children. He says the present school methods are responsible to a great degree for much of the nervous and mental trouble that exists in the country. He further maintained that the school hours for children under 16 years of age should be reduced to a maximum of four hours a day.

Dr. Kempster is not alone in his opinion that school hours are too long and do serious and permanent injury to the child. Professor Goldwin Smith, who is now 80 years old and in sound health, ascribes his longevity and his ability to work at this age chiefly to the fact that he was not overworked at school. Professor Bain, Herbert Spencer, and any number of specialists in nervous diseases, indorse the same opinion. They hold that the mind of the child is in a condition to receive text-book instruction only for a few hours each day, and that even those few hours should be broken by intervals of rest.

The state has assumed the larger share in directing the education of the child and each year takes to itself more and more responsibility in saying what shall and shall not be done for children. Whether the parent will or no, he is compelled to send his child to school a certain number of hours each day, for a certain number of weeks each year.

He is obliged to trust to the sanitary conditions of the schoolroom, to the merit of the teacher, to the course of study laid out. He has nothing to say of the method prescribed, or the time allotted to any particular study. All that is decided by officers appointed by the city or state.

This being the case and nervous, delicate children being obliged to submit to the same conditions laid out for those of the more robust type, it is the business of the state either to give up some of the responsibilities it has taken from parents or to see to it that the methods of study and the number of hours are such as shall be of physical as well as of mental advantage to the child.

NEURALGIA

THIS DISTRESSING COMPLAINT IS DUE TO IMPOVERISHED BLOOD

When the blood becomes thin and watery, as a matter of course, you become weak, vitality gets down low, and there is but little power in the system to ward off disease and pain.

Neuralgia hunts out a weak spot, and makes a home there, so secure that it is [illegible] proper remedies it can be driven from the system, never to return. To obtain immediate relief, first apply to the painful parts, a good quantity of Polson's Nerviline, and then bind on a hot flannel cloth.

This local treatment will be found very efficacious, but must be followed by a course of Ferrozone treatment. Ferrozone is a blood food, and a blood purifier, and quickly strengthens the system so that further attacks may never be feared. It makes the rich red kind of blood, that gives strength and vigor to weak constitutions and puts them in good shape to resist neuralgia attacks.

This combined treatment of Nerviline and Ferrozone in Neuralgia, Sciatica, and Rheumatism, is marvelously effective and cures after all else has failed. Because of the unique success of these remedies we have no hesitancy in endorsing their use to our readers. All druggists sell them.

LAKE SUPERIOR CONSOLIDATED

A Forecast of Plan Proposed by Speyer and Company

Philadelphia, January 27— There is every reason to believe that Speyer & Co. will this week announce whatever plans they have for the reorganization of the Lake Superior Company. Unless the plan shall be deemed equitable and fair by the Moffly reorganization committee it will not be recommended for acceptance. Should no recommendation be made the property will be handled entirely by the Canadian liquidators.

The delay on the part of Speyer & Co. in announcing their plan to allow stockholders to participate in the reorganization, or in the liquidation of the collateral held as security for the loan that is said to be due to the failure, until a few days ago, of a number of the members of the Speyer Syndicate to sign the agreement, vesting New York bankers with absolute authority in the premises. Ten days ago all the signatures were affixed to the syndicate agreement, which binds members to subscribe an amount equal to one-third of the sum they advanced in the loan should Speyer & Co. declare its necessity for reorganization purposes. Should the Speyer plan be rejected, thousands of stockholders (who invested millions in the industries at the Soo will lose virtually all their investment. If the plan proves equitable, the money deposited in the Fidelity Trust Company under the terms of the Moffly committee plan will be turned over to the bankers. Much interest centers in the stock assessment feature of the proposed Speyer plan. It is believed it will call for a $5 share assessment, taking in the $3 already paid and calling for $1 a share a year until $2 shall be paid. It is also believed that the capital of the new company will exceed $40,000,000 the figure set in the Moffly Committee plan. This will be increased, it is believed, in order to make a more equitable exchange of shares.

Ayer's Hair Vigor

This is what it does: Restores color, stops falling, makes hair grow, cures dandruff. Is not that enough?

THE CAPTURE OF CASHEL

Mounted Police Forced to Burn Him Out

NEVER LEFT CALGARY

Stayed around, He Says, to Help His Brother John

Winnipeg Jan. 26.—Ernest Cashel, the murderer who escaped from Calgary police barracks a few days before the date set for his execution in December, was caught by the police to-day a few miles from that city. He is supposed to have been hiding in an old cellar since his escape. Cashel is now in the guard-house.

During his liberty Cashel has not been more than eight or nine miles away from the city, and during a portion of the time was in the city. The police police learned two weeks ago that he was lurking about the eastern suburbs. They found that he was well informed of all that was going on, and that he was in Calgary for the purpose of rescuing his brother, John Cashel, in case the latter was convicted for assisting in securing his release. Two weeks ago the police informed the Calgary papers of this fact, and as it was learned that Cashel was in some way kept informed of all that was being done a request was made that nothing be published. This was agreed to, and gradually the meshes of the law were woven about the condemned man. On Tuesday last Cashel stopped at the house of a man named Wigmore, a few miles from Calgary. He remained there during the night, and confessed that he was Cashel. He ordered Wigmore not to leave the house that day, saying he could get out of the country if he wanted to, but that he did not want to leave without his brother.

A SYSTEMATIC SEARCH.

The police sent men in plain clothes to several houses in the district to await developments. After the conviction of John Cashel on Friday the authorities decided to take an offensive position, and thirty-two men were detailed to search every house in the entire district. They were detailed in squads of eight. Inspector Duffis with his party went north having in his squad Mr. Chamberlain, of the Secret Service Department, Toronto; Constables Biggs, Peters, Stark and Rogers. They searched houses and haystacks up to noon, but found nothing. Then they separated into two parties. One, under Constable Biggs, in examining a house owned by Wm. Pitman, came upon a den in a haystack, about 100 ft. from the house. In the pit were found clothes and other articles resembling what Cashel had worn. Cashel was not found in the den, and search was made of the house.

A BRISK FUSILADE.

In one corner of the cellar Constable Biggs found a hole where a man might conceal himself. He secured a light and held it to the hole. He caught sight of a man and had hardly done so when a random bullet whizzed past his head, quickly followed by another shot. He was not armed and made a retreat up stairs. He secured a revolver, and returning to the cellar door, met Cashel coming up. Two shots were exchanged, one by Cashel tearing off the inside of the door behind which Biggs had taken cover. Biggs returned with a shot which tore into Cashel's heel. Cashel fired again and Constable Stark came to the rescue. Then the murderer dropped back into the cellar, and the police retired from the building to await the arrival of Inspector Duffis. When he arrived it was decided to fire the building.

THE BUILDING FIRED

The contents were carefully removed and the torch applied. When Cashel smelled the smoke he gave signs of a parley. A revolver shot was heard and Cashel called out that he was going to kill himself, but wanted some one to ge [illegible] tter from his mother. This had no effect on the police and he was ordered to come up and hold up his hands. Cashel then cried out he would kill himself, and said the letter from his mother would be found in a corner of the cellar. Another shot was heard, but no one moved from above, and the inspector again ordered him out. A minute later Ernest Cashel haggard, unkept, bearded and shaggy came up, put up his hands in the air and gave himself up. He was soon afterwards in the cells at Calgary. [illegible] communicative on the way in, and said he could have escaped frequently but that he would not leave his brother, who had dared so much for him. Cashel was thoroughly up to date on all the doings in his case, knew that he was to be hanged on the 20th, and of the conviction of his brother.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

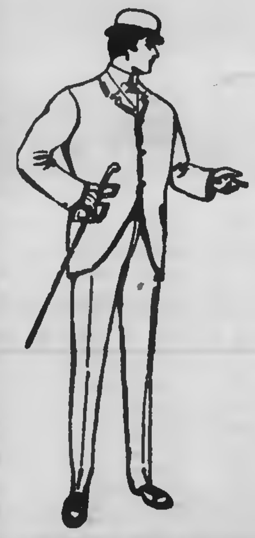
WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough — necessity knows no law — the stock can't be moved or kept for another season.



MEN'S SUIT SLAUGHTER

Men's Black and Blue Worsted Serge Suits, Regular $10.00, for	$5.75
Men's Black and Blue Worsted Serge Suits, Regular $8.00, for	$4.50

NEW YORK-GRASS VALLEY GOLD MINING CO.

New producing and shortly to go on a Dividend Paying Basis

Offers the best opportunity for immediate investment of any Mining Stock in the Market. The Company is now installing additional stamps to work in their mill, which will be in operation this week, when the Capacity of the present plant will be increased to upwards of

100 TONS PER DAY

GOLD BAR

6 1-8 inches long, 2 1-4 inches wide and 1 3-8 inches deep

The above Gold Bar, weighing 168 ounces, recently sent to the San Francisco mint represents a ten day's run of the New York Grass Valley Mill, and is valued at about $2800.00

We hold an option on a limited amount of the stock which we can offer for a very short time longer at

30 Cents per Share — This is an — Exceptional Opportunity

To secure a first class stock, and one that will not be available for any length of time, as on the declaration of the first dividend, which is due this month it will be impossible to secure it at anything like present prices.

We anticipate 75 cents to $1.00 per share within six months.

We advise the immediate purchase of New York Grass Valley stock to large and handsome dividends.

We are the authorized agents of this Company, and you will find it greatly to your advantage to deal directly with us.

Write for full particulars KAYE, DeWOLF & CO., Brokers and Financial Agents, 39 41 Cortland Street, N. Y. C.

IS THERE CERTAINTY IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.
2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.
3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.
4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.
5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.
6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.
7th—By being able to erect a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 5 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.52 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.53 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address.

PETERBOROUGH BROKERAGE CO., Local Fiscal Agents, Peterborough

A Groom's Voluntary.

Sir Frederick Bridge, the English musician, is a good story teller, according to T.A.T., and has a fund of amusing personal experiences to draw upon. One of the great musician's best stories is about a provincial church organist, who was once a pupil of his. This young man was appointed to an important church in the Midlands. In course of time he married. During his absence his voluntaries were much missed by the congregation. They had always been appreciated, and their renewal was looked forward to. "Imagine," says Sir Frederick Bridge, "the intense amusement of the people when the newly-married organist gave as his first voluntary, upon his return, Handel's 'Waft Her, Angels, to the Skies.'"

To Build Cruisers.

As a result of the recent naval manoeuvres the British authorities are considering the advisability of building some "dogging" cruisers, to pursue battleship fleets of the enemy and pounce on those which are forced to fall behind. The Bacchante and the Aboukir "dogged" Lord Charles Beresford's fleet in this way almost to the Azores. The flagship Majestic had something the matter with her engines. She was frequently compelled to slow down. Then the big, heavily armed cruisers of the pursuing fleet would swoop down on her. It was necessary to slow down the entire squadron several times for her protection.

"Another point of much interest is that of speed in battleships," writes a British naval authority. "Those who have been engaged in the manoeuvres would have done much better with a few knots more in hand. There are experienced flag officers who say that high speed in battleships is not essential. Yet if gun powder and protection go before it, speed is, in nine cases out of ten, the only thing that can enable a strong fleet to bring a weak one to action. It is the factor that enforces victory and will enable the British fleet to carry on its old policy of seeking out the enemy to destroy him wherever he may be found."

The Wrong Man.

They had been married only a few months, and the wife stood by the side of her husband looking into one of the department store windows. A handsome tailor-made dress took her fancy, and she left her husband to examine it more closely. Then she went back to him, still talking.

"You never look at anything I want to look at any more," she complained. "You don't care how I dress. You don't care for me any more. Why, you haven't kissed me for two weeks."

"Indeed, I am sorry, but it is not my fault," said the man.

Turning, the lady looked at him and gasped. She had taken the arm of the wrong man.—Philadelphia Ledger.

A Baloon Trip.

There is nothing exciting about a balloon voyage. You take your place in a shallow wicker basket; decide to take a picture of the crowd as you leave the earth; hear the order "let go," and before you can press the button the crowd has evaporated—sunk out of sight—and the rest is a moving picture show, with no sense of motion, the air delightfully cool and absolute silence. Presently a voice, apparently from another balloon a long way off, asks how you like the journey. You have exactly the same trouble with your hearing you had while in the caisson, but from an opposite cause there pressure, here rarefaction. In this case, too, the act of swallowing brings relief. A balloon trip is for all the world like sitting in a dentist's chair and taking a whiff of gas, followed by a pleasant dream. But, of course, instead of taking gas, gas is taking you. Photography under these conditions is a very simple matter—pointing the lens over the edge of the basket, waiting until the desired object comes into view, and the snapshot is taken.—W. N. Jennings, in Booklovers' Magazine.

A Quiet Village.

It seems hardly credible, says The London Telegraph, that not more than thirty minutes from all the noise and bustle of Paris there lies a village that is so quiet, so peaceful and so old-fashioned that one would imagine one's self at least one hundred miles away from the gay capital. Here at this village, La Frette by name, and about fifteen minutes' walk from Cormeilles, preparations for midday and evening repasts have to be made very early in the morning, for no such thing as a good shop is anywhere near, and the walk to Cormeilles is one which one considers twice before taking, for it is up steep and rough roads. So daily butcher, baker and greengrocer pass this quaint little place, and the villagers gather round the various tradesmen and make their purchases for the day. They also buy their clothes in this way, and may often be seen trying on bonnets, dresses and boots in the middle of the street. From a scenic point of view, all artists have agreed that there is no place to equal La Frette between Paris and Havre. To the left of the village is the park of Maisons Laffitte, and facing the park is Sartrouville, while opposite lies the forest of St. Germain, in all its green splendor. To the right is Herblay, quite an important place, whose church is visible for miles along the Seine. La Frette itself has the quaintest villagers possible. Many of them speak worse French than those of the Midi, and it is an event indeed when one takes a journey up to the capital. They are thriftiest of the thrifty. Only a short time ago one of the peasants gave his daughter no less a sum than 50,000 francs on her wedding day, and another is to receive the same amount on her approaching marriage. And yet this man, who must be worth 4,000,000 or 5,000,000 francs at least, lives in a patched-up old house and digs in the fields from early morning till late at night.

Be Regular in Milking.

The cow is a creature of habit, and therefore the time and manner of milking should vary as little as possible from day to day. The yield of milk will sometimes vary by reason of matters of such small moment that we fail to reckon them. From our results a change in milkers showed a small average loss in yield. Some cows were not affected at all, while others gave a slightly reduced yield. This will depend, however, upon the ability of the milker. Carlyle found no appreciable difference in the frequent changing of milkers. Tracy found by a good milker following a careless one an increase with five cows of 244 pounds of milk in two weeks.

Cows fed at milking time are apt to hold their milk when the customary feed is withheld. This may occur even when the animals have access to abundant pasture. This is so noticeable with some of the station cows that it is advisable to give them a little grain through the summer season to induce them to give down their milk. Emery notes that a cow that gave over seven pounds of milk gave only two pounds when her customary feed was withheld at milking time.

Allowing cows to miss a milking has a tendency to dry them up, and is liable to cause an injury to the udder, some cows being affected much more than others in this respect.—(Bulletin No. 106, Kentucky Agricultural College.)

—The Orillia News-Letter, in commenting on the press criticisms anent the Grand Trunk's lack of motive power, says This brings back to us Conductor Jack Lethbridge's old story of the cow. On one occasion the Midland train stopped short and a passenger asked the cause. "Cow on the track," replied John. Half an hour later they ran into another cow and stopped. The passenger again asked and was told the cause. "What," he exclaimed, in surprise, "have we caught up to that blamed cow again?"

HOW SHALL WE LIVE.

Rev. Alfred W. H. Halder,
Sixteenth Baptist Church,
New York.

Man shall not live by bread alone, but by every word that proceedeth out of the mouth of God.—Matthew, iv., 4.

How shall we live? The tempter says, "By bread." Christ replies in the words of our text. Man lives by God's gifts only as God is behind them, and yet the real support is not in the gifts but in the giver. Life in its fullest sense is action from within, sustained with food from without. This is clearly illustrated by the power of steam generated within a boiler, but dependent upon water and fuel from without.

God has appointed under all ordinary circumstances that we should sustain life by the secondary means of earthly food, but placing this as the limit of God's directions we make our lives earth, earthy, and hold out little or no hope to the poor and needy of this world's goods.

The word "bread" covers a wide range of earthly supplies and is of primary interest to the people of all nations. It places an emphasis upon the saying "Self-preservation is the first law of nature." The world says, "By these things we live."

Moreover, we are not blind to the necessary anxiety about such things as the body's just claim, but rather accept the fact that food, raiment and shelter are part of God's economy of life. Christ says, "Your heavenly Father knoweth that ye have need of all these things." In the Lord's Prayer we are taught to ask, "Give us this day our daily bread," and we are justified in a material interpretation of this human request as much as in a spiritual sense. But we are wrong if we place so small a horizon about our lives and give no attention to the words of Christ, "Man shall not live by bread alone; but by every word that proceedeth out of the mouth of God." We place ourselves by the side of the Pharisees, of whom it was spoken, "Woe unto you, Pharisees; for ye tithe mint and rue and all manner of herbs, and pass over judgment and the love of God; these ye ought to have done, and not to leave the other undone."

First. We should live in love. If Paul were writing to-day he would have said, "Though I possess abundance of all things, and have not love, it profiteth me nothing." Iron in the soil is raised to a more useful sphere by the growing plant rooted in the earth; the plant then taken to nourish the body places the iron still higher and finds its largest usefulness in energy produced in the blood of man. So the seed of divine love, placed by God in the human heart, can raise it to a larger and nobler life. We need the food of culture, knowledge, affection, solitude, all of which are bread to nourish, sustain and develop our souls, for man is not wholly alive when his body is alive; for the soul lives by every word which proceeds from the mouth of God.

In a western city by the river a sick girl had been taken out of the street by a poor woman who kept a dining-room for sailors, with a kitchen behind it, and who made a little bed for the sick child under a stairway. It was thought the girl would be more comfortable in a hospital, and so she was taken there. But she missed the kind heart of the motherly old woman's love and so went back to die in the kitchen. No doubt there was surprise in heaven when these two met at God's throne, and the old woman, who had no earthly church, heard the words uttered which encircle Livingstone's tomb in Westminster Abbey, "Inasmuch as ye did it unto one of these little ones, ye did it unto me."

Second. We may also live by every kind of truth which comes from God to make us more alive. It is ignorance, narrowness, bigotry and selfishness which make us cling to the letter and reject constant new revelation. The mind needs to be nourished with new thoughts or it will return to infancy long before the body comes to its three score and ten. Truth revealed in science, truth revealed in daily experience, truth revealed in common faith in man—these are some of the words proceeding out of the mouth of God. For men's souls are only nourished and strengthened in proportion to their minds' and hearts' working. High friendships, noble loves, solemn angles in grief and death, adversity and solitude—all special agencies to feed particular souls.

Third. We may also grow strong and live by every kind of service. This was Christ's teaching and practice. "I must be about my Father's business" are His words. God's service, an exalted sense of true life, a definite path of duty, a noble example of a blessed spirit. Though the body lacked the bread of this world and came to hunger, pain, tears, sorrow, insult and rejection, yet the one thought is, "My meat is to do the will of Him that sent me."

So may we readers of to-day's sermon resist the temptation of a concentrated thought and work for earthly bread, and feed upon that bread of which if a man eat he shall hunger no more.

Bulb Growing in Ireland.

Just now, says The London Daily Chronicle, millions of bulbs are being bought and sold, or given away, and it is good to know that Great Britain, even in the absence of a protective duty, is rapidly wresting the trade away from Holland. In that country bulb culture has been an hereditary pursuit for the past three centuries at least, and until a quite recent period the importation to England was immense. Now even the rarest and consequently most expensive varieties are grown on this side of the North Sea, and not the least successful bulb farms are to be found in Ireland. The experiment, which was begun eight years ago at Rush, county Dublin, where the ground was previously devoted to potatoes, has proved entirely successful, and both climate and soil have been found almost perfect for the industry. Irish-grown bulbs have not yet reached the eccentric prices running to three figures—which a past generation sometimes paid for a single specimen, but even at Rush you may spend twelve guineas on a root.

EVERYBODY READS THE TIMES.

HIGH PRAISE FOR THE INTERCOLONIAL RAILWAY

Its Equipment, Scenery and Literature Most Favorably Commented Upon

Mr. D. Pottinger, General Manager of the Government Railways has received the following letter dated Dec. 3rd, from the office of the Board of Trade, Montreal, which speaks for itself.

D. Pottinger, Esq., General Manager Intercolonial Railway, Moncton, N.B.

Dear Sir,—I have pleasure in communicating herewith a resolution adopted by this committee conveying to your management an expression of gratitude for the tour over the Intercolonial Railway, provided for the over-sea delegates to the Fifth Congress:

"Resolved, that the Canadian Committee of Arrangements tenders to the Intercolonial Railway Management its most sincere thanks for having, at this Committee's request, afforded the over-sea delegates to the Fifth Congress of Chambers of Commerce of the empire, a complimentary tour over its line, and for the added courtesy in providing special trains for the two parties.

"That the lovely scenery of the Matapedia River together with the beautiful valleys of the Miramichi and Nashwaak rivers, seen when the autumnal tints were at their best

WAS GREATLY ENJOYED
BY THE DELEGATES

as were also the visits to the cities of Fredericton, Halifax, St. John, and Sydney, with the local trips provided by the citizens thereof, while the ride along the shore of the beautiful Bras D'Or Lakes was declared to be worthy conclusion of the glories of the All Canadian tour.

"That the delegates greatly appreciated the illustrated volume, "Forest, Stream, and Seashore," which the Intercolonial Management so kindly presented to all who took the tour over its lines.

"That the Committee of Arrangement is convinced that the circumstance, that, with the assistance of the Dominion Government and by the kindness of the Railway and Inland steamboat companies, it was able to tender to the over-sea delegates these extended tours through Canada added largely to the success which has attended the holding of the Fifth Congress in this City, and it is most gratifying to know that these tours have resulted in impressing the delegates most favorably

WITH THE GREAT RESOURCES OF THIS COUNTRY

the vast opportunities it affords for the investment of capital, and its superior advantages as a home for the surplus population of the motherland.

"That the committee has been gratified to learn that the knowledge of the resources and beauties of our country thus obtained by the delegates will be widely disseminated by them through various parts of the Empire from which they came, for it is the intention of many of the delegates to communicate to the members of their respective Chambers and to other audiences, by illustrated lectures and other means, the information they have gathered during their visit to Canada;

"That the Committee records its belief that the tours through Canada have filled in the highest degree the hope in which they were planned that in addition to affording much enjoyment to

THE OVER-SEA DELEGATES
TO THE CONGRESS

that would result in great and lasting good to our country, and that the railway and steamboat companies who gave the transportation privileges deserve and enjoy the gratitude of all Canadians for their wise generosity in this connection."

The recent Congress of Chambers of Commerce of the Empire being the first of these Congresses held outside of the Mother Country, this Committee caused a medal to be struck in bronze to commemorate that fact, and it subsequently had a few struck in silver for special presentation purposes, one of which is now sent you under another cover in token of the Committee's appreciation of your kindness in connection with the complimentary tour given over your line to the over-sea delegates.

I am dear sir, yours truly,
(Sgd.) Geo. Hadrill,
Secretary.

A copy of a resolution passed by the Chamber of Commerce and Manufactures (Incorporated) of Sheffield, England, has also been received and which reads as follows:

"At a meeting of the Council of the Sheffield Chamber of Commerce and Manufactures (Incorporated) held on Oct. [illegible], 1903, it was resolved that the best thanks of this Chamber be and they are hereby awarded to the Intercolonial Railway for their great courtesy and hospitality extended to the delegates from the Sheffield Chamber on the occasion of the Fifth Congress of Chambers of Commerce of the Empire at Montreal."

(Signed)
HERBERT HUGHES,
Secretary.'"

Before leaving for home Lord Brassey paid a warm compliment to the Intercolonial Railway. "I have never travelled,' said he, "more comfortably nor on a better appointed train than that which conveyed me out of Halifax to-day.' He alluded to Canada's Famous Train, the "Maritime Express."

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.96 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.68 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. P. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunnels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet, 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore, there is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 200-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. W invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

CURES in 1 to 5 days. Guaranteed not to stricture. Prevents Contagion. THE EVANS CHEMICAL Co. CINCINNATI, O. U. S. A.

MEN AND WOMEN. Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1. , or 3 bottles $2.7[illegible]. Circular sent on request.

'Henry Fielding's ream'

By CORTLAND MYERS.

"I read yesterday the writing of one prominent union man, who said; 'The promised prosperity has arrived—the genuine, unadulterated article, and how the capitalists rejoice. But the wage slaves! Oh, they are not to be considered, only as so many tools or machines that are only fit to toil and support the idle capitalist when it seems to be the most profitable. Workingmen, *do you realise* that you and your class are the only ones who can and will give yourselves any *better conditions? Strike* the capitalist entrenchment in its weakest point. Capitalism or private *ownership is wholly responsible* for all the vice, crime, misery, want and servitude of the masses. Strong men willing to work starve while gazing on stores of food which is controlled for private interest. Little *children go to bed* hungry, while capitalists are feeding on luxuries they never earned. The miner digs into the bowels of the earth, hid away in dungeon, toiling out his own life, scarcely seeing the light of day, to support a class who never aid in production, but feast on the blood and sweat that has been coined into dollars. Get rid at least of the superstition that there would be no capital if there were no capitalists, for it is this absurd notion which keeps you in bondage; which makes each of you look beggingly to some capitalist for employment instead of looking fraternally to each other for mutual serving in co-operation.'

"He writes extravagantly and does injury to his own cause. That is not the right method to pursue, nor is the cure presented, only in a vague and hackneyed way. There is something deeper than that. Many wise men and true hearts have advocated the public ownership of public utilities. That would prevent the repetition of this present situation. This is undoubtedly true in a measure, and I wish it was in effect to-day, but that only touches the public utilities, and leaves out the general condition and great question.

"No city ought to be subjugated to the inconvenience and injustice of a street car strike. *That affects* other people more in some instances than it does the corporation or their employes. *Our rights and liberties* must be considered. Light, water, postal, telegraph and transportation services *ought* to be *under government* control. The crime of the past is the cause of the penalty to-day. We give away valuable *franchises* and hundreds of millions of acres of land, and these days are the result. Here are the *most frequent* and bitterest strikes, and it ought never to have been possible. The old world is ahead of us, and the governments are making great revenue from the very things in which the individuals and corporations in this country are hoarding their millions.

"This is not the extreme of socialism. It is only good government and good sense. Even in the present position, no strike should be possible in these departments of our life and commerce. Here at least we could have a permanent court of arbitration, whose power was final. Our business should be established upon the principle of our government. There we have a king, but he is controlled; there we have the people, but they are not a mob. Both are governed as well as governing.

"In the case of the capitalist, he is a most important element in our society. In proportion to his goodness is his value. The workingmen are just as valuable to society, and we have a multitude of the best in the world. The good capitalist, like a good king, is one of the greatest blessings, if he does not oppress his fellowmen, and is willing to divide reasonably the profits with his employes, and surrounds his factory or men or railroad with an atmosphere of brotherhood and love. He may be a benefactor, indeed, but if he is a bad man, he is like the king who becomes simply a tyrant on his throne.

"So the workingmen are the very sinew of our life. They are now the lower class. They are on a level with the best. Every citizen ought to be a workingman in the best definition of that term. If the workingman is industrious and honest and economical, and *possesses ability*, he is not only a necessity, but one of the greatest elements of wealth in our society. *Neither employer* nor employe ought to rule this country unguarded. That is contrary to every *principle of the republic*. You make kings and create mobs to your shame and your death. We have individual liberty, *bounded by law*. It is almost an outrage to put in the hands of any one man or corporation the interests of a whole city.

"In this present crisis I am impressed with the certainty of the men being in the *right*. They have been oppressed for *months* and years by an increase in their hours of toil, with no rest-day in the week, as God ordained, and as every man has the right to possess. More than that, there has now been made a slight reduction in wages. It is the hour for a strike, if no other power will secure justice. Why is all this increase of hours and lowering of wages? Is it because the stockholders are growing poorer? No, their dividends are increasing and they are growing richer every day. It is only the process of selfishness.

"Forgive me if there is any offense, but I must speak the truth, even though I die in the utterance. Do I advocate a strike? No, it ought to be the last resort. The workingmen may have made the mistake of taking this last means too hastily. After everything else has failed, what is there for the men to do, if not to strike?

"We are coming nearer the day when arbitration will settle these disputes. That is the next great epoch in the history of labor, but until that hour, I know of no other procedure than that which is adopted. I am *not prepared* to say how it shall be conducted. I don't think there should be force used to the bodily injury of *other men*, nor should there be the destruction of property. I am convinced that the end would be attained and public sympathy aroused more quickly by the right and lawful way.

"Public opinion is the great force to keep upon your side. You must lose if you lose that. You forfeit that by undue haste or lawlessness.

"Now, I am afraid that some of you have disagreed with me, and perhaps may be even offended at me, but both employers and employes listen. Be calm and fair. Hear me through. I do not stand for my own opinions this morning. I stand for the thoughts and purposes of Jesus Christ. What are the great principles which he came to introduce into the world of business and labor? Both sides must abide by his decision. You cannot escape it, for even the judgment throne of God is governed by the Gospel.

"A distinguished statesman, who now holds the high office of associate justice of the Supreme Court of the United States, said recently: 'You ministers are making a fatal mistake in not holding forth before men, as prominently as the previous generation did, the retributive justice of God. You have fallen into a sentimental style of rhapsodizing over the *love of God*, and you are not appealing to that fear of future punishment which your Lord and Master made such a *prominent* element in His preaching. And we are seeing the effects of it in the widespread demoralization *of private virtue* and corruption of public conscience throughout the land.' And an authority higher than *any statesman* or jurist has said: 'I will forewarn you whom ye shall fear: Fear Him who, when He hath killed *the body*, hath *power* to cast both soul and body into hell.' It is a sad and awful truth that sin kills beyond the tomb. To hide this truth from men by cowardly silence is disloyalty to Him who had called men to preach His Gospel.

"The judgment is a part of the Gospel, and every man must face it. The capitalist will answer for every dollar that he has made, and the laborer will answer for every strike he has inaugurated or in which he has engaged.

"I have said once that Christ would belong to a labor union. I have no reason now to change that declaration. At least, if He would not belong to it, I ought not and you should not. Neither do I see any reason why Christ could not be an employer, but the same divine principle would control His acts in either place.

"It is selfishness, pure and unadulterated which is at the source of misunderstandings and quarrels between capital and labor. We are willing that Christ should reign in the Church on Sunday, but not willing that He should rule in our lives on Monday.

"Men are not controlled by Christ's law of service and sacrifice seven days in the week. We talk about progress in the world. There is no progress apart from unity. We must all keep together, and no man be left behind. That is both philosophy and religion—yes, it is the fact itself. The hovels of the poor are not far from the palace gates. Dives and Lazarus are blood relatives. Leave one part of the city in *ignorance* and want, and the other part in *progress?* Never. We move, but we must all keep together. That *is the principle of* every word upon the lips of Christ, and every act in his life. This is His life. This is the *brotherhood* of man; this is the fatherhood of God; this is the triumph of the Gospel; this is the program of Christianity. The Golden Rule is not a farce, but a glorious possibility and reality. The end of all this must be Christian arbitration. Strikes are dangerous and injurious, if not altogether wrong and contrary to our Christian and political principles. There ought to be some other way, and there must be. What is in store for factories and places of business and homes, and even the Church, if a mob of people using lynch law shall triumph? What is in future for men if the railroad corporation succeeds without arbitration? It would be perilous to the best interests of us all to have them meet with success and force men to work for less than they earn.

"Would to God a court of arbitration could be established on Christian principles, and the impulse would push the world rapidly nearer the throne of God. Would to God that you employers here to-day could take hold of the pierced hand of Christ, and ask Him to lead you. Do not hesitate. Make the venture—dare to face duty. It is right, it is the only right; your *eternity is in it. Make your Christianity real.* Show it to these men—yes, show Christ to them. That is your first business. *Give them justice*—aye, more than that—give them sacrifice or you do not share in Calvary.

"Oh, you men who *are in the labor* unions of the city, whether in the street car strike or not, hearken to me. This is not rhetoric now. This is my blood. Give Jesus Christ a chance in your life. Your employers may not be all to blame. Is your record in relation to them perfectly clean? Have you always done unto them as you would that they should do to you? Stand up like a man against every wrong method, and only do what you know the Carpenter of Nazareth would do in your place. Make the Gospel practical. It can be. It was intended for your union and your toil. Christ wants you; the Church wants you; I want you—every man of you, to give your hearts to the Lord Jesus and serve Him.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC. . . .

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O.

The Prescott National Bank,
Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 29th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

CANADIAN BITTER AGAINST AMERICA

Says the People of the United States Have No Friendship for the English

London, Jan. 27.—Edward Musgrave, of Victoria B.C., has written a letter to the London Times, in which he says that the great majority of Americans have ill friendship towards the English people. Americans have never forgiven the past. They are jealous of the present and bitterly resent our status and progress. They have rejoiced and would again at any humiliation or difficulty affecting the Canadians. Mr. Musgrave adds: "The object in writing this, presumptuous, perhaps, in the case of an obscure individual, is to point out the existence of a bitter feeling in British Columbia, which may become a serious danger to the good relations now existing between the Dominion and the Mother Country."

The comments of the British press, in which it has been stated that bad business and the disappointment of any decision are better than a continuance of the danger of the loss of American friendship and Lord Brassey's speech in Canada, the burden of which was that whatever steps we might take in our commercial affairs, we must be careful not to offend our friends the Americans, says Mr. Musgrave, are not calculated to allay this feeling.

Wedge of Discord.

Member of Parliament Verburg, speaking at Blackburn, in regard to the colonies as prospective nations, said that Canada of course in years to come might vie with the splendor of the United States. "It is impossible to make arrangements satisfactory to each colony in inaugurating any system of protective tariffs," he said. It would be inserting the thin edge of the wedge of discord, and would split the empire in pieces.

A Quid Pro Quo.

Lord Onslow, speaking at Camberwell last night, said: "A large number of the industries of the colonies have not yet been called into being. The colonies decide that if we can give something, which is an equivalent, they shall take from us the produce of our factories instead of manufacturing themselves."

Canadian Went Mad.

John Hornibrook, formerly of the Strathcona Horse, a native of Montreal, who returned from South Africa a week ago, went mad on Sunday at Brighton. He jumped from a window, falling 30 feet, and sustaining shocking injuries. He is now in the Sussex County hospital. His condition is thought to be hopeless.

WRIGHT GUILTY, DIED OF BLOW

Bankrupt English Croesus Stricken Soon After Sentence Was Passed

London, Jan. 27.—The jury rendered a verdict of guilty against Whitaker Wright, the company promoter, charged with fraud. Wright was found guilty on all the counts and was sentenced to seven years penal servitude.

In summing up, Justice Bingham described as singular the way in which thousands of pounds sterling became millions on paper. The London and Globe and the Standard Companies were gambling concerns which excited his indignation. In the course of his long experience, Justice Bingham had never before heard of anything like the transactions which preceded the hopeless bankruptcy of the London and Globe financial corporation. If it was necessary to see a motive for Wright's actions, it would be found in his desire to maintain the fine position he had made for himself. At the same time, it was said that after the crash of the London and Globe financial corporation he found himself with $1,500,000 to $3,000,000 in worthless shares.

Whitaker Wright is dead.

Wright was attacked with a sudden indisposition after he left the court, and was attended by two doctors. His death was attributed to heart disease.

Wright's friends all along said that they were certain he would not survive a sentence and would commit suicide. This, apparently, is what happened.

JOHN CASHEL GETS ONE YEAR IN JAIL

Earnest Cashel, the Recaptured Murderer is Reprieved by Court Until February 2

Calgary, Jan. 27.—At 10 o'clock yesterday morning John Cashel was taken before the court and sentenced to one year for assisting his brother, Ernest, the murderer, to escape. While in the court room John looked bright, and a smile passed over his face when the judge pronounced one year's sentence. He evidently expected a good deal longer term. [illegible] broken down and wept when he caught a glimpse of his brother being led back to his cell, and had spent a very uncomfortable night. Ernest, too, regrets his capture and says he is sorry he gave himself up.

The court was crowded and there is great excitement throughout the city over the Cashel brothers.

After John was taken from the court house Ernest, securely shackled and handcuffed, with a mounted guard surrounding the rig, was taken to the court house, where a further reprieve was to be granted in order to make necessary arrangements for the execution and get Radcliffe here. A reprieve was granted to February 2.

PECULIAR DEATHS IN FAMILY OF FOUR

Montreal, Jan. 27.—The story as told here of the death of Mrs. B. O'Brien is very peculiar. The O'Brien family lived in poor circumstances. Their back yard abutted the rear of a paint factory, and for a long time the fuel used in the kitchen stove was supplied by breaking up barrels that had been emptied of Paris green. The arsenic in the small amount of green that always adhered to the wood sent forth a poisonous fume when burnt. About a year ago two of the children died. Later Mrs. Bruneau, the grandmother, passed away, and yesterday morning it was found advisable to send Mrs. O'Brien to the hospital. She was removed to a ward where she died within a few minutes.

An autopsy revealed no arsenic in the stomach, and the doctors discredit the poisoning story.

Notes Sent to Teacher.

These notes are declared by the Chicago "Inter-Ocean" to be authentic:

Teacher—What shall I do mit Charley? Me and my man can't nothing make of him. When we want to lick der little imp he gets the bed under where we can't reach for him and must put a hook on her bedroom door to hold him for his licking. Please spak him in school shust as often as you got time.

Teacher—If Louis is bad please lick him until his eyes are blue. He is very stubborn. He has a good deal of the mule in him. He takes after his father.

Teacher—I dink you are a fool. You want my boy to read when he don't no alferbita. Please teach him some.

Miss Brown—You must stop teach my Lizzie fiscal torture she needs yet reading and figurs mit sums more as that, if I want her to do jumpin I can make her imms.

The Test of Respectability.

The New York "Evening Post" points out the fact that Carlyle's favorite definition of respectability, a "gigman," seems obsolete in the light of modern developments. In place of the old standard "he keeps a gig," we have substituted "he has a steam yacht." Most amusingly was this latter-day measure of wealth brought out in the letters from Paris of the promoter in search of an underwriter. Question arose as to the financial responsibility of one ready subscriber (apparently without ready cash), and the astute American applied himself to the task of rating the fellow. But how did he go to work? Did he go to the banks, the agencies, the Bourse? No, he simply observed the man's manner of life. When he discovered that the backward underwriter kept a yacht, his doubts were instantly relieved, and he cabled the joyful news to New York. Evidently, we say, in the lexicons of today we must look to see the entry: "Gigman; modern, yachtsman."

Privileged.

The Honorable Colonel William J. Bryan appears to believe that the constitutional provision regarding free speech was inserted for his especial benefit.

Fired.

"I understand Blankley was ejected from Jones's house, where he went to pay a visit."

"Yes, he was an old flame of Mrs. Jones, and Jones put him out."

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully."

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price. $500 will be paid for any case that it w[illegible]

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1 00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 200 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 100 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid fo no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,

SOAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL

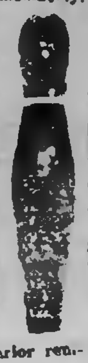
CATARRHOZONE

The Only Cure for Catarrh endorsed by the Medical Profession

Physicians boldly state that every requirement of a perfect cure for Catarrhal diseases is fulfilled in Catarrhozone, and on this account it is prescribed by almost every intelligent doctor.

It is the most powerful antiseptic known. When the lungs are filled with its germ-killing vapor the microbes which cause and maintain the unhealthy condition of the mucous membrane die immediately. Disease germs cannot exist where Catarrhozone is used.



Although very penetrating, Catarrhozone is soothing and healing treatment. It quickly heals raw spots and allays irritation and congestion of the mucous membrane.

When using Catarrhozone you don't have to wait all day for relief; with every breath taken through the Inhaler, head and throat are cleared and cleansed almost at once. Droppings in the throat, headache, coughing, and spitting, and all other disagreeable symptoms of catarrh are banished by a few days' use of this superior remedy.

Catarrhal diseases of every description yield without much difficulty to Catarrhozone. When used for Bronchitis, Lung Trouble and Colds, it affords not only instant relief, but cures in a very short time.

Croup, Whooping Cough and Winter Ills simply won't live any time if Catarrhozone is inhaled four times daily, and as a safeguard for Pneumonia and Consumption it has no equal.

Better get a Catarrhozone Inhaler; use it occasionally, and you won't have a cough or cold in the head or catarrh. These afflictions can be prevented by Catarrhozone as well as cured. Complete outfit, full two months' treatment, costs $1. Small size, 25 cents. Sold by all druggists and N. C. Polson & Co., Kingston, Ont.

Piano Tuning

Heintzman & Co.'s piano tuner, R. S. Shaw, is here from Toronto. Leave orders at Ormond & Walsh's drug store 'Phone 146.

St. Paul's Church

The annual congregational meeting of St. Paul's Presbyterian church took place last night in the lecture room of the church. A report of the proceedings will appear tomorrow.

Took Ill at Camp

Yesterday Mr. Simon Clancy, son of Mr. P. Clancy, was brought to town from Mr. A. McDonald's camp, near Buckhorn, where he had been employed taking out logs. Mr. Clancy was taken suddenly ill on Tuesday. He is now at his father's residence, Ashburnham ward.

Who Was Gold Bricked?

The Times is in receipt of the following—"Mr. James Williamson, of Stewart street wanted his piano tuned to a lower pitch. He left his order at a certain store, with the key of his house, his family being away on a visit. Given the key and the house number, the piano tuner started out. The key would not unlock the door but the tuner succeeded in getting in a window and tuned the instrument according to instructions. It was the wrong house. The parties owning the piano want it put back to high pitch. Mr. Williamson paid for his tuning in advance but the piano is still untuned. The tuner says he was given the wrong key. Puzzle—Who was gold-bricked?"

—The Picton hockey team were entertained last night after the match by the officers of the 57th Regiment.

Day and Night Classes.

It is desirable that all who purpose entering the school should do so on the above date.

WM PRINGLE,
Opposite Post Office Principal

Golden Wedding Anniversary

Mrs. Frank Mason left yesterday for Bowmanville to be present at the 50th anniversary of the marriage of her parents Mr. and Mrs. Thomas Sherin, of that town which takes place today. The family of four daughters and one son were all present except one daughter who resides in the United States. Mr. and Mrs. Sherin's many Peterborough friends will wish them many years yet of health and happiness.

Not Generally Known

It is not generally known that there is a great tendency to the prevalence of hydrophobia among dogs at times like the present when there is a scarcity of water, the creeks, pools and springs being covered with snow. This is a fact, however, upon which all scientific men are agreed. Dogs are more liable to become mad in winter than in summer, and water should be placed where they may have ready access to it.

Plumbing Trade Busy

The plumbing trade is kept very busy at the present time, thawing out frozen pipes and repairing those that have succumbed to internal pressure. Many urgent calls are received daily, but they were not quite so numerous as in the last cold snap, which discovered most of the weak spots in the plumbing of residences. A large number of citizens are having their pipes boxed in to prevent future trouble.

An Uncalled For Remark

The Times has received a letter from a well known citizen which says: "The remark made at the Mayor's banquet on Monday evening, and copied into one of the leading papers to the effect that if the town was incorporated as a city Mr. J. Alex Culverwell would claim all the credit, was a mean and cowardly statement. Mr. Culverwell has been a good friend to Peterborough, and what he has done to advance the town and promote its growth as a manufacturing centre was done without costing us a cent. It comes with bad grace, especially on an occasion of this kind, to be obliged to hear a remark of this kind made, when Mr Culverwell was not present to defend himself.

INCREASING THE SALARIES

To the Editor of The Times:

Sir,—I notice at the Mayor's banquet Mr. Dumble was in favor of increasing the salaries of the town officials. Does our worthy Police Magistrate know that Peterborough is today paying the highest salaries to its officials of any town in Canada? I was told this by a town clerk of a neighboring town, who showed me all the figures. We are away ahead of some of the cities in this respect. Surely Mr. Dumble does not want to make himself disliked by the ratepayers? He would be doing the ratepayers a service if he would explain what there is for some of the "officials to do during a large portion of the year. For instance, what are the duties of the town engineer, say from December 1st to April 1st each year? What are the duties of the Commissioner during these months? Does Mr. Dumble know that nearly 20 per cent. of the entire outlay on streets and bridges goes in the salaries of these two officials?

Let us be sensible and try and adhere to some extent at least to business principles.

VERITAS.

February Canadian Magazine

The readers of the Canadian Magazine will find much excellent matter in the February number. Perhaps Professor Goldwin Smith's article, "Can Canada make her own Treaties?" may not exactly please them, but his views are presented frankly and in an attractive form. F. C. Wade's "Comments on the Alaskan Boundary" is also attractive, and probably more pleasing to Canadians, though Lord Alverstone may not find it quite to his liking. The article on Sydney, Australia, with its excellent illustrations, is something out of the ordinary. W. J. Loudon's brief contribution Concerning the National Observatory, with its illustrations, is also somewhat unusual. The short sketch of Mr. Hearst, a man much spoken of as the successor to Mr. Bryan in the Democratic leadership in the United States and an avowed annexationist, is timely. S. T. Wood's epitome of Herbert Spencer's contribution to the world of ideas is cleverly done. The second instalment of A. G. Bradley's "Fight for North America," is illustrated with portraits of Governors Shirley and Dinwiddie and autographs of some of the early French Governors, a facsimile of the plates which were nailed by Celoron on the trees from Lake Erie to the Mississippi, and some drawings of the French uniforms of the period. The short articles, the stories and the departments are all well done. Especially interesting is Mr. Ewan's comprehensive monthly summary of "Current Events Abroad" and Mr. Cooper's comments on "People and Affairs."

—The children in a local kindergarten class were recently interrogated by their indulgent teacher as to their aspirations. One child said she would like to be a dressmaker. Others made assertions which gave an idea of the bent of their young minds. Finally a bright little fellow, who worships his teacher, spoke up "Miss S.," said the child, "I want to tell you my wish, I want to be a married man." And the longing look which Cupid cast on the blushing teacher was appreciated by the quick-witted children in the class.

DR. FED HIMSELF

Found the Food That Saved His Life

A good old family physician with a life time experience in saving people finally found himself sick unto death.

Medicines failed and—but let him tell his own story. "For the first time in my life of 61 years I am impelled to publicly testify to the value of a largely advertised article and I certainly would not pen these lines except that, what seems to me a direct act of Providence saved my life, and I am impressed that it is a bounden duty to make it known.

"For 3 years I kept failing with stomach and liver disorders until I was reduced 70 lbs. from my normal weight. When I got too low to treat myself, 2 of my associate physicians advised me to 'put my house in order' for I would be quickly going the way of all mankind. Just about that time I was put on a diet of Grape-Nuts predigested food. Curiously enough it quickly began to build me up, appetite returned and in 16 days I gained 6 lbs. That started my return to health and really saved my life.

"A physician is naturally prejudiced against writing such a letter but in this case I am willing to declare it from the housetops that the multiplied thousands who are now suffering as I did can find relief and health as easily and promptly by Grape-Nuts. If they only knew what to do. Sincerely and Fraternally yours." Name of this prominent physician furnished by Postum Co., Battle Creek Mich.

Look in each package for a copy of the famous little book, "The Road to Wellville."

THE FIRST STEAMER

The Steamer "Woodman" First of the Sagging Season

The Lindsay Post, in referring to the life of the late Capt. George Crandell says;

"In the fall of 1850, having completed the plans and ordered the necessary machinery and fittings, this energetic young pioneer in inland navigation commenced at Port Perry the construction of the Str. Woodman—a side-wheeler, about 100 feet in length. Everything turned out well, and on May 24th, 1851, the new boat started to make regular trips between Port Perry and Lindsay, the event being hailed with great joy by the residents of both villages and the settlers along the shores of the lake and river. The horse boat went out of business the day following the first trip of the puffing monster that devoured cordwood, and travelled at the rate of eight miles an hour. A couple of years later some of the boiler flues gave way, and as a sample of the difficulties under which the pioneers labored it may be pointed out that new flues could not be procured in Toronto, and Mr. Charles Britton had to send to a New York firm for them.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mrs. J. R. Stratton will receive this afternoon from four to six.

—Miss G. Frazer, of Barrie, is visiting Mrs. R. A. Dutton, town.

—Rev. Mr. Armitage, who has been spending a few days in town, left yesterday for Picton.

—His Worship, Mayor Boulter, of Picton, is the guest of Lieut.-Colonel Miller.

—Mr. Ralph Carton, who has been seriously ill, we are pleased to learn, is recovering.

—Mrs. W. J. Morrow has kindly consented to act as accompanist for the Lady Minto Hospital concert next Tuesday evening in the Market Hall, and will close her studio that evening to allow her pupils the privilege of hearing these great artists.

—The many friends in Peterborough and surrounding district will regret to learn that Mr. W. J. Pearson, the well known horse buyer of Montreal, is quite ill at Pontypool, where he had gone to purchase horses. Under the skillful care of Dr. Lapp, we are pleased to say he is recovering.

—Miss Josephine Morrow, daughter of Mr. Bernard Morrow, County Registrar, has completed with honors a three years' course in the Phelps Sanitarium, Battle Creek, Michigan. Miss Morrow is a member of the second senior class, the graduating exercises of which will be held on Thursday evening, February 2nd.

INCIDENTS OF THE DAY

Away Paragraphs Picked Up By Reporters on Their Rounds

—Hear Frank Blatchford of Toronto, the favorite violinist.

—The Cavanagh House is being repainted and greatly improved.

—Yesterday was a very cold day, especially for the Tories.

—It is cheaper to clean off the snow than leave it to the Magistrate.

—The stages in country districts have difficulty in making their way on account of the snow drifts.

—Hear Mr. Firth, the baritone singer and composer, in his own songs, at the concert Tuesday, February 2nd.

—The coal men are growing more and more independent every day. They have no complaint to make about the weather

—The large amount of snow in the back country is said to be causing considerable trouble in lumbering operations.

—The trains on the Grand Trunk were late yesterday, the noon train from Toronto not reaching here until after two o'clock.

—Don't miss the treat of the season—S Homer Eamon, entertainer of Boston, on his costume characters.

—The Picton hockey team and its supporters were given a drive yesterday afternoon to the principal sights of interest about town.

—Ald. Rush says that the Town could have sold the Hilliard property which was recently purchased, for an advance of $2,000.

—It is proposed to erect a building for the Y.W.C.A. This is a work that should and would receive the hearty support of the public.

—Warden Peck will entertain the members of the County Council and the County officers to dinner in Mr. Harry Long's Palm Parlors this evening at six o'clock.

—Plan opens at Edmison's drug store to-morrow, at 10 a.m., reserved seat tickets to be had at Edmison's drug store Ormond & Walsh's, and Sanderson's Lady Minto Hospital concert.

CENTRAL CHARITY BOARD

A Number of Accounts Ordered to be Paid—Other Business

The Central Charity Board met on Tuesday evening, when the following were present;—Messrs. R. Innis, chairman; J. J. McBain, W. Yelland, W. Fowler, J. Hatton, H. Rush, and F. W. Miller.

The minutes of the previous meeting were read and confirmed.

A letter was read from T. H. Adams, vestry clerk of St. Luke's church, stating that Rev. E. A. Langfeldt had been appointed to represent the church on the Board.

The following statement of orders given was read;—

	During 1903	During Jan., 1904
Groceries	$721 22	$ 77 60
Wood	433 00	113 75
Sundries	126 90	3 53
Total	$1280 60	$195 65

The following accounts were presented;—

D. Belleghem	14 00
P. Connal	3 00
Greene Bros	3 00
A. Allison	6 00
C.P.R. Co	6 75
M. H. Halpin	4 00
R. C. Braund	3 00
Miss Grundy	3 00
Ormond & Walsh	1 50
J. J. Howden	1 50
W. H. Hamilton	3 00
White & Gillespie	6 00
Geo. Gahoon	3 00
A. Comstock	6 00
A. J. Warne	10 00
Mrs. M. J. Dunford	6 00

It was moved and seconded that all accounts presented be paid.—Carried.

The Board adjourned until Monday evening February 8th, at 7.45 o'clock.

Old Newspapers for Sale

Old newspapers, suitable for putting under carpets or for wrapping purposes for sale, Times Bookstore.

How long will it take the man to fill the sack if he does not stop the leak? To attempt to nourish the body when the stomach is diseased is like trying to fill the sack with the hole in it. When the stomach and other digestive and nutritive organs are diseased, there is a constant loss of nutrition. Enough is eaten but the body loses flesh,—plain proof that the food eaten is largely wasted because it is not digested and assimilated.

Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It stops the leaks by which nutrition is lost, and enables the building up of the body by the nutrition derived from food. The gain in weight proves the cure.

"Three years ago I was taken sick with what the doctor called nervousness and indigestion," writes Mrs. Warren E. Parker, of Orange Street, Nantucket, Mass. "He gave me medicine for the trouble, but I could not eat even a little toast or oatmeal without suffering severely. In a few months I began to have distressing pains right in the pit of my stomach. I called the doctor again and he said I had catarrh of stomach; gave me medicine but it did not do any good. I lost 28 pounds in three months. I then commenced taking Dr. Pierce's medicines and soon began to feel better. I have taken six bottles of 'Golden Medical Discovery,' two of 'Favorite Prescription' and six vials of Dr. Pierce's Pellets. I have gained ten pounds. Can eat everything."

Dr. Pierce's Pleasant Pellets cure constipation.

A HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable oppportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for 6er. per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain for others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

A DYNAMITE PLOT TO WRECK THE PALACE

Madrid Anarchists Plan Wholesale Murder--Men with Infernal Machine

London, Thursday, Jan. 28— The madrid correspondent of the Daily Mail says that during a reception at the palace last Saturday in honor of King Alfonso's saint's day a dynamite plot was nearly successful. The police noticed two suspicious looking men, seated on a bench near one of the entrances. The men, realizing that they were watched left the bench, leaving a parcel beneath it. This parcel proved to be a soldered tin box, with a smouldering wick attached. It was examined at a laboratory, and found to contain a quantity of dynamite, gunpowder, broken glass and bullets. It it had exploded there would have been many victims the palace being crowded. There is no clue to the two men, but they are believed to be Anarchists.

COREAN DISTURBANCES.

Paris, Jan. 28 —A despatch from Seoul to the Paris edition of the New York Herald says that the native disturbances at Pyengyang are increasing. The Tonghaks are openly threatening foreigners. Mr. Allen, the American Minister, confirms the statements that the position is serious, but does not expect immediate danger.

PARLIAMENT MUST DECIDE.

London, Jan. 28— The Colonial Secretary informed a correspondent that he would not sanction the Transvaal ordinance with regard to Chinese labor till the matter had been discussed by Parliament.

Wellington, N.Z., January 29— Replying to Premier Seddon's representations on the subject of the proposal to admit Chinese laborers into the Transvaal, Colonial Secretary Lyttelton has pointed out that the British Government could not refuse to accede to the wishes of one part of the Empire, on a matter which it considered of paramount importance, in deference to the wishes of another part indirectly interested.

Berlin, January 29— Positive information has reached German official Colonial quarters to the effect that an uprising of Kaffirs is imminent in British South Africa. The Germans state that the outbreak is so certain that they fail to understand the joy of the English press over the Herero rebellion in German South West Africa. It is asserted that the British fired the martial ardour of the blacks by arming them against the Boers during the recent war.

Berlin Jan. 28 —A huge landslide at Karrowitz, in Russian Silesia, yesterday morning entombed thirty men, who were working on a railway.

The accident came without warning, while the men were engaged in repairing the roadbed.

They were buried beneath hundreds of tons of earth.

Relief forces were hurried to the scene and the work of extricating the bodies was begun.

It is known that thirty men were working at the spot of the accident, and it is not believed possible that any of them escaped.

New York, Jan. 28— Further trial of prisoners connected with the Kisheneff massacre is about to be resumed. Only the first comprising those directly the first, comprising those directly charged with murder have been tried. The number still awaiting a hearing is over 30.

A formal appeal against the verdict already delivered has been lodged with the Minister of Justice, but the Jews doubt if the appeal will be successful.

London, Thursday, January 28. —The Chronicle publishes a letter from Lord Wolseley in reply to Rev. Father McCarthy re the Riel Rebellion. Lord Wolseley says that all ranks were sorry not to be attacked at any place during the long journey from Lake Superior to Red River.

POWERS ASCBRIBED TO NEW ELEMENT

RADIUM AS MEANS TO DETERMINE THE SEX OF CHILDREN

Russian Scientist Say Powder Magazines Could be Exploded by Rays at Long Distances

St. Petersburg, Jan. 29 —Prof. Prince Tarkhanov, the well known scientist, lecturing recently before the Military Association, made some interesting uses of radium. He presented to his audience two cancer patients who had been cured of malignant growths on the face by the use of radium, and expressed the opinion that the problem of determining the sex of children which Prof. Schenck had failed to solve, will shortly be settled by the aid of radium.

The Prince added that he had prevented the development of hydrophobia in dogs inoculated with rabies virus, by using radium. When large quantities of radium were available, the Prince contended the whole system of modern warfare would be revolutionized, as powder magazines, whether in forts or in the holds of vessels, would be at the mercy of radium rays, which could explode them at long distances.

EMIGRATION OF ENGLISH ARTISANS

DEPUTY MINISTER SMATR ISSUES AN OFFICIAL STATEMENT

NO RESTRICTION LIKELY

Canada Needs All the Population She Can Obtain, He Says

London, January 29— Deputy Minister Smart makes a statement today with an important bearing on the suggested Canadian Government intervention to check the American labor bosses' attempt to hinder British immigration to Canada.

MR. SMART'S STATEMENT.

Mr. Smart says; "We are the best friend of the Canadian artisan, because we bring him customers for his wares. We have room for ten millions more purchases of manufactured goods. The Government agents do not seek artisans. No capitation bonus is paid upon each. They must go out on their own accord and take their chances.

NO EXCLUSION LAW.

"I do not think Canada will ever legally restrict immigration of any sort. Our country is too big to warrant our adoption of the new Australian policy, which almost excluded six British hatters."

ST. PAUL'S CHURCH ANNUAL MEETING.

SOME VERY ENCOURAGING REPORTS PRESENTED

Rev. A. J. Wilson to Remain Another Year—An Outline of the Business Before the Meeting

The annual congregational meeting of St. Paul's Presbyterian church was held on Wednesday evening in the school room. There was a large attendance, and the pastor, Rev. Dr. Torrance, occupied the chair. The principal business of the evening was the presentation and discussion of various reports. The meeting opened with devotional services.

THE MISSION'S REPORT.

The report of the Mission church in No. 1 ward was presented, and showed that the Mission was opened on the 1st of February last, and services had since been held morning and evening with Sunday school at 3 p.m. These had been attended by from 50 to 75 in the morning, and from 50 to 125 in the evening. The Sabbath school attendance was about 60 exclusive of workers and teachers, and that of the weekly prayer meeting from 40 to 60. In open collections there was contributed $114.17, an average of $2.55 per Sabbath. The Ladies Aid had added to the appearance and comfort of the place by improvements to the platform. The committee are very much encouraged by the results of the past year.

REPORT OF SESSION.

The report of the session was read by Rev. Dr. Torrance. In some departments of church work gratifying progress was made. There were seventy-two additions to the membership, thirty-two by certificate, and forty by profession of faith. The losses by death were ten, and by certificate thirty-four. The number now on the roll is 770, which is the largest number in the history of the congregation. The number of families remains about the same, but in the last annual report there were the names of seventy-seven persons not connected with families. There was a material increase in the ordinary revenue of the church, and there was prospect of a further increase of about $400 for the present year, which will be required to meet increased expenditure. Rev. Mr. Wilson, the assistant pastor, had discharged his duties with efficiency; his Bible class was a credit to the church, and he had done good work among the young people. Mr. Widguet had resigned as organist during the year, and the fact that Mr. Crane now occupied the position was viewed with great satisfaction. Further support was urged on behalf of Missions.

THE MANAGER'S REPORT.

The report of the Board of Managers, presented by Mr. Macdonald, showed that ordinary collection during the year had amounted to $5,562.79, and that special collections were $361.76. The deficit for 1902 of $597.91 had been increased by $509.31, making a total of $1,107.22. There had been expended in salaries some $3,535, the mission expenditures were $1,735.00, including balance of building account and furnace, less $1,000 raised by mortgage, the balance being paid out of current revenue.

The deficit during the year had been the result of expenditure on the Mission, and in the discussion that followed the report appreciation was expressed of the careful management evident. The deficit some four years ago had been $1,475. It was estimated that the expenditure during next year would amount to $6,950. There had last year been a large increase in revenue of the number contributing by revenue. Quite a number of old contributors had increased their offerings. The increase in revenue for 1903 amounted to $371, which include anniversary collection of $371.

The reports were adopted.

THANKS TO MR. CRANE.

On motion of Mr. J. Coyle Brown, seconded by Mr. T. A. S. Hay, a vote of thanks was tendered Mr. J. Crane, the organist, and the choir for the very valuable services rendered during the year. A vote of thanks was also tendered the choir of the Mission.

Mr. J. Crane responded in appreciation of the cordial expression in regard to the choir and himself, and stated he would convey the favor to the members at their next practice.

ASSISTANT PASTOR.

Moved by Mr. R. E. Wood, seconded by Mr. Thomas Tucker, that St. Paul's congregation wish to express their appreciation of the manner in which Mr. Wilson had discharged his duties as assistant minister, and request that the office bearers re-engage him for another period upon such terms as may be agreed upon.

The motion was received with hearty approval and was duly acknowledged by Mr. Wilson, amid applause.

MISSIONARY CONTRIBUTIONS.

Mr. Wm. Madill presented the report in regard to the Missionary contributions. The total receipts for the year had been $1,766.60, which amount included $750 for the support of three missionaries in the North-West. This was the third year this generous contribution had been made. The actual amount contributed by envelope was $1,009.21, which with $7.39 accrued interest, made $1,016.60. To Cordova Mission $10 had been paid, and the remainder was for distribution to Home and Foreign Missions and French Evangelization. There were 190 contributions by envelope, and twenty-one without name or number. The amount was about $18 less than in 1902, and the number of envelope contributions was less by eight.

It was decided to distribute the collections as usual.

A hearty vote of thanks was tendered the Finance committee for their service.

SABBATH SCHOOL.

Mr. J. A. Fife presented the report of the Sabbath School. The year had been marked by earnest careful work and had not been altogether in vain. On the roll at the end of the year the Primary class numbered 97, Intermediate 168, senior boys, 15, Bible class, 135, teachers and officers, 34, total 434. The Home Department was at present without a teacher. Death had not visited the membership during the year. Some twenty-three members had united with the church, eleven seniors and twelve intermediates. The receipts of the year were $347.43 and there was a balance on hand of nineteen cents.

Y.P.S.C.E.

The report of St. Paul's Y.P.S.C.E. was that of a successful year. Several new members had been added, but a number of old ones had been lost, leaving the membership roll about the same as last year. The average attendance was also about the same. Mention was made of the fact that one of the former members, Miss A. I. Dickson, B.A., had been appointed to mission work in China. The society had undertaken the support of an Indian famine child for a year, and had also contributed $20 to Home Missions and $20 to Foreign Missions. The Financial statement showed receipts of $71.94 in which the chief item is $56.26 missionary collection. The expenditures were $65.70.

LADIES' AID.

The work of the Ladies' Aid Society had been carried on most successfully during the year. The opening of the Mission School, and the entertainment of the St. Andrew's Young Men's Guild by St. Paul's Guild were events in which help had been given. A sale of work and high tea in April for a piano for the Mission School netted $168.74. The collection for the charity fund amounted to $40. From this fund assistance is given those of the congregation who are in need. The receipts of the year were $605.77 inclusive of a balance of $352.57, the expenditures were $253.68, leaving a balance of $352.09.

WOMEN'S AUXILIARY.

The annual report of St. Paul's Auxiliary of the Women's Foreign Missionary Society was presented. It showed a total membership of 112, and of these 56 are members of the General Society and seventeen are life members. A successful Thanksgiving service was held, and the offering amounted to $230.75. The Stewart Settlement Sabbath School contributed, as usual, four dollars. A box containing clothing for a boy and girl was sent to the Lake of the Woods Boarding School, while also quilts and other useful articles were sent, amounting to $80. Feeling reference was made to the death of a member, Mrs. Henderson.

YOUNG MEN'S GUILD

The second annual report of St. Paul's Young Men's Guild stated that the membership had increased and there were encouraging prospects for the future. There were about thirty-five active members, and during the year a number of charter members had been lost by their removal from town. The guildsmen had assisted in ushering, taking the collection and other work of the church. The assistance of the Ladies' Aid in entertaining the St. Andrew's Guild was much appreciated, also the kindness of Mr. Robert Innes and Mr. Wm. Davidson in connection with the first annual picnic, and Messrs. H. R. H. Kenner, R. M. Dennistoun and Jas. A. Fife for papers read before the Guild at various times. The meetings are held on the first Tuesday of each month and an invitation to all young men in the Church to attend. The year's receipts were $67.19, and there was a balance of $8.09 in the bank.

The meeting closed with the doxology and benediction.

MANITOBA TO HAVE A NEW LABOR LAW

Winnipeg, January 28.—Attorney-General Campbell, at last night's session of the Legislature, outlined his proposed changes in the liquor law of Manitoba. The main planks of the Government platform are:—

1. A good license law properly enforced.
2. Total abolition of all saloon licenses.
3. Abolition of wholesale licenses in rural municipalities.
4. Stringent legislation dealing with interdicts.
5. Improvement of condition of bona-fide hotel.
6. Elimination of undesirables as license holders.

There will be no change in hours.

EVERYBODY READS THE TIMES.

THE TRENT VALLEY CANAL

STRONG LETTER FROM MR. J. A. CULVERWELL

Who Hit the Nail on the Head in Regard to the Action to Be Taken by Those Interested

To the Editor of The Times:

Sir,—The Trent Valley Canal, "made in Canada," or to be more correct, being made in Canada, will next summer have a stretch of 180 miles opened—out of a total length of waterway of less than 200 miles. It is Nature's short-route grain-carrying waterway, and will be a link in what is destined to be a great international transportation highway between the Canadian North-West, —"Britain's granary,"— and Europe, and the accompanying map, (made by the writer) which includes voluminous information, should prove to any fair-minded man its utility and the necessity of its completion—as also its great superiority over the Welland and Erie Canal routes.

The Trent Valley Canal is not a canal in the true sense of the term, as in fact only some 18 miles will be canal. It is composed of a succession of lakes and rivers joined together by short canals, and in most places merely by a lock itself, which altogether will connect Georgian Bay waters with those of Lake Ontario either at Port Hope or Trenton, and save the long detour around Lakes Huron and Erie.

This great waterway will also open up an inland navigation having a shore line of over 1,000 miles, and many of the lakes and rivers running traversely to the line of canal, and having some six million acres of land within ten miles of its wharves—rich in agriculture in the southern and middle portions and teeming with manufacturing, hardwoods, and minerals in the north-eastern district.

Even in its unfinished state it has been the cause of developing great industries in the district—notably so at Peterborough, where three of the largest factories of their kind in Canada have recently been erected, and also at Lindsay where great manufacturing developments are taking place. In fact, a member of the Rothschild banking house in England, when visiting this district some years ago, stated that it was destined to be one of the great manufacturing districts of America, on account of its waterpowers and Canals.

The transhipment question has been proven to be mainly a bug-bear in the public mind and should not be allowed to prejudice the construction of a barge waterway. Major T. M. Symons, of New York State, who has no doubt given more attention to canal improvement than any one in America, has shown in his report regarding the new Erie Canal construction, that this is so. The enlarged Erie Canal, with the additional expenditure of over one hundred million dollars,—which money was recently voted by a large majority of the people of New York State, will be a large waterway which, will, of course necessitate transhipment at Buffalo and again at New York.

It is a well known fact that the smaller bottoms running on the Upper Lakes have a draft of 14 feet and carrying sixty thousand bushels, are rapidly being replaced by magnificent bottoms, with a draft of eighteen feet and over, and carrying one hundred thousand bushels and upwards for the reason that the same officers and crew that will man the small steamer will also man the larger bottom; and in fact the total expense of operation is a great deal less in proportion.

Some forty million dollars have been expended in enlarging the Welland and St. Lawrence Canals system from a depth of nine feet to fourteen feet and giving locks 270 feet long by 45 feet wide in place of 200 feet in length—but this step forward in deepening its channel was too late to properly profit by it. In fact by the time the whole system of enlargement was completed, it was years behind time to suit the purposes it was enlarged for.

To give an adequate navigation for this system at least a nineteen foot channel would be required as well as the locks being enlarged,—and this would make the cost simply prohibitive for the present at least.

Is it not about time that Nature's short route, i.e.,—Trent Valley Canal—a barge route—were given an opportunity— particularly when so small a sum was required to complete the construction, as five million dollars, or rather less, and which will besides open up such an immense extent of inland navigation.

It will surprise Canadians to know that the great additions, expenditure of one hundred million dollars will only give the Erie Canal a thousand-ton-barge canal, whereas with only an additional expenditure of a sum within five million dollars the Trent Valley canal will have an eight-hundred-ton barge capacity.

The Trent locks are unusually large its minimum locks being 134 feet by 33 feet in width, with a depth of six feet on the sills, but all the works at present constructed are arranged for an eight foot draft, with a slight additional expenditure for the raising of the dams by additional layers of stop-logs between the concrete piers and raising of lock gates, and the clearing out of a few shoals,—as reported by the Canal Engineering Department. The great hydraulic double lift lock at Peterborough now completed will give a draft of eight feet, as also the hydraulic lift lock near Lake Simcoe, which is now nearly completed.

Speaking of these hydraulic lift locks it is well to state that there will be altogether five on the Trent Canal, and the time saved by these lift locks will be about six hours over the ordinary system of locking as exists in other Canals on this continent.

To realize the great capacity of the Trent Canal—fancy seeing two great barges—each loaded with twenty-five thousand bushels of wheat—being raised and lowered simultaneously sixty-five feet, as will be done at Peterborough with the double hydraulic lift lock, which, by the way, is the greatest in the world. There are others in England, Belgium and Germany, but none as great as the Peterborough lock.

It will surprise the public to know that the Trent Valley Canal route is 350 miles shorter than the Welland route between the Sault and Montreal, and will save one day's time or two days' on the round trip. The Trent route is also 130 miles shorter between the Sault and Liverpool than the Erie route, being nearly 1500 miles on the round trip.

The total cost of the Trent Valley Canal, as per Government estimates, will be some eight million dollars of which about four millions is already expended on the inside—the larger section. It is figured that the other four millions will open up the Lake Ontario and Georgian Bay outlets,—if judiciously expended—and thus complete this national and colonization waterway.

The Imperial Government in 1832, recognizing its value voted part of the money requisite and started the work, but the funds were diverted for suppressing the McKenzie rebellion. A Dominion Government appointed Commission in 1897, after taking evidence at ports on the Great Lakes and Seaboard, recommended its completion. A ten million dollar mill has been erected at Peterborough upon the assurance of the completion of the canal. Chicago, Buffalo, and Boston papers have recently come out, and boldly and stated that it will damage the American Lake and rail shipping business, and yet pleased why this great work has been so delayed. The answer has been given "Because it has been a political football." Another answer has been given, "Because continual attempts are being made to make it a milch cow by professed friends of the Canal." In fact, like the proverbial dog, it has gotten a bad name, but this, however, does not disprove its utility.

When will the Trent Valley Canal have again a real advocate in Parliament. Certainly no member in the district can claim that distinction at present. Election promises are given, but little action taken in pressing the claims of this great waterway before Parliament.

Sir Thomas Shaughnessy, of the Canadian Pacific Railway, stated the other day, "The question of transportation east of Fort William cannot be discussed without taking into consideration our waters. Slow and cumbersome as it is, yet it is the cheapest." Sir William Van Horne has also stated, "The grain-hopper is full, but the spout is small."

The Trent Valley Canal should be completed without any further delays. There is no good reason at least, why the Lake Ontario outlet should not be completed—whether it be by Port Hope or Trenton.

J. ALEXR. CULVERWELL.

Peterborough, Jan. 21, 1904.

Surrenders to Police

St. Catherines, Ont., Jan. 28— After over a week's absence from the city, Thomas Blake, the missing post-office clerk, wanted in connection with alleged irregularities at the post office, returned to the city Tuesday night and surrendered himself. He was taken before the police magistrate and remanded for eight days. He is charged with having stolen a letter from a box in the post office containing the sum of $1.25.

—It is reported that in the woods of the back country, forty or fifty miles north of here, the snow is between five and six feet deep on the level, the greatest depth that has been seen in twelve or fifteen years.

A PROTEST FROM BRITISH COLUMBIA

EDWARD MUSGRAVE WRITES A LETTER TO LONDON TIMES

AMERICANS NOT FRIENDLY

Mr. Musgrave Declares Britain's Friendliness to Them Rouses Feeling in Canada

London January 29 —Edward Musgrave, of Victoria, B.C., heir presumptive to the Musgrave baronetcy, in a letter to the Times, says that the great majority of Americans feel no friendship toward the English as a people. Americans have never forgiven the past, are jealous of the present, and bitterly resent our status and progress. They have rejoiced and would again rejoice at any humiliation or difficulty affecting Canadians. Mr. Musgrave adds that the object of writing, presumptuous perhaps in the case of an obscure individual, is to point out the existence of a feeling in British Columbia, which may become a serious danger to the good relations of the Dominion with the Mother Country. The comments of the British press are a bad business, and there is disappointment that any decision would be thought better than the continuance of a danger to American friendship. And Lord Brassey's speech in Canada, the burden of which was whatever steps we take in our commercial affairs, we must be careful not to offend our friends, the Americans, says Mr. Musgrave is not calculated to allay this feeling.

MR. YERBURG'S VIEW.

Robert A. Yerburg, Conservative M.P. for Chester, speaking at Blackburn, said he regarded the colonies as prospective nations. Canada, in the course of years, might vie in splendor with the United States. It would be impossible to make arrangements satisfactory to each colony. Inaugurating any system of tariff would be inserting the thin end of the wedge to split the Empire to pieces.

LORD ONSLOW'S IDEA.

Lord Onslow, speaking at Camberwell, said that a large number of industries in the Colonies were not yet called into being. The Colonies desired and wished, if we can give something equivalent, that they shall take these products from us instead of manufacturing them themselves.

A CANADIAN IN TROUBLE.

J. Hornibrook, of Strathcona's Horse, a native of Montreal, who returned from South Africa a week ago, while temporarily insane, on Sunday, at Brighton jumped from a window. He fell 20 feet, sustaining shocking injuries and is now in Sussex County hospital, in a well-nigh hopeless condition.

Hornibrook was not a Montreal man, and not in the Strathcona Horse. He was a member of the 48th Highlanders, Toronto, and joined the First Contingent, becoming a member of C. Company.

Local Sports

The match tonight promises to be a hot struggle for the supremacy. The Peterborough II., who will be considerably strengthened by Harry Morgan on the forward line, are confident of again administering a defeat to the T.A.S., while the latter are equally confident of turning the tables and come out a winner. The T.A.S. will play the same team as appeared on the ice last Friday, but will change the position of the players which they claim will make a vast difference in the strength of the forward line. Come and see the game.

The T.A.S. will lay Lakefield here on Monday night.

The Juniors go to Port Hope tonight.

The Picton team leave for Belleville this morning. It will be a hot game in the Bay City tonight. Luck to Picton!

EVERYBODY READS THE TIMES.

BOERS FIGHTING WITH GERMANS

THE TROUBLES IN GERMAN SOUTH-WEST AFRICA

FAIL TO BELIEVE GARRISON

Germans Lose Heavily in Conflict With the Rebellious Tribes—How the Disorder Arose

Berlin, January 29— An official despatch from Windhoek German South-Africa, says the Germans have lost heavily in unsuccessful attempts to relieve Okahandja, that five settlers and their entire families have been murdered, and that the Hereros are threatening Windhoek.

The last news from Windhoek was dated Jan 11, but no news has been received from Okahandja since Jan 12.

A German patrol which engaged the natives near Hope Farm lost a reserve officer, von Boyssen, one non-commissioned officer and six men killed.

The garrison of Windhoek numbers 120 men, part of the force being horsemen, with two machine guns.

The garrison was brought up to its present strength by enrolling all the settlers and Boers.

Light has been thrown by the Frankfort Zeitung on some of the contributory causes of the Hereros' rising in German South-west Africa as the result of statements made to that paper by a traveler who has just returned from Windhoek and Okahandja. The merchants and traders allied with them are charged with purposely involving the natives in debt. According to this traveler, the traders are largely discharged soldiers, whom the merchants equip with wagons and from 16 to 20 oxen and goods valued at thousands of marks. The traders sell at first entirely on credit, not requiring any cash until they make later trips. The improvident natives buy largely and repeatedly on these easy terms, and the merchants favor the system by extending and renewing the credits of the traders, sometimes to 15,000 marks ($3,750.).

The traders finally begin collecting portions of the debts, taking cattle in payment, and at the same time selling more goods on credit. The natives are often indebted to several traders at once. The Frankfort Zeitung's informant adds that he found the merchants took an average of 70 per cent. profit on the transactions of the traders, and the latter added one hundred per cent. more on the cattle which they took in payment. The traders further rouse the anger of the natives by seizing their cattle arbitrarily, without waiting for tedious legal procedure. It is true that the authorities forbid this, but the natives usually do not complain, merely nursing their grievances, and if they do complain the police have difficulty in discovering the offending traders.

STILL HOLDING OUT.

Berlin Jan. 28— The Neueste Nachrichten, of Brunswick, has received a despatch dated from Karibib, German South-west Africa, yesterday, saying that Okahandja was then still holding out against the besieging rebel natives.

Official intelligence from Swakopmund dated yesterday, says Okahandja reports that 16 persons have been murdered in that district, and that 70 people are missing.

NEGRO LYNCHED

Guthrie, Ky., Jan. 29—Lewis Radford, a negro, was lynched here last night by a mob of from 30 to 40 negroes. Radford had been arrested on the charge of killing Priscilla Frozelle, also a negro. He confessed to having been in the woman's company and to assaulting her, but denied that he killed her. While Radford was in the jail corridor a mob rushed in and demanded the keys of his cell. The guard refused at first to deliver the keys. The mob then gave him several blows on the head and drew their pistols. The keys were then promptly delivered. The prisoner was dragged to a tree a few yards from the jail door and hanged to a limb.

WEATHER NOTES

Decidedly cold.

THE BIG STEEL RAIL COMBINE IS BROKEN

Canadian Pacific Buys at $6.50 Less Than the Price Charged by the Trust

Montreal, January 28.—The Pennsylvania Steel Company, in order to get a big contract for rails from the Canadian Pacific Railway, to-day broke the $28 rate of the American combines and accepted a contract for 40,000 tons of steel rails at $21.50. The United States Steel Company, who started the combine for a $28 rate in the States, tendered for the contract at the same price, but the quality of their rail was found to be inferior to that of the Pennsylvania. The price quoted was far below that of the English and German manufactures.

THE WARDEN'S BANQUET

A VERY SUCCESSFUL FUNCTION LAST NIGHT

About Thirty Guests were Present—A List of the Toasts

Last night about thirty gentlemen sat down to a complimentary banquet, at Long's Palm Parlors, given by Mr. E. A. Peck, the newly elected Warden of the County of Peterborough. The affair was very successful, all who were present thoroughly enjoying themselves. A unique feature of the affair was the dinner took place shortly after six o'clock, thus giving ample time for the speeches without running into the night.

The following gentlemen were present: E. A. Peck, Warden, and County Councillors Crowe, T. M. Hunter, G. W. Fitzgerald, Robert Shaw, Johnston, Buck, John Menogue, Curtis, and D. Moloney; Mayor Roger, Judge Edmison, D. Hughes-Charles, Sheriff Hall, J. Coyle Brown County School Inspector, D. Morrow, County Registrar; Dr. Caldwell, Jail Surgeon; R. P. Watt, County Clerk, George Stewart, County Treasurer; John Moloney, Clerk of the County Court; Dr. Jeffs, E. M. Elliott, Ald. Adams, T. E. Pradburn, Fred Stenson, T. Ray, J. E. Belcher, County Engineer, and representatives of the local press.

The chair was occupied by Warden Peck, who was supported by Mayor Roger on his right and Judge Edmison on his left. The vice chairs were ably filled by County Councillors Hunter and Fitzgerald.

After full justice had been done to the splendid dinner provided by Mr. Long, the toast of "The King" was proposed by the chairman, and responded to by the singing of the National Anthem.

"The Mayor and Council," by the chairman responded to by Mayor Roger and Ald. Adams.

"Our Visitors," proposed by the vice-chairman coupled with the names of Dr. Jeffs, Sheriff Hall and E. M. Elliott, Reeve of Smith, who responded in felicitous speeches.

"Our County Officers," proposed by the vice-chairman, and responded to by Messrs. J. E. Belcher, J. Coyle Brown, R. P. Watt, and George Stewart.

The part broke up shortly after nine o'clock, not, however, before shewing the high appreciation and regard in which all present entertain for the new Warden.

CANADIAN SYSTEM STOCK GAMBLING

ISSUE OF COMMON STOCK AT NOMINAL PRICES OBJECTIONABLE TO ENGLISHMEN

London, Jan. 27—Mr. T. W. Cook, addressing the Dudley Chamber of Commerce in reference to his recent visit to Canada says the issuing of common stock merely at nominal prices to bondholders in Canada was a matter which struck the ordinary Englishman as a most objectionable feature. It brought into commerce a gambling element. By this wild method prices were rushed up for common stock and depreciated simply by rumors. The announcement of a quarterly dividend was one of the factors that had a most damaging effect on the real commercial status and business of the Dominion Steel Company.

Effect of Preference.

Professor Ashley, lecturing at the Chartered Institute of Secretaries, in reply to a question by the Secretary of the Cobden Club, said it seemed, according to the best informed opinion, that the Canadian preference had increased certain of our exports to the Dominion, especially in textile goods, and had prevented the decline of other exports.

Must Make Sacrifice.

Member of Parliament Laing, speaking at a meeting at Malmesbury, said; "We will not keep our colonies for ever unless we realise that we must meet their needs. The consummation of this great idea might involve some temporary sacrifice on the part of the people of the Mother Country, but is it not worth the while to make some sacrifice to retain our great heritage and keep and consolidate our Empire."

Promise to Galway.

Charley Devlin told his Galway constituents last night that he had been promised that when the Canadian Government came to consider the matter of a terminal port for the Canadian fast Atlantic line, it would not settle the question before going fully into the claims of Galway port. Had Colonel Lynch again been allowed to sit in Parliament, he said, he would have been the first to have stood back to allow his friend to come forward again.

State-Aided Cables.

Sir Wolfe Barry, presiding to-day at a meeting of the Eastern Telegraph Company said; "The policy of establishing State aided competition against a commercial undertaking is an unsound policy. It has proved so in the case of the Pacific cable, which is not in a profitable state, and is a serious discouragement to any commercial cable enterprise. It is an anomaly that we should have to compete with British as well as foreign subsidized cables."

Black Watch May Come.

The King has sanctioned the proposed visit of the Black Watch Band to Canada during the coming Industrial Exhibition.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room
Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

PETERBOROUGH, JANUARY 29, 1904

INSPECTOR REPORTS ON COUNTY SCHOOLS

MR. J. COYLE BROWN TELLS THE COUNCIL ABOUT THE WORK OF PAST YEAR

How Some of the Sections are Situated and What They Require

The following is the report of the Inspector of County Schools, presented to the County Council on Wednesday last:

Peterborough, January 19 04.

To the Warden and members of the County Council, County of Peterborough:

Gentlemen,— In presenting my semi-annual report I may say that the past year has been one of peculiar difficulty. In many places diseases of various kinds, diphtheria, scarlet fever, smallpox, etc., have interfered with the schools, reducing the attendance, and in some cases leading to the temporary closing of the schools. Also teachers were difficult to be got at such salaries as many of the back sections were able to pay. I was forced to give temporary permission to some who did not come up to the legal requirements. Some schools were closed altogether owing to inability to secure teachers. Times are good. Avenues to employments, not requiring so much time and money in preparation are open. Hence few are preparing for the teaching profession. I understand that at present there are only fourteen young men attending the three Normal Schools of the Province, whereas three years ago there were one hundred and forty. The public schools are more and more filled with female teachers, and they are becoming harder and harder to get. Salaries must be very materially increased, or else many schools must be closed.

A new union school section was formed during the year, consisting of an eastern part of the Township of Douro, and a western part of the Township of Dummer. A site was chosen on the boundary line and a school house erected. The school will be opened in a short time. The nearest schools were more than six miles apart by the shortest road, so that many were altogether too far from school privileges. They will now be within reasonable distance.

Union school section, No. 11, Belmont, and No. 8, Marmora, has had a great backset on account of the closing of the Cordova Mines. It is to be hoped that the closing is only temporary.

School Section, No. 12, Otonabee, has changed its site. The old site was in an out-of-the-way place and the school property was often destroyed with impunity. The building was a poor one. The new site is on the Black Road.

The difficulty in School Section No. 11, Otonabee, may be said to be settled. A site has been granted on the Indian Land, and a building is to be erected, and ready for occupation after the midsummer vacation.

A section, union, or other, is very much needed in the northern part of the Township of Anstruther. Unfortunately much of the land there is within the limits of lumber companies, and cannot be leased to settlers. How to deal with it is a problem of which I have thought much, without being able to solve. It is a great pity that a considerable number of children should grow up in any part of the county without an opportunity to obtain even the most elementary education. One man who has been in the neighborhood fifteen years has, I understand, four or more children of school age.

The auditing of school accounts should be done before the annual meeting. It is very generally done at the annual meeting and badly done, it is to be hoped that the secretary-treasurers are honest men.

In many cases the house, out-buildings, etc., are not sufficiently looked after. The first meeting of the Trustees for the year should be held on the Wednesday following the annual meeting. A thorough examination of the house, out-buildings, furniture, maps and apparatus should be made, with a view to see that everything is in good order. The teacher should inspect often, and when anything is needed, or out of order, should report to the trustees. These duties are often overlooked.

The practice of holding public examinations has been dying out. It should be revived. Three public examinations should be held each year; one before Easter another before midsummer, and the third before Christmas. The trustees and teacher should make it a point to have these examinations held in every school. It gives the parents and friends of education in the neighborhood an opportunity of seeing how matters are going on and increases their interest in educational affairs.

The scribbling book is now a prominent part of a pupil's outfit. It is questionable, however, whether as generally used, it is an advantage or otherwise. Matter is placed in it without much care as to correctness or appearance. Leaves are torn out or mutilated. When finished it is not often fit to be seen, a mere bundle of paper rags. Used in this way it is a positive injury to the pupil. In a new scribbling book, the leaves should be numbered from the beginning to the middle. No leaf should be torn or mutilated. The date should be placed at the beginning of the entries for the day; everything placed in it should be done as neat as the pupil can. The teacher should look over it often and commend, or give directions for alterations and improvements, as the case may require. When finished the teacher's endorsement should be attached. The pupil should take it home for the inspection of parents or guardians, and then put it carefully away. Used in this way, it would greatly benefit the pupils in the work of the school and in the business of after life. It would also give to the parent a better idea of what the pupil was doing, and what progress making, that could be easily got in any other way.

It is proposed that the government should undertake to supply all the schools of the province with text-books. This, it appears to me, is undesirable on both sanitary and educational grounds, unless the pupils be given the books outright. For a pupil to use books that have been used before by one or more others, may be, and is likely to be, a means of propagating disease in a neighborhood. It is a decided advantage for a pupil to have his own books. The associations clinging around text books are often among the most pleasurable recollections of youth. When one comes across a book studied during school days he does not readily lay it down. It is often conned over again, and causes a troop of forgotten images to pass before one's mental vision that otherwise would never be recalled.

It is also proposed to introduce nature study, manual training and domestic science into the Public School course. Looking over a "Draft of Proposed Changes" it is almost appalling to see the large space these objects occupy, compared to that given to what must ever be the backbone of an education for the real majority. Reading, spelling, writing, arithmetic and geography, all the main subjects to be taught in the public schools. Most of the others should be learned not taught.

In every school there should be a Cabinet for holding such specimens of natural history, of manufacture, and of art as can be obtained in small space. The pupils should be made acquainted with the names of the specimens, and with any interesting particulars regarding them. A portion of time each week should be devoted to this purpose. It would give an opportunity for a start in original investigation according to the pupil's bent, and might lead to important results in the case of not a few.

In conclusion allow me to hope that the year on which we have entered may be a happy and prosperous one, and that each of us at the end may be able to look back on a year well spent.

I have the honor to be, gentlemen,
Your obedient servant,
J. COYLE BROWN,
P.S. Inspector.
Peterborough, 26th January, 1904.

Councillor Fitzgerald considered the report an excellent one, and he moved, seconded by Councillor Curtis, that it be received and referred to the Committee on Schools.—Carried.

The important question concerning the introduction of manual training and domestic science into the schools was discussed with the inspector, who gave a very interesting elucidation of the subjects. He considered, however, that some of the recommendations made by the Ontario Educational Association were absurd as applied to rural schools.

Mr. Hunter moved, seconded by Mr Curtis, that Mr. Borwn attend with the Committee on Schools, to assist in drafting a communication to the Minister of Education, with reference to the Ontario Educational Association.—Carried.

FREEDOM IS THE BASIS OF EMPIRE

SECTETARY LYTTELTON'S POLICY IS NOT TO INTEFERE WITH COLONIAL DESIRES

Sentence of Whitaker Wright is a Triumph for Purity says Morning Post

London, Jan. 27.—Colonial Secretary Lyttelton, addressing his constituents at Leamington last night, said the Government's decision in favor of a revision of the fiscal policy must lead sooner or later to a colonial preference. (Cheers.) Canada is setting a splendid example, and South Africa and New Zealand are following, and he believed Australia had the same faith.

There is only one way of dealing with the immense colonial problem, and unless Imperial interests are vitally concerned, our principle should be never to interfere with the desires and wishes of the self-governing States of the Empire. Even with regard to the Crown colonies Britain must remember that each desired to have its own life, its own particular thought and policy and method of expression. Provided they kept that always in view, the Empire would possess the surest foundations.

Support the Preference.

A final plebiscite of members of the London Chamber of Commerce resulted as follows; For a tax on raw materials, 21; against, 319; for taxing manufactured articles, 116; against, 29; for preferential trade with the colonies and foreign countries on a reciprocal basis, 166; against, 40. The chamber will move at the next annual meeting of the Chambers of Commerce a resolution in support of retaliation, provided that friendly negotiations fail.

Planted the Seed.

The Rt. Hon. Andrew G. Murray, Secretary for Scotland, speaking at a banquet in his honor at Rothesay last night, said Premier Balfour would be remembered in history as having, through the medium of the Defence Committee, viewed the Empire as a whole. The invitation to Sir Frederick Borden to sit upon that committee was a momentous constitutional departure, a small seed which would grow to be an exceedingly great tree.

Is Really Protection.

Mr. James Bryce, M.P., speaking at Enfield yesterday, said that although Premier Balfour's ship was turned towards the port of retaliation, it was drifting in the direction of protection. Mr. Chamberlain had refused to say if colonial manufactured goods were to be taxed like foreign goods.

Natal Man Resigned.

The Agent-General of Natal has resigned his connection with the Tariff Commission, owing to his having reached the age of superannuation.

Give us Britishers.

The Canadian Deputy Minister of the Interior, Mr. Smart, told the reporters who interviewed him last night: "Give us more British settlers and you need have no fear for British connection."

Triumph for Purity.

The Morning Post, referring to the Whitaker Wright case, says the verdict and sentence form a triumph for financial purity. His long immunity from punishment had hampered the trade of the city.

Change of Life

A TIME OF INTEREST AND GREAT IMPORTANCE TO ALL WOMEN.

Wrecked health is produced by neglect during this trying period, and small wonder that women look forward with dread to its coming, for if not properly passed, it is but the beginning of an endless chain of troubles.

As soon as the unmistakable signs known to all women make their first appearance, Ferrozone should be used regularly, and if persistently taken will be a guarantee of happy, healthy old age.

Nothing can bring more pleasure than to know that the days of sickness and suffering are over. This can best be accomplished by building up the system with Ferrozone, which produces blood, muscle, tissue, and strength to resist and ward off disease.

Ferrozone increases the appetite strengthens and improves nerve tone and digestive processes, thereby strengthening and invigorating the whole system. It gives tone to the heart, regulates its action, removes distressing palpitations, and it lays the sound foundation of perfect health.

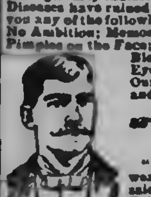
Ferrozone is a sensible and efficient tonic; it brings back strength very quickly, and few people are so strong and healthy, that they would not be benefitted by using it.

Be advised and try Ferrozone. It is very pleasant to take, one tablet after each meal. All reliable druggists sell it for 50c. per box, or three boxes for $1.25. By mail from N. C. Polson & Co., Kingston, Ont.

Ayer's Cherry Pectoral
for colds, coughs, bronchitis, consumption. We have been saying this for 60 years. And so have the doctors. J. C. Ayer Co., Lowell, Mass.

Weak, Nervous, Diseased Men.

Thousands of *Young and Middle Aged Men* are annually swept to a premature grave through early indiscretions and later excesses. Self abuse and Constitutional Blood Diseases have ruined and wrecked the life of many a promising young man. Have you any of the following symptoms: Nervous and Despondent; Tired in Morning; No Ambition; Memory Poor; Easily Fatigued; Excitable and Irritable; Eyes Blur; Pimples on the Face; Dreams and Drains at Night; Restless; Haggard Looking; Blotches; Sore Throat; Hair Loose; Pains in the Body; Sunken Eyes; Lifeless; Distrustful and Lack of Energy and Strength. Our *New Method Treatment* will build you up mentally, physically and sexually. Cures Guaranteed or no Pay.



25 YEARS IN DETROIT. BANK SECURITY.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough — necessity knows no law — the stock can't be moved or kept for another season.

IS THERE CERTAINTY IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.
2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.
3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.
4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.
5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.
6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.
7th—By being able to case a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

The Girls of France.

Mr. H. B. Marriott Watson, the novelist, complains of the decadence of the "American girl," owing to idleness and lack of aim. Mrs. Philip Gilbert Hamerton brings the same indictment against the girls of France. Forty years ago, she writes, the French girl was modest, retiring, simple in dress, diffident in talk, and respectfully obedient to her parents—either from natural bent and the powerful influence of her surroundings, or through the discipline of education and the weight of public opinion in her own country. That some French girls were by nature coquettish, fond of finery and show, impatient of restraint and control, cannot be doubted, but when these tendencies did exist they had to be carefully hidden behind the outward appearance of a willing and contented self-effacement in all circumstances by every girl who wished to be thought "bien elevee." For the slightest deviation from this strict rule was sufficient to mark her as "mal elevee," and to banish her from the intimacy of all friends who wished to be "comme il faut." To-day, Mrs. Hamerton says, the modern French girl would be astonished were she told not to take the leading part in conversation, not to giggle loudly, not to set her arms akimbo, and never to talk privately with a young gentleman. "She would think," adds Mrs. Hamerton, "that such recommendations were perfectly ridiculous as preventing all possible flirtations, for the art of flirtation is never at its best unless practised in private. But forty years ago, when parents deemed that marriage was not a proper subject for the thoughts of their daughters, flirtation—even as a word—was unknown in France. At that time simplicity in dress was the order of the day for young maidens, and even conferred a certain distinction, being carried as far as possible among the aristocracy. There were special light silks and inexpensive trinkets for jeunes filles, set with corals, enamels, and pearls, among which the tiniest of diamonds would never have been tolerated any more than costly laces, furs, or elaborate trimmings. At a glance it was easy to ascertain by the style of dress whether a young woman was married or not, whereas it is not by any means so easy now, the same satins, velvets, feathers, and jewels being worn alike in both cases. And it is not any easier to guess from the behavior in society, for it may happen that the conversation is taken up and carried on by the girls in their desire to shine and to attract attention—the married ladies being silenced and ignored in the midst of the excitement and amusement artfully created by free sallies, unrestrained laughter, and much attitudinizing. No doubt the conventional restrictions of forty years ago were somewhat excessive, and kept French girls till after marriage in a state of prolonged childhood; nevertheless, it remains to be seen whether the rapid change which has supervened is a real gain, for if it has remedied some evils of the old system, it has also engendered new ones, and on that account many thoughtful French parents are now seriously disquieted about the future of their daughters."

London to Have a Gay Winter.

The social outlook for the winter season in London is most promising now that the English royal family is out of mourning, and King Edward and Queen Alexandra have begun to entertain lavishly. The sisters of the King are also throwing off the mantle of sorrow. The papers comment enthusiastically on the recent brilliant dinner-party, followed by a ball, given on the Isle of Wight by Princess Beatrice, the widow of Prince Henry of Battenberg, the handsomest of all the "handsome Battenbergs." Her mourning for Prince Henry has been long and sorrowful, but she would have emerged sooner from the gloom that enshrouded her life for so many years had she been less the principal companion of Queen Victoria, and been allowed to follow the natural bent of her years, for of all the children of the late Queen there are none that seemingly love the pleasant things of this world more than her eldest son, King Edward, and her youngest daughter, Beatrice. According to the London correspondent of the New York "Herald," she is far more attractive than some of the younger members of the royal family in manner and appearance, although prone to stoutness, like Princess Christian, her eldest sister now living, and of late also the dispenser of considerable hospitality at her new, beautiful town house in Pall Mall. The most attractive of the King's sisters is Princess Louise, Duchess of Argyll, whose London residence is Kensington Palace, where her youngest sister, Princess Beatrice, has also had willed to her for life a suite of spacious apartments. Princess Louise has never acted as hostess to any great extent, and even since the accession of her husband as the sixth Duke of Argyll (who has nearly a dozen other hereditary titles in addition, and innumerable posts that increase his income), the expenditure of Princess Louise for purely social hospitality is very limited, both in London and at her Scottish seats.

Power of a Remark Overheard.

A man waiting patiently at the glove counter of a New York department store heard one young shopwoman say to another, as she handed down a box of gloves: "Maria told him downright she'd have nothing more to do with him; and she called him a poison-faced adder, he gripped her in the waltz that scandalous." This was all! Customers clamored for attention, and the confidence ceased at this point. But the force and richness of the language, the liveliness of the allusion, captivated the hearer's soul. He confessed that, for years afterwards, when he was waltzing with decorous reluctance under the compelling eye of his hostess, memories of Maria's partner would assail him, and he would find himself envying the adder the mysterious nature of his enthusiasm.—New York "Life."

Wasted Indignation.

"Let me see," said the minister, as he was making out the baptismal certificate, "this is the thirteenth, isn't it?"

"The thirteenth," exclaimed the indignant mother, "indeed, but it's only the seventh, and would have been the sixth, only two of 'em were twins."

"The thirteenth of September," said the minister, mildly, and peace was restored.—Ex.

—The Orillia News-Letter, in commenting on the press criticisms anent the Grand Trunk's lack of motive power, says This brings back to us Conductor Jack Leithbridge's old story of the cow. On one occasion the Midland train stopped short and a passenger asked the cause. "Cow on the track," replied John. Half an hour later they ran into another cow and stopped. The passenger again asked and was told the cause. "What," he exclaimed, in surprise, "have we caught up to that blamed cow again?"

A Romantic Episode.

The King's visit to Paris has been marked by a singular and picturesque incident, says the "Spectator." It appears that in 1878 a chemist named Danval was accused of poisoning his wife and that the King, then Prince of Wales anxious to watch French procedure, attended the trial, which ended in a sentence of imprisonment for life. The Prince, who had watched the evidence for five days, was certain that justice had miscarried, and visited the convict in his cell to tell him so, and enquire if any remedy were possible. None could be found, but after twenty years' imprisonment the sentence was revised and M. Danval liberated. The kindness of the Prince in his hour of despair had made a deep impression on his mind, and when the King recently visited Paris he addressed him a letter full of gratitude for the visit paid twenty-five years before. One wonders if kings know the depth of the impression both of regard and of hatred which they can almost unconsciously make.

"What's the difference between obstinacy and firmness?" "Why, obstinacy in oneself is firmness and firmness in another is obstinacy."—Chicago "Post."

Estate agent (to laborer's son)—Here, my boy, where can I find your father? Boy—In the pig stye, sir. You'll know 'im by 'is brown 'at!—"Punch."

Barber—How will you have it cut, sir? Peppery—Both short. "Both? Hair and beard?" "No; hair and conversation."

"Who originated the remark, 'It is always the unexpected that happens?'" "I don't know," said the melancholy government attache, "but I suspect he worked in the weather bureau."—Washington "Star."

"W'y don't you put mo' hell in you' sermons, Brer Williams?" "Well, w'en I gives 'em too much er it de congregation makes sich a noise fannin' deyself, I hes ter order a recess!"—Atlanta "Constitution."

Von Quizz—What does your friend write? Verse? Novels? Tragedies? H. Kashe—Great Scott, what do you take him for? An amateur? No, sir! He writes advertisements, of course!—New Orleans "Times-Democrat."

Acrum—How are the plans for your new house coming along? Subbubs—Splendidly. My wife has finally laid out all the closets she wants, and now all the architect's got to do is to build the house around them. — Philadelphia "Press."

MEDICINAL QUALITIES.

Asparagus is very cooling and easily digested.

Cabbage, cauliflower, Brussels sprouts and broccoli are cooling, nutritive, laxative and purifying to the blood, and also act as a tonic, but should not be eaten too freely by delicate persons.

Celery is delicious cooked, and good for rheumatic and gouty people.

Lettuces are very wholesome. They are slightly narcotic, and lull and calm the mind.

Spinach is particularly good for rheumatism and gout, and also in kidney diseases.

Onions are good for chest ailments and colds, but do not agree with all.

Watercresses are excellent tonic, stomachic and cooling.

Beetroot is very cooling and highly nutritious, owing to the amount of sugar it contains.

Parsley is cooling and purifying.

Turnip tops are invaluable when young and tender.

Green nettle shoots, if gathered in Spring and cooked as spinach, form a most delicate and wholesome blood-purifying vegetable.

Potatoes, parsnips, carrots, turnips and artichokes are highly nutritious, but not so digestible as some vegetables. Potatoes are the most nourishing and are fattening for nervous people.

Tomatoes are health-giving and purifying, either eaten raw or cooked.

Chili, cayenne, horse-radish and mustard should be used sparingly. They give a zest to the appetite, and are valuable stomachics. Radishes are the same, but are indigestible, and should not be eaten by delicate people.

WISE MAXIMS

There are no elevators in the house of success.

The "bad boy" often makes the best man.

A man can be too confiding in others, but never too confident in himself.

A college education is a good thing, but many a graduate finds himself over trained.

Clothes don't make the man, but good clothes have got many a man a good job.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, [illegible] confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc., etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully."

To every one sending for a trial order and finding good results we ask to observe any special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, sore back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. [illegible] per box, or 3 boxes for $1.00.

Dr. Clarke's Sure Cure for Catarrh and Dr. Clarke's Sure Cure for Eczema, same price [illegible] will be sold for [illegible]

HIGH PRAISE FOR THE INTERCOLONIAL RAILWAY

Its Equipment, Scenery and Literature Most Favorably Commented Upon

Mr. D. Pottinger, General Manager of the Government Railways has received the following letter dated Dec. 3rd, from the office of the Board of Trade, Montreal, which speaks for itself:

D. Pottinger, Esq., General Manager Intercolonial Railway, Moncton, N.B.

Dear Sir,—I have pleasure in communicating herewith a resolution adopted by this committee conveying to your management an expression of gratitude for the tour over the Intercolonial Railway, provided for the over-sea delegates to the Fifth Congress;

"Resolved, that the Canadian Committee of Arrangements tenders to the Intercolonial Railway Management its most sincere thanks for having, at this Committee's request, afforded the over-sea delegates to the Fifth Congress of Chambers of Commerce of the empire, a complimentary tour over its line, and for the added courtesy in providing special trains for the two parties.

"That the lovely scenery of the Matapedia River together with the beautiful valleys of the Miramichi and Nashwaak rivers, seen when the autumnal tints were at their best,

WAS GREATLY ENJOYED BY THE DELEGATES

as were also the visits to the cities of Fredericton, Halifax, St. John, and Sydney, with the local trips provided by the citizens thereof, while the ride along the shore of the beautiful Bras D'Or Lakes was declared to be worthy conclusion of the glories of the All Canadian tour.

"That the delegates greatly appreciated the illustrated volume, "Forest, Stream, and Seashore," which the Intercolonial Management so kindly presented to all who took the tour over its lines.

"That the Committee of Arrangement is convinced that the circumstance, that, with the assistance of the Dominion Government and by the kindness of the Railway and Inland steamboat companies it was able to tender to the over-sea delegates these extended tours through Canada added largely to the success which has attended the holding of the Fifth Congress in this City, and it is most gratifying to know that these tours have resulted in impressing the delegates most favorably.

WITH THE GREAT RESOURCES OF THIS COUNTRY

the vast opportunities it affords for the investment of capital, and its superior advantages as a home for the surplus population of the motherland;

"That the committee has been gratified to learn that the knowledge of the resources and beauties of our country thus obtained by the delegates will be widely disseminated by them through various parts of the Empire from which they came, for it is the intention of many of the delegates to communicate to the members of their respective Chambers and to other audiences, by illustrated lectures and other means, the information they have gathered during their visit to Canada;

"That the Committee records its belief that the tours through Canada have filled in the highest degree the hope in which they were planned that in addition to affording much enjoyment to

THE OVER-SEA DELEGATES TO THE CONGRESS

that would result in great and lasting good to our country, and that the railway and steamboat companies who gave the transportation privileges deserve and enjoy the gratitude of al Canadians for their wise generosity in this connection."

The recent Congress of Chambers of Commerce of the Empire being the first of these Congresses held outside of the Mother Country, this Committee caused a medal to be struck in bronze to commemorate that fact, and it subsequently had a few struck in silver for special presentation purposes, one of which is now sent you under another cover in token of the Committee's appreciation of your kindness in connection with the complimentary tour given over your line to the over-sea delegates.

I am Dear sir, yours truly,
(Sgd.) Geo Hadrill,
Secretary.

A copy of a resolution passed by the Chamber of Commerce and Manufactures (Incorporated) of Sheffield, England, has also been received and which reads as follows;

"At a meeting of the Council of the Sheffield Chamber of Commerce and Manufactures (Incorporated) held on Oct. 23, 1903, it was resolved, that the best thanks of this Chamber be and they are hereby awarded to the Intercolonial Railway for their great courtesy and hospitality extended to the delegates from the Sheffield Chamber on the occasion of the Fifth Congress of Chambers of Commerce of the Empire at Montreal.

(Signed)
HERBERT HUGHES,
Secretary.' "

Before leaving for home Lord Brassey paid a warm compliment to the Intercolonial Railway. "I have never travelled,' said he, "more comfortably nor on a better appointed train than that which conveyed me out of Halifax today." He alluded to Canada's Famous Train, the "Maritime Express."

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.00 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $3.75 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values, $12.50. This being a general sample taken from the dump. The other two assays are $62.00 and $70.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present dip it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body.

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,350 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,050 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. W invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

"The only remedy for labor and all trouble is His Divine Spirit in the hearts of individual men. Christ saved society, but, man, he must first save you."

There was perfect silence in the great audience for a half minute after Mr. Dowling finished.

Then the services closed in almost the same quiet, and few tarried to speak with each other. The impression was so great. The burning conviction of a true man had entered the hearts of every listener.

The preacher went immediately to his room, and wondered, but was satisfied. Duty done is the author of peace in the soul.

Within two months, twenty-nine members of the labor union had accepted Christ as their Saviour, and became members of David Dowling's church.

CHAPTER X

Henry Fielding's Conversion.

In the last meeting of Union No. 10 there had been a most earnest desire manifested to do the right thing. More so than ever before. Now the business and discussion were more personal, and yet the men were more conservative and charitable than in the past. Most of them were not conscious of it, but it was plainly manifest. Some new power had control, and they were breathing a purer air.

The question now was not one of strikes in general or concerning the street car strike going on, but it was their own interest and their own families which were to suffer. They were sure of the lockout. It had passed beyond the boundaries of threat and was assuming a distinct form of reality.

Most of them were undecided. They wanted to be independent and heroic enough to fight and starve if necessary, but their case was not altogether a clear one. There were two sides to it, and they were honest enough not to desire to ignore that, and close their eyes willfully to the rights of their employers.

A rabid enthusiast was heard many times during the meeting that night. A decision must be made and the narrow vision could only see one way. Throw down the challenge and go into battle without counting the cost, or placing the cause into the scales and taking time to let it balance!

Never had they held such a meeting in the display of true manhood. It was not a radical, unreasonable, unjust denunciation of the men who employed them, but a spirit of nobility and desire to come to a righteous reconciliation.

The rule is that there is only one result to that feeling in the soul, whether in factory or home, church or State, on earth or in heaven. There may be exceptions, but the rule remains.

That meeting, long to be remembered by every man who was there, lasted until twelve o'clock at night, with the victorious result of the appointment of a committee, consisting of Henry Fielding, James Watts and the Rev. David Dowling, to go at once to the employers and strive to adjust the affair satisfactorily to both sides.

The conclusion had been reached that it was more misunderstanding than fault on either side. It was the new way of doing it, but it was unquestionably the right way.

If war is ever righteous anywhere, it can only be so as the last resort in securing justice. There is a better way first. This was that better way.

It was a new experience for David Dowling again, but he was not the man to hesitate now. He had passed that, and was rather anxious to serve the workingmen in any possible way, and this had been one of the dreams of the past weeks: "Why not the preacher, the man supposed to be nearest Christ, act as a peacemaker?" he had asked himself, and they did not know it, but he was ready for the opportunity to try this Christ method in labor disputes, as well as in every other place.

The very next morning, as soon as the information reached him, he went to the factory, and at noontime the three entered the private office by appointment for the conference.

The conversation was almost too sacred to be repeated.

The revelation of kindness and good intent was beyond their expectation. Neither the members of the firm, nor the superintendent displayed any ill-feeling, much less any anger.

They said they would rather keep their old men, but only insisted in running their own business in their own way, which they would guarantee them was always in the interests of their employes, as well as themselves. They tried to make it plain that the introduction of new machinery was essential to success there, and even to the keeping of the factory running. They had to be up with the times. It was a case of necessity, and not selfishness. Quality and quantity of work must be turned out; and where it changed the hands about, and in some cases demanded a less number, would in the end result for the good of all.

They finally agreed to keep them all, at least for the present, and see what the future demanded.

One of the employers spoke up and said:

"I don't honestly believe that I want to see your families suffer any more than I do my own. I am willing to sacrifice for the good of every faithful man in this factory, but you don't know how I have passed my nights this last year. I have worked all my life up to this point, and it looked dark many days at noonday. We have made just half this year what we made two years ago. Of course, it is not our business to tell our men all that, but not one of them has lost a dollar of his wages this year, even if I have lost a part of that which I gave my whole life to secure."

His partner interrupted, and said: "Yes, I have wished sometimes that I was one of the men in our employ instead of having this load on my hands."

Henry explained the position of the men as best he could, and said it looked so much different from their standpoint, but he believed every man of them, when the report was returned, would do the right thing, and would be more content in the future—at least, not so quick to condemn.

Mr. Dowling told them of his confidence in the victory of the Christ spirit. While they may not be members of the church, it nevertheless remained true everywhere that the principles and example of the Saviour of men were destined to triumph. They need not fear them, nor regard them as something foreign to a labor union or a factory. It was the very intent of the Gospel to settle all these things for the good of all.

"Gentlemen," said he, "I never felt so much in my life the possibility of bringing the Christ into all relations of life, and sweetening them by His divine influence. I used to preach a Gospel. I am now going to preach the Gospel— yes, and practice it, too, God help me."

There were three men in the firm, but only one of them was a Christian. Not a word was sent, but if silence ever gave consent it was at that moment. Every man in the room was saying in the secret quiet of his own soul, "There is a better way— this is it."

Misunderstanding and misrepresentation are twin demons standing between capital and labor and working night and day in their diabolical efforts to bring up the forces of either side in battle array. A calm

(To be continued.)

BRITISH CABINET IS SHAKEN TO PIECES.

LANSDOWNE, LONDONDERRY AND BALFOUR MAY RESIGN

The Big Fire in Norway Swept Away Every Building - Terrible Suffering

London, January 26.—The London Daily News this morning publishes a rumor that further Cabinet resignations are imminent, saying the officers to resign probably are Lord Lansdowne, Secretary of State for Foreign Affairs, Lord Londonderry, President of the Board of Education, and Gerald Balfour, President of the Board of Trade.

Aalesund, Norway, Jan. 25.—The fire which swept over this town yesterday destroyed every building in it, with the exception of the hospital. The 11,000 inhabitants of Aalesund were compelled to camp in the open. The children were housed temporarily in the church of Borgun. The panic among the people was so great after the outbreak of the flames that all attempts at leadership or discipline became out of the question. No excesses, however, were committed. The people first endeavored to save some of their property, but they soon found that they had quite enough to do to save themselves.

The destruction of the town was complete within a couple of hours from the time the fire started. Over twenty steam fishing boats and many sailing smacks were sunk in the harbor to save them from the flames, but three steamers and many other boats were burned. It is now believed that only three persons lost their lives. Sucor has arrived from Moho, Bergen and other places, and provisions are being distributed.

London, January 26.—A despatch to the Daily Mail from Sydney, says that the Board of Health of Victoria, has decided to treat consumption as an infectious disease, and completely isolate all sufferers. It has arranged to accommodate a number of consumptives at the quarantine station.

Christiana, January 26.—King Oscar will establish a new princely order to be known as the order of the Norwegian Lion, on the occasion of his seventy-fifth anniversary Thursday. All Monarchs belonging to the Swedish order of Seraphim will be decorated. Only twelve Norwegians or Swedes may belong to the order simultaneously. The new order has been established because the Swedish order of the Seraphim has hitherto been used as the highest reward of merit, even when Norway was concerned, thus placing that country under the shadow of Sweden.

THE WRIGHT CASE

Government Refused to Prosecute Promoter of Big Swindle

London, Jan. 27.—The inquest over the remains of Whitaker Wright, who died suddenly yesterday after being sentenced to seven years' penal servitude for fraud, has been definitely fixed for tomorrow morning.

The Opposition papers continue making trenchant comments on the Government, "which," they say, "declined to do its duty for reasons now shown to have been absurd in law, and which are always repugnant to common sense. The Government declined to prosecute Wright. Premier Balfour, acting on the advice of the law officers of the Crown, having announced in Parliament that the case was not one for the public prosecutor. Papers insinuate that the Government wished to shield Wright because he was a strong supporter financially and otherwise of the Conservative cause, and because he had influential friends.

The Daily News contends that the law officers, Sir Robert Finlay and Sir Edward Carson, ought to resign, and it refers to the "wicked insinuation" of Wright's friends that a prosecution of the case would involve the Duke of Connaught, who did invest in one of Wright's companies, but who was not even remotely involved in his misdoings.

Recoup Prosecutors

The Times says it would only be seemly for the Government to recoup fully to the prosecutors all the costs they have incurred "in bringing to justice a culprit of a kind that under our laws fortune generally favors."

"The handling of this matter," says the Westminster Gazette, "has reflected more discredit on the Government than its other mistakes, with even graver consequences. Distinguished people were involved, and some of them have had happy escapes."

The Financial News on these points says: "Wright might have made disclosures which might have seriously discomforted some people, but Wright was loyal as well as courageous, and he carried his secrets to the grave. To prevent others from divulging what he chose to conceal he destroyed many papers, thus completing his sacrifice."

A post-mortem examination has shown that Whitaker Wright committed suicide by taking cyanide of potassium.

It is reported that a loaded revolver was found in Wright's pocket by the police.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be us.d for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

A HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable oppportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantion are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

FARMERS' TRUST INCORPORATED.

IT WILL PROBABLY DO BUSINESS IN CANADA

CAPITAL OF $100,000,000.

Control of Grain and Live Stock to Enhance Prices is the Scheme

Chicago, Jan 27—By the incorporation under the laws of South Dakota of the Farmers Grain and Live Stock Commission Company a scheme for a gigantic "farmers trust" has been launched. The project is promoted by Chicago men, and a majority of the incorporators are residents of this city.

It is the intention of the organizers of the new trust to do business on a large scale. The capitalization of the company has been fixed at $100,000,000, the larger portion of which is to be furnished by the farmers whom the promoters expect to interest in their project. The plans contemplate the formation of what is practically a cooperative organization of farmers.

Broker For The Farmers.

The farmers are to allow the company to do their buying and selling and to act for them as commission merchants, packers and brokers at the present time. The new company intends to control the sale of the grain raised on the farms and to ship it to the markets. Cattle shipped are to be fed by the corporation and to be disposed of by it to the markets. It will do business in Canada.

It is expected by the incorporators that the farmers, by joining the new organization, will find their profits increased. The sponsors say the growers will be able to get better prices for their produce, as the corporation can sell at a favorable time and influence the markets, while the farmers as individuals are now practically at the mercy of speculators.

The promoters also believe that the farmers can obtain advantages by buying through the corporation. It will be able they say, to buy farming implements and machinery at prices much lower than the farmers can obtain as individuals.

In other ways the new concern expects to increase the profits of the agriculturalists and cut down those of the men with whom they deal. It is its avowed purpose to put out of business the middlemen who now share the profits of the farmer.

Promoter Talks of Plans.

As yet the corporation is in rather an embryonic state and it is admitted by its incorporators that the success of their plans depends on the manner in which they are regarded by the farmers.

"The new company believes that the farmers will take kindly to the scheme by which it is proposed to increase their profits and wipe out those of the middlemen," said D. M. Kirton, one of the incorporators, last night. "At present the farmers are obliged to sell their grain as soon as they harvest it, no matter what price rules at that time. If the farmers were members of our company they would be able to get more money for their produce, as the company could dispose of grain when they chose to do so, and when the markets were favorable. In a hundred other ways the farmers would reap advantages from the company.

"At present, however, little has been done to further our objects, except to file the incorporation papers. There is no question of the success of the company if the farmers take kindly to our plans but it seems almost a herculean task to induce them to interest themselves financially in the corporation."

BRITISH DEBATED COLONIAL POLICY

"FISCAL UNION WOULD MEAN DISUNION"

FREEDOM THE BEST POLICY

Day is Coming When Members for Montreal Will Sit Beside the Member for Paddington

London, Jan. 27.—"The Liberal party and the colonial policy," formed the subject of an interesting debate at the National Liberal Club last night. Lord Carrington was in the chair.

Would Mean Disunion.

The Right Hon. R. B. Haldane, M.P., declared that a fiscal union would be like thrusting a ramrod into delicate machinery. Unless each component part was complete the freedom of the Empire would not last ten years. As one of the links of Empire he suggested a temporary enlargement of the Cabinet by the addition of colonial advisers, the frequent summoning of the Committee on Imperial Defence, and the transforming of the House of Lords into a great imperial chamber for the discussion of imperial questions where the Agents-General could sit and the colonies bring their difficulties.

Absolute Freedom.

Mr. Channing, M. P., believed the best colonial policy lay in the absolute freedom of every unit.

Mr. Hawksley, solicitor for the Cecil Rhodes estate, argued that the House of Lords, were it to become an Imperial chamber, needed an amendment which would be impossible unless backed up by the country. The proposals for an enlarged Cabinet would be of no value unless carried by the House of Commons.

Into the Future.

Mr Samuel, M.P., said the day was far distant when a member for Montreal would sit side by side with a member for Paddington. The links of empire were an Imperial law tribunal, the Committee of Imperial Defence and Imperial sentiment. Colonials had avoided the fetid atmosphere of the House of Lords. The colonials fighting in South Africa themselves outnumbered the Boers, and Australia would be able to throw 100,000 men into India in the time of need.

Favor Preference.

Premier Deakin, of Australia, says the whole Ministerial party, a majority of the Labor members, and a large minority of the Opposition are in favor of a preference to Britain. The Customs Department has estimated that £7,000,000 yearly could be diverted to British manufacturers without injury to Australian industries.

Hits the French.

The Times Newfoundland correspondent wires that the export of codfish from the French islands has been the worst in their history, proving the efficiency of the Newfoundland Bait Act.

Canada the Eldorado.

The Italian Vice-Consul at London has advised his Government that there are no opportunities for the employment of Italians in English agriculture, but they could emigrate to Canada with advantage.

Canadian's Good Notes.

Miss Irene Foster, of Pictou, N.S., and M. MacKay also a Canadian, delighted a large audience in Steinway Hall last night. The London dailies praise Miss Porter brilliant notes.

Order of Druids.

Colonial Secretary Lyttleton was yesterday initiated at Leamington into the mysteries of the Order of Druids.

Storehouse of Empire.

Sir. Horace Tozer, speaking at the London Institute last night, referred to Canada and Australia as the storehouses of the Empire. Canada was able to turn out ten times as much wheat as she did now and when she did that Australia would look after the butchers trade.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000 00.
Par value $1 00. Full Paid and Non-Assessable

At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,600 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.
1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 196 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS.*
C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a smal block of stock will be sold at 15 cents per share. When machinery is paid fo no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY.

Cold in the Head

What's the sense in sneezing and Sniffling, dosing with purgatives or bothering with atomizers?

Catarrhozone

A convenient inhaler treatment is the proper remedy to cure quickly and pleasantly

Sensible people long ago abandoned the idea of "working off" a cold by means of laxatives and purgatives for the simple reason that the cure is as bad as the disease itself.

To cure a cold in about ten minutes' time use Catarrhozone. It is aromatic delightful to inhale, clean and very simple to use.

Catarrhozone is a vegetable antiseptic, and perfectly safe and harmless. Even children and infants can use it. The vapor is inhaled at the mouth, and after passing through the respiratory organs is exhaled slowly through the nostrils.

Catarrhozone never disappoints. It stops sneezing, coughing and running at the eyes, by a few inhalations. Inflammation, congestion and all irritation disappear under the influence of Catarrhozone more quickly than can be told

C. B. College, of Clarence Street, London, says: "I had a continuous cold in the head for years, and never used anything with such quick results as I derived from five minutes' use of Catarrhozone. I am delighted to find a remedy that cures colds in a few minutes. Catarrhozone cures every time."

To carry a Catarrhozone Inhaler in the pocket means you won't have colds, catarrh or any lung trouble. It keeps these diseases away and is warranted to protect you against all the ills of winter. Complete outfit, with Hard Rubber Pocket Inhaler costs $1.00. Small size, 25 cents. Druggists or N. C. Polson & Co., Kingston, Ont.

Died in Smith

On Thursday morning there passed away in Smith, at the family residence, Mr. Robert Steadman. The deceased was 66 years of age. The funeral will take place on Saturday afternoon to Little Lake cemetery.

The Gymn Boys' Exhibition

Over fifty boys of the Gymnasium classes in connection with the Y.M.C.A. will take part in the exhibition to be given in the gym. on Monday evening, February 1st. A most interesting program will be given under Mr. Alpine's leadership. Seats can be reserved at the Y.M.C.A. office for 15 cents. General admission, 10 cents.

A Painful Accident

While doing some work at All Saints church, Mr. P. Alexander, of the firm of Alexander & Miller, met with a painful accident. In some way the glass bulb of the lamp which he was using swung against a beam, breaking the bulb into many pieces, the glass flying into Mr. Alexander's face and eyes, causing great pain. Dr. Bradd, who attended, succeeded in extracting the small pieces of glass, and Mr. Alexander is now recovering.

Lipton's Teas

Liptons have begun an extensive advertising campaign in Canada, and already a surprising increase in the consumption of their tea is reported. While Lipton is a firm believer in newspaper advertising he is also a firm believer in giving the public a pure article. The tea reaches the consumer absolutely without adulteration, and the blending and packing is performed in the most scientific and approved manner.

In Great Britain Lipton's teas are used more largely than any other, they having a record of over 52,000,000 packages per annum. This certainly speaks for the purity and quality of the teas that are known throughout the civilized world. Every lover of good tea should try a package of Lipton's. The delight to be extracted will be a revelation.

THE NEW ROY STUDIO

Will be Opened in a Month or Six Weeks

Fifteen men are now at work cleaning up the debris on Hunter street, preparatory to rebuilding the new studio for Mr. Roy. This force will be increased in order to get the new studio completed as soon as possible.

Mr. Roy told The Times yesterday that he expected to be ready for business in a month or six weeks.

THE COUNTY'S NEW MINISTER OF FINANCE

Mr. T. M. Hunter Gets the Important Chairmanship

We congratulate the County Council on its choice of its chairman of the Finance committee of the Council. Mr. T. M. Hunter, who was elected head of that most important committee, is a gentleman well qualified for the position. He is thoroughly conversant with the duties of the office, and has an intimate knowledge and a full grasp of the finances of the county.

A JANUARY WEDDING

Nuptials of Mr. Oscar Sharpe and Miss Charlotte Jeffs

A very quiet house wedding took place on Wednesday last at the residence of Mr. and Mrs. James Jeffs, 81 Homewood avenue, when their second daughter, Miss Charlotte, was united in marriage to Mr Oscar Sharpe, of Hague, Saskatchewan. The nuptial knot was tied by Rev. W. J. Jolliffe.

The bride was becomingly attired in a dress of crepe de chine trimmed with lace, and the ceremony was performed under a floral arch in the presence of only the immediate relatives of the contracting parties.

Mr. and Mrs. Sharpe were the recipients of many costly presents, and left per the C.P.R. train for their honeymoon and after for Saskatchewan.

ST. RAILWAY AND LIGHTING

The Appeal Against Judge Meredith's Ruling Has Been Entered

The City Fathers met in Committee of the Whole last evening, but did not convene in special session, afterwards as was announced.

The committee were assured that Mr. Stuart is taking steps towards floating the Street Railway Co.'s bonds, and will if possible, have the road in operation by July 1st as originally agreed upon. This, however, hinges upon whether rolling stock and electrical appliances can be secured in time, now that so much delay has arisen.

The Town's appeal against the ruling of Judge Meredith re the street lighting bylaw has been entered, but as there are some eighty appeals before the court it will not come up for hearing till three or four months hence, and possibly later. The Council is, therefore, considering whether it would be better to allow their appeal to stand in the hope, as advised by their Toronto counsel, of winning it, or to enter into a new agreement with the Peterborough Light and Power Company. Another course suggested is to pass a provisional bylaw to stand good if the old one is quashed in the court of appeal. This is now in the hands of the Legal committee, who will report at the Council's next meeting, when a definite decision will be arrived at.

The Hospital Concert

Lady Minto has written Mrs. McAllister saying; "Owing to my many engagements it is impossible to accept your invitation for Feb. 2nd, but hope you will have every success and be able to do something substantial to the fund." It is now for the people of Peterborough to do this. Another check for $30 has been received by Mrs. McAllister who hopes to have some more contributions before sending the list to Her Excellency the middle of the month. Buy your tickets early and be able to mark them before the rush. This morning the plan opens.

MARRIED

HART—CHAMBERS.—At the residence of the bride's parents, Manvers, on Wednesday January 27, 1904, by the Rev. Mr. Marvin, of Pontypool, Thomas Hart, son of Mr. and Mrs. William Hart, of Arthur, Ont., to Flora Adeline, fourth daughter of Mr. and Mrs. James Chambers, Manvers, Ont.

Mr. and Mrs. Hart will reside at 169 Vine avenue, Toronto Junction.

BIRTH

BRADBURN—On Tuesday, January 26th, at 25 Homewood avenue, to Mr. and Mrs W. H. Bradburn, a son.

CHILD CULTURE

A Pupil of Froebel's Says Things

A well known woman physician of Chicago who was in her youth a pupil of Froebel the originator of the kindergarten, and herself a famous authority on the mind and body culture of children says of Postum Food Coffee;

"I am an advocate of natural foods for the building up and developing of the body and brain and for this reason I have introduced Postum into hundreds of families. Much of my life has been spent in giving lectures to mothers how to bring their children above disease by instructing them what to eat and drink.

"I have two of the healthiest, strongest sons in America to prove my theories correct. We live perfectly and are able to demonstrate the fact that true knowledge of food opens the gates of sunshine in our home.

"Postum Food Coffee given to children enhances their ability to greater achievements in the world of competition. Thousands of constitutions are enfeebled in youth by drinking coffee where otherwise they could have had health and strength.

"Of the foolish mother and father to encourage in their children perverted appetite by indulging the palate for those things which enslave them in after life, cultivating an appetite for still grosser habits of intemperance.

"Postum is Nature's wholesome liquid food and drink and when the taste is cultivated for this food drink the individual's path is safe and free from sour and unhealthy stomach action and perverted heart pains.

"There is no doubt coffee causes thousands to suffer all forms of dyspepsia, and heart, brain or nerve troubles and countless other ails, depriving them of money, home and comforts of life by the ceaseless outlay of doctors' bills and inability to be useful or conduct the ordinary duties of business.

"Advocating Postum Cereal Coffee to insure good health to my patients I have never been disappointed. My pocketbook has suffered that is true but my conscience is clear and easy for having done my duty. Name given by Postum Co. Battle Creek, Mich.

Look in each package for a copy of the famous little book, "The Road to Wellville."

THE POST OFFICE NUISANCES

Something Should be Done to Remedy the Evils Complained of

To the Editor of The Times.

Sir,—Two or three weeks ago there appeared in The Times a short paragraph, calling the attention of the caretaker to the bad light in the post office lobby. No doubt the light was, and is, bad, but I can't understand how the caretaker could better it, as he has no authority at the power house.

But, sir, there are other abuses or nuisances in connection with the post-office lobby you could call to the attention of the proper party with great benefit to the public viz;

1st A number of loiterers, or toughs, of both sex, make a habit of hanging around and on those heaters. The fem ales eating either bananas, oranges, nuts or candy and throwing the refuse on the floor. The males amuse themselves chewing tobacco and spitting among the nutshells on the floor, or else they smoke vile cigars or worse cigarettes, and all the while bandying coarse jokes to the annoyance of people having business at the office.

"Then there is the dog nuisance, the worst of all. A number of people who should know better, are in the habit of allowing their dogs to follow them to the post office where they trot around leaving their excrement behind them. But their owners think nothing of it, as the P. O officials are public servants, and therefore are fit subjects to be poisoned by any filth they think proper to leave there. Now, sir, those people should think how they would like to earn their living in such an atmosphere. We are all servants, one of another, in some capacity. If not, then we are drones, and should be served as the bees serve them. Some of these people allow dogs to follow them into the office as large as a one year old calf, and twice as filthy as the calf.

By calling the attention of the proper authority to these nuisances, you will confer a favor on the suffering public. Thanking you,

ONE WHO SUFFERS.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. George Jackson, of the Dominion Express Co.'s office, is confined to his bed with la grippe.

—Mr. W. E. Lech is laid up with a severe cold. His many friends hope to see him around again in a day or two.

—On account of sickness in the house, Mrs. C. B. McAllister will not receive this month.

—Mrs. J. H. Brandon, Fenelon Falls, and Mrs. W. H. Robertson, are spending a few days in Toronto.

—The many friends of Mr. W. H. Hill will regret to learn that he is confined to his bed with a severe attack of la grippe.

—Mrs. A. L. Davis and Miss Stephens will not receive this week, but will be at home on Friday next, February 5th, afternoon and evening, and on the following Fridays in February.

—Mrs J. E. Roxburgh and daughter of Norwood, are the guests of Mrs. G. A. Williamson, and will receive with Mrs. Williamson this (Friday) afternoon.

—Mr. T. Turcott, the general and efficient secretary of the T.A.S., is ill with la grippe. The duties of the office are in the meantime being ably performed by Mr. George Lynch.

—Mrs Sowerby, of Toronto, is in town, having been called here through the sudden and serious illness of her son who was taken ill while at work in The Times office on Wednesday. He is now in the hospital, and is recovering.

—Mr. and Mrs. R. H. Green, of Listowell, are visiting at the home of Mr. Green's brother, Mr. G. Walter Green, 563 Downie street. Mr. Green is returning from St. Thomas, where he was a prominent exhibitor of the Cheesemakers' Convention of Western Ontario. Mr. Green took a 1st and 3rd prize, and also the sweepstake prize for a silver trophy valued at $300.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—Hear Frank Blatchford of Toronto, the favorite violinist.

—The Board of Works met yesterday at four o'clock.

—The Sons of Scotland met last night in the Maccabees Hall.

—The Chief of Police has awaiting an owner a robe which was picked up a mile out on the gravel road.

—Mr Primeau, of town, has been engaged as chef at the Palace Cafe. He will enter upon his duties this morning.

—The returned curlers from Orillia report having had a good time while in that town.

—Hear Mr. Firth, the baritone singer and composer, in his own songs, at the concert Tuesday, February 2nd.

—Don't miss the treat of the season—S Homer Eaton, entertainer of Boston, on his costume characters.

—All accounts owing the Roy Studio must positively be settled at once, either by mail or at Mr Roy's residence, corner of Hunter and Sheridan streets. 3d

—Plan opens at Edmison's drug store to-morrow, at 10 a.m., reserved seat tickets to be had at Edmison's drug store Ormond & Walsh's and Sanderson's Lady Minto Hospital concert.

—At the police court yesterday morning a man was fined $2 and costs, $4 altogether, for being drunk and creating a disturbance at the rink and in a store on Wednesday.

—The Peterborough Thistles will send two strong rinks to Toronto on Tuesday next to contest for the Ontario Tankard. A large crowd is expected to accompany them on their excursion.

—It is stated that men for the woods are becoming more plentiful and in consequence wages are coming down. Bushmen who a few months ago, could command $32 per month, can now be engaged for $28, $26 and even as low as $24.

—A congregational meeting of Charlotte street Methodist church was held Wednesday evening, at which the following gentlemen were selected as representatives to the quarterly official Board for the coming year; Messrs. A. B. Cunningham, Jas. McCreary, George Minorgan, Jos. Forster, W. P. Adamson, J. L. Hughes and Dr. Jeffs.

Obituary

The sincere sympathy of their many friends will be tendered Mr. and Mrs. Robert Pollock, of the 5th Ward, in the death of their daughter, who had been ill with consumption. The deceased young lady was 22 years of age, and was greatly beloved by all who knew her. The funeral will take place this afternoon at 2.30 to Little Lake cemetery.

"WILFUL WASTE
MAKES WOEFUL WANT."

That old copybook maxim finds its most forceful application in the waste of vitality, which is called "burning the candle at both ends." A woman is often tempted beyond her strength by domestic or social demands. Some day she awakens from this waste of strength to the woeful want of it. She has become weak, nervous and miserable.

For weak, nervous, run-down women, there is no better tonic and nervine than Dr. Pierce's Favorite Prescription. It restores the appetite, quiets the nerves and gives refreshing sleep. It cures local diseases peculiarly womanly which undermine the general health. It makes weak women strong, sick women well.

"No doubt you have forgotten me, but after you read my letter you will remember me," writes Mrs. Annie E. Moring, of 238 7th Avenue, S. W., Roanoke, Va. "In the year 1897, I wrote to you for advice, which you gave me free of charge. When I wrote to you I was a wreck; I could not walk straight for pains in my abdomen; could not sit down, lie down, or get any ease at all. I had what was called the best doctor here, but did not get any better until I went through a course of your medicine. I took eight bottles each of 'Favorite Prescription' and 'Golden Medical Discovery,' and ten bottles of the 'Pleasant Pellets.' I tell you the medicine made a cure of me."

Weak and sick women are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as strictly private. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Pellets cure biliousness.

THE COUNTY COUNCIL

Council Busy Thursday with Committee Work—A Short Session

On Wednesday afternoon the County Council was waited upon by a deputation from the Children's Aid Society, consisting of Rev. Father McColl and Mr. R. M. Dennistoun.

Mr. Dennistoun pointed out that 29 children had been received at the Shelter last year, of these twelve were from town and seventeen from the county. The grant last year from the town was $300, and from the county $100, while the total expenses had been $800. Voluntary subscriptions, chiefly from benevolent citizens, had made up the balance. Mr. Dennistoun referred to the fact that the cost of looking after destitute children from the county was larger than in the case of the town.

Rev. Father McColl spoke of the good work the Society was doing for destitute and abandoned children, and pointed out that the work was carried on by painstaking, capable officers. Children sometimes lived with parents whose lives were anything but an influence for good, and it was considered wise, under these and other undesirable conditions, that the children be removed to moral surroundings, and saved, if possible, from destitution and from being a menace to society. The work carried on was therefore, a worthy one, and Rev. Father McColl hoped the application would receive generous consideration.

Mr. Dennistoun read the annual report of the Society, which has already been published. He hoped the county grant would be doubled. It was the purpose to make improvements to the Shelter by the installation of baths, sanitary plumbing, and other requirements.

On motion of Councillor Shaw, seconded by Councillor Moloney, the application was referred to the Finance committee.

Councillor Fitzgerald moved, seconded by Councillor Shaw, that the Clerk be instructed to notify the treasurers of municipalities who have not made their returns to the county of the urgent necessity of doing so at once.—Carried.

Yesterday morning the Council went into committee, with Mr. T. M. Hunter, chairman of the Finance committee, in the chair.

Properties for Quick Sale

Two strey, brick house, semi-detached, with stable, and two extra building lots, very centrally located on corner. A splendid investment, $2500.

Four roomed, *frame cottage in first-class* repair, nice lot, $600.

Two story, brick store and dwelling having a well established business, stable and yard.

JAPAN READY FOR WAR TO COME THE OUTLOOK VERY THREATENING

Tokio Sentiment Strong For Action and St. Petersburg is More Peaceful

LONDON LOOKS FOR WAR

Post Thinks War is Inevitabe Between Two Nations

London, Jan. 29.—The Daily Post's Tokio correspondent says that war with Russia is inevitable. At no time has the cloud been darker than at present.

St. Petersburg, Jan. 29—Much as I should like to echo the words of the peace rumors which prevail, I am bound to record them, a business man to whom I showed a report sent to an English paper to the effect that the business men were congratulating themselves that the danger of war had passed, was amazed. He said:

"Quite the contrary is the case. The spirit of the business men whom I am seeing all day is very much shaken. A proof of that is that the banks have become shy and make the utmost difficulties about doing business."

A further note of moment is that all officers on leave in the Far East have been called. One hundred naval officers have been sent out in haste and three additional batteries have just been dispatched from Vilna.

I have had another talk with the general holding the highest office in close touch with the emperor. I asked him what he could say as to the present situation. He said;

"Our poor emperor would do anything to avoid war, but he recognizes that the present crisis is the biggest that has faced Russia during her history; that any signs of weakness just now would be tantamount to throwing away the results of Russia's great efforts during half a century, which she has only been able to crown with success by a terrible expenditure of life and money."

NO CONCESSIONS POSSIBLE.

I asked him, as he is in the entourage of the emperor, whether it is true that his majesty had stated no concessions could be made to Japan. He replied;

"It is true that no concessions can be made. You know well enough our desire to get to southern waters. We are baulked by ill will and jealousy. The Baltic is closed for six months of the year. We had to forge to the east, and at last we got there. You Americans and Englishmen are using the Japanese as a weapon to shut us in. What second-rate power could tolerate such a thing? It is impossible.

"We have not hitherto been a commercial nation, but the commercial spirit is growing apace, and, having got an outlet, it is of vital importance for us to retain it. Now these wretched Japanese want to sit down and place a fortress in front of our sole outlet. I am not a diplomatist, only a soldier, yet I know our diplomacy, good or bad, has done its best to avoid war, but it is unavoidable. Speaking of it as a soldier, I look upon it as a step in the dark. But it must be taken at all risks, unless we humble ourselves before eastern nations. You know what that would mean. This state of suspense and expense is intolerable to us, as to Japan as well, and must come to an end, immediately. I am confident in Russia's strength. Everyone knows the strength of Russia."

Then, correcting himself, he said, "No one has known the strength of Russia." By this phrase reaffirming what he had previously stated—namely, that Russia's war capacity would astonish the world.

The St. Petersburg bourse for the past two days has been in an exceedingly nervous condition on account of the persistent pessimistic rumors that Japanese chauvinism had got the upper hand. This is confirmed by advices from Berlin that the idea of arbitration or intervention in any form is ridiculous.

JAPANESE HAVE NOT LANDED.

Seoul, Jan. 29—There is no truth in the report that 3,000 Japanese troops have landed at Chemulpo. It is expected even here that peace negotiations will actually fail or Japan take active military measures in Korea before Feb. 1 at the earliest.

Although Yi Yong resigned the war portfolio he retains control of the army as chief of the council of generals.

IF WAR BREAKS OUT

It must be remembered that, if this war begins, the whole question of the balance of power in the Far East will be at stake. That is a matter which by common consent touches us very nearly. In no circumstance could England be indifferent to such an issue of the contest as would materially alter that balance of her prejudice. We could not afford to see the dominion of the Far East pass into the hands of a single power which is not friendly to us. Our duty to our trade, to India, to Australia, to all our possessions in the Pacific and on its further shore, forbid it. We could not look on and see Japan obliterated or permanently reduced to the rank of a second-rate power. War would, therefore, be an event of no small gravity for ourselves, and if, unhappily, it comes, we must be prepared to watch its course with vigilance, and to protect our interests should the necessity arise, with force commensurate to their magnitude and to their importance.

ASHBURNHAM LADY HEIR TO MILLIONS

HERITAGE VALUED AT OVER THREE MILLIONS

A Story That is Stranger Than Fiction—Wonderful Good Luck

The Hamilton Herald, of Wednesday, contains the following;

"Something of the old superstitions still cling to the people, and many of them hold to their childish belief in lucky stars, despite the teachings of the day to the contrary. Whether James P. Morgan, 45 North East avenue, believes in lucky stars or not is not known, but, according to the popular idea, he has some cause to hold such belief. Either a lucky star was watching the birth of his mother, and some years afterwards the birth of himself and a sister and brother, or fate stepped in and took the business out of the star's jurisdiction. However this may be, the Morgan has come in for a big fortune that counts away up in the millions.

J. P. Morgan, who is a traveller, is away from the city at present, and particulars of the fortune could not be learned today. Sufficient was learned though, to make it appear that there is no doubt as to the genuineness of it. The direct heir is Mr. Morgan's mother, who resides at Peterborough, and the estate is in England. It is estimated as being worth $3,700,000, and it is all bequeathed to Mrs. Morgan, of Peterborough, and her three children. Besides J. P., of this city, the children are Charles G. Morgan, vice-president of the Merchants Bank, Montreal, and Mrs. P. Turner, of Brighton, England.

"It is understood that J. P. Morgan's grandmother left the estate. The Canadian representatives of the family did not know anything about it till Charles Morgan noticed an advertisement in the Toronto Globe, about six months ago, and he at once set about ascertaining the facts of the matter. He learned that his mother was the rightful heiress, and he followed the business up to a successful issue.

"Just what arrangements are being made to get possession of the big fortune is not known in this city, but, doubtless, the necessary steps are being taken. It is not every day that a person comes in for nearly $4,000,000."

Mrs. Peter Morgan is a resident of Ward No. 6, and when seen yesterday by a Times reporter, confirmed the above in the main, only that the amount she thought might not exceed $3,500,000. Her son in Montreal had followed up the matter, and she believed she would come into possession of the estate. The late Mrs. H. T. Strickland was a daughter of Mrs. Peter Morgan, who now resides with with her son-in-law.

The Times has had a long acquaintance with Mr. J. P. Morgan, who has been identified with newspaper work all his life.

The Toronto Star, of Friday, contains the following;

"A report came from Hamilton today that Mrs. Morgan, of Peterborough, mother of Thomas P. Morgan, of Hamilton, Charles G., vice-president of the Mercantile Bank, Montreal, and Mrs. P. Turner, of Brighton, England, has fallen heir to an English estate of $3,700,-000 bequeathed to her and her children by her mother, who died some years ago. Mr. Charles Morgan, of Montreal, has been interesting himself in the matter, and it is thought at Hamilton that the details will be arranged very shortly.

"Mr. Thomas P. Morgan, who is well known in Toronto, is a brother-in-law of Mrs. J. W. Geddes, of 431 Spadina avenue. The Morgan family lived in Toronto for many years, residing in Simcoe street. Mr. T. P. Morgan was educated at Upper Canada College, and at one time was employed on the News of this city. The father died many years ago, and the mother has made her home in Peterborough for some years past. The surviving daughter, Mrs. Turner, of England, married Captain Turner of the 6th Regiment.

"But the story was shattered this afternoon when the following despatch came to the Star from its Montreal correspondent;

"Mr. Charles Morgan, of the Merchants Bank of Canada here, whose mother Mrs. Morgan, of Peterborough, was reported to have inherited a fortune of $3,900,000, told the Toronto Star today that the case had been investigated and it had been found that the family would not have any claim to any such fortune."

THE COUNTY COUNCIL

A NUMBER OF DEPUTATIONS ATTEND

The New Drill Hall Site—The Governor General's Reception—Tablet for Heroes

The County Council held a session Friday morning, with Warden Peck in the chair and all of the Councillors present.

On motion of Mr. Crowe, seconded by Mr. Hunter, a deputation consisting of His Worship Mayor Roger and Alderman Rugh, addressed the Council in reference to a site for the new drill hall stating that the Minister of Militia would be here shortly to select such a site as was desirable. They proposed that a committee be appointed to confer with another from the town in reference to the matter and to meet the Minister of Militia.

On motion of Councillor Buck, seconded by Councillor Curtis, the matter was left in the hands of Councillors Johnston, Hunter, and the Warden.

Mayor Roger also addressed the Council in reference to the expense in connection with the reception given to the Governor-General and party on the occasion of their visit to Peterborough last summer, requesting the county to meet a portion of the expenditure.

On motion of Coun. Fitzgerald, seconded by Mr. Crowe, the matter was referred to the Finance committee.

Mr. Dumble addressed the Council, suggesting that a tablet be placed in the Court House building to the memory of the volunteers from this county who died while serving in South Africa.

Mr. Dumble and Mr. Beal also addressed the Council, asking a grant on behalf of the Horticultural Society.

On motion of Mr. Hunter, seconded by Mr. Maloney, the matters were referred to the Finance committee.

On motion of Councillor Shaw, seconded by Councillor Hunter, the Council adjourned until two o'clock. At half-past one yesterday afternoon the County Council at the invitation of Mr. Stuart, visited the Cereal Works, and were enabled to make a thorough inspection of this interesting manufactory.

FROZEN TO DEATH

Three in One Vicinity in Wisconsin Die from Intense Cold

Marinette, Wis., Jan. 29—Three deaths have resulted from the cold temperature in three days here. The temperature has been as low as 35 degrees below. Fred. Cudnofski, at Beaver, Wis., was chained into a wagon by the crew riding back to camp from work because he was unruly. He was forgotten by his companions and when he arrived at camp he died from exposure. Ernest Brusttas; a logger, became lost in the woods near Waumukee last night. He was found this morning and died in a few hours. James Carroll, of Harris, lay down in a snow bank and was found frozen to death the next morning.

Anoka, Minn., Jan. 24—Henry Mertz, an old man, living alone at Linwood, was found frozen to death in his bed today.

BURN THEIR CAPTIVES

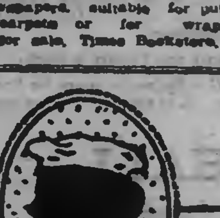
London, Jan. 29—A dispatch to the Central News from Cape Town says the Bushmen with the rebels in German South West Africa are committing terrible atrocities. The limbs of the dead are chopped off, and prisoners are said to have been burned alive.

Mrs. Mather Was in Misery for Five Years from Neuralgia.

Mrs. P. N. Mather, Vancouver, B.C., who was told by doctors that she would never get rid of her neuralgia, writes thus:—"Neuralgia in the head and face made life a misery for me for five years. The doctors said I would never get rid of it. I had heard so much about Paine's Celery Compound that I determined to give it a trial. After the use of four bottles I am a cured woman and have not been troubled with the disease for five months. I owe my present good health, comfort and happiness to Paine's Celery Compound, and advise all neuralgic victims to use it. It is the best medicine in the world."

PAINE'S Celery Compound Cured Her.

Medical advice free to all who desire it. Address "Consulting Physician, The Wells & Richardson Co., Limited, 200 Mountain St., Montreal, P.Q.



Considering how little you spend in a year for baking powder, why not have the best?

Cleveland's is a pure, cream of tartar powder that never fails, and the best that is made.

PETERBOROUGH II.'S WIN BOTH GAMES.

DEFEATED THE T.A.S. IN A HARD FOUGHT MATCH

The match at the rink last night between the T.A.S. and Peterborough II. in the T. V. L., was a keenly fought battle throughout. It was the decisive game, as far as the T.A.S. were concerned as the result depended on their being in the running, they having lost one game to Keene and two to their opponents in last night's defeat, making the third loss, and all chances of winning their district, Peterborough II. and Keene being left to fight it out.

The winners were greatly strengthened by the assistance of Harry Morgan, who played a splendid game and did much to keep the forward line together, and his attacks on the goal were very effective. The forward line in the previous game with the T.A.S. was very weak in this point. They also were greatly improved in combination. In fact both teams indulged more freely in passing the puck, especially in the first half. The T.A.S. on the whole being better stick handlers than their opponents, but their forward line is much lighter and very speedy. The defence of both teams was very strong and were very hard to get past, breaking up rush after rush made by the forward lines.

A good crowd witnessed the game, the rink being about three-quarters full. From the start to the finish it was anybody's game, as the score indicates, the victors scoring the winning goal about five minutes before time was up. Mr. T. Roach, of Port Hope, was referee, and kept the players well under control, penalizing for the slightest offence, and made the boys play hockey all the way.

The first goal went to the T.A.S. after about thirty minutes' play.

The second goal was more strenuously fought for, and a series of attacks on both nets ensued. Ford put a couple of hot ones into McCoy, who very cleverly cleared the nets, but Harry Morgan put one in the right place after thirteen minutes' play, this ending the scoring in the first half, which was marked by many exciting and brilliant plays. Lynch was very conspicuous, Crowley made some good rushes, and Wasson was called upon to take care of a few, Billy George shooting a couple of stiff ones, but with no good effect.

For Peterborough II. the forward line were playing a hard and steady game, Lee and Morgan doing very clever work, Glover and Macpherson were called upon to break up a number of attacks, and were always on the spot. In this half Renton was put up against the boards and injured, which caused a delay for a few minutes. Five players decked the fence in the first half—three T.A.S. men and two of their opponents.

The second half was very exciting and was nip and tuck, all the players of both teams exhibiting great hockey at times. It was marked with a couple of minor bouts, Lee and Parnell deciding to go to the fence to cool off, and McGrath and Ford having a little spar, all by themselves, and, not wishing to have the referee interfere, decided to get into the game. For the winners Lee and Morgan, on the forward line, were playing a hard game, Ford and Renton were also doing good work, and Glover and Macpherson were called upon to take a hand in some very dangerous assaults; Wasson eating up a number of twisters.

For the T.A.S. Lynch was playing hockey and with the assistance of Parnell, George and McGrath, made some good rushes up the ice, some of which looked like sure ones, but Wasson was still in the net, which seemed impossible to puncture. It took about twenty-five minutes' hard playing before the third and final goal was scored, this going to Peterborough II. The T.A.S. went at it hard, determined to make a tie, but without success, their opponents winning the game by a score of 2—1.

The following was the line up;

Peterborough II.		T.A.S.
	Goal	
Wasson		McCoy
	Point	
Glover		Meagher
	Cover Point	
Macpherson		Crowley
	Rover	
Lee		Parnell
	Centre	
Morgan		Lynch
	Right Wing	
Renton		George
	Left Wing	
Ford		McGrath
	Goal Umpire	
W. A. Smith		Picord

Referee—T. Roach, Port Hope.

THE LATE JOHN MONOGUE

Death of One of the County's Most Promising Young Men

The following from our Chandos correspondent will be read with sorrowful interest by people residing in the north, as well as many in town who have a personal acquaintance with Mr. John Monogue, member of the County Council, father of the deceased. It is needless to say that Mr. Monogue and family have the sincere sympathy of the entire community, in which The Times cordially joins. Our correspondent says;

It is with sincere regret that the community received the announcement of the death, under particularly sad circumstances, of James Monogue, Chandos, which sad event occurred on Monday morning, Jan. 18th, just one week following the death of a bright little baby brother. He had been suffering for some time with a lingering illness, but his many friends had always looked forward with some degree of hope to his return to health. He had never been confined to his room, but he appeared so much depressed by the little one's death that on the morning following this sad occurrence alarming symptoms developed, and he gradually sank, in spite of all efforts to arouse him.

The deceased was only eighteen years of age, and was the second son of Mr. John Monogue, ex-Reeve of Chandos, now a representative in the County Council. The deceased was well and favorably known in this community. Particularly bright and intelligent, and beloved by all who knew him, he leaves a large circle of relatives and friends to mourn his untimely demise. He was buried on Tuesday afternoon, at three o'clock from his late residence, when a large procession followed the remains to their last resting place in the Roman Catholic Cemetery.

The pall-bearers were all young friends of the deceased, associated with him in childhood, and had played their field games together during his young manhood. They were members of the Cyclonic football team, with which he was associated. They were;—Maurice Hobbins, Philip Tanner, Michael O'Brien, John Long, Simon Mahoney, Dennis O'Brien. The sympathy of the entire community is extended to the sorrowing family in this trying time of their double bereavement.

* * *

—In writing the announcement of the death of James Monogue I feel that I cannot allow this opportunity to pass without paying some brief tribute to the memory of one whose loss we all so deeply feel. Although I realize my inability to express it as I would like, I am confident that I voice the public sentiment when I say that he was a favorite with all as a boy at school; not only did he show unusual ability in his studies, but in his home he had a neatness—a natural thoroughness, which characterized all that he did.

Although sweet and amiable in his disposition, he had a seriousness unusual in one so young—a sweet, boyish face, beaming with intelligence. It's a sad regret that a life so full of promise should be so brief and to know the parents anguish as they laid him to rest in the silent tomb; the jewel is now with the God who gave it. We who loved him have no wish to remember him, as we saw him in the latter months, when our hearts were torn with conflicting hopes and fears. He rejoiced in his young manhood and the love of life was strong within him, and if he shrank at first from the knowledge that he must leave this world of beauty and sunshine and go down in the darksome silence, his eye seemed to bridge the chasm and see beyond the golden portals.

In the silence of a cold, gray winter's morning, as with desolate hearts we looked on his dying face, let us think that already upon his wasted brow he felt the breath of the eternal morning and heard the news break upon the farther shore, "He is gone but not forgotten."

A. L. H.

TO ABOLISH THE SALOON

THIS IS THE PROPOSAL OF PRESENT MANITOBA LEGISLATURE

The Attorney-General of Manitoba Maps Outs the Government Temperance Plans

Winnipeg, Jan. 30 — Attorney-General Campbell at the session of the legislature, outlined the proposed changes in the liquor law of Manitoba. The main planks of the government platform are;

1. A good license law properly enforced, 2. Total abolition of all saloon licenses, 3. Abolition of wholesale licenses in rural municipalities; 4. Stringent legislation dealing with interdicts; 5. Improvement of condition of bona fide hotels; 6. Elimination of undesirables as license-holders. There will be no change in hours.

THE DOMINION BANK

Splendid Showing at the 33rd Annual Meeting

We once again have to congratulate the stockholders of the Dominion Bank on the result of the year's operation, as set forth, in the financial statement presented at the 33rd annual general meeting of the shareholders of that popular institution, held on Wednesday last. The report is certainly a most gratifying one. The premium on new stock, $16,136, transferred to the reserve, has brought that fund up to $3,000,000, equalling the capital. The profits for the eight months were $331,673, which, after paying dividends up to January 2nd, left $121,647.15 to be added to the profit and loss account. This latter now stands at $474,903.03. Deposits bearing interest now amount to $22,290,718.67, and not bearing interest $3,983,432.66; total, $26,277,141.28 — Call loans are $4,121,660.11, and bills discounted and current advances $21,400,271. Branches have been opened at Fort William and St. Thomas.

ATE OUT

Boy Condemned to Die Ate His Way to Health

The fond mother's story of how powerful food built up her boy is intensely interesting.

"I have an adopted son who was 12 years of age at the time I first began to use Grape-Nuts. About that time three of the best physicians in Evansville told me he would die of consumption before he was 14.

"He was also afflicted with gastritis and this is what first called my attention to this famous food three years ago, for I knew Grape-Nuts was good for all stomach troubles.

"Since that time he has eaten nothing but Grape-Nuts for breakfast and supper and instead of being dead with consumption he now weighs 140 pounds, stands 6 ft. 7 1-2 inches high and has big, hard and well developed muscles, is in the second year of the high school and claims that where study used to be difficult it is now as clear as day and without any great effort on his part. The boy himself attributes his splendid health and active brain to his steady faithful use of Grape-Nuts food.

"We also have a grandfather living with us who is 80 years of age and although confined to his room by old age has gained considerably in flesh. His nerves that were a perfect wreck are now steady and right since he began to use Grape-Nuts food regularly. The nervous twitchings of hands and feet have entirely disappeared and when nothing else will remain on his stomach Grape-Nuts sets perfectly easy and after eating it at supper which he takes at 6 o'clock he does not feel the slightest weakness and rests well until his breakfast at the next morning." Name given by Postum Co., Battle Creek, Mich.

Grape-Nuts Food that always digests and gives out the needed nutriment works wonders, even in extreme cases like the above. There's a reason.

Look in each package for a copy of the famous little book, "The Road to Wellville."

WOULD BENEFIT THE BRITISH COLONIES ONLY

Britain Tax Her Food and we Put Protective Duty on British Goods

London, Jan. 29.—Lord Goschen, addressing the anti-protection meeting at Halifax last night, said he wanted the next act of the protection drama to be performed at Westminster, where opponent would meet opponent. The House of Lords was prepared to do its duty if the matter was not properly brought before the House of Commons. He was amused at the airs the tariff commission gave itself. He hoped Britain would never adopt the science of German fiscal legislation. Mr. Chamberlain's denial of imperial instincts to his opponents was an insult from a man who had given scant attention to our mighty Indian empire. We had learned what was the white man's burden there, but to a certain extent we had still to learn what was that of the colonies.

Sir Edward Grey, M.P., in an article in the Independent Review, says that Mr. Chamberlain must either give up his ideal of free trade within the Empire or part company with his colonial supporters. Mr. Chamberlain's clamp to hold together the tottering edifice of empire is that Britain should tax her food for the benefit of the colonies they to remain free to put protective duties upon British manufactures.

BY THE COBDEN CLUB.

The Cobden Club has issued a pamphlet of 100 pages in reply to Mr. Chamberlain. It attacks the scheme of colonial preference on the ground that there is no offer from the colonies, and no likelihood of a reduction in the colonial tariffs. The colonies would not agree to any limitation of their fiscal independence. Canadians expect a preference not only for their food importations, but for their manufactures imported to Britain, resulting in the dumping of her bounty-fed iron in lieu of Germany's scheme. The advantage to South Africa, New Zealand, and Australia would be very little, and would cause conditions similar to those that severed the American colonies from Britain.

Mr. Austen Chamberlain, speaking at King's Norton, said the chief reason why foreign countries had outstripped Britain was that foreign business men had some security for their capital.

AGREE TO DIE TOGETHER

Husband and Wife Carry Out Compact of Death

Pendleton, Oregon, Jan. 29—The bodies of John T. Brown and wife, of Reinbeck, Iowa, were found in the hills today. Mrs. Brown had been shot in the breast and her throat cut from ear to ear with a razor. Brown had shot himself in the head after swallowing poison. A note found said they were tired of life and had agreed to die together. Another note, written by Mrs. Brown, and addressed to "Dear Brother," said; "When this reaches you I will be no more. I have found another man in Oregon I love better than my husband."

INDIANS HOLD CRUEL DANCE

Braves in Manitoba Slash Themselves with Knives

Yorkton, Manitoba, Jan. 29— Edward Fisk, of Fishing River, brings word of a potlach held by Indians, who were inspired by whisky supplied by a trader. The braves slashed themselves with knives. One Indian got the others to cut the tendons of his back, but was unable to bear the pain. The dance continued three nights, over 100 Indians taking part, and the settlers in the vicinity left their homesteads. Eight North-West police started to round up the Indians, and arrested Gayfahasageung, 90 years old.

NEW TELEPHONE SUBSCRIBERS

Names of Citizens who Have Been Added to Telephone List

The people who use the telephone will do well to note the following list of new subscribers and numbers not in the directory;

Local Sports

Belleville defeated Picton last night by 16—6, winning the championship of District No. 2.

Peterborough Juniors were defeated at Port Hope by 7—6.

The T.A.S. play Lakefield on Monday night.

Winnipeg, Jan. 29.—Winnipeg Rowing Club hockey team again defeated the Victorias tonight in the senior series by 6 to 4. It was a very rough match.

Magnus Flett, one of the Victorias star players, had his leg broken early in the game.

Toronto Star; Manager "Billy" Breen from Peterborough that if Artie Edmunds is looking for a boxing bout he will match Pete Barry against him at 135 lbs. ringside for $50 a side. Mr. Breen says "This is business, not advertising, and if Mr. Edmunds doesn't desire the match it is open to anyone else in Toronto, first come first served." Mr. Breen can be found at the Oriental Hotel, Peterborough.

Edmunds stated today that he would accept the challenge if the amount was raised to $100 a side and Mr. Breen posts his money in the hands of a responsible party. Edmunds says he is ready to fight or wrestle at 24 hours notice.

MAYOR OF CHICAGO FREE

AN ORDER FOR HIS RELEASE IS GIVEN

A Declaration That Carter Harrison is in No Ways Guilty of Chicago Fire

Chicago, Jan. 30— Mayor Carter H. Harrison was yesterday afternoon ordered by Judge Richard Tuthill to be immediately discharged from custody in connection with any responsibility for the wholesale loss of life in the Iroquois theatre fire.

The judge declared that the mayor was in no way whatever guilty or liable, and that the coroner's jury in ordering Mayor Harrison held to the grand jury had put an unjust stigma upon the mayor, who had failed in no particular whatever, either in commission or omission.

WHAT HARRISON SAID.

Following his release, Mayor Harrison made a statement saying; "The only possible feature which this jury were able to find connecting me with the Iroquois fire disaster was the alleged negligence and incompetency of my appointees, Fire Chief Musham and Building Inspector Williams. I want to call attention to the fact that Chief Musham has been connected with the Chicago Fire Department for forty years, beginning at the bottom of the ladder and winning his way by gallant and heroic conduct of a lifetime. When the position of Building Commissioner became vacant, I invited the builders club, the association of architects and various other non-partizan professional organizations to nominate a man. They named in nominating Mr. Williams, a Republican and gave me the strongest testimonials. The imputation of guilt upon these men is entirely unjustifiable, but to strike at me, over their shoulders, is little short of infamy."

COME, GENTLE SPRING

Tell us, ye winged windy winds,
That through our whiskers blow,
Is winter never going to end?
That's what we want to know.

Will warmer weather never come?
Oh, do not say us nay.
Or must we all be friz to death?
Say gentle zephyrs, say.

Shall we be carried to the skies
On flow'ry beds of ease,
Or stand in drifts up to our eyes
The while our marrows freeze?

Come gentle spring, list to our song
We'd have you know that if
You don't appear ere very long,
We'll all be frozen stiff.

A Legislators Pinch

John H. Carnegie, M.P.P., for East Victoria, arrived at Toronto Monday night, and is the hero of the hour. He left his home on Sunday night for Coboconk five miles away, on foot, as the snow was too deep for horses, to catch the train that makes Toronto connections. Leaving Coboconk early Monday morning, the train had proceeded only a short distance when it stuck in the snow. To go back was not to be thought of, and the legislator set out out to walk and catch the Lorneville Junction train, some 23 miles away. After struggling with snow drifts, Mr. Carnegie got to Lorneville Junction in an exhausted condition, having made the 23 miles in five hours along the railway line. The train for Toronto had been held at that place for the Orillia connections, and this enabled the Victoria member to arrive here last night. Several of the members are snowed up at different points en route to Toronto.

EGG FAMINE OVER AMERICA

Chicago, Jan. 30 — Unless the cold spell which burdens Kansas, Missouri, Arkansas and other great egg producing states loosens its grip an egg famine is probable. The present supply in the hands of Chicago merchants is entirely insufficient to meet demands. Receipts have been reduced almost to the vanishing point.

New York, Jan. 29— Vegetarians here are having rather an expensive season in supplying themselves with food. All kinds of green vegetables are high in price and scarce in quantity, owing to the long continued cold, and people in ordinary circumstances have been compelled to fall back on canned goods. Spinach costs about as much as mushrooms do ordinarily. Lettuce is 15 cents a head, while celery, peas, beans, and strawberries, all of which generally are plentiful in the markets, are now almost unobtainable.

Eggs of the ordinary quality, not strictly fresh, are bringing 50 and 60 cents a dozen. Dealers say no fresh supplies are coming in.

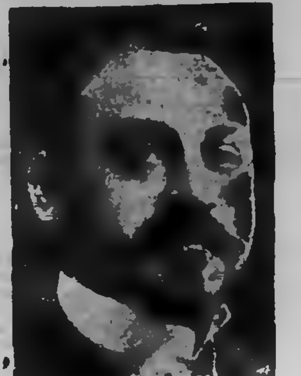
CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has



DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

[illegible] paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month, and to outside points at $3 per year strictly in advance.

PETERBOROUGH, JANUARY 30, 1904

IMPORTANCE OF CREMATION

Some time during the year 1880, the question of building crematoriums throughout the United States for the incineration of human remains, was animately discussed by the people and the press. The burning of human bodies may be said to have been the general practice of the ancients, with the exceptions of Egypt, where corpses were embalmed, Judea, where they were carefully placed in sepulchres, and China, where they were buried in earth.

Without doubt the practice of cremation in modern Europe was prevented in a large measure by the doctrine that the Christian's body was redeemed and purified. With the clergy, the disposal of bodies by fire has always been repugnant.

The rapid growth of cities, and the proximity of dwelling places to cemeteries should end the sentiment in regard to placing human bodies in the ground where they become dust, while in the "sweet sleep and calm rest" which the old prayer that the earth might lie lightly has associated with man's burial. Careful investigation has demonstrated that a certain amount of irrespirable gas will escape into the air, or into sewage drains, and thus pass into houses. Water is also contaminated from the same terrible source.

In 1874, a congress at Milan, Italy, resolved to petition the Chamber of Deputies for a clause in the new sanitary code, permitting cremation under the supervision of the syndic of the commune. Scientists in Switzerland, Germany, Austria, France, and Great Britain have frequently spoken in favor of cremation.

A correspondent in the Philadelphia Public Ledger in discussing cremation and contagion, illustrates the dangers of cemeteries. He quotes the following instances;

"In 1828 Professor Bianchi explained how the dire reappearance of the plague at Modena, Italy, was due to an excavation made in some ground where 300 years previously the victims of the plague had been interred.

"At Evam, in Derbyshire, England, the digging up of the plague burial grounds caused an immediate outbreak of the disease, carrying off thousands.

"The cholera which visited London in 1854 was attributed to the excavations for sewers, in the site where the victims of the plague of 1665 were buried.

"In 1848, when the parish church of Minchinhampton was rebuilding, the superfluous soil of the burial ground was disposed of for fertilizing the neighboring gardens. The result was the loss of nearly half of its inhabitants.

"The outbreak of the plague in Egypt in 1823 was due to the opening of a disused burial ground at Kelloub, fourteen miles from Cairo. Two thousand perished in the village, and Cairo suffered fearful mortality.

Every municipality should own a crematorium. The presence of such a structure would at least accustom the public to the idea that incineration, which is now decidedly repulsive to many relatives of the dead, is a safeguard against disease germs, which live in the soil of cemeteries long after bodies crumble to dust.

METHODISTS AND AMUSEMENTS

The Iroquois theatre disaster has had many and far-reaching effects. It has opened up many questions on widely different subjects. Not among the least of these is what will be the modifications, if any, made in the principles of the Methodist church against theatre-going? It is well known that two Methodist pastors, Rev. George H. Studley and Rev. C. L. Roberts, and nearly 100 members of the church lost their lives in the theatre fire. These victims were not hypocrites stealing into wickedness under false colors. They went openly and probably without any qualms of conscience. That there is a change of feeling on the part of many sincere, devout Methodists in regard to theatre and other amusements, once classed as frivolous, is evident from the fact that at the coming conference of Methodists at Los Angeles next April, one of the topics to be discussed in on this very point. Time was when even the discussion of such a matter would not have been tolerated.

The rigid rules of the Methodist were formulated at a time when theatres were of a low character compared with those of today. Self-respecting people rarely attended them and the churches generally discountenanced them. Since then times have changed and theatres have also changed. In many ways they have become a powerful ally to morality, if not to religion. Now there are theatres and theatres, and discrimination should be made. The need, too, for recreation and diversion should be recognized in the church as out of it, and persons of acknowledged integrity should be allowed some liberty of conscience. The Methodist church has a difficult question to face, but it has faced many serious problems in the past and has dealt with them heroically and at the same time with good common sense. It will doubtless cope with the present matter, steering clear of laxity on one hand, and undue interference on the other.

USE
DIAMOND DYES
If Your Toboggan Suit is Soiled or Faded.

Thousands who love the sport that tobogganing affords are now using Diamond Dyes to renew and beautify last year's faded and dingy suits. Diamond Dyes dye anything any color. The only warranted dyes in the world.

DISTRICT NEWS

NORTH SMITH.

—Mr. Beamer, who resides with her mother Mrs. A. E. Kennedy, is at present seriously ill. Her many friends will be pleased to learn of her speedy recovery.

—Quite a number are suffering from severe colds in this neighborhood.

—A very pleasing event took place at the residence of Mr. Absalom Northey, on Wednesday evening, Jan. 20th, it being the marriage of his only daughter, Violet, to Mr. C. B. Kennedy, only son of Mr. A. B. Kennedy, president of the Buckhorn Dairy Company. The bride was very becomingly attired in a dress of steel grey, and wore the customary bridal veil. The duties of bridesmaid were suitably performed by Miss Georgie Nugent, cousin of the bride, who was also suitably attired, both carried a handsome boquet of flowers. The duties of groomsman were ably performed by Mr. Walter Northey, brother of the bride. The wedding march was played by Miss Fisamie Kennedy, as the bride entered the parlor leaning on the arm of her father. The marriage ceremony was performed by Rev. Dr. Mettler, pastor of the Methodist church, of which the contracting parties are both members, in the presence of over 50 invited guests. The presents to the bride were both many, useful and costly. The happy couple start out in life under the most favorable circumstances, and with the best wishes of a host of friends.

KEENE.

—Mr. and Mrs. I. Lepoint and children of Trenton, were the guests of Mrs. Roach for the past week.

—Mr. P. Gillespie, of Hastings, was in the village on Saturday.

—The carnival on Friday evening was not a success owing to the bad weather. About one hundred people braved the storm, and about 20 were in costume. The prizes were awarded as follows—

Best dressed gent—Fred Eason.
Best comic gent—George Fife.
Best dressed lady—Mrs. A. D. Anderson.
Best comic lady—Miss A. M. Campbell.
Best dressed girl—Miss M. Walsh.
Best dressed girl—Miss Mabel McCann.
Best dressed boy—Norman Taylor.
Best comic boy—Thos. Campbell.
Mens race—James Quinn.
Boys race—Leo Walsh.

—Miss Flora Roach left last Monday to visit friends in Buffalo.

—Misses E. and Jennie Nelson have taken up residence in the rooms over the post office, lately occupied by Mr. T. Laing.

—Mr John Lang, M.P., has become a citizen of our village, having moved into the house he recently purchased from Mrs. Miller.

—Mr. T. Clitheroe has finished painting Mr. J. Moore's handsome residence. He has also grained the dining room in the Victoria House.

—Mr. L. Denny, of Peterborough, was the guest of Mr. T. Mulcahey during the past week.

—Miss Annie McIntyre is the guest of Mr. and Mrs. Parks at Inglewood.

—Mr. Ed. Wright is visiting friends here at present.

—Miss M. McLaughlan is visiting with friends in Burnley for a couple of weeks.

—People are getting in their supply of wood for next winter, and farmers who are cutting it find ready sale and good prices for it. Green hardwood sells at $3.50 a cord, and soft wood $2.50 to $3. The large amount of snow in the swamps at present makes it somewhat difficult to haul wood out.

—We are sorry to report that Mrs. McFarlane is still confined to her room and hope she will soon be around again.

—The Lakefield hockey team drove down on Monday evening and played their first match with Keene in the T.V.L. The score was 16—3 in Keene's favor.

Ayer's Hair Vigor
Always restores color to gray hair, always. Makes the hair grow and stops falling hair. A splendid dressing. J. C. Ayer Co., Lowell, Mass.

APPLICATION TO PARLIAMENT

Notice is hereby given that an application will be made on behalf of the Town of Peterborough to the Legislative Assembly of the Province of Ontario at the next session thereof for an act for the following purposes;

1. That the said Town of Peterborough may be incorporated as a City, with all the rights, powers and privileges of cities under The Consolidated Municipal Act 1903.

2. To declare that it has been and shall be lawful for the Commissioners of the Peterborough Town Trust, with the approval of the Municipal Council, to invest a portion of the sinking fund received by them in the purchase of the buildings and other permanent improvements erected and made by tenants under lease from the Commissioners on any land vested in the Commissioners.

3. To provide for the vesting of the real estate and sinking fund which belonged to the Corporation of the former Village of Ashburnham in, and the management of the same by, the Commissioners of the Peterborough Town Trust.

4. To amend section 3 of 2, Edward VII., chapter 69, so as to authorize the Council without the assent of the electors to borrow sums not exceeding $10,000 in any year for the purpose of making extensions, repairs, improvements and alterations in the waterworks, and to pass by-laws for that purpose.

5. To ratify and confirm By-Law number 1053 of the Corporation of the Town of Peterborough, entitled, "A By-Law to aid the Colonial Weaving Company" being a By-Law to fix the assessment of the said Company at $4,000 for a period of ten years from the first day of January, 1904, upon the conditions in said By-Law mentioned.

6. To ratify and confirm By-Law number 1056 of the said Corporation, being a "By-Law to authorize the purchase of certain real property required for the use of the Corporation of the Town of Peterborough and to borrow the sum of $10,000 to pay for same and to authorize the sale of any part of said land not required for Municipal purposes."

7. To authorize the Council, without the consent of the electors, to borrow money for the purpose of erecting an Isolation Hospital or Hospitals, and to pass By-laws for that purpose.

8. To confirm the purchase by The Little Lake Cemetery Company of part of Lot number Forty-six and Lots numbers Forty-seven and Fifty-seven on Registered Plan No. 50 for the Town of Peterborough.

9. To make alterations in the number term of office, manner of appointment and duties of the Town Trust Commissioners.

10. To provide for the reduction of the number of members of the Board of Education.

11. To provide for the election of Aldermen for a term of two years and for one half of the members of the Council retiring each year.

12. To provide for the appointment by the Council of a Court of Revision consisting of three members, none of whom shall be a member of the Council.

13. To ratify and confirm By-Laws passed by the Council of the late Village of Ashburnham exempting the property of The Dickson Company, of Peterborough, situated on Burnham's Point, and the property of The Canadian Ultimator Company, Limited, situated on the south side of Elizabeth Street, from taxes, except school taxes, for a period of ten years, upon the conditions in said By-Law mentioned.

Dated at Peterborough this sixth day of January, 1904.

E. H. D. HALL,
Solicitor for the said Town.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

IS THERE CERTAINTY IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.

2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.

3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.

4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.

5th—By having now on the dumps are estimated to be worth over twenty thousand dollars, and all taken from development work.

6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.

7th—By being able to ease a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

A DOLLAR DRAFT WITH EVERY BOTTLE

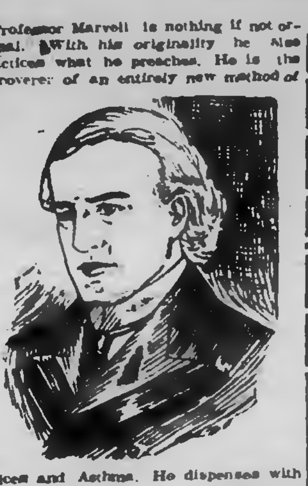
CATARRH

Recognizes the Fact That Scores of Sufferers Outside of Toronto Cannot Avail Themselves of Free Trial Treatment at His Offices.

A BONA-FIDE DOLLAR DRAFT

Is Enclosed with Each Bottle of the Remedy, and the Buyer is Invited, in Plain Language, to Fill in His Name and Present it for Payment Should the Treatment not Prove Satisfactory.

Professor Marvell is nothing if not original. With his originality he also practices what he preaches. He is the discoverer of an entirely new method of



treatment for Catarrh, Deafness, Head Noises and Asthma. He dispenses with the old fogey inhalers, blowers, atomizers, snuffs, powders, and noxious stomach nostrums. None of these are used in his principle of cure. He believes all these have had their day, and, best of all, proves it by testimony from the people who have used his new system of treatment. Prof. Marvell says, "The people who suffer from this loathsome disease have been living in a kind of natural faith, a natural hope and expectation that, some day, if they lived to see it, some new method of treatment would be discovered and the end of the old system would come suddenly. And it has come. Marvell's method of treatment for Catarrhal trouble is as far ahead of the older systems as the electric light is over the tallow dip, or the electric car over the old stage coach. The hope of thousands of victims of this ever-increasing and loathsome malady has come at last. It has set the people of Canada talking as never before. Hundreds of men and women who had failed to secure benefit under the old fogey nostrums have crowded Marvell's offices from the first day of opening. They have taken the remedy home, have been given free treatment, and have come back to praise it, as honest men and women should praise a meritorious article after benefits received. The testimony is on file in Marvell's offices. The names and addresses of a score of people who say they have been cured of Catarrh of the Head, of the Throat, the Stomach, Deafness, Head Noises and Asthma. Marvell knew it! Knew what his remedy would do for every sufferer.

DRS. KENNEDY & KERGAN

The Leading Specialists of America. 25 Years in Detroit. Bank Security.

Nine out of every ten men have been guilty of transgression against nature in their youth. Nature never excuses, no matter how young, thoughtless or ignorant he may be. The punishment and suffering corresponds with the crime. The only escape from its ruinous results is proper scientific treatment to counteract its effects.

The DRAINS, either by nightly losses, or secretly through the urine, must be stopped—the NERVES must be built up and invigorated, the blood must be purified, the SEXUAL ORGANS must be vitalized and developed, the BRAIN must be nourished. Our New Method Treatment provides all these requirements. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers disappear; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. We invite all the afflicted to call and consult us confidentially and free of charge. Cures Guaranteed or no Pay. We treat and cure: Varicocele, Blood Diseases, Stricture, Gleet, Emissions, Urinary Drains, Spermatorrhoea, Unnatural Discharges, Kidney and Bladder Diseases.

CONSULTATION FREE. BOOKS FREE.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $20.13 ore 3 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $20.23 to $12,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

A HEROINE FOUND.

CARRIE ANDERSON TELLS STORY OF IROQUOIS FIRE

PRISONER ON HIGH ESCAPE

Foot Caught and Enveloped in Flames She Guides Ladder

Chicago Jan 29—At the Samaritan Hospital her head and left side swathed in bandages, lies Carrie Anderson, the child whose deed of heroism at the Iroquois fire was recounted in brief during the coroner's inquest, but whose name has never been learned until yesterday.

Through the steadfast bravery of this 14-year-old girl at least fifty lives were saved on the fatal afternoon. She it was, who, despite the fact that her entire [illegible] side was being lapped by flame, caught the end of the ladder thrown across the alley from the Northwestern University Building, and guided it to a fire resting place on the fire escape of the second balcony. Across this ladder many men, women and children scrambled to safety from the inferno behind them.

She was in the balcony with her mother who was employed as a cleaner at the theatre, and while she escaped, her mother perished. The child does not know yet that her mother is dead, and thinks that she is merely badly injured

GIRL TELLS OF HER ESCAPE.

"I was in the highest balcony with mamma," she said yesterday, "and when the fire began I jumped up and tried to pull mamma with me. We got to the fire escape all right, and I got out on it. I had hold of mamma, but she did not reach the open air, out of all the smoke, with me, and I saw her kind of fall back. I know she got hurt, because she has not been to see me.

"I fell on the escape and my foot got caught so that I could not stand up. I was lying on my right side, and the fire burned me dreadful on my left arm and leg and head, but I was too excited to think much of that then. There were only two other people on the escape with me. One was a woman down below me, who couldn't do anything, and perhaps she was dead. Just beside me was a man. He kept moaning all the time.

"'You don't realize what this is, little girl,' he said to me, and than a few minutes after he began moaning and crying to God. That was when I was burning, and he was, too. All this time I had my foot so tightly caught I couldn't move to get further away from the wicked fire, but, anyway, there was no place to go unless I jumped down into the alley, where I could see people away below me. Then the man lay very still and the fire was worse over us.

DRAGS UP LADDER, RESCUED.

"Then all of a sudden I saw a ladder in the air coming from the building opposite us. I don't know how I caught the ladder, because I can't remember anything clearly after that, everything hurt so. But I caught it some way, and and then the man came across to me and pulled me out from where my foot was fastened. They dragged me over the ladder and a whole lot of people came after us."

After her splendid deed, Carrie was taken to the Northwestern Building and given temporary relief. Then she was hurried to the Samaritan Hospital, where she has been ever since. She has suffered much, but Dr. L. B. Baldwin says she is doing well and that she will be able to have most of the remaining bandages removed within two weeks.

Carrie's father is a Norwegian, both her father, Alex Anderson, and her grandmother, having been born in Christiania. Her mother was also a Norwegian girl, who came to America from her native land to marry young Anderson, who had reached Chicago three years previous to her arrival in 1886, and who had been her sweetheart in Norway. The little heroine, herself, was born in Chicago. She is now in the sixth grade at the James Otis school and lives with her grandmother and father at 292 West Erie street.

◆

OPPOSE CANADIAN CATTLE

The London Journal quotes Lord Mayo as saying: "If Canadian store cattle are admitted to the English market English stockmen may all take third-class tickets to Holyhead at once. He himself would fight till he died to prevent the unrestricted importation of Canadian cattle."

◆

LOAD FELL ON HIM

Lindsay Post—A young man named Joseph Found, residing with his parents on the Bryson farm, about six miles south of Little Britain, lost his life on Tuesday. The unfortunate fellow was driving grain to Mariposa Station elevator, and being seated on top of a heavy load, the badly drifted road caused the load to upset, with the result that he was pinned in the deep snow underneath the grain.

The accident happened a short distance south of Little Britain, and when discovered some time later young Found was completely buried out of sight, the horses standing in the same position as when the load upset. No particulars are available, but it is supposed the victim of the accident, being unable to extricate himself, met death by suffocation. Deceased was about 24 years of age and a single man.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values, $12.50. This being a general sample taken from the dump. The other two assays are $62.66 and $79.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet further it would come in contact with a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location works and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

H. C. LANE, President. **F. F. NORTON**, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body,

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,250 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $4.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $100,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 200-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure the gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

consideration and a Christian charity would settle almost every contention and strife in the industrial world. Wise and unselfish arbitration would change the whole aspect of each individual case by itself, and the whole horizon of the world of labor—yes, it would drive every cloud from the sky, and heaven's own blue would reflect a world of peace and love.

Union No. 10 had learned its greatest lesson in an hour of sublimest experience. Their employers discovered their fault and made most sacred promises. The relations were never so harmonious, and the contentment was never so sweet.

The next Sunday evening two of the firm and the superintendent were in Mr. Dowling's church, revealing their respect for him, and appreciation of his action in behalf of the men. They did not condemn him for coming in the committee of the men, but honored him for it, and wanted to hear him. They had said to each other: "He is a manly fellow, different from some ministers. He does not live in his pulpit. He lives among men. He is not one of your droning, sniveling specimens. He is alive."

That was the very Sunday evening when one of the greatest manifestations of the power of the Divine Spirit of God's direct answer to prayer were given to David Dowling.

It had been a simple Gospel sermon about the young man who had kept the whole law, and to whom Christ said, "One thing thou lackest." He was dramatic in his style, and his picture of this scene and a demonstration of Christ's anxiety and love for the noble fellow was most vivid.

When he came to the tragedy of the scene, where the young man would not surrender, and went away in sorrow, it seemed as if everybody in the building could see the very event itself.

One of Mr. Dowling's hearers saw himself in his morality going away from Christ, and in sorrow, too. It was Henry Fielding. He was saying to himself:

"It is myself; it is myself. That is just what I have done; I am doing it to-night. Why not give up? — I am in the wrong."

A hundred times the same thoughts and convictions shot through his very soul. He tried to drive them away, or at least not let his feelings be apparent to any one else.

Immediately after the service Grace came up to him, and with the same expression of delight to meet him, she said:

"Oh, was not that a splendid sermon? How striking the picture!"

Henry had moved a half-dozen times while she was saying only those few words, but not away from her. He hastened to make some response about her father's health, as he had been ill for some time.

She answered him, but was too much interested in something else just then. She came to say it. She hesitated. She said, "I will," and then looked into his face, and said:

"Mr. Fielding, I wish you were a Christian."

Henry was never so bewildered in his life. He did not expect it from her. He could not just realize it. He did not know what to say. He turned his head away for a second and then looked in her eyes only to discover a tear.

It was a more brilliant and valuable jewel than the diamonds in her ears or the ruby upon her fingers. What could he say? There was only one thing to say.

If he would be honest before a girl who dared to do that, and before the girl whom he even dared to love, he must say only the one thing.

In a partial whisper, he replied:

"I wish I was, too, but do not talk about it to-night. You have said enough," he continued.

Just then, in the plan of God, Elsie appeared, and said:

"Henry, are you most ready to go?"

"I am afraid not yet. I wonder if you could not go alone to-night, sister. I want to see Mr. Dowling before I go, and I do not know how long I shall be."

"Certainly," said she.

"I will see her half way," said Grace.

"Yes, we will take care of each other," added Elsie.

Henry turned away as if anxious to go, and very nervous in every movement.

"I wonder what he wants of Mr. Dowling to-night," said Elsie.

"Never mind," answered Grace, "you let them go. I think I know."

"I can guess what you mean. I am so glad. Do you mean that he wants to talk to Mr. Dowling about becoming a Christian?" asked Elsie.

"Yes, that's just it, and we will both pray for him. I know it will be all right," said Grace, with a mingling of earnestness and joy.

Henry had already approached Mr. Dowling, and before he had opportunity to make his desire known, the warm hand of the preacher had grasped his, and the warm heart had gone out after him again, as often before, and now the direction of the Spirit was heeded, and he said:

"Henry, I was preaching to you to-night. Christ loves you. You were that young man, moral and good, but you are going away from Jesus, and I know you are not happy either. Why not make the surrender? You know what is right—do it, and do it right away. If you have faults to find with me and the Church, forget them now. You cannot find any fault with Christ."

Mr. Dowling was going on in his enthusiastic exhortation and plea when Henry, with his eyes to the floor, interrupted, and said:

"I have not as much fault to find as formerly. You can depend upon that. I was mostly in the wrong—I did not understand. Yes, I did not understand myself, nor you, nor the Church, nor Christ, nor anything else, as I should. I look at it differently now."

"I am so glad to hear that," said Mr. Dowling. "Come into my room for a moment, won't you?"

"Yes," said Henry, in a manly, determined tone of voice.

As they walked toward the door of his room, Mr. Dowling said:

"I am very tired to-night, but I will stay here all night, Henry, if you will only give your heart to Christ."

When once the door closed behind them, and the key was turned in the lock, Henry Fielding felt that he had never really understood a minister.

What occurred ought to be only for angel vision. It was just like Christ with the young man, or Nicodemus in the night-time. They were both honest and earnest, and in such a case the result is inevitable.

Mr. Dowling simply opened his heart at the first, and told of the meaning and the power of Christ in his own life. How temptation and sin swarmed around him, the same as any other man. He said:

"Henry, don't think that I live in a different world from yours; and that what is real to me, will not be so to you. You will have one enemy to fight, and I will have another, 'but His grace is sufficient.' You do not know what I pass through in battle, but I am determined to have a character at any cost, to anything else in my life. I used to be anxious for a reputation, and even was so low in my aim at one time that I wanted only a good salary, but all that is changed. I am crying to God every day to make me like Christ, and I will pay the price. This is always part of my prayer, 'Nearer my God, to Thee, e'en though

(To be continued.)

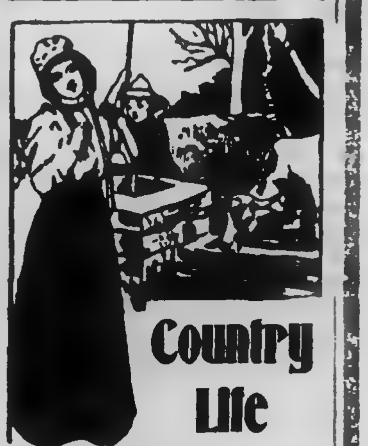
POWERS ASCBRIBED TO NEW ELEMENT

RADIUM AS MEANS TO DETERMINE THE SEX OF CHILDREN

Russian Scientist Say Powder Magazines Could be Exploded by Rays at Long Distances

St. Petersburg, Jan. 29.—Prof. Rince Tarkhanov, the well known scientist, lecturing recently before the Military Association, made some interesting ties of radium. He presented to his audience two cancer patients who had been cured of malignant growths on the face by the use of radium, and expressed the opinion that the problem of determining the sex of children which Prof. Schenck had failed to solve, will shortly be settled by the aid of radium.

The Prince added that he had prevented the development of hydrophobia in dogs inoculated with rabies virus, by using radium. When large quantities of radium were available, the Prince contended the whole system of modern warfare would be revolutionized, as powder magazines whether in forts or in the holds of vessels, would be at the mercy of radium rays, which could explode them at long distances.



Ought, it would seem, to give exemption from the diseases which prey upon the residents of thickly populated cities. But there is no exemption from disease, and in the country, as in the city, one may see the cheeks grow hollow and the eyes grow dull while the frame wastes away with that terrible disease, consumption.

Weak lungs are made strong by the use of Dr. Pierce's Golden Medical Discovery. It cures obstinate and stubborn coughs, bronchitis, bleeding of the lungs and other symptoms which, if neglected or unskillfully treated, terminate fatally in consumption. The action of Golden Medical Discovery in the curing of wasting diseases is entirely philosophic. Emaciation, and consequent loss of weight, are among the most striking symptoms of what are known as wasting diseases. The body is not being adequately nourished, and the cause of this lack of nourishment is not lack of food but lack of ability in the stomach and the other organs of digestion and nutrition to prepare the food for the assimilation and nutrition of the body. Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and the organs of digestion and nutrition, and so enables the body to be nourished back to strength in the only way by which strength can come; that is, by food perfectly digested and assimilated.

Dr. Pierce's Golden Medical Discovery is a temperance medicine. It contains no alcohol, neither opium, cocaine or any other narcotic.

Accept no substitute for "Discovery." There is nothing "just as good" *for you*, though many things may pay the dealer a larger profit.

CAUGHT COLD.

"The first day of this year," writes Mrs. Kate Sebey, of 718 St. Paul Avenue, Milwaukee, Wis., "I caught a heavy cold, which settled on my lungs and brought on a hemorrhage. From that time on until the first of April I bled from my lungs five different times. I was so weak and undone I could only do the lightest work. The doctor told me I was going into consumption. My breath was short and at times I could hardly get my breath at all. This is the state I was in when I began to take Doctor Pierce's Golden Medical Discovery. After the first bottle I was much better, and I could walk two or three blocks without trouble. My breath was not so short and I was much improved. After taking four bottles I could work all day, and I never felt better in my life. I think your medicine the best in the world and I recommend it to all who are troubled as I was."

WILL MAKE AFFIDAVIT.

"I was sick for about three months, had chills, fever, and coughed a great deal," writes Mr. W. L. Brown, of McDearman, Jackson Co., Tenn. "Most of my neighbors and friends thought I had consumption. I was reduced in flesh, and was very weak—only weighed 130 pounds; my physician thought there was little hope for my recovery.

"My wife went to the store to get some antifebrin, quinine, etc., for me and a friend of mine (Mr. W. W. McDearman), who had been taking Dr. Pierce's Golden Medical Discovery recommended this medicine for me. Finally I decided to use it, after my physician told me that it would be good for me. I sent and got one bottle, and before all was taken I weighed 150 pounds—a gain of 20 pounds. I am still taking the Golden Medical Discovery, have taken nearly two bottles, and now weigh [illegible] pounds, which is more than I ever weighed. I am still gaining strength and taking the 'Discovery.' I wish to say that this is a recent recovery, that only two months ago I only weighed about [illegible] pounds.

"I can and will make affidavit to this full statement any time. If you wish to use this as a testimonial do so, and I will answer all letters from inquiring sufferers."

Dr. Pierce's Common Sense Medical Adviser, containing 1008 pages, and over 700 illustrations, is sent free on receipt of stamps to defray expense of customs and mailing only. Send 31 one-cent stamps for the book in paper covers, or 50 cents for the book in cloth binding. Address Dr. R. V. Pierce, Buffalo, N. Y.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 1-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 28th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-22-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

A HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price tha will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

REFERENCES—The Governor of the State, and any bank in Boise, Idaho. Write the Company for particulars. Address

A PROTEST FROM BRITISH COLUMBIA

EDWARD MUSGRAVE WRITES A LETTER TO LONDON TIMES

AMERICANS NOT FRIENDLY

Mr. Musgrave Declares Britain's Friendltness to Them Rouses Feeling in Canada

London, January 29.—Edward Musgrave, of Victoria, B.C., heir presumptive to the Musgrave baronetcy, in a letter to the Times, says that the great majority of Americans feel no friendship toward the English as a people. Americans have never forgiven the past, are jealous of the present, and bitterly resent our status and progress. They have rejoiced and would again rejoice in any humiliation or difficulty affecting Canadians. Mr. Musgrave adds that the object of writing, presumptuous perhaps in the case of an obscure individual, is to point out the existence of a feeling in British Columbia, which may become a serious danger to the good relations of the Dominion with the Mother Country. The comments of the British press are a bad business, and there is disappointment that any decision would be thought better than the continuance of a danger to American friendship. And Lord Brassey's speech in Canada, the burden of which was whatever steps we take in our commercial affairs, we must be careful not to offend our friends, the Americans, says Mr. Musgrave is not calculated to allay this feeling.

MR. YERBURG'S VIEW.

Robert A. Yerburg, Conservative M.P. for Chester, speaking at Blackburn, said he regarded the colonies as prospective nations. Canada, in the course of years, might vie in splendor with the United States. It would be impossible to make arrangements satisfactory to each colony. Inaugurating any system of tariff would be inserting the thin end of the wedge to split the Empire to pieces.

LORD ONSLOW'S IDEA.

Lord Onslow, speaking at Camberwell, said that a large number of industries in the Colonies were not yet called into being. The Colonies desired and wished, if we can give something equivalent, that they shall take these products from us instead of manufaturing them themselves.

A CANADIAN IN TROUBLE.

J. Hernibrook, of Strathcona's Horse, a native of Montreal, who returned from South Africa a week ago, while temporarily insane, on Sunday, at Brighton jumped from a window. He fell 30 feet, sustaining shocking injuries and is now in Sussex County hospital, in a well-nigh hopeless condition.

Hornibrook was not a Montreal man, and not in the Strathcona Horse. He was a member of the 48th Highlanders, Toronto, and joined the First Contingent, becoming a member of C. Company.

CANADIAN SYSTEM STOCK GAMBLING

ISSUE OF COMMON STOCK AT NOMINAL PRICES OBJECTIONABLE TO ENGLISHMEN

London, Jan. 27.—Mr. T. W. Cook, addressing the Dudley Chamber of Commerce in reference to his recent visit to Canada says the issuing of common stock merely at nominal prices to bondholders in Canada was a matter which struck the ordinary Englishman as a most objectionable feature. It brought into commerce a gambling element. By this wild method prices were rushed up for common stock and depreciated simply by rumors. The announcement of a quarterly dividend was one of the factors that had a most damaging effect on the real commercial status and business of the Dominion Steel Company.

Effect of Preference.

Professor Ashley, lecturing at the Chartered Institute of Secretaries, in reply to a question by the Secretary of the Cobden Club, said it seemed, according to the best informed opinion, that the Canadian preference had increased certain of our exports to the Dominion, especially in textile goods, and had prevented the decline of other exports.

Must Make Sacrifice.

Member of Parliament Long, speaking at a meeting at Malmesbury, said, "We will not keep our colonies for ever unless we realize that we must meet their needs. The consummation of this great idea might involve some temporary sacrifice on the part of the people of the Mother Country, but is it not worth the while to make some sacrifice to retain our great heritage and keep and consolidate our Empire?"

Promise to Galway.

Charley Devlin told his Galway constituents last night that he had been promised that when the Canadian Government came to consider the matter of a terminal port for the Canadian fast Atlantic line, it would not settle the question before going fully into the claims of Galway port. Had Colonel Lynch again been allowed to sit in Parliament, he said, he would have been the first to have stood back to allow his friend to come forward again.

State-Aided Cables.

Sir Wolfe Barry, presiding to-day at a meeting of the Eastern Telegraph Company, said: "The policy of establishing State aided competition against a commercial undertaking is an unsound policy. It has proved so in the case of the Pacific cable, which is not in a profitable state, and is a serious d'arorangement to any commercial cable enterprise. It is an anomaly that we should have to compete with British as well as foreign subsidized cables."

Black Watch May Come.

The King has sanctioned the proposed visit of the Black Watch Band to Canada during the coming Industrial Exhibition.

—It is reported that in the woods of the back country, forty or fifty miles north of here, the snow is between five and six feet deep on the level, the greatest depth that has been seen in twelve or fifteen years.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1 00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $15 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,800 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 190 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*
C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.
The Peterborough Brokerage Co., Local Agents.

Graveyard Coughs and Colds

Cured Quickly by Catarrhozone

A cough or cold this season of the year paves the way for pneumonia or consumption. The best remedy is "Catarrhozone." It eases a cough in five minutes, and colds cannot exist but a few hours where it is used. Mrs. H. L. Ozmowith, residing at Glendive, Montana, was worried by a "graveyard" cough. In the following letter she tells how Catarrhozone cured her in one week;

"I had a bad cough for several months last fall that settled on my lungs. I was worried very much to think that nothing I used could shake it off, but reading in the Halifax "Presbyterian Witness" of the wonderful cures Catarrhozone was effecting, I decided to try it. The irritability and soreness was taken out of my throat in a few days, and in less than one week it entirely cured my cough.

"It is with great gratitude and pleasure that I recommend Catarrhozone. I am sure it will benefit and cure all who use it."

(Signed) Mrs. H. L. Ozmowith.

The reason Catarrhozone always cures is that it goes right to the sore spot, which it heals and makes well quickly. It is antiseptic and destroys disease germs in every part of the system. For Coughs, Colds and Bronchitis, nothing compares with Catarrhozone. It is very simple to use, contains no injurious drugs, and is warranted perfectly safe to use. Catarrhozone Inhaler is suitable to use in a street car, theatre, church any place at any time. Complete outfit costs but $1.00 and is guaranteed to cure or your money back. Trial size, 25c., sold by druggists, or by mail, from N. C. Polson & Co., Kingston, Ont.

Anniversary Services

Tomorrow Rev. W. R. Young, of St. Thomas, a former pastor of George street church, will preach anniversary services in the church. On Monday the annual congregations, tea will be held.

Special for Men

Rev. W. R. Young, D.D., of St. Thomas, a former pastor of Peterborough, will address the men's meeting at the Y.M.C.A. tomorrow at four o'clock. Soloist, Mr. R. N. Jolliffe. There should be a large attendance of men at this meeting.

Special Services

Evangelist Stephens, of Toronto, is holding a series of special services at Bethany Tabernacle every night, including Saturday. The Evangelist will also speak tomorrow morning and afternoon. The afternoon service will be more especially for children, and young people though everybody will be welcome. The public is cordially invited.

A Cocking Main

Port Hope Guide—We have been creditably informed that the sporting fraternity of Millbrook and vicinity held a grand old-fashioned cocking main in the Agricultural Hall last night. We would most respectfully call the attention of the Crown authorities to the fact, as we have been under the impression that all such amusements are (or ought to be) illegal and punishable. If that's so, let the law officers get a move on

A Rich Mine

Mr. Cowan, mining engineer of the Star of the East Gold Mining Co., was in town yesterday, and gave The Times a call. Mr. Cowan speaks very hopefully of the future of the mine. He says that the shaft is now sunk to a depth of 55 feet, and a test of the ore taken at this point shows it to be worth $122 to the ton. This is phenomenal, and fully warrants the assurances given by Mr. Sager and Mr. Kidd, the president and secretary of the company, that they have a veritable bonanza.

THE DOMINION BANK.

PROCEEDINGS OF

The Thirty-third Annual General Meeting

OF THE STOCKHOLDERS.

The Thirty-third Annual General Meeting of the Dominion Bank was held at the Banking House of the Institution, Toronto, on Wednesday, January 27th, 1904.

Among those present were noticed: Messrs William Ince, Wm. Spry, E. B. Osler, M.P., W. D. Matthews, Thos. Walmsley, W. G. Cassels, David Smith, G. W. Lewis, A. R. Boswell, P. Leadley, G. N. Reynolds, A Foulds, J. J. Foy, K. C., John T Small, Anson Jones, H. Gordon MacKenzie, J. Gordon Jones, W. Crocker, J. F. Cavanagh, Ira Standish, B W. Langley, Lieut.-Col. Pellatt, Wm. Hendrie, J. G. Ramsay, W. C. Lee, W C Crowther, F. J. Phillips, Richard Brown, G. B. Sweetnam, J. A. Proctor, H B. Hodgins, N. Johnson, T. G. Brough, Miss H. M. Robinson and others.

It was moved by Mr. Wm. Ince, seconded by Mr. Anson Jones, that Mr. E. B Osler do take the chair, and that Mr. T. G. Brough do act as Secretary.

Messrs. A. R. Boswell and W. G. Cassels were appointed scrutineers.

The Secretary read the report of the Directors to the Shareholders, and submitted the Annual Statement of the affairs of the Bank, which is as follows:

To the Shareholders:

The Directors beg to present the following Statement of the result of the business of the bank for the EIGHT MONTHS ending December 31st, 1903:

Balance of Profit and Loss Account, 30th April, 1903			$353,355 48
Premium received on new Capital Stock			16,195 00
Profit for the EIGHT MONTHS ending 31st December, 1903, after deducting charges of management, etc., and making provision for bad and doubtful debts			321,073 86
			$690,564 34
Dividend 2 1-2 per cent., paid 1st August, 1903	$74,710 50		
Dividend 2 1-2 per cent., paid 2nd November, 1903	74,858 05		
Dividend 1 2-3 per cent., payable 2nd January 1904 (2 months)	49,963 16		
		$199,526 71	
Transferred to Reserve Fund		16,195 00	
			$216,061 71
Balance of Profit and Loss carried forward			$474,202 63

RESERVE FUND.

Balance at credit of account 30th April, 1903	$2,983,805 00
Transferred from Profit and Loss Account	16,195 00
	$3,000,000 00

Branches of the Bank have been opened during the past eight months in Fort William and St. Thomas, Ont.

All Branches of the Bank have been inspected during the past year.

E. B. OSLER,
President.

Toronto, 27th January, 1904.

The Report was adopted and the thanks of the Shareholders were tendered to the President, Vice-President and Directors for their services and to the General Manager and other officers of the Bank for the efficient performance of their respective duties.

The following gentlemen were elected Directors for the ensuing year: Messrs A. W. Austin, W. R. Brock, M.P., T Eaton, J. J. Foy, K.C., Wm. Ince, Wilmot D. Matthews and E B. Osler, M.P.

At a subsequent meeting of the Directors, Mr. E. B. Osler, M.P., was elected President, and Mr. W. D. Matthews, Vice-President, for the ensuing term.

T. G. BROUGH,

General Manager

Toronto, 31st December, 1903.

Dummer Vital Statistics

There has been registered in the Clerk's office for the municipality of Dummer for the year ending the 31st of December, 1903, births, 48, marriages 10, deaths 19, and up to the corresponding date for the year 1902, births 52, marriages 12, deaths, 23, showing a decrease of 4 births, 2 marriages and 4 deaths in 1903. We are pleased to note a decrease in the death rate but would like to see the other two departments up to the standard.

Church Dedicated

The new Methodist church at Cavanville was dedicated on Thursday, the opening address being delivered by Rev. Mr. Sparling, of the Metropolitan church, Toronto. Rev. J. P. Wilson, of Peterborough, conducted the dedicatory service, and Rev. J. J. Rae, of Oshawa, the financial part, to which there was a very generous response. A tea and entertainment was held in the evening, at which the attendance was very large. Tomorrow sermons will be preached at 11 a.m. and 7 p.m., by Rev. Dr. John Burwash, of Victoria University, Toronto, and in the afternoon by Rev. Jos. Kilgour of town, a former pastor.

The Late John Guthrie

There passed away on Thursday last, an old and esteemed resident of the county, in the person of Mr. John Guthrie. Deceased was born in Ireland and came to Canada when three years of age. After residing in Quebec for some time, he settled in Otonabee, where he lived for 47 years, coming to Peterborough three years ago. He was 84 years of age, and leaves to mourn his loss a wife and five daughters, Mrs. Fawcett, Etta, Annie, Violet and Mary. The funeral will take place this afternoon, at 2.30 o'clock, from the family residence, 308 Aylmer street, to the Little Lake cemetery.

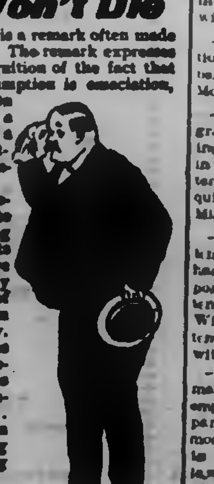
A New Cement Company

The Lindsay Portland Cement Company has been incorporated. The charter members are Messrs. J. D. Flavelle, Thos. Sadler, Rich. Sylvester, Thos. Stewart, J. B. Knowlson, J. M. Squier, Robt. Kennedy and Johnston Ellis. The authorized capital stock is $600,000. The company's marl deposit is at Sandy Lake below Bobcaygeon, but its mill is to be built north of Lindsay on the river. The stock on the company will be put on the market very soon, and with the prospects of the Portland cement business at present, it should make an attractive investment when issued at par.

—How's your coal bin these old-fashioned winter days

"He Won't Die

Of consumption" is a remark often made of a fleshy man. The remark expresses the popular recognition of the fact that the sign of consumption is emaciation, loss of flesh. On the other hand, a gain in flesh is a sure sign that wasting diseases are being cured.

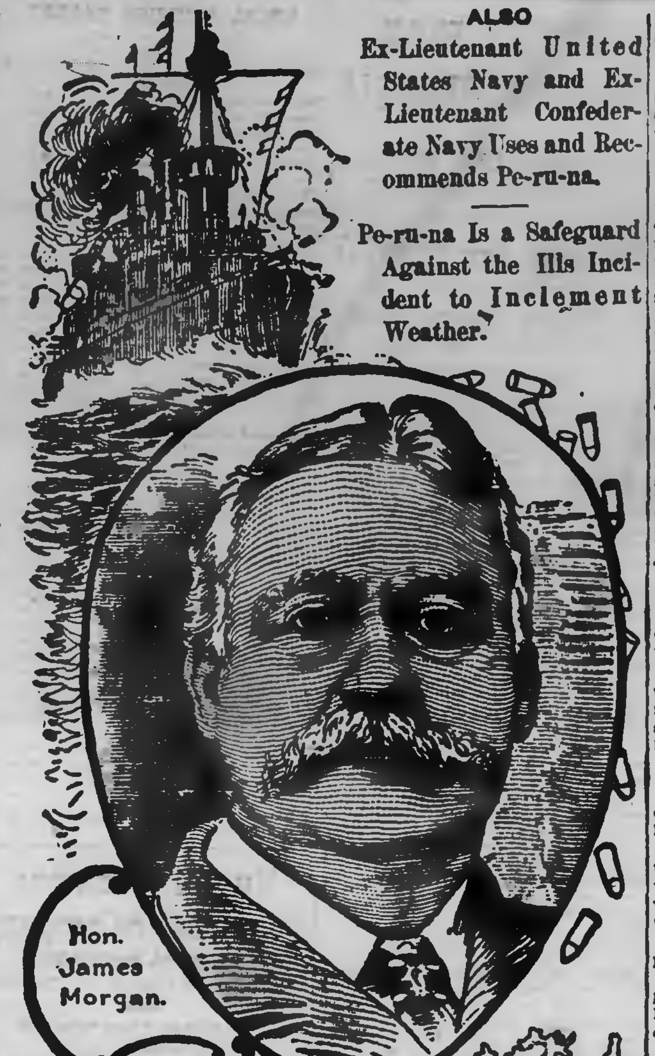


Emaciated people with obstinate coughs, bleeding lungs, night-sweats and weakness, have been perfectly cured by the use of Dr. Pierce's Golden Medical Discovery. The several steps of the cure were recorded in ounces and pounds of increasing weight. When there is gain in flesh the wasting disease is being surely cured.

Mr. Will H. Whitmire, of Ashton, Rockingham Co. Va., writes: "Our son contracted a deep cold about the first of July, 1899, and had a terrible cough. We called a doctor and he pronounced it irritation of the bronchial tubes, with asthmatic trouble, and he informed me that my son was liable to die at any time. He told me that if we could keep the bronchial tubes open, he might cure him; but after treating him several weeks and my son growing worse all the time, I concluded to try Dr. Pierce's Golden Medical Discovery and 'Pleasant Pellets.' I had seen several almost miraculous cures brought about by the use of these medicines, and of course I had wonderful faith in them. He used three bottles of 'Golden Medical Discovery' at home and one vial of the 'Pellets,' and was then well enough to go to West Virginia, taking a supply with him. I am just in receipt of a letter from him from which I quote: '*I am well and hardy and getting very fleshy.*'"

The Common Sense Medical Adviser, 1008 large pages is sent *free* on receipt of stamps to pay expense of customs and mailing *only*. Send 50 one-cent stamps for the cloth-bound volume or only 31 stamps for the book in paper covers. Address Dr. R. V. Pierce, Buffalo, N. Y.

The Ex- CONSUL GENERAL TO AUSTRALIA



ALSO

Ex-Lieutenant United States Navy and Ex-Lieutenant Confederate Navy Uses and Recommends Pe-ru-na.

Pe-ru-na Is a Safeguard Against the Ills Incident to Inclement Weather.

HON. JAMES M. MORGAN, 1785 Twentieth Street, Washington, D. C., Ex-Lieutenant U. S. Navy, Ex-Lieutenant Confederate Navy, and Ex-Consul General to Australia, writes:

Peruna Medicine Co., Columbus, Ohio:

Gentlemen:—"The use of your Peruna as a remedy or cure for catarrh by many of my friends who have been benefited by the same, as well as my own experience as to its efficacy and good tonic properties causes me to recommend it to all persons, and you are at liberty to use this endorsement and my photograph if it will give any force to same."—James M. Morgan.

Catarrh of the Head Which Affected Hearing Cured by Pe-ru-na.

Mr. J. Emile Tanguay, No. 88 John St., Quebec, is Secretary of the Jacques Curling Club of Quebec, one of the leading sporting clubs in the city. Its members are composed of young men of the best families. He writes:

"Last winter I caught a severe cold which developed into a severe case of catarrh of the head, affecting my hearing especially. My eyes ran, my system seemed to be generally clogged up. I was advised by a club friend to try Peruna, and did so at once. To my delight I found a change set in for the better within three days, and in eight days I was entirely well."J. Emile Tanguay.

Mr. Adolph Koehler, President of the North Side Turnerschaft, writes from Clark and Leland Ave., Chicago, Ill.:

"It is with pleasure that I endorse Peruna as a first-class medicine especially for catarrhal affections of the throat and lungs. I have used it with much benefit and several of my friends have been cured of catarrh entirely where Peruna was used."—Adolph Koehler.

"Nothing Better Than Pe-ru-na for Catarrhal Troubles," Says Congressman C. P. Dorr.

C. P. Dorr, Hotel Johnson, Washington, D. C., Ex-Congressman from West Virginia, writes:

"I can cheerfully recommend Peruna to anyone who wants a safe and permanent cure for catarrh. For throat, lung and catarrhal trouble, there is nothing better than Peruna."—C. P. Dorr.

Colds Lead to Chronic Catarrh.

A common cold is acute catarrh, which quickly becomes chronic catarrh if allowed to remain.

Every cold snap leaves in its trail thousands of cases of catarrh, many of whom for want of an effective remedy, will suffer from this disease the rest of their lives.

Is there anything that can be done to prevent all this?

In the first place, Peruna used at the proper time will prevent taking cold. In the second place, Peruna will cure a cold in from two to five days.

Again, Peruna will cure catarrh quickly in the first stages, and finally Peruna will also cure chronic catarrh, if used properly and persistently.

Peruna kept in the house and properly used will therefore not only act as a safeguard against the ailments which result from sudden cold waves, but will also prove a sure remedy for this class of ailments.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Peruna can be purchased at any first-class drug store for $1.00 per bottle.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

China Hall is headquarters in Peterborough for Wedding Presents, Dinner Sets, Toilet Sets, Lamps, Fancy China, &c. Special bargains all this month in every department. Notwithstanding discounts and other inducements offered elsewhere China Hall's prices will always be found the lowest, and the assortment the largest in Peterborough.

We Positively Undersell All Other Dealers. CHINA HALL & SILVER BAZAAR ESTABLISHED —1882.—

INCIDENTS OF THE DAY

Breezy Paragraphs Picked Up By Reporters on Their Rounds

—A vagrancy case at the police court yesterday was remanded for a week.

—Now, boys, all together, three cheers for Warden Peck. "Hip, hip, hurrah!"

—The Ladies' Bible Class, which meets in the Y.M.C.A. on Saturday afternoons, will be discontinued for the present.

—Three interesting cases, for violation of the Lord's Day Act, will come before Police Magistrate Dumble on Monday.

—Yesterday the Chief received a telegram from R. J. Byers, of Massey, stating that a man, Barney McCabe, died in that place, and that he has a sister living in Peterborough. Upon enquiry it was found that his sister is Miss Irene McCabe, 17 Wescott street.

—Mr. F. P. Brady, formerly Superintendent of this division of the C. P. R., has recently been promoted from the position of Assistant General Superintendent of the Central Division at Winnipeg to that of General Superintendent of the Lake Superior Division, with headquarters at North Bay.

—The Canadian Pacific Railway is making it known to its thousands of employes that drunkenness in any department will not be tolerated for a moment and one of the plans adopted is to urge as severe a sentence as the law allows in cases where the safety of the public has been in jeopardy.

—The Council will conclude its January session today.

—The County Auditors, Messrs. Wm. O'Brien and Geo. W. Bennett, will start next week on the audit of the books of the treasurer.

—Miss Gibbs, of the Barnardo Home, will address the gospel meeting at the Young Women's Christian Association rooms at 4.15 tomorrow afternoon. Miss Godrey will sing. The association quarters has been moved upstairs, and the entrance will be at the hall door, 409 George street.

—"Can you tell me what sort of weather we may expect next month?" wrote a subscriber to the editor of the g.f.j. and the editor replied as follows; "It is my belief that the weather will be very much like your subscription." The inquirer wondered for an hour what the editor was driving at, when he happened to think on the word "unsettled." He sent in the required amount next day.

—Norwood Register —Our local auctioneer, Mr. T. Fraser, will long remember the 19th of January, 1904. While holding an auction sale at the farm of Mr. W. D. Stephenson on that day, Mr. Fraser had his nose frozen three times. It was the coldest day of the season. A stiff nor'-wester was blowing and the mercury dipped as low as 30 below zero The sale was a good success, notwithstanding the cold.

—An Ottawa man proposes to send to England a shipment of eggs packed like coal in a barrel and frozen solid. The eggs, he claims, must be frozen at purchase, and all candled. They must be frozen and shipped in the condition with a hole in the flat end of the egg. Before using they would require to be thawed out, but they would then be as fresh as when they were laid, and if used in a short time would be in first class order.

—Mr R. E. Carss, of the Tait-Carss Lumber Co., tells the Orillia News-Letter that this is the worst year for ice harvesting yet recorded. An investigation of the ice was made on Saturday for his form, and after two feet of snow had been scraped off the top this is what was found; snow ice about three inches, then a layer of ice about eight inches, next six inches of water, and under that several inches more of ice. The immense amount of snow on top of the ice has kept the frost out, and there seems to be no prospect of the situation improving. It looks like high ice next summer Mr. Carss' company recently erected a large addition to their ice house.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. J. M. Might has returned to Toronto.

—Mr. Robert Stuart, of the American Cereal Co., is in town.

—Lindsay Post; Mrs. J. J. McBain, of Peterborough, is visiting at Mr. G. A. Little's, Cambridge street.

—Mr. Albert Harvey, Oak Leaf, Manitoba, son of the late Dr. Harvey, is visiting friends in town.

—Miss McKettrick, of Hamilton, has been engaged to open and take charge of Cressman's dressmaking department for the spring season.

—Miss Olive E. McNeillie, youngest daughter of Mr. T. T. McNeillie, 161 Borden street, who has been a frequent visitor here with her sister, Mrs. (Dr.) McCulough, Brock street, was quietly married in Richmond on Friday last, in the presence of a few close friends, by the Rev. J. J. White, to Homer Newton McCoy, son of Mr. Geo. E. McCoy, a prosperous business man of that town After the wedding a luxurious supper was served at the home of the bride's parents. Mrs. McCoy, after a few days visit with her parents in Toronto, will return, and make her home in Richmond, Ind., where her sister, Mrs. E Strome, also resides

OMEMEE SCHOOL BURNED

Children Got Out of Building Without Any Mishap

The Omemee high and public schools were burned to the ground on Wednesday morning. The alarm was given at 11.30, but all the scholars got safely out. The fire started at the furnace, and, as the building was of wood, burned very quickly. The loss is about $4,000. The building was insured for $2,400. The fire caught the adjoining buildings, but was extinguished with little loss. A stable belonging to Wm. Neil, near the school, full of hay and oats, was burned also.

MARRIED IN SOUTH AFRICA

Nuptials of Miss Mabel Yenny to Mr. H. C. Gerrard

A wedding took place at Standerton, South Africa, on Wednesday, December 23rd, which will be of interest to many in Peterborough, when Miss Mabel, daughter of Mr. H. A. Yenny, town, was united in marriage to Mr. H. C. Gerrald, B.A., of Stratford-on-Avon, England. The bride was attended by Miss Wilkinson, of Toronto.

After a bridal trip to Durban, Mr. and Mrs. Gerrald will for the present take up their residence at Standerton.

The many friends of the bride in Peterborough will wish her a happy future. Mrs. Gerrald has been teaching in South Africa for about two years.

Properties for Quick Sale

Two strey, brick house, semi-detached with stable, and two extra building lots very centrally located on corner. A splendid investment, $2300.

Four roomed, frame cottage in first-class repair, nice lot, $600.

Two story, brick store and dwelling having a well established business, stable and yard.

JAPAN READY TO STRIKE AT MOMENT'S NOTICE

All Now Ready to Loosen the Dogs of War in the Far East

ONLY HOPE FOR PEACE RESTS WITH THE CZAR

At St. Petersburg the Feeling is Steadily GrOwing That Japan Will Begin Hostilities

Tokio, February 1 — All military, financial and other preparations are completed and Japan is ready to strike at a moment's notice. The people, rich and poor alike, are zealously subscribing to the Exchequer bonds.

St. Petersburg, February 1 — There is almost no hope of peace on account of the conviction in imperial quarters that Japan intends under any circumstances to force war.

The terms of Russia's reply are being kept secret, but those who are best informed state that it will not satisfy the Tokio Government. There is a faint possibility that the Czar at the last moment will declare for peace at whatever cost to Russian prestige.

Paris, January 31—It is understood that the conferences between Foreign Minister Lamsdorf and M. Kurino, the Japanese Minister at St. Petersburg, have permitted the latter to advise his Government concerning the position Russia is likely to take in her forthcoming answer; but, the officials here say this was merely an intermediary step towards adjusting the remaining differences as the answer is subject to changes until officially communicated.

It is also further said that Russia will not answer until she feels reasonably assured that her answer will not have the effect of precipitating hostilities.

The officials here are gratified at an apparently authorative statement that Japan does not intend to fortify the Straits of Corea. They say it will remove one of the main obstacles, as the most recent negotiations showed that Russia was unalterably opposed to the creation of any condition in Corea which would lead to closing that outlet from the sea of Japan. A strong intimation has been made that the Maritime nations of Europe and the United States would have taken up the question unless this declaration had been made.

GRAVE ANXIETY IN FRANCE.

London, February 1—Some press telegrams from Paris are also gloomy, agreeing with the statements printed in the Graphic. They add that M. Delcasse the French Foreign Minister, has lost his former confidence that peace would be maintained, and does not conceal his grave anxiety.

JAPANESE TROOPS MOVING.

Port Arthur, February 1 — A telegram reported to have been sent by the Russian military attache at Tokio, was received here yesterday. It gave information of the mobolization of the Japanese army, and had the effect of renewed preparations for the despatch of the troops already ordered to the north but who had been detained on account of the peaceful aspect of affairs. The authorities have invited the Russian women of Port Arthur to join the Red Cross.

The organization of the city's resources continues as though war were certain. The authorities are receiving many sensational reports from Corea and China.

THE NEUTRALITY OF COREA.

New York, February 1— Internal disturbance in Corea is spreading, cables the Herald's Seoul correspondent. It is the result of increased taxation. The governors of three provinces report that their officers have been captured by organized bands and government funds taken.

The notification of Corean neutrality, cabled from Chee Foo to the powers, was unknown in the Corean Foreign Office until replies were received from the representatives abroad. The intimation was that it was arranged by Yi Yung Ik and Hyen Sang Kun, the latter having just returned from Russia.

The Corean Minister at Tokio has been instructed especially to urge Japan's immediate recognition of Corean neutrality.

AN OBJECTION FROM MINISTRY.

TO CANADA DECLARING FOR HER CHAMPION, MR. CHAMBERLAIN

PLANS FOR EMIGRATION

Large Numbers Likely to Come From Great Britain and Belgium

London, February 1 — The Toronto correspondent of the Manchester Guardian says that a member of the Dominion Cabinet said he would consider it grossly indecent for any Canadian public man to go to Britain posing as a representative Canadian, and assure British audiences of the support and sympathy of the Dominion with one political party or the other.

EMIGRANTS FROM BELGIUM

The Canadian Government's Continental emigration agents have been in London to confer with Deputy Minister Smart. Mr. Decello, the agent at Antwerp, is of the opinion that a large number of Belgians will emigrate to Canada during the coming summer. Mr. Smart starts on a tour of inspection of the Scotch and Irish officers of the department to-night.

NEW EMIGRATION PLAN.

General Booth's new emigration scheme is to take the unemployed in large numbers to Canada and Australia under conditions which would admit of their being sorted out, cared for and supervised till they were in a condition to stand alone and become good citizens.

THE BISLEY MEETING.

At the Bisley meeting in 1903 the number of entries for the competition was 41,448, and the amount taken entrance in fees, pools, and practice shots was £14,330.

WONDERS OF RADIUM

Vienna, Jan. 30 —Prof. Gussenbauer, an eminent surgeon, has discovered that contraction of the gullet, caused by cancer can be alleviated in certain cases by the use of radium. The experiment was made of applying sixty milligrammes of radium in a rubber capsule contained in the end of a bougie to the affected part. The radium rays decomposed the cancerous growth, enlarging the gullet, and allowing food to be swallowed, thus obviating an operation for the introduction of food into the stomach.

The experiment is somewhat dangerous until further knowledge is obtained, inasmuch as too much radium will decompose the ulcer so rapidly that there is risk of perforating the gullet.

BRITISH GUNS MAY BOMBARD LHASSA

BRITAIN WILL PROBABLY ENGAGE IN WAR WITH THIBET

BRITAIN READY TO FIGHT

A War That Will Have a Far-Reaching Effect on the World

London Feb. 1—The latest despatches from Chumbi, British India, indicate a very serious condition of affairs in Thibet. The Thibetan army is moving in force on the British under Col. Younghusband, and already a battle may be raging. The British occupy a strong position at Tuna, and will be able to hold their own against the forces of the Grand Llama.

RIGHTEOUS INDIGNATION.

If Great Britain and Thibet are destined to engage in one of those little wars for which the Empire is famous, the former country will enter into the fight with some sense of righteous indignation. Britain has nothing to be ashamed of in the matter of aggressions upon the Thibetans. That she is anxious to thrust her trade upon them may be admitted. In resorting to arms to accomplish this, she is only enforcing the terms of a treaty which the Dalai-Lama has flagrantly violated. Britain has asked for no more than her diplomacy has fairly won. If, when the smoke clears away, the Thibetans find themselves shorn of a large slice of territory, if their Lamas are no longer permitted to intrigue with St Petersburg and Pekin, their punishment will about fit their crime. This and more they deserved in 1886, when they invaded British territory. They escaped for the time, because the Indian Government was not in a position to deal severely with them. Since then, say students of Indo-Chinese affairs, they have treated the British Government with open disrespect. Leniency was mistaken for weakness. The disinclination to make summary reprisals was interpreted as an admission of fear. The patience of the British Government, "long as a summer day," they have familiar with, but the vengeance, "long as a winter night," they know nothing of. And it now seems that they are about to be taught by Younghusband, of the Guides.

LHASSA, THE MYSTERIOUS.

The news of the expedition calls attention to that great city of which the outside world knows so little —Lhassa, the mysterious. Solitary and aloof, it has dwelt in the heart of the Himalayas for twelve centuries, and from its mountain heights has sent forth the sacred law to millions of the faithful, for the Grand Lama is the Pope of the Buddhist world. His authority is almost equal to that of a king, although Thibet has always been ranked as a Chinese province, and thrice a year the Lama has sent a tribute to Pekin. Outside of this perfunctory observance of an ancient custom, Thibet has been unmindful of politics and international affairs. The people of the country have tilled their arid soil and tended their herds of sheep and yaks, while the Grand Lama, and the lesser Church dignatories have been wrapped in the contemplation of their ancient religion. But this isolation must end, soon or late, for Thibet has become a pawn in the great game. The Bear is seeking an outlet to the south, and the Lion keeps moving north. Thibet lies between. Its fate is inevitable. It must choose its master. No longer will it be permitted to main neutral. The Lama realizes this fact, and, making a virtue out of a necessity, he despatched a mission to St. Petersburg, some months ago, and it is rumored, came to an understanding with the Czar. He was wise enough not to waste time by applying to Pekin for advice or assistance. This move forced the hand of Britain, and Col. Younghusband's mission is the result.

A DIFFICULT PROBLEM.

Travelling in Thibet has always been and must always be, difficult in the extreme. An armed expedition such as Britain is sending forth finds providing for its transport the most difficult problem. Mules and ponies are plentiful but in these altitudes fodder is scarce. At this season of the year the trip is even more hazardous than usual. The Thibetans, however, will probably resist, and as they have lately supplied themselves with magazine rifles they may do terrible execution in a country which can furnish three ambuscades for every mile of road. Until a couple of years ago the Thibetans were armed with old flintlocks and spears but they learned from China what China had learned of Japan, and are now much better equipped to give battle than formerly. Should the order go if Lhassa (and that it will do so if Lhassa becomes an objective cannot be doubted), the probability is that a fierce fight will ensue. From what little is known of the city, it seems certain that it is a veritable fortress, set on a high hill. Never has it been put to the test of war, however, so that its actual strength is a matter of mere conjecture. The guns of the British are going to ask it a question.

MAY HAVE PEACE

One Obstacle to Agreement Said to Have Been Removed

Paris, Jan. 29.—It is understood that the conferences between Foreign Minister Lamsdorf and M. Kurino, the Japanese Minister at St. Petersburg, have permitted the latter to advise his Government concerning the position Russia is likely to take in her forthcoming answer, but the officials here say than was merely an intermediary step towards adjusting the remaining differences, as the answer is subject to change until officially communicated.

It is further said that Russia will not answer until she feels reasonably assured that her answer will not have the effect of precipitating hostilities.

The officials here are gratified at an apparently authoritative statement that Japan does not intend to fortify the Straits of Corea. They say it will remove one of the main negotiations showed that Russia was unalterably opposed to the creation of any condition in Corea which would lead to closing that outlet from the State of Japan. A strong intimation had been made that the maritime nations of Europe and the United States would have taken up the question unless this declaration had been made.

THE NORTH AMERICAN LIFE

Annual Statement a Most Satisfactory One

Managing Director Goldman and those associated with him in the control of the North American Life Assurance Company are to be congratulated on the splendid showing made last year, as set forth in the report presented at the twenty-third annual general meeting. This progressive company for the year ending Dec. 31st, 1903, had total receipts from premiums of $1,182,616.91, and from income from cash investments, $248,746.78, making a total income of $1,381,363.69. The total disbursements amounted to $773,888.29, leaving a balance to be carried forward of of $773,-384.29 After deducting every liability and providing for all contingencies, there is a surplus on hand of $560,584.73

The North American has earned, a splendid reputation for its fair and attractive plans of insurance and investments. In this district it has many policy holders and friends, all of whom will be pleased to know that prosperity is plainly marked on every page of its history.

The Company is represented in Peterborough by Mr. George B. Stevenson, who will be pleased to furnish copies of the report or other such information as may be required.

RUN OUT OF COAL

Seaforth, Jan. 29.—The fuel question has become a very serious problem in this and other towns in this district, and if relief is not soon afforded there will be a great deal of suffering. Rich and poor are alike affected. There is neither soft or hard coal to be had for love or money, and as the electric light station has nearly exhausted its supply we are likely soon to be in darkness as well as suffering from the cold.

The dealers have not a pound on hand, many of the mills and manufacturers are running on short time in order to husband their nearly exhausted supplies, and wood is not to be had at any price. The coal dealers say there is plenty of coal to be got, but the railways are unable to handle.

DESPONDENT AND SHOT HIMSELF

Iroquois, Jan. 29.—Mr William Harvey, a retired Hamilton merchant, committed suicide yesterday by shooting himself at the home of his son-in-law, Mr. A. D. Harkness, Irena. Within the last two or three years his wife and daughter died, and he had been despondent since.

Two sons and two daughters survive. The sons and one daughter live in or near Hamilton. A letter was found in his pocket in which he asked his children to forgive him for what he was doing and saying that he could stand the strain no longer, but would go to join his wife and daughter in heaven, and that he hoped to be forgiven

HIS NEXT APPOINTMENT

Ottawa, Jan. 29—The report is current in official circles that Lord Minto's next appointment, after the expiration of his term of office in Canada, will be as Viceroy of India, in succession to Lord Curzon.

THE TRUSTS AND GUARANTEE COMPANY

SEVENTH ANNUAL MEETING OF SHAREHOLDERS

SATISFACTORY REPORTS PRESENTED

The seventh annual meeting of the shareholders of the Trusts and Guarantee Company (limited) was held Wednesday at the offices of the company, 14 King street west. There was a large and representative attendance of shareholders from various parts of the Province. The reports presented make a very creditable showing, indicating a highly successful year's business, and showing a substantial increase in the revenue of the company.

The operations of the year have resulted in sufficient net profits, after paying all expenses of operation and management, to permit the payment of a half-yearly dividend at the rate of 5 per cent. per annum, and to carry forward a balance of $34,464.92. The amount at the credit of profit and loss account is now $52,918.12. The subscribed capital is $2,000,000, and the paid-up capital now amounts to over $840,000.

In moving the adoption of the report of the directors, the President referred to the growing confidence of the public in the management of the company and appreciation of the facilities the company affords for the transaction of the various classes of trusts committed to its care. This is indicated by the large increase in volume of the general business entrusted to the company during the past year, and the large number of wills which have been made appointing the company trustee and executor.

Some remarks were made by Mr. D. W. Karn, the Vice-President, commenting on the very gratifying nature of the report, and also by several other shareholders present, expressing the general feeling of confidence in the company's methods and management which exists among the shareholders residing in the districts represented by the various speakers, after which the report of the directors was unanimously adopted.

In every respect the annual report of the company affords a showing which must be gratifying to the officials and shareholders and to the general public desirous of availing themselves of the special features the company presents.

The retiring Board of Directors was re-elected, and at a subsequent meeting of the directors, Hon. J. R. Stratton was re-elected President, and Messrs. F. W. Karn and C. Kloepfer, Vice-Presidents for the present year.

WHITAKER WRIGHT AND HIS REVOLVER

DID HE INTEND TO KILL INSTIGATORS OF PROSECUTION

ARNOLD WHITE'S STORY

He Declares That He Was Prepared to Duck Table in Court Room

London, February 1 —Arnold White the well known journalist, will publish in a Sunday morning paper a story to the effect that Whitaker Wright carried the loaded, cocked revolver which was found in his pocket, for the avowed purpose of killing the two principal instigators of the prosecution—Arnold White himself, and Mr. Ernest Flower, if the jury should return a verdict of guilty. Indirectly from Arnold White, a press correspondent received the following version of the forthcoming disclosure.

"Whitaker Wright stated to some of his most intimate friends several days before the conclusion of the trial, that he was prepared to wreck summary vengeance on Flower and myself the moment he should be convicted. He explained that he would be armed and would give the case a climax worthy of its general character. Information regarding Wright's proposed intention was communicated to Flower and myself. We had a tipstaff watch every movement he made. Several times while the jury was out I saw Wright place his hand in his hip pocket, as if to assure himself that his weapon was there. Each time I slid to the edge of the chair on which I was sitting, preparatory to ducking under the table.

"When sentence had been pronounced Wright made a final move as if to draw his pistol and turn, but the tipstaff interposed and removed him to the adjoining room. There is little doubt that he would have shot himself had he not recognized that the tipstaff was suspicious and ready to interfere. Wright had foreseen this possibility and had provided poison as an alternative means of suicide. The tipstaff did not suspect poison when Wright took something from his pocket and placed it in his mouth, because the promoter had been taking pastilles from time to time throughout the trial.

TO BOOM IMMIGRATION

Winnipeg, Jan. 29 —A party of leading Winnipeggers returned from St. Paul, where they attended the convention of land dealers and business men in Manitoba and the Western States. The result was the formation of a Western Canadian Immigration Association which, the returned delegates point out, cannot fail to be a powerful influence for the continuation of the movement of settlers to Western Canada. The work of the association will be directed by the ablest and most prominent United States land men engaged in the colonization of the West, together with shrewd business men from Winnipeg.

THE GEORGE ST. CHURCH

Anniversary Services Held Yesterday—Sermons by Rev. Dr. Young

Anniversary services, in connection with the George street Methodist church were held yesterday, when Rev. Dr. Young, of St. Thomas, formerly pastor of Peterborough, preached forcible and eloquent sermons, morning and evening. Special music was provided by the excellent choir of the church. The collections, which were large, were in aid of the Trust Fund of the church.

The trustees will give the annual tea this evening. A splendid programme has been prepared. Dr. Young will also deliver an address. The financial reports of the various societies will be presented. Every member of the congregation is most cordially invited to attend.

DIED IN THE HOSPITAL

Bert Thompson Passed Away on Saturday at St Joseph's

Albert Thompson, a young man, 22 years of age, and well known about town, was stricken with diphtheria on Tuesday last and passed away on Saturday morning at St. Joseph's Hospital. The deceased went to South Africa with the Third contingent. His many friends will deeply regret to hear of his death.

The funeral took place yesterday morning to the Little Lake Cemetery, and was attended by the South African Veterans Association.

SUGGESTS THAT TREATY WITH CANADA BE MADE

FORMER CANADIAN TELLS THE YANKEES IT WOULD BE WISE TO ANTICIPATE GREAT BRITAIN

Jacob Gould Schurman of Cornell, a native of Canada, made a speech before the Manufacturers Association of Brooklyn on Thursday night. The Herald thus reports it; Advocating the adoption at once of a reciprocity treaty, with Canada, to checkmate the possibility of Great Britain following Jos. Chamberlain's lead into a policy of preferential relations with her colonies, and pointing out the dangers of this country arising from a concentration of industries into the hands of comparatively few men, thus tending to displace the old-time democracy with a plutocracy, Jacob Gould Schurman, president of Cornell University, was the chief speaker at the eleventh annual dinner of the Manufacturers Association which was held in the Union League Club, Brooklyn.

Mr Schurman said; Dr. Johnson, crusty conservative as he was once asserted that "an English merchant is a new species of gentlemen." This was a startling paradox to the eighteenth century. What a change the twentieth century shows in the standing of that class of economic producers who in the eighteenth century were still pleading for recognition from the landed proprietors, who then engrossed all social and political honors and sought to monopolize all wealth. Why, the lordly heirs of those aristocratic families now deign to marry the daughters of millionaire traders.

"Why the ablest, the most versatile and certainly by far the most interesting sovereign of Europe, with all the other titles he has inherited, has won for himself the title of the best commercial daughter in the world

"But even now trade is convulsing the politics of Englishmen and shaping the policies of the English government. Mr. Chamberlain has set out to overturn the long established system of British free trade by appeals and arguments addressed both to the pockets and to the patriotism of his countrymen. Whether his scheme will ultimately be adopted by the voters of the British empire, it is too early to say. But it is not too early for associations like yours to consider the effects of its adoption upon the export trade of the United States

"It would inevitably reduce the volume of the agricultural products you now send to Great Britain and the volume of the manufactured products you now send to Great Britain and the volume of the agricultural products you now send to Canada and other British colonies

"I venture to ask whether, in view of the facts and the consequences I have mentioned, it would not be both prescient and statesmanship and shrewd politics for us to negotiate without delay a treaty of reciprocity with the Dominion of Canada."

BURN THEIR CAPTIVES

London, Jan. 29— A dispatch to the Central News from Cape Town says the Bushmen with the rebels in German South West Africa are committing terrible atrocities. The limbs of the dead are chopped off, and prisoners are said to have been burned alive.

CHILDREN WHO WORK

Winnipeg, Jan. 29— In the Legislative Committee yesterday the Manitoba Factories Act was amended, by which the age of child labor is fixed at fourteen for boys and fifteen for girls; a week's work is to consist of 54 hours, and in case of overtime, a maximum day's work may be 12 1-2 hours, instead 10 and 72 1-2 hours a week's work instead of 60.

THE C. P.R.'s ENTERPRISE

Bowmanville, Ont., February 1 — Mayor James has been informed that the Dominion Parliament will be asked next session to incorporate the Campbellford, Lake Ontario and Western Railway Company, to construct a railway through Hastings, Peterboro, and Northumberland, Durham, Ontario and York counties, connecting with the Canadian Pacific Railway. This is the outcome of the request made by a large delegation, which waited on Sir Thomas Shaughnessy in Montreal.

A BITTER OPINION

London, Jan. 30.—The Toronto correspondent of the Manchester Guardian says that a member of the Dominion Cabinet said he would consider it grossly indecent for any Canadian public man to go to Britain posing as a representative Canadian and assure British audiences that the support and sympathy of the Dominion are with one 'ollden' party or the other.

GERMANY'S AFRICAN WAR CAUSES BERLIN CONCERN

Kaffirs Have Effected a Junction With the Hereros and Trouble Increases

Berlin, Feb. 1 —The commander of the German gunboat Habicht, lying at Swakopmund, German Southwest Africa, cables that he has received news from Lieut. Zuelow, in command of the German forces at Okahandja —a mission station eighty miles from Walfish Bay—that the Kaffirs have effected a junction with the Hereros who are besieging that post. As Okahandja was already hard pressed, the announcement has caused concern at the Colonial Office here.

The following is the despatch from Lieut. Zuelow, sent by messenger, via Karibib, received here to-day;

"Okahandja, Jan. 20

"Am holding Okahandja. Occupied it Jan. 15, with 200 men, after heavy fighting. Am waiting for guns from the Habicht. Ask for a division of artillery. Weak relief corps with machine gun from Windhoek repulsed Twelfth and Thirteenth. Loss reported, eight reserves. In order to establish connections with the rear and bring forward military transports we attempted today with sixty men to reach Karibib by rail."

A later despatch, dated Jan. 21, says; "Yesterday afternoon, near Kawatueraasine, there was a sharp fight. A division about seventy men strong, sent forward by rail, lost four dead and three slightly wounded. The enemy lost twenty to twenty-five dead. We can hold out for some time yet."

A TALK ON TEMPERANCE

At St. Andrew's Last Night by Bro. T. W. Glover, D.R.W.G.T.

T. W. Glover, D.R.W.G.T., of the Independant Order of Good Templars, and Past Grand Chief Templar of New Zealand, is now on a visit to Peterborough. He gave an excellent address in St. Andrew's church last night, Rev. J. G. Potter conducting devotional exercises. The subject was "Where are the Nine" quoting the President of the English Sunday School Teachers' Union, who declared that nine of every ten of the children taught in the Sabbath school were lost to the Christian church and that many were found in our jails and penitentiaries, and even amongst the lost girls on our city streets, the speaker had traced many and found strong drink to be the main cause—stifling the conscience, brazening the face and nerving the arm to do terrible deeds. He urged all to meet him at the Y.M.C.A. rooms on Tuesday night, when the Good Templar Lodge would be organized, and all present willing to become members, instructed into the movement. Other meetings will also probably be advertised.

FRIGHTEEND OUT OF FREE TRADE

MANUFACTURERS' INFLUENCE UPON OUR LIBERAL PARTY

AN ENGLISH OPINION.

Canadian Sentiment is Reported as Frankly in Favor of a Higher Tariff

London, Jan. 30 —Mr. A. G. Bradley, has an article in The Speaker on "Canada and Mr. Chamberlain's Proposals," in which he says; "The eastern manufacturers are prospering, but no doubt will raise the tariff if they can. They are an immensely powerful body, and have the bulk of the wealth, which means much in Canadian politics. They frightened Sir Wilfrid Laurier and the Liberal party out of all free trade or tariff for revenue promises, under which they came into power."

Canadians visiting England complain of being called Yankees. Already they are ceasing to send their sons to English schools, as it keeps the boys out of touch with Canadian life and brings them back to start their career without friends of their own age.

The French-Canadians are not burning with Imperialistic ardor. They are a negative quantity at the very best.

Letters received from Canadian friends in various parts are mainly favorable to Mr. Chamberlain's proposals, "as there is no intention," says Mr. Bradley, "of giving English manufacturers any better rates, why should they not be? At the same time, a considerable party in Canada appears lukewarm." The most able Liberal editor in Canada told Mr. Bradley that he felt confident a higher tariff was looming up in the future.

ANGLO-CANADIAN NOTES.

The British Womens Emigration Society is endeavoring to raise £2,000 to send 3,000 women to Canadian factories.

Mr. Henniker Heaton, M.P., figures that the standing in the Australian Senate for preferential trade is twenty-four against twelve, and in the House of Representatives fifty-one to twenty-four. Australia is solid for Chamberlain.

Lord Strathcona, speaking at the Newport Chamber of Commerce yesterday, said the colonies regarded Mr. Chamberlain as their best friend, and held that he had done more for the Empire than any other man.

Sir Edward Grey asked the Manchester Reform Club yesterday if they could think of a single case of any country being benefitted by retaliation. Instead of the protectionists being able to throw open the colonial markets to British goods, the colonies would still further raise the duties.

Mr. Bonar Law, M.P., speaking at Edinburgh yesterday, said that with the example of Canada Germany need not go abroad to see what retaliation meant.

The Durban correspondent of The Telegraph announces the arrival of the Indian war canoe Tilikum, thirty feet long, in which Captain Voss, a Canadian who, as the result of a bet of $5,000, started from Vancouver with a companion traveling round the world.

London Jan. 30 —The Saturday Review, referring to Mr. Hargraves letter in The Times of the 28th says; "The latter points a moral. There is a sentimental tie which now coddles the American and cuffs the colonial. A Canadian on the spot is better able to judge of the real feelings of the American people towards the Empire than the Englishman at home. Canadians are growing tired of being sacrificed to conciliate American friendship."

New York, February 1— The New York Sun says; "Mr. R. L. Borden's enunciation of the policy of the party which may be in control of affairs in Canada within a few months contains matter for the consideration of some of our people, who seem to be convinced that the beckoning finger raised on this side of the line will be answered by a Canadian rush into a treaty of reciprocity with the United States. This is a profound mistake. Reciprocity with Canada is not to be had for the mere asking. Neither is imperial union. Canada is in no hurry, and she is now doing so well that she can afford to wait. Under no circumstances will she submit to any dictation either from England or from the United States. Imperial preferences and reciprocity will alike demand skilful and considerate diplomacy and the decision will rest with that which Canada regards as contributory to her broadest welfare."

W. E. CURTIS RECALLS OLD THEBES

MR. CURTIS TELLS OF ITS MODERN SUCCESSOR, CITY OF LUXOR

HISTORY IN A NEW LIGHT

Temple of Karnak the Greatest Piece of Architecture of Ancient Times

Luxor, Egypt, Jan. 9—There is a very comfortable hotel at Luxor, surrounded by a garden and plenty of verandas, where one may loaf and take his ease if he is fortunate enough to have leisure for that luxury. Luxor is a modern village, occupying part of the site of the ancient city of Thebes, which stretched back into the desert on both sides of the Nile. It stands on the eastern bank, nearly opposite the famous statues called the Colossi and the Rameseum, as the palace of Rameses II. is called, which, in its time, was one of the most extensive and one of the most splendid of human habitations. Thebes, like London, occupied both sides of a river, and may have extended over an enormous area. The topography is favorable for a large city, and the extent over which the ruins are scattered, gives a hint of its size and population. Some archaeologists think that Thebes had a million of people, and it certainly was very populous, for in thousands of palaces and hundreds of temples, its mighty walls and massive gates, there is nothing left but piles of rubbish, heaps of ruins and a multitude of tombs spread over the hills that surrounded the city. Thebes represented the great central period of Egyptian history. Rameses II. made it his capital, and the record of his deeds and the praises of his virtues that are carved upon the walls of temples and tombs cover almost as much space as is devoted to the rest of the dynasty.

Behind the ruins, reaching far back into the desert, is a range of granite mountains, with valleys extending in different directions, which were used as a necropolis and among them, carved into the living rock, are the tombs of the kings, which you are already familiar with if you have read much about Egypt.

The river widens here, and between the two ranges of mountains that once formed the banks of the Nile is a rich plain, broken here and there by clumps of palm trees and sycamores, which produce two crops of wheat every year. Luxor should be a prosperous town because of the rich agricultural resources around it but it is interesting as one of the most popular health resorts of Egypt, and the home of the grandest ruins.

* * *

Upon the bank of the river are two groups of temples, the most extensive the most imposing in the valley of the Nile, and many consider them the grandest ever erected. One group is at Luxor; the other at Karnak, two miles farther up the river, and 4,000 years ago they were connected by a broad boulevard, lined on either side with rows of sphinxes carved from massive blocks of stone and set facing each other at frequent intervals. It was the grandest avenue in the world, as those were the

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

TAKE BACK YOUR GOLD

Andrew Carnegie has in one or two instances found cities that did not want his libraries. Moreover, in Mr. Carnegie's fatherland his richest gifts have been met with growls and insults even while they were accepted. An occasional rebuff of this nature may be expected by any man who makes it a practice to confer benevolences upon the people collectively.

It has remained, however, for Mr. Carnegie to undergo the unique experience of offering a cool million and a half to a group of private individuals, and have the acceptance debated and delayed from month to month with a great prospect that the gift will be rejected altogether in the end.

The various engineering societies of New York City, including civil engineers, architects, and men of allied professions, are the organizations in question. A couple of years ago Mr. Carnegie proposed to erect for them a magnificent club building, in which they could all have quarters, and by which they could be brought into more intimate relationship. One or two of these societies had plans for buildings of their own under way, and one or two of them regarded themselves as distinctly better—"higher" in the professional plane—than the others. These societies would have been perfectly willing to accept Mr. Carnegie's money, or a share of it, for themselves, but they were not willing to use it jointly with their "inferiors." Mr. Carnegie, however, proved adamant. "You can take it or leave it," he told them. "You can get together and have the money, or you can stay apart and go without it."

A decision is now at last said to be approaching. The American Society of Civil Engineers held a "long and bitter" debate at its fifty-first annual meeting and not coming to an agreement, it decided to take a vote of all its members by mail, as to whether it would join in accepting the money or not.

From this we learn that money is not everything—even in New York City.

THE COTTON APPEAL

London, Jan. 29.—The Duke of Marlborough, Under-Secretary for the Colonies, received a deputation of the British Cotton-Growers' Association yesterday afternoon. The Duke stated that every possible assistance would be given to the association. He regarded their scheme as one not only important to the nation, but to the Empire at large. Steps would, he said, be immediately taken to plant large areas on a very large scale.

RATES ARE INCREASED

Canadian Pacific and James J. Hill Agree on an Advance

Montreal, Jan. 29.—The Canadian Pacific Railway, through the general manager, announced today that the company had entered into an agreement with the American transcontinental railways to advance freight rates on a large number of commodities. The agreement is the first of the kind made between the Canadian Pacific, and Mr. Hill's lines, the Great Northern and the Northern Pacific. The agreement, which is one for mutual advantage, can be broken if the advantage does not materialize. Discussing the agreement, the Canadian Pacific give their side of the case as follows: "The real reason why rates are now going up is that on many commodities they have been too low. Up to the present the average rate per ton per mile on Canadian Pacific has been considerably lower than on any other North-Western line. During last year it was 7.43 mills, a reduction of .09 mills as compared with the year before. On the Great Northern the rate was 8.67 mills, and on the Northern Pacific 8.58 mills. The difference cannot be claimed to be due to the low grades on the Canadian Pacific, for, while most of our central, western, and Lake Superior divisions is lower grade than on the American lines, there are 2,000 miles in the east of Canada, and a good part of it will average higher grade freight business than any 500 miles of Great Northern.

C. P. R. TO LAKE PORTS

Application for Charter for Line to Bowmanville and Other Places

Bowmanville, Jan. 29.—The action taken by the mayors and the reeves of the municipalities between Campbellford and Pickering appears to have been productive of good results.

Mayor James has been informed that application will be made to the Dominion Parliament at its next session to incorporate the Campbellford, Lake Ontario, and Western Railway Co., to be declared a work for the general advantage of Canada, with power to construct and operate a railway from a point on the Ontario and Quebec division of the C. P. R. between the stations of Blairton and Ivanhoe, thence in a south-westerly direction through Hastings, Peterborough and Northumberland to Cobourg, and then in a westerly and north-westerly direction through Northumberland, Durham, Ontario and York to a point on the line of the C.P.R. between the stations of Locust Hill and Leaside Junction.

This is the route requisitioned for these municipalities in December last, when the large delegation waited on Sir Thomas Shaughnessy in Montreal.

CASHEL IS NEW

Calgary, Jan. 29.—Ernest Cashel was brought out of the barracks yesterday afternoon and requested to give evidence for the defence in the case against Thomas Emery, who is having his preliminary trial on the charge of assisting Cashel to elude the police. Cashel could not see the point, and was of opinion that he had been called to give the men away. He said: "I decline to say anything concerning myself, and will say nothing one way or the other." Emery was committed for trial.

COMING TO CANADA

London January 29.—The Canadian Government Continental emigrant agents have been in London to confer with Mr. Smart.

Devello, the agent at Antwerp is of the opinion that a large number of Belgians will emigrate to Canada during the coming summer.

Mr. Smart is starting on a tour of inspection of the Scotch and Irish offices of the department tonight.

Womanly Troubles

SHOULD NOT BE ALLOWED TO UNDERMINE HEALTH AND BEAUTY, BUT SHOULD BE TREATED AT ONCE BY FERROZONE

It is impossible to go into details on this subject, but the experience of many a poor woman who is crippled for life, just because she didn't use a good remedy in time, should be a warning to others.

When the first stages of womanhood appear in a young girl, a great deal depends upon getting her over this critical stage, so that in years to come she will not develop green sickness or consumption.

As soon as she complains of flushed face, headache, bearing down feelings, give her at once a course of Ferrozone treatment which will carry her past the circle.

In the adult woman if any irregularities occur, Ferrozone will be found a remedy of remarkable potency and power.

Ferrozone is the ideal regulator for the monthly period and causes all organs of the body to perform their work properly, and at just the expected time.

It purifies the blood, tones up the nerves and vital energies. The stomach is strengthened, and digestive and assimilative processes are improved by the good work of Ferrozone. It regulates the bowels, cures constipation, and piles, and replaces disease and decay by health and strength.

There is nothing better for the complexion than Ferrozone. It removes the dark circles from under the eyes, removes and cures all manner of skin eruptions, gives brightness and brilliancy to the eyes, a rosy tint to the cheeks, whitens the teeth and develops a well rounded plump and handsome form.

Ferrozone is the ladies' favorite, and should find a place in every household. It is prepared in the form of a chocolate coated tablet, convenient and pleasant to take. Price per box 50c. or three boxes for $1.25. Sold by all druggists, or by mail from N.C. Polson & Co., Kingston, Ont.

Ayer's Pills

The dose is one, just one pill at bedtime. Sugar-coated, mild, certain. They cure indigestion, biliousness.

granitest temples. People who live in Washington, or visit that city, can get a slight idea of what the temples were from the "Halls of the Ancients," where Mr. Franklin W. Smith has reproduced with great ingenuity and skill a portion of one of the groups of pillars.

No such columns stand anywhere else; no such massive walls and arches; no such towering obelisks. Several acres of ground are covered with broken and recumbent statues, shattered columns, mutilated pillars and massive blocks of stone, which once formed buildings that are alluded to in Homer's Iliad, for a knowledge of the grandeur of Thebes had reached the Greeks of that age, who wondered and gossiped about its hundred gates and the 20,000 chariots of war, which Rameses II. led to battle.

Herodotus tells us all about it, and Diodorus, who saw the city with his own eyes, asserts that it was twelve miles in circumference, and was not only "the most beautiful and stateliest city of Egypt, but of all others in the world." There were a hundred stables on the river bank, he says, each of which was capable of holding 200 horses, and "no city under the sun is adorned with so many stately monuments of gold, silver and ivory, and multitudes of colossi and obelisks cut out of one solid stone." He describes the four temples "the most ancient of which was in circuit thirteen furlongs (about one and a half miles) and five and forty cubits high," and had a wall twenty-four feet broad; and the ornaments of this temple, Diodorus says, were suitable to its magnificence, both in cost and workmanship, but the silver and gold and the ivory and precious stones were carried away by the Persians.

• • •

There is no doubt that these ruins are the most wonderful in the world, for the temples were built upon the same stupendous lines as the pyramids. They were not beautiful, but they were imposing. Egyptian architecture is massive, rather than beautiful, and suggests strength and endurance rather than artistic taste and skill. Everything was on a colossal scale, and that is the reason why they have stood so long, when the rest of the ancient world has been crumbling. But they do not appeal to me like the Parthenon of Athens, the temple at Pestum, on the coast of Italy, near Naples, and the matchless, incomparable columns of Baalbek. The material is sandstone, limestone and granite, and it is roughly dressed. Archaeologists explain that the surface of the columns and walls was once covered with enamel, and that the roughness of the stone was concealed by gilding and paint after the manner of the decorations in the Halls of the Ancients at Washington.

The walls were wonderfully carved and painted, and where they have been protected from the weather the workmanship and the colors are almost as perfect today as they were 3,000 years ago. The decorations tell of the achievements of the several kings, who built them and added one temple after another. There are elaborate sculptures of horses and chariots, fleets of galleys upon the Nile, and the panoramas of the struggles of gods and men. Here a king rides by in his golden chariot, followed by his ministers and warriors, attended by his fan bearers and priests, who burn incense before him; in another place he is represented as sitting upon his throne in state, receiving tribute from conquered kings, and princes and the homage of his court. Again he is portrayed with his terrible bow or battle sword slaying his enemies by the thousands, or returning from the carnage of war with all the evidences of his triumphs, his captives and his booty.

The great Sesostris, who is best known to history as Rameses the Great, gets a great deal of glory from the walls of the temples which he built himself, and the accounts of his adventures are so complimentary as to excite doubt as to their accuracy. For example, one series of sketches relates the history of a memorable campaign, which is commemorated upon the walls of nearly every temple and palace he built, and repeated upon his tomb by the royal scribes. There can be no doubt that it refers to some extraordinary display of courage and strength by this famous Pharaoh, although it may not be strictly truthful, because it tells us that Sesostris, alone and individually, being separated from his army in battle and attended only by his chariot driver, trampled down a hundred thousand warriors like straw beneath his horses feet, slew most of them with his own hand like a god, and those who escaped his sword, he chased to the banks of the river and drove them into the water, where they were gobbled up by crocodiles. This, you will admit, sounds like a story in a modern yellow journal, even though it was carved upon the walls of a religious meeting-house 3,700 years ago.

A BITTER OPINION

London, Jan. 29.—The Toronto correspondent of the Manchester Guardian says that a member of the Dominion Cabinet said he would consider it grossly indecent for any Canadian public man to go to Britain posing as a representative Canadian and assure British audiences that the support and sympathy of the Dominion are with one political party or the other.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.46.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

IS THERE CERTAINTY IN MINING

The Idaho Richmond Gold Mines Company says Yes

AND HERE IS THE PROOF:

1st—By having a property located in a camp that has produced over sixty million dollars worth of gold.

2nd—By having a property that has produced over one hundred and fifty thousand dollars to the former owners.

3rd—By having over two thousand feet of development work done on the property in the way of tunnels and drifts.

4th—By having four different ledges on the property, varying in width from three feet to thirty feet, besides several smaller ones all rich in free gold.

5th—By having now on the dumps ore estimated to be worth over twenty thousand dollars, and all taken from development work.

6th—By having large amount of stoping ground opened up for the taking out of large quantities of ore.

7th—By being able to erect a mill that is located within two thousand feet of the property for the treatment of the ore, which will be done as soon as a small amount of the stock is sold to help defray the expenses of getting ready.

There is no promoter or gift stock, and there is yet over six hundred thousand shares in the Treasury.

We can prove to your satisfaction that we have a mine, and it will pay you to write for information, if you are looking for an investment that will pay you good returns.

LONDON LOOKS FOR WAR

POST THINKS WAR IS INEVITABLE

Tokio Sentiment Strong for Action and St. Petersburg is More Peaceful

London, Jan. 29.—The Daily Post's Tokio correspondent says that war with Russia is inevitable. At no time has the cloud been darker than at present.

St. Petersburg, Jan. 29—Much as I should like to echo the words of the peace rumors which prevail, I am bound to record them, a business man to whom I showed a report sent to an English paper to the effect that the business men were congratulating themselves that the danger of war had passed, was amazed. He said:

"Quite the contrary is the case. The spirit of the business men whom I am seeing all day is very much shaken. A proof of that is that the banks have become shy and make the utmost difficulties about doing business."

A further note of moment is that all officers on leave in the Far East have been called. One hundred naval officers have been sent out in haste and three additional batteries have just been dispatched from Vilna.

I have had another talk with one general holding the highest office in close touch with the emperor. I asked him what he could say as to the present situation. He said:

"Our poor emperor would do anything to avoid war, but he recognizes that the present crisis is the biggest that has faced Russia during her history; that any signs of weakness just now would be tantamount to throwing away the results of Russia's great efforts during half a century, which she has only been able to crown with success by a terrible expenditure of life and money."

NO CONCESSIONS POSSIBLE

I asked him, as he is in the entourage of the emperor, whether it is true that his majesty had stated no concessions could be made to Japan. He replied:

"It is true that no concessions can be made. You know well enough our desire to get to southern waters. We are baffled by ill will and jealousy. The Baltic is closed for six months of the year. We had to forge to the east, and at last we got there. You Americans and Englishmen are using the Japanese as a weapon to shut us in. What strong-rate power could tolerate such a thing? It is impossible.

"We have not hitherto been a commercial nation, but the commercial spirit is growing apace, and, having got an outlet, it is of vital importance for us to retain it. Now these wretched Japanese want to sit down and place a fortress in front of our sole outlet. I am not a diplomatist, only a soldier, yet I know our diplomacy, good or bad, has done its best to avoid war, but it is unavoidable. Speaking of it as a soldier, I look upon it as a step in the dark. But it must be taken at all risks, unless we humble ourselves before eastern nations. You know what that would mean. This state of suspense and expense is intolerable to us, as to Japan as well, and must come to an end, immediately. I am confident in Russia's strength. Everyone knows the strength of Russia."

Then, correcting himself, he said, "No one has known the strength of Russia." By this phrase reaffirming what he had previously stated—namely, that Russia's war capacity would astonish the world.

The St. Petersburg bourse for the past two days has been in an exceedingly nervous condition on account of the persistent pessimistic rumors that Japanese chauvinism had got the upper hand. This is confirmed by advices from Berlin that the idea of arbitration or intervention in any form is ridiculous.

JAPANESE HAVE NOT LANDED.

Seoul, Jan. 29—There is no truth in the report that 2,000 Japanese troops have landed at Chemulpo. It is expected even here that peace negotiations will totally fail or Japan take active military measures in Korea before Feb. 1 at the earliest.

Although Yi Yong [illegible] resigned the war portfolio he [illegible] control of the army as chief of the council of [illegible] ordie.

FROZEN TO DEATH

Three in One Vicinity in Wisconsin Die from Intense Cold

Marinette, Wis., Jan. 29—Three deaths have resulted from the cold temperature in three days here. The temperature has been as low as 35 degrees below. Fred. Cucnolski, at Beaver, Wis., was chained into a wagon by the crew riding back to camp from work because he was unruly. He was forgotten by his companions and when he arrived at camp he died from exposure. Ernest Bruettea, a logger, became lost in the woods near Waumukee last night. He was found this morning and died in a few hours. James Carroll, of Harris, lay down in a snow bank and was found frozen to death the next morning.

Anoka, Minn., Jan. 28—Henry Mertz, an old man, living alone at Linwood, was found frozen to death in his bed today.

MAYOR OF CHICAGO FREE

AN ORDER FOR HIS RELEASE IS GIVEN

A Declaration That Carter Harrison is in No Ways Guilty of Chicago Fire

Chicago, Jan. 30— Mayor Carter M. Harrison was yesterday afternoon ordered by Judge Richard Tuthill to be immediately discharged from custody in connection with any responsibility for the wholesale loss of life in the Iroquois theatre fire.

The judge declared that the mayor was in no way whatever guilty or liable, and that the coroner's jury in ordering Mayor Harrison held to the grand jury had put an unjust stigma upon the mayor, who had failed in no particular whatever, either in commission or omission.

WHAT HARRISON SAID.

Following his release, Mayor Harrison made a statement saying: "The only possible feature which this jury were able to find connecting me with the Iroquois fire disaster was the alleged negligence and inconsistency of my appointees, Fire Chief Musham and Building Inspector Williams. I want to call attention to the fact that Chief Musham has been connected with the Chicago Fire Department for forty years, beginning at the bottom of the ladder and winning his way by gallant and heroic conduct of a lifetime. When the position of Building Commissioner became vacant, I invited the builders club, the association of architects and various other non-partisan professional organizations to nominate a man. They named in nominating Mr. Williams a Republican and gave me the strongest testimonials. The imputation of guilt upon these men is entirely unjustifiable, but to strike at me, over their shoulders, is little short of infamy."

AGREE TO DIE TOGETHER

Husband and Wife Carry Out Compact of Death

Pendleton, Oregon, Jan. 30—The bodies of John T. Brown and wife, of Reinbeck, Iowa, were found in the hills today. Mrs Brown [illegible] shot in the breast and her [illegible] ear to ear with a razor [illegible] himself in the [illegible] son. A note fo[illegible] of life and [illegible] Another note, [illegible] and addressed [illegible] "When this [illegible] more. I have [illegible] gon I love [illegible]

INDIANS [illegible]

Braves in [illegible]

[illegible]

[illegible] READS THE TIMES.

For the Farmer.

The process of tearing down, or what is commonly termed "wearing out" our land, has been the work of generations, and the building up must necessarily be the effort of years. On the ordinary farm, with its five or six year rotation, each particular tract is reached and worked only six or seven times in one generation, which should prompt us to make as much improvement as possible when opportunity offers.

Sheep are necessary on some farms in order to save much of the waste materials. Sheep will eat many plants that other animals will not touch. It may not be profitable for some farmers to keep large flocks of sheep, but a dozen sheep will cost almost nothing. The same may be said of one or two pigs, which give a profit because they consume materials that would otherwise go to the manure heap, but too many sheep or pigs may make the item of labor too costly to allow of a profit.

Value of Shredded Fodder.

Ask men who have made a practice of feeding shredded foder why they do it, and they will tell you that they feed it because their cattle, horses and sheep like it so well and thrive so well upon it, and because they cannot afford to let it go to waste and feed hay which could be sold for two or three times as much as the prepared fodder costs. When the farmer computes the cost of cutting and shredding his fodder it looks high, but he must remember that, although it does cost him from $2.50 to $3.50 per ton, it takes the place of hay which has a market value from two to three times that amount. Men who have made a practice of feeding shredded fodder state that it costs from $3 to $5 an acre to prepare it, and that an acre of average corn will yield from one and one-half to two and one-half tons of dry fodder. They say further that a ton of fodder has as much or perhaps more feed value than a ton of average hay. Corn used for shredding is bound and shocked when the grains are well dented and glazed over, but before the stalk has shown many signs of ripening. When thoroughly dry it is run through the husker and shredded and stowed away in the mow.—Iowa Agriculturist.

Double Yolked Eggs.

Many poultry [illegible] are proud that their hens [illegible] yolked eggs, and I have known [illegible] in my experience [illegible] with three yolks. [illegible] is one to be [illegible] sible way, say[illegible] Farmer and [illegible] for it is not an indication [illegible] but rather of [illegible] either by [illegible] from the ordinary [illegible] life, as a severe fright, or [illegible] to weakness of the [illegible] natural process [illegible] being gone through [illegible] regularly. In almost every [illegible] condition is brought about by [illegible]—a too rapid development of the yolks causing more than one to leave the ovary at a time to enter the oviduct. A hen which once gets into this habit will always be liable to illness, which usually takes the form of loss of power in the legs, even if an actual rupture does not occur internally. Such a hen should therefore be put at once on [illegible] with a view to checking [illegible] being the development of [illegible] not the hen which lays a [illegible] egg occasionally that is [illegible]. What the poultry [illegible] at is a higher gen[illegible] production—a bet[illegible] more regular lay[illegible] lay once every [illegible] These are the "un[illegible] often the birds [illegible] to the "double yolk" [illegible]

Great Demand for Poultry.

The Dominion Department of Agriculture has received communications from British dealers who desire to purchase Canadian poultry. One of the dealers, Mr. James Blackburn of Manchester, Eng., is at present in Canada negotiating for the shipment of poultry. For [illegible] years the Department of Agriculture has exported the [illegible] [illegible]

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.66 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $3.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.60. This being a general sample taken from the dump. The other two assays are [illegible] and [illegible] respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet further it will connect the [illegible] ect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 18[illegible], and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. [illegible]

The PETERBOROUGH BROKERAGE CO., Fiscal Ag[illegible]

PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. S. P. NORTON, Secretary and Treasurer.

Over $[illegible] of development work already done. Main shaft 9 x 16 feet, [illegible] 700 feet. Over 3,000 feet of drifts, tunnels and shafts showing immense ore bod[illegible]

Destined to become large and continuous dividend payer[illegible]

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, [illegible] and [illegible]. They are located in [illegible] Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three [illegible] and dollars of development work was done upon the mines—on [illegible] not mere "prospects" but actual mines. [illegible] work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft ([illegible] compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts at different levels, having a combined length [illegible] Rule winze and the [illegible] of 2,[illegible] feet.

In addition to the above there are four small shafts, with a combined depth of about [illegible] feet; [illegible] feet of tunnels, and at least [illegible] feet of open-cuts, [illegible] planes, etc.

All told, there is [illegible] feet of underground work—the most of which is in ore; there is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least [illegible] Hundred Thousand Tons!

As a further evidence of the large amount of work done [illegible] [illegible] to 100,000 tons of ore on the dumps at the different [illegible] that, with modern [illegible] process, can be [illegible] at a profit.

THE TITLE

Title to the [illegible] and North Bonanza mines is by [illegible] States government, [illegible] [illegible]

The Equitable Company [illegible] of which are patented, by purchase [illegible] of [illegible] [illegible] and is now operating them. [illegible]

Although Yi Yong resigned the war portfolio he retains control of the army as chief of the council of generals.

FROZEN TO DEATH

Three in One Vicinity in Wisconsin Die from Intense Cold

Marinette, Wis., Jan. 29—Three deaths have resulted from the cold temperature in three days here. The temperature has been as low as 35 degrees below. Fred. Cudnolski, at Beaver, Wis., was chained into a wagon by the crew riding back to camp from work because he was unruly. He was forgotten by his companions and when he arrived at camp he died from exposure. Ernest Bruetten, a logger, became lost in the woods near Wausaukee last night. He was found this morning and died in a few hours. James Carroll, of Harris, lay down in a snow bank and was found frozen to death the next morning.

Anoka, Minn., Jan. 28—Henry Mertz, an old man, living alone at Linwood, was found frozen to death in his bed today.

MAYOR OF CHICAGO FREE

AN ORDER FOR HIS RELEASE IS GIVEN

A Declaration That Carter Harrison is in No Ways Guilty of Chicago Fire

Chicago, Jan. 30—Mayor Carter M. Harrison was yesterday afternoon ordered by Judge Richard Tuthill to be immediately discharged from custody in connection with any responsibility for the wholesale loss of life in the Iroquois theatre fire.

The judge declared that the mayor was in no way whatever guilty or liable, and that the coroner's jury in ordering Mayor Harrison held to the grand jury had put an unjust stigma upon the mayor, who had failed in no particular whatever, either in commission or omission.

WHAT HARRISON SAID.

Following his release, Mayor Harrison made a statement saying: "The only possible feature which this jury were able to find connecting me with the Iroquois fire disaster was the alleged negligence and inconsistency of my appointees, Fire Chief Musham and Building Inspector Williams. I want to call attention to the fact that Chief Musham has been connected with the Chicago Fire Department for forty years, beginning at the bottom of the ladder and winning his way by gallant and heroic conduct of a lifetime. When the position of Building Commissioner became vacant, I invited the builders club, the association of architects and various other non-partisan professional organizations to nominate a man. They named in nominating Mr. Williams, a Republican and gave me the strongest testimonials. The imputation of guilt upon these men is entirely unjustifiable, but to strike at me, over their shoulders, is little short of infamy."

AGREE TO DIE TOGETHER

Husband and Wife Carry Out Compact of Death

Pendleton, Oregon, Jan. 29—The bodies of John T. Brown and wife, of Reinbeck, Iowa, were found in the hills today. Mrs Brown had been shot in the breast and her throat cut from ear to ear with a razor. Brown had shot himself in the head after swallowing poison. A note found said they were tired of life and had agreed to die together. Another note, written by Mrs. Brown, and addressed to "Dear Brother," said: "When this reaches you I will be no more. I have found another man in Oregon I love better than my husband."

INDIANS HOLD CRUEL DANCE

Braves in Manitoba Slash Themselves with Knives

Yorkton, Manitoba, Jan. 29—Edward Field, of Fishing River, brings word of a potlach held by Indians, who were inspired by whisky supplied by a trader. The braves slashed themselves with knives. One Indian got the others to cut the tendons of his back, but was unable to bear the pain. The dance continued three nights, over 100 Indians taking part, and the settlers in the vicinity left their homesteads. Eight North-West police started to round up the Indians and arrested Gayfahasagueng, 30 years old.

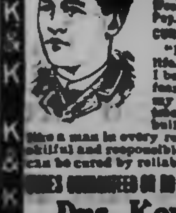
SINFUL HABITS IN YOUTH

MAKE NERVOUS, WEAK, DISEASED MEN.



THE RESULT of ignorance and folly in youth, overexertion of mind and body induced by lust and exposure are constantly wrecking the lives and future happiness of thousands of promising young men. Some fade and wither at an early age, at the blossom of manhood, while others are forced to drag out a weary, fruitless and melancholy existence. Others reach matrimony but find no solace or comfort there. The victims are found in all stations of life—the farm, the office, the workshop, the pulpit, the trades and the professions. Nervous Debility and Seminal Weakness are guaranteed cured by our New Method Treatment or No Pay. You run no risk. 25 years in Detroit. Bank security.

CURED WHEN ALL ELSE FAILED. No names used without written consent.

"I am 33 years of age and married. When young I led a gay life. Early indiscretions and later excesses made trouble for me. I became weak and nervous. My kidneys became affected and I feared Bright's Disease. Married Life was unsatisfactory and my home unhappy. I tried everything—all failed till I took treatment from Drs. Kennedy & Kergan. Their New Method built me up mentally, physically and sexually. I feel and act like a man in every respect. They treated me six years ago. They are honest, skillful and responsible financially, so why patronize Quacks and Fakirs when you can be cured by reliable doctors."—W. A. Belton.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.52 ore 3 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.52 to $10,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

W. D. WALRATH,
NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

For the Farmer.

The process of tearing down, or what is commonly termed "wearing out" our land, has been the work of generations, and the building up must necessarily be the effort of years. On the ordinary farm, with its five or six year rotation, each particular tract is reached and worked only six or seven times in one generation, which should prompt us to make as much improvement as possible when opportunity offers.

Sheep are necessary on some farms in order to save much of the waste materials. Sheep will eat many plants that other animals will not touch. It may not be profitable for some farmers to keep large flocks of sheep, but a dozen sheep will cost almost nothing. The same may be said of one or two pigs, which give a profit because they consume materials that would otherwise go to the manure heap, but too many sheep or pigs may make the item of labor too costly to allow of a profit.

Value of Shredded Fodder.

Ask men who have made a practice of feeding shredded foder why they do it, and they will tell you that they feed it because their cattle, horses and sheep like it so well and thrive so well upon it, and because they cannot afford to let it go to waste and feed hay which could be sold for two or three times as much as the prepared fodder costs. When the farmer computes the cost of cutting and shredding his fodder it looks high, but he must remember that, although it does cost him from $2.50 to $3.50 per ton, it takes the place of hay which has a market value from two to three times that amount. Men who have made a practice of feeding shredded fodder state that it costs from $3 to $5 an acre to prepare it, and that an acre of average corn will yield from one and one-half to two and one-half tons of dry fodder. They say further that a ton of fodder has as much or perhaps more feed value than a ton of average hay. Corn used for shredding is bound and shocked when the grains are well dented and glazed over, but before the stalk has shown many signs of ripening. When thoroughly dry it is run through the husker and shredded and stowed away in the mow.—Iowa Agriculturist.

Double Yolked Eggs.

Many poultry dealers are proud that their hens produce double-yolked eggs, and I have known numerous cases in my experience of hens laying eggs with three yolks. The habit, however, is one to be discouraged in every possible way, says a writer in London Farmer and Stockbreeder, for it is not an indication of productiveness, but rather of disease. It is caused either by some sudden disturbance from the ordinary conditions of life, as a severe fright, or else it is due to weakness of the egg organs—the natural process of formation not being gone through properly and regularly. In almost every case this condition is brought about by overfeeding—a too rapid development of the yolks causing more than one to leave the ovary at a time to enter the oviduct. A hen which once gets into this habit will always be liable to illness, which usually takes the form of loss of power in the legs, even if an actual rupture does not occur internally. Such a hen should therefore be put at once on short rations with a view to checking for the time being the development of eggs. It is not the hen which lays a double-yolked egg occasionally that is a profitable hen. What the poultry farmer should aim at is a higher general standard in egg production—a better average size and more regular laying. Some hens only lay once every two or three days. These are the "unprofitables," and they are often the birds which are addicted to the "double yolk" evil.

Great Demand for Poultry.

The Dominion Department of Agriculture has received communications from British dealers who desire to purchase Canadian poultry. One of the dealers, Mr. James Blackburn of Manchester, Eng., is at present in Canada negotiating for the shipment of poultry. For four years the Department of Agriculture has exported the chickens fatted at the illustration stations to Mr. Blackburn. The dealings have been perfectly satisfactory, and the prices obtained for the chickens have been profitable. Mr. Blackburn said that he would like to handle 3,000 cases of chickens per week.

Mr. Hare, chief of the Dominion Poultry Division, states that prices offer substantial inducements to Canadian exporting firms to ship poultry to Great Britain. The poultry should be forwarded in a steamship equipped with cold storage. The railway and steamship companies will inform shippers when suitable steamships will leave St. John or Halifax. Even on small consignments of poultry the freight charges will not be over one cent per pound.

The chickens fatted at the illustration stations have been sold in Toronto, Montreal, St. John, N.B., Halifax, N.S., Sydney, C.B., and Charlottetown, P.E.I., and also to dealers in other smaller cities. The price obtained for fatted chickens in Toronto was 11c per pound, in Montreal 13c per pound, and in the cities in the Maritime Provinces, with the exception of Charlottetown, 11c per pound. The chickens were sold in Charlottetown at 10c per pound.

The fatted chickens sold to the merchants gave perfect satisfaction, and it would be to the interest of farmers to fatten their chickens before they are marketed. The department could have sold several times as many fatted chickens if an extra number could have been bought from the farmers in the vicinity of the fattening stations. A Charlottetown merchant stated: "We have a reply from the party to whom we shipped the last lot, and he speaks of them as being very fine, and expressed surprise that we could produce such chickens in this country." Almost any farmer in this country can produce fatted chickens equal to the Government chickens at little extra expense for labor and feed.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.66 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.60. This being a general sample taken from the dump. The other two assays are $61.66 and $70.66 respectively, thus being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, dow 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, know as the North Bonanza, Flowery and Kimbark. They are located in Six Mil Canon, less than four miles from Virginia City, Nevada, which is the neares railroad station.

Years ago, over three hundred thousand dollars of development work wa done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, an was paid for by the owners of the mines themselves; thus giving double as surance that the work was well done and that the expenditure was jus tified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seve hundred feet. From this shaft, running along the vein matter, east and west are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,850 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $106,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and air pipe into the 2d-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

1123 BROADWAY, NEW YORK

OFFICERS AND DIRECTORS

HON. W. A. SIMMONS, PRESIDENT, Formerly Collector of Customs, Port of Boston, Mass.	NEW YORK
A. EDWARD ROEBER, VICE-PRESIDENT, With the John J. Mitchell Company.	NEW YORK
M. K. GOLD, SECRETARY AND TREASURER, Formerly with the Clark syndicate Companies.	NEW YORK
HOWARD E. MARSH, CONSULTING ENGINEER, Marsh Manufacturing Company.	NEW YORK
FRED'K DALTON PARKER, LAWYER,	LOS ANGELES, CAL.
GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner, formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. W invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

It be a cross that raiseth me.' I have even told Him to take my health, or loved ones; or anything, only leave me in the image and likeness of Christ. You do not know what a struggle is in my life. Just look at this one peril of the minister. He is so tempted to be jealous of the other men. You would think that might be the last fault. He ought to rejoice in the prosperity of every church and every preacher, but there is the difficulty. The other man has a larger audience, or more conversions, seemingly greater prosperity. Then jealously mounts the throne of my heart, and demands my subjection. I have been a slave, but, God helping me, I never will be again. This world is large enough for my neighbor and myself both, but the old and mean feeling keeps coming up when he seems to have the best, and the tendency to injure him pushes its foul self to the front. Now, Henry, some of these things may not seize you with such a relentless grip, and other things may be more powerful in your life. The enemy is there, facing us all with a boldness which only wickedness possesses, but I want you to know that Christianity is not only for the preacher, but for every man. I am first a man, and just like yourself."

Henry sat with eyes fastened apparently upon a picture hanging at the side of the room, but it was not there to him. It was all blank wall. He was listening to every word from the lips of one whom he respected most, and whose spirit was now making him seem nearer every moment.

He wanted to do right, and was an honest seeker after truth, but to him the new birth as yet seemed mysterious and unreal.

He was doing the best he could, he thought, and what more does a new birth mean?

"Now," Mr. Dowling said, "there is one thing that you lack."

"What is that?" asked he.

"That is conversion."

"Just what do you mean by that?" queried Henry.

"Except you be converted, and become as a little child, you cannot enter the Kingdom of Heaven."

"Yes; but what is conversion?"

"Only this, Henry. Convert means to turn around—face about. You have your eyes toward yourself and your own moral life, and even your sin. You must turn around and face Christ. That is all. Trust Him, love Him, and serve Him. One side of the great act is *faith*, and the other side is repentance. You repent of your sin, and you trust in Christ as your Saviour. Is that not simple? This is the meaning of Calvary to you. This is the divine plan of salvation for us all. You may not live much differently in the future outwardly, but you will live with a different disposition and a new spirit. It is just giving up to God's way, in sorrow, for all the sin of your life. Isn't that simplicity itself? The great mystery of the universe, and yet a child can understand how to say 'sorry' to God. I asked my little boy Will, eight years old, when he gave his heart to Jesus, and instantly he replied, 'Why, papa, ever since I first heard of Him.' Was not that beautiful? Why do not all men treat the Saviour like that?"

"Well, Mr. Dowling, I am ready, in as far as I know, to do it. This has been creeping over me for some weeks—in fact ever since I first began coming to church, and I have been awake many times in the night this last week, and have even tried to *pray* myself right."

"This is all, Henry; just this prayer now settles it for eternity: 'God, be merciful to me, a sinner, for Christ's sake.' That is coming to Christ, and that is going to heaven. 'He that believeth hath everlasting life.'"

They knelt at the same chair. The hand of Mr. Dowling rested on the farther shoulder of his companion, and great tears dropped from four eyes to the floor.

Angels carried the news to the city of God, and there was rejoicing around the throne.

Elsie was awake when Henry came in, but she was in her room, and refrained from telling him her joy, or asking the one important question. Never had her heart such an effort to control her lips, but she did, and it was best.

In the morning there was a strange occurrence. No, it was almost the ordinary one, but, alas, always unexpected.

Henry anticipated that everything was going better.

Elsie expected a new world, but the great tempter was planning his best work. He always does.

For the first time in a year, the alarm clock did not awaken Henry. In his excitement the night before, he had forgotten to wind it. When his eyes opened in the morning he was half an hour late. All things were in their wrong places, and haste only made waste.

Just before he was going away, Henry said something to his sister, which had in it only the shadow of unkindliness, but it was a sword as the one of Goliath thrust into her tender heart.

She could hardly control her feelings, and the door closed with more of a bang than usual, and he was gone.

Elsie sat down, and had it out the girl's way—a good cry was a relief.

Henry could have done the same, if he dared. He said:

"There can be no reality in what I did last night. I am not a Christian yet, or I would not have said that to her. She did not do anything. It was all my own fault, and I am glad that I did not tell her about my new life before I tried it."

Henry Fielding was in the warfare that they had talked about, and his enemy was doing his very best to conquer.

This was the last opportunity.

That was the longest and hardest day he ever had, but it was a day of victory, because he had stamped his foot a score of times, and said, "I will."

As soon as he entered their home that night, he did not place his hat before he went to Elsie's side, and said in tenderest tones:

"Elsie, I want you to forgive me."

That was the greatest evidence of his conversion, but he did not realize it.

She sat down and had to cry again.

There was something else in it now, and when her brother attempted to comfort her, she only said: "Wait a minute, and I will tell you."

Then she told him of her happiness; that they were tears of deepest joy, because he had become a Christian. She knew it, even though he had not told her, and she said: "Your doing this, which you never did before, is the best proof. Your coming to me in this Christ-like way tells the whole story. Now, I can reveal another secret to you. I could not tell you before, I was afraid you would not bear it, as I know you will now. You can bear all things now through Christ, and I am sure this will be such a sorrow and disappointment to you. You have been so good to me, and such a noble brother. You have made so many sacrifices for me and my music lessons. I have done my best to learn, and you know how far I have advanced, especially with my last teacher, but every time your hard-earned money went to pay for the lessons, I felt as if I was guilty of a crime, and now this is the saddest part of it."

"I will bear it, and not care. What do you mean?" he asked, as she made the slightest pause. "Tell me," he said anxiously, as he rose and looked down at her.

"I have been waiting for weeks to

(To be continued.)

Individualities.

Sir Frederick Treves, the famous English surgeon, who has just retired, established a record in performing one thousand consecutive operations for appendicitis without a death.

Great interest has been aroused in London by the announcement that the Marchese Karlo di Rudini, son of the former Italian Premier, is to marry Dora Labouchere, daughter of Henry Labouchere, the noted editor of "Truth."

During his lifetime Gordon McKay, the wealthy inventor of the machine that revolutionized shoemaking, who died at Newport lately, deeded all his property, valued at four millions of dollars, to Harvard University, retaining an income for life.

Mark Twain and his wife have leased the Villa Papiniano, which belonged originally to the sculptor Baccio Bandinelli, a contemporary and rival of Michael Angelo. The villa is pleasantly located about halfway between Florence and Fiesole, and connected with the modern town and the old Etruscan stronghold by a line of electric cars.

That much-quoted superstition, "three times a bridesmaid never a bride," seems to have no terrors for Alice Roosevelt, who has accepted an invitation to serve in this capacity at the approaching marriage of Miss Lilla McCauley and Mr. Wolcott Tuckerman, which will take place in Washington, D.C., November 25. Miss Roosevelt was a bridesmaid at the wedding of Miss Ruth Pruyn and Mr. David M. Goodrich, in Albany, last June, and also at the marriage of Miss Madeline Jackson to Mr. George C. Lee, jr., in Boston, several years ago.

Pope Pius has appointed Mgr. Merry del Val to be Papal secretary of state. It is reported that the nomination, however, will not be made officially until the next consistory, when the monsignor will also be made a cardinal. Mgr. Del Val is under forty years of age, and is descended from one of Spain's noblest families. His mother was an Englishwoman, and he was born in England, receiving his early education from the Jesuit fathers in Stonyhurst College. His higher education was received in the Academy of Nobles, in Rome, the institution of which he is president.

New York clubmen are going in for politics with a vengeance. It is evidently the intention of both Democratic and Republican parties to have representative men as aldermen. Eddie Crowninshield, who is a member of the Knickerbocker Club, one of the Rough Riders, and a leading spirit in a great many social and other enterprises, is to run on the Tammany ticket for alderman in the "kid glove" district. In the Republican camp, there is Beverley R. Robinson, son of Dr. Beverley Robinson, who is to be the candidate in the twenty-ninth aldermanic district, which comprises the territory on Fifth avenue, between Fifty-second and Fifty-fourth streets.

Helen Keller has just begun her senior year at Radcliffe. Her studies this year will consist of Professor Kittredge's Shakespearian course, Dr. Neilson's English literature, Professor Moore's course in Plautus, Cicero and Lucretius, and Professor Morgan and Dr. Rand's course in Latin, which covers the annals of Tacitus, the satires and epistles of Horace, and selections from Catullus. Up to the present time Miss Keller has passed with credit all her college examinations. When she has completed this year's work, as outlined, she will have accomplished more in the way of scholarship than any other person who has been handicapped with the loss of sight, hearing and speech.

When Eleanor Calhoun, the California actress, was married, a few months ago, to Lazarovitch, the Servian leader, she announced to her friends that she might some day return to the stage. She has now, however, abandoned all such ambitions, and has thrown herself enthusiastically into assisting her husband with his political writings and into looking after his three children. It will be remembered that Lazarovitch, according to his own statement, was approached by certain Servians prior to the massacre of King Alexander and Queen Draga, and asked to accept the throne as next in line of succession should the plot prosper. Lazarovitch, however, having no desire to rule the kingdom, not only refused to be a candidate, but left the country. It was then he came to London, met the California actress, and married her.

When the Duke of Devonshire and the present Duke of Manchester's grandfather were young they loved Louisa, daughter of the Count d'Alten of Hanover. Devonshire, then known as Lord Hartington, was a laggard in his love affairs, as he has been in everything else, and so the lady became Duchess of Manchester in 1852, and duchess she remained for forty years. But, though she married the other man, her devotion to Lord Hartington and his devotion to her were famous. She counseled him in all the important affairs of his public life, spurred him on, and was his nearest friend. Nobody thought of inviting one without the other. At last Manchester died, Hartington himself shortly afterward succeeded to a dukedom, and in 1892 the widow, still one of the beautiful women of England, became a bride and a duchess again.

"Mr. Nozzleton," *she* said, "If you try to hug and kiss me again I shall call papa." "Where is your father?" he asked. "He's in the Yellowstone Park, and will be beyond mail or telegraphic communication for three weeks."—Chicago "Record-Herald."

She (reproachfully)—Before we were married you used to say you couldn't live without me. He—A man never knows what he can do till he tries—"Life."

The money obtained from this sale is to be us.d for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 1-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

RS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear property well and favorably spoken of by parties who have been on ground and whose opinion should carry considerable weight; and the that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property pos a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)

Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the prospects for a big mine in this part of th country. The officers are men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 1-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

HIGH CLASS INVESTMENT

ZACUALPA RUBBER PLANTATION COMPANY

corporated Under the Laws of the State o Calfornia.

Zaluaipa Rubber Plantation is situated in the best location in Mexico for cultivation of rubber. It has been for a great many years a choice strip of rubber land and superior experience has shown that it is to all that has been claimed for. The affairs of the company are in hands of men of undoubted integrity high reputation as successful men business. To those seeking a safe investment which will secure a good income for life, this proposition offers a opportunity

shares in La Zacuaipa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders shares in La Zacuaipa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacuaipa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and care for same for a period of five years and at the expiration of that time gather the first harvest and deliver net proceeds thereof to the shareholder.

In other words, La Zacuaipa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacuaipa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to a shareholder is the one to be gathered from La Zacuaipa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacuaipa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,

13 Market St., San Francisco, C l.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price tha will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

EFERENCES—The Governor of the State, and any bank in Boise, Idaho. Write the Company for particulars. Address

GEO. W. E. DORSEY, President,

Boise City, Idaho.

J. W. DOUGHTY, Fiscal Agent, Peterborough.

Anecdotal.

A Western Congressman was asked if he did not think President Roosevelt certain to be re-elected, barring any "big mistake" the candidate might make. "Yes," was the reply, "but let me tell you that the biggest mistake he possibly could make would be to allow the crops to fail next year."

A friend of Edward MacDowell attended a recital given by a mediocre teacher's pupils, and when he met the American composer he remarked: "I heard one of the pupils, a little girl of eight, play your 'To a Wild Rose.'" The composer sighed dejectedly. "I suppose," MacDowell remarked, "that she pulled it up by the roots."

During the protracted sessions of the Parnell commission, Justice Day habitually sat with closed eyes. It was commonly supposed that his lordship was sleeping, and the late Sir Frank Lockwood, observing that the learned judge was very much awakened by a little tiff between the president and Sir Charles Russell, exclaimed, quite audibly: "This is the dawn of Day!"

Chauncey M. Depew declares that when King Edward, as Prince of Wales, visited the United States, the old Duke of Newcastle used to scan the accounts of expenditure. At the end of one hotel bill he one day found a charge which he couldn't make out. "What's that charge for?" asked the Duke of the hotel proprietor. "For making such a damned fuss," was the immediate reply.

General Nelson A. Miles says that during the Civil War there was one conscription fakir who made thousands of dollars before the authorities restrained him. This rascal would send letters broadcast, wherein he said he would communicate for two dollars a sure means of escaping the conscription. Letters, enclosing two-dollar notes, poured in on him, and in reply to each letter he would send a printed slip reading: "Join the nearest volunteer regiment."

An old negro living in Carrollton was taken ill recently, and called in a physician of his race to prescribe for him. But the old man did not seem to be getting any better, and finally a white physician was called. Soon after arriving, Dr. S.—— felt the darkey's pulse for a moment, and then examined his tongue. "Did your other doctor take your temperature?" he asked. "I don't know, sah," he answered, feebly; "I hain't missed anything but my watch as yit, boss."

One of Pere Ollivier's flock, a very beautiful and handsomely dressed woman, coming very late to church one Sunday morning, caused some disturbance and stir among the worshippers by her entrance, and interrupted the flow of eloquence of the worthy father, who, very irritable and easily put out, said: "Madame perhaps waited to take her chocolate before coming to church?" To this, madame, by no means abashed, graciously replied: "Yes, mon pere; and two rolls with it."

It is related that the American commissioner of fine arts at a Paris exposition once wrote to several artists—to Whistler among them—saying that he would be in Paris shortly, and mentioning the time at which, and the place where he would like them to call upon him. Whistler was asked to call at four-thirty precisely. He wrote: "Dear Sir — I have received your letter announcing that you will be in Paris on the —th. I congratulate you. I have never been able and never shall be able to be anywhere at 'four-thirty precisely.' Yours most faithfully, J. McN. Whistler."

By his tact and amiability Sir Thomas Lipton has made thousands of friends during his visit in New York City. One day recently on the "Erin" he was watching the "Shamrock" from the bridge, and his guests, among whom were some pretty girls, were on the deck below, screened from the sun by awnings. Sir Thomas went down to chat with them for a few minutes, and then said: "I think I'll have the awning taken down." "Don't, Sir Thomas," the women all exclaimed in chorus, "we'll roast here." "But," tactfully replied the baronet, "I'm lonely on the bridge, and I miss your pretty faces." No one objected to the awning coming in after that.

Here is one of Lew Dockstader's latest stories: Two brothers had more or less trouble with the boy next door, and hadn't always come out victors. In fact, the boy next door was so much bigger that he seemed to have the best of it invariably. So it wasn't an unusual thing when one of the boys came into the house with a badly bruised eye. Moreover, he was crying when his aunt stopped him in the hall. "Hush, Willie," she said; "you mustn't make any noise." "What—what's the ma-matter?" he asked, between his sobs. "You may disturb your new brother," said his aunt, soothingly. He dried his eyes in a minute. "Have I got a new brother?" he asked. His aunt nodded. "One besides Jim?" She nodded again. "Bully!" he exclaimed. "You're glad of it?" she asked. "You bet!" Willie fairly shouted; "if Jim and me and the new one can't lick that feller next door, we'd better move."

A pretty story, illustrative of the change of feeling which has come over the Irish peasant toward King Edward since the recent royal visit, appears in the English press. Two London journalists, on their way from Dublin to Cork, accosted a shaggy, farmer-looking native at a Queen's County station with the words: "Well, Pat, what do you think of the King of England now?" "King of England, is it?" replied the Irishman, and there stole over his face an inimitable expression of drollery as he went on in a stage whisper: "Sure, avic, ye'll want a viceroy over there, I'm thinkin'. Himself an' herself are not goin' back to yes at all!" An old dame in Galway who had spoken with the King was questioned as to what she thought of his Majesty. She delivered herself of a long and enthusiastic eulogy, to the effect that "Edward the First of Ireland" was "a grand man entirely," closing with the remark that she had "only wan thrifling fault to find with him," and that was that "they keep the poor man so long in the Phaynix Park beyant that they have him talkin' with a strong Dublin accent."

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA

AND

BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,093 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 195 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS.

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,

SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

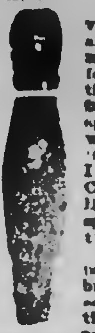
BRONCHITIS CURED

For fifteen years Mr. John Pearson of Melvern Square suffered from Bronchitis and throat irritation. Doctors failed to relieve but Catarrhozone cured quickly

The remarkable recovery of Mr. Pearson, who for years was principal of Melvern Square High School, is convincing evidence of the exceptional curative powers possessed by Catarrhozone.

"For fifteen years," writes Mr. Pearson, "I constantly suffered from Bronchitis and Throat Irritation. Until quite recently I was able to keep up my teaching, but my bronchial trouble became so annoying that I was forced to resign.

"For months I doctored with different physicians and was not benefited. My trouble grew more severe and extended to the lungs, and I feared I would end in decline.



"Providentially I was advised to use Catarrhozone, and I believe it really saved my life. Its immediate effect was to relieve the throat trouble sufficiently to give me perfect ease in speaking. Within one short week all symptoms of bronchitis had disappeared. I can fervently recommend Catarrhozone. I know it has no equal as a sure and speedy cure for throat trouble and bronchitis."

Every air cell and air passage, all parts of the breathing organs are reached and breathed by the antiseptic vapor of Catarrhozone. It soothes and heals the inflamed mucous surfaces, stops the cough, clears the nose and throat, and drives every symptom of bronchitis right out of the system.

To purify the blood of all poisons, and to build up the system, Ferrozone Tablets, which are included in every Catarrhozone outfit, are very highly recommended. This local and constitutional treatment in Bronchitis, Catarrh, and Consumption cannot be equalled.

Catarrhozone is endorsed by physicians and ministers and thousands it has cured. Two months' treatment costs $1. Small size, 25 cts. Sold by all Druggists, or N. C. Polson & Co., Kingston, Ont.

A Free Demonstration

Miss Hills, a teacher of cookery, will give a free demonstration on Thursday evening, Feb. 4, in the Y.M.C.A. building, as an introduction to the course of lessons which she will begin immediately afterwards. Everyone is cordially invited to this demonstration, which will doubtless prove most interesting.

Died in Toronto

On Wednesday last the death of Mrs. E. Peplow, formerly of Peterborough, took place. The deceased was well known in Peterborough, having lived here with her husband, who ran the Hilliard flour mill a few years ago. Mrs. Peplow was born near Warsaw, and her many friends there will learn with regret of her death, which occurred while her husband was in Toronto.

Millbrook Cocking-main

Lindsay Post—A number of Lindsay and Peterboro sports journeyed to Millbrook Wednesday night, the attraction being a cocking main, Peterboro vs. Lindsay, the latter side losing. The affair took place in the agricultural hall and was marked by the usual fights, drunkenness, and disorder. We are informed that a certain well known constable was a prominent personage at the gathering. The matter should be looked into by the Crown ahtuorities.

OBITUARY

The death of Mr. Captain Henry McDonald occurred on Friday morning. He passed peacefully away after an illness of about ten days. The deceased was fifty-six years of age, was well known and highly respected. Mr. McDonald has been a resident of Peterborough for the past fifteen years. He leaves to mourn his loss a wife and two daughters, Miss Rose and Mrs. Wm. Proctor. Much sympathy is felt for the widow in her sad affliction as she was stricken with a stroke of paralysis about a year ago which left her quite helpless. The funeral took place from the family residence 11 Wescott, street, on Saturday afternoon at three o'clock to the Little Lake Cemetery.

Presentation of Band Instruments

The new band instruments for the Salvation Army, which the citizens of Peterborough so generously made donations in recognition of the good work the Army is doing in town, will be presented to the members tonight. It will be something special at the barracks. Brigadier Turner, of Montreal, will be present and make the presentation along with a number of prominent citizens and business men of the town. Mr R. R. Hall, barrister, will address the meeting, and it is expected that the local ministers will also attend. The instruments will be on exhibition at the barracks this afternoon, also the quilt on which the names of those who made donations are worked. This quilt will be disposed of to-night. Any prospective purchaser can view the same this afternoon.

An Officers Council will be held this afternoon at which Brigadier Turner will be present.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporte on Their Rounds

—The Town Council will meet this evening.

—The Board of Education will meet in the Secretary's office this evening.

—Don't forget the presentation of band instruments at the S.A. Barracks tonight.

—Only fourteen days until Valentine's Day. Get your valentines at Times Bookstore. Big assortment to choose from.

—Mr. Ed. Hyland, who has occupied the position of cutter at Mr. Thomas Barrie's store, has acquired an interest in the business. His many friends will wish him and the new firm every success.

—The February meeting of the Ministerial Association will be held on Monday, February 8th, instead of on Feb. 1st. Rev J. C. Davidson, M.A., will be the speaker, his subject being, "The Mission of the Church."

—The regular fortnightly meeting of St. John's Young Men's Guild will be held this evening at 8 o'clock. A large attendance is urgently requested as some very important business will be transacted.

A SPLENDID REPORT

The Trusts and Guarantee Company's Meeting

We congratulate the Hon. J. R. Stratton, (President), directors and shareholders of the Trusts and Guarantee Company on the splendid financial position of the Company, as set forth in the statement presented at the Seventh annual meeting of the shareholders, held at the Company's office, Toronto, on Wednesday last.

After paying a dividend at the rate of five per cent, and providing for all contingencies, the sum of $34,466.92 was carried forward as a nest egg for next year.

Hon. Mr. Stratton, in moving the adoption of the report of the directors referred to the growing confidence of the public in the management of the company. To the citizens of Peterborough the company needs no commendation.

The returning board of directors were re-elected and at a subsequent meeting of directors, Hon. J. R. Stratton was re-elected President.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—The T.A.S. and Lakefield will play a T.V.L. game here tonight.

—Mr John Riddell, South Monoghan, is ill with typhoid fever.

—Mr. John Finlay, the Liberal candidate in East Peterborough, was in town Saturday.

—Mr. J. McCarthy, Portage la Prairie is home visiting his parents, Mr. and Mrs. J. McCarthy, 137 Lake street.

—Mr Jos. Welsh, accompanied by his friend Mr. Anderson, is visiting at his home on Elm street.

—The Times had a call on Saturday from Mr. John Lang, M.P., of Keene.

—Mrs Sowerby, accompanied by her son, Mr. Fred., returned to Toronto, Saturday. Mr. Sowerby had been seriously ill at the Hospital, and is sufficiently recovered to make the journey home.

—Among the passengers who sailed on Saturday by the S.S., Graf Waldersee are Rev. E. A. Langfeldt, Rector of St. Luke's Church, Peterborough, with Mrs Langfeldt and little daughter, Dorothy. Mr. Langfeldt will spend three months in Germany.

—On Saturday last Mr. Edward Green and Mrs. M. A. Heather celebrated their seventy-eighth birthday. Mr. Green and Mrs. Heather, who are twins, were born in Ireland, and have been resident here for fifty years. Friends will be pleased to know that they are in excellent health and likely to see quite a number of birthdays yet.

—A Peterborough correspondent writes to the Globe:—Despite the storm of Tuesday, the at home given by Mrs. J. Harris McLellan for her guest, Mrs. Frederick Duggan, of Toronto, was a pronounced success. The pretty drawing room with bright fire and artistic floral decorations in red, was a delightful contrast to the stormy elements outside. The decorations in the tea room were pink carnations and asparagus fern, and the table was exquisite in its dainty coloring and tasteful arrangement, the color scheme being carried out in the ices, cakes and bon-bons. Those assisting in the tea room were Mrs. Louw, Mrs. Forlie, Mrs. Grubbe, Miss Hall, Miss Alma McCallum, Mrs. Hugh Charles, Miss Bradburn, Miss Pearce, Miss Hay, Miss Annie Hall.

Pamphlets, explanatory of the attractive investment plans of the company, and a copy of the annual report showing its unexcelled financial position will be furnished on application to the home office or any of the company's agencies.

$500 REWARD FOR WOMEN

WHO CANNOT BE CURED.

So uniformly successful has Dr. Pierce's Favorite Prescription proven in all forms of Female Weakness, Prolapsus, or Falling of Womb, and Leucorrhea, that, after over a third of a century's experience in curing the worst cases of these distressing and debilitating ailments, Dr. Pierce now feels fully warranted in offering to pay $500 in cash for any case of these diseases which he cannot cure.

IT STANDS ALONE.—The "Favorite Prescription" stands alone, as the one and only remedy for these distressingly common forms of weakness, possessed of such positively specific curative properties as to warrant its makers in proposing, and binding themselves to forfeit, as we, the undersigned proprietors of that wonderful remedy hereby do, to pay the sum of $500 in legal money of the United States in any case of the above diseases in which after a fair and reasonable trial of our treatment, we fail to cure. No other medicine for the cure of woman's peculiar ailments is backed by such a remarkable guarantee; no other medicine for woman's ills is possessed of the unparalleled curative properties that would warrant its manufacturers in making such an offer; no other remedy has such a record of cures on which to base such a remarkable offer.

Therefore, *insist* on having Dr. Pierce's Favorite Prescription and turn your back on any unscrupulous dealer who would insult your intelligence by attempting to foist upon you some inferior substitute, under the plea that "it is just as good." Insist on having the article which has a record of a third of a century of cures and which is backed by those willing to forfeit $500 if they cannot cure you.

In cases attended by a leucorrheal drain a solution of Dr. Pierce's Lotion Tablets should be used conjointly with the use of the "Favorite Prescription." They are sold by all druggists, or sent post-paid to any address, on receipt of 25 cents in stamps. Send 50 cents in stamps for Dr. Pierce's Common Sense Medical Adviser. Address WORLD'S DISPENSARY, Buffalo, N. Y.

Weak and sick women are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as strictly private. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Pellets cure biliousness.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully."

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

etween the Town and the P. L. & P. Co. Provided for by a Second By-Law Adopted by the City Fathers Last Night

he City Fathers met in regular ses- last night at 9 o'clock and sat un- the clock struck 12. There were sent: Mayor G. M. Roger, and Alder- , Edgcumbe, McWilliams, Clinks- e, Johnston, Best, Hicks, Morrison, h, Scott and Adams.

LOCK WORKS ASSESSMENT

. Morrison submitted the follow- ;—

our Manufacturers Committee beg e to report and recommend as fol- s;—

. That this Committee be authorized end one or two persons at any time interview persons who propose lo- ing an industry when the Committee ms it advisable to do so, and that Treasurer be authorized to pay the enses on the certificate of the irman of this Committee.

. That the application of the Peter- ough Lock Manufacturing Co. be epted, and that the Company be given site asked for and a fixed assess- nt of $12,000 for ten years on terms be fixed by the Manufacturer's Com- tee and as nearly as may be on the e terms as the grant of a site made the Canadian Cordage and Manufac- ing Company, and that the necessary islation be applied for to enable the wn carrying this out.

. That for the purpose of encourag- the erection of an Academy of Mu- the Council apply for legislation au- rizing the Council by a three-fourths e to pass a by-law or by-laws grant exemption from taxation for a per- not exceeding 15 years any suit- e building erected for that purpose terms to be fixed by the by-law nting the exemption.

Clause two of the above report was response to a communication from Peterborough Lock Manufacturing ., stating that their present pre- es having become unsuitable for ir business, and so situated as to ke it impossible to enlarge their ndry, so as to expand the business, d as it is absolutely necessary to lo- e where they could get railway sid- s from both the Grand Trunk and nadian Pacific Railways, they made following proposition;—If the Town l give the Company the lot lying be- en the G.T.R. and the C.P.R. tracks, a protion of which lot is at pre- t occupied by Mr. H. P. Kennedy as stock yard, the Lock Co. will agree to [illegible] up-to-date buildings to in the neighborhood of $25,000, and ree to a fixed assessment of $12,000 for term of ten years. The Company fur- er stated that satisfactory arrange- nts can be made with Mr. Kennedy regard to his giving up his lease the portion of the lot occupied by m.

Ald. Best objected to giving the Lock Vorks a grant of land valued at $3,500. ey had enjoyed exemption for twenty ears, and he could not see why they ould expect their request to be ranted. He could not see why they hould not be able to make money as ell as the Gurney, Tilden Co., of Hamilton, who are similarly situated. The atter concern have no railway running o or alongside their property, and apparently are in a position to handle their aw material and output advantageously. He quoted a letter saying that the Gurney Tilden Co. are enjoying no advantages from the city of Hamilton save hose allowed all industries, exemption except school tax. All industries there are placed on the same footing, and the Peterborough Lock Works should e satisfied to be assessed on the same asis as such firms as the Wm. and Peter Hamilton Manufacturing Companies. As to a free site, that was out of the question. We shut off the Auburn Woollen Co. some years ago, and they are now paying full assessment, besides being seriously handicapped owing to the tariff; then why should we give preference to a paying concern like the Lock Works?

Ald. Morrison—"One reason for this Company's request is that they are going to double their capacity by erecting bigger buildings. Again, their present insurance is high, owing to the fact that the scattered nature of their premises forbids the installing of an automatic sprinkler. The Lock Works have a hundred hands employed—skilled mechanics earning good wages—and it would be a great misfortune should Peterborough lose this industry. He thought the fixed assessment asked for—$12,000—a fair one as compared with any other industry in Peterborough. Ald. Morrison moved, seconded by Ald. Rush, the adoption of the report.

Ald. Hicks moved in amendment, seconded by Ald. Johnston,—That in the event of the Lock Manufacturing Co. purchasing the property in question from the Town, at a fair valuation, or any other property suitable to them, that they be given a fixed assessment on $12,000 for ten years, providing they erect on the property such buildings as mentioned in their letter.

Ald. McWilliams—The plan adopted in Hamilton seems to be that they assessed only on school tax. We want if possible to treat all manufacturers alike. It does not make any difference whether a manufacturer is making any money or not, we must consider what benefit the concern is to the town. We offer a free site and exemption to new industries, and should give the same inducements to new additions to present industries. If the Lock Works are, with their proposed enlargements, going to offer us substantial compensation equal to that derived from the Cordage Works, we should give them the same privileges as secured from us by the latter concern.

Ald. Best moved in amendment to the amendment,—That the Company be not granted the site of land in question, except by purchase on valuation, and that any improvements shall be subject to the same terms of assessment as the Wm. Hamilton Co., and other industries at present located here.

Ald. Best's motion in amendment to the amendment was here voted on and lost on the following division;

Yeas—Best and Clinkscale.

Nays—Ald. Edgcumbe, Johnston, Morrison, Rush, Scott, Adams and McWilliams.

Ald. Hicks' resolution in amendment to the report was next voted on and lost on the following division;

Yeas—Ald. Hicks, Johnston and Scott.

Nays—Ald. Edgcumbe, Morrison, Rush, Adams, Clinkscale, McWilliams and Best.

The original report was also voted on the following division;

Yeas—Ald. McWilliams, Adams, Rush, and Morrison.

Nays—Ald. Johnston, Hicks, Scott, Clinkscale and Best.

Ald. Edgcumbe did not vote on the report.

Subsequently, however, clauses one and three of the report were adopted as read.

Later in the evening, at 11.30, this question was again resurrected by Ald. Morrison moving, seconded by Ald. Hicks,—That the matter of the Lock Mfg. Co. be reconsidered.—Carried.

Ald. Morrison again moved, seconded by Ald. Rush,—That the Peterborough Lock Manufacturing Co. be granted a fixed assessment of $10,000, providing they purchase from the Town the land specified in their letter and erect thereon buildings to cost not less than $25,000. The price of the lot to be subject to the approval of this Council.

Ald. Adams could not see the justice in this resolution, which fixed the assessment at the same price as that of others whose property is four times the value of that of the Lock Works—the Wm. Hamilton Co. for instance. He would rather support Ald. Best's amendment.

Ald. Morrison urged that this matter be settled definitely tonight some way in order to get immediate legislation, as the Lock Co. intend to erect their new premises this year.

Ald. Best pointed out that there was no reason to rush the thing through, as the Lock Co.'s exemption did not expire till 1906, and this is only 1904.

Ald. McWilliams moved in amendment, seconded by Ald. Best, that the matter be referred to the Com. of the Whole.

Ald. Morrison withdrew his resolution and the amendment carried.

ST. LIGHTING CONTRACT.

A communication was read from Dennistoun, Peck, Kerr & Stevenson, stating that the present uncertainty as to whether a valid lighting contract existed or not, makes it very difficult for the Peterborough Light and Power Co. to arrange for necessary changes, and improvements in their plant and power house, which were being rearranged. The suggestion was made that the Council take the course suggested by Mr. Justice Meredith, and pass a by-law to take the place of the former one, and discontinue the appeal which may not be heard for several months. In this event, the Light and Power Co. would defend the new bylaw if attacked, and will indemnify the town against costs. The company were willing to execute the contract in form prepared by the Town Solicitor, with the changes relating to a duplicate plant and free lighting of Victoria Park.

This led to the following report being submitted by Ald. McWilliams;

Gentlemen,—Your Legal Committee beg leave to report and recommend;

1. That, having given instructions that the matter of the application of Meldrum & Peterborough in regard to the street lighting by-law be taken to the Court of Appeal, the Treasurer was instructed to issue a cheque for $300 to be deposited in the Court of Appeal as security and we recommend that this be confirmed.

2. That in view of the letter received from Mr. Dennistoun on behalf of the Peterborough Light & Power Company, the appeal in the street lighting application be dropped and that a by-law be passed authorizing a new agreement with the Peterborough Light & Power Company for street lighting on similar terms, the Company to agree to supply light from a system of duplicate generators and furnish light free in public parks.

All of which is respectfully submitted. The report was adopted as read.

A by-law to authorize the execution of a new contract with the Peterborough Light and Power Co. for street lighting, as recommended in the above report next followed and was read a first time.

Council then went into Committee of the Whole on the second reading. Ald. Morrison in the chair.

Ald. Best here took a hand in the proceedings and remarked; "If you put that by-law through tonight there'll be another injunction filed, and we'll then see where Mr. Stuart stands on the question of bonus. We promised the ratepayers to take up municipal lighting, and it can be done at $35 a lamp. And as to the street railway, I'm satisfied tha within a very short time we are going to have a very much better proposition for an up-to-date system than Mr. Stuart's." Ald. Best then went on to say that in the event of the Town doing its own lighting, it would be in the interest of the Peterborough Light and Power Co. to hand over their poles on reasonable valuation, and the Town charge them a reasonable pole rent for power and domestic purposes.

Ald. Best here moved in amendment, seconded by Ald. Clinkscale,—That the by-law be read six months hence,—Lost, only being supported by the mover and seconder.

Ald. Best here asked if this by-law did not mean confirming the agreement with Mr. Stuart regarding the street railway.

Ald. Morrison.—"You were at the last Committee meeting when Mr. Dennistoun said that Mr. Stuart was prepared to go ahead preparing for the installation and operation of the railway."

Ald. Best—"Yes, providing he gets the street lighting contract.

Ald. Morrison—"He did not say that."

Ald. Best—"That was the agreement from the first and he still adheres to it."

The by-law was here read a second time and carried.

The Mayor here took the opportunity of informing Ald. Best that this question had been approved of by the people at the polls, two to one.

Ald. Best—"What did they vote on? Not two by-laws, but on an agreement which one of the smartest Aldermen of last year's Council—Ald. O'Connell,—admitted he did not understand."

The by-law was here read a third time and adopted.

DIVERSION OF CREEK.

Moved by Ald. Adams, seconded by Ald. Scott,—That the matter of the diversion of the creek in Ward Five as provided by by-laws of the Village of Ashburnham, be referred to the Board of Works, to act as speedily as possible.—Carried.

NOT A CITY YET.

Ald. Morrison moved, seconded by Ald. Rush,—That the Legislature be memorialized to incorporate Peterborough as a city.

Ald. Hicks did not see the need for haste in this direction. He thought it would be advisable to get a clear statement as to the financial standing of Peterborough. There are many questions to be looked up, especially at this time, when the Town has just entered into union with Ashburnham.

The motion was lost on the following division;

Yeas—Ald. Morrison, McWilliams and Rush.

Nays — Ald. Johnston, Edicumbe, Hicks, Scott, Adams, Clinkscale and Best.

The clock here struck twelve and the City Fathers thought it about time to adjourn, which they did.

When you stop to think that home-made tea biscuit cost but five cents a dozen, is there any reason for buying at the baker's?

Made with Cleveland's Baking Powder they will taste better and will be more wholesome and appetizing than any you can buy.

FROZEN AT HIS KEY

Operator Succumbs to Illness at Lonely Station in Northwest

Erwood, N.W.T. February 2.—Walter Gray telegraph operator here, died at his key Saturday night, and when found his body was frozen stiff in the little frame depot. He was at work dispatching trains, and at the end of a message said;

"Feel awfully sick; think I am dying."

The operator at the other end tried to get him again, but could not. Three men were sent on a hand car from the nearest station, and after a terrible trip through the blizzard found him dead and the body frozen, the fire having burned out. Even if they had arrived in time little could have been done, as the nearest doctor is fifty miles away. The storm blew down the wires, and they were only replaced this afternoon. Gray had been sick for some time.

THE BEST FRIEND OF THE COLONIES

LORD STRATHCONA PAYS TRIBUTE TO HON JOSEPH CHAMBERLAIN

FACTORY WOMEN COMING

British Women's Immigration Society Plans to Send Out Three Hundred Shortly

London, February 2.—Mr. Smart, besieged by reporters, said the average Briton did not fully appreciate the superior advantages of Canada over other countries. The emigration of British people would create a better feeling than any fiscal policy. In twelve years Canada could supply Great Britain with all she needed in wheat and flour.

SIR EDWARD GREY.

Sir Edward Grey asked the Manchester Reform Club if they thought their was a case in which any country benefited by retaliation. Instead of protectionists being able to throw open Colonial markets to British goods, the Colonies would still further raise the duties.

COLONIES' BEST FRIEND

Lord Strathcona, speaking before the Newport Chamber of Commerce yesterday, said the Colonies regarded Mr. Chamberlain as their best friend, and he had done more for the Empire than any other.

BACK TO THE LAND.

Mr. Chamberlain has written a letter to Edgar Wallace, approving of the scheme of replacing on the land agriculturall aborers stranded in London.

MR. BONAR LAW.

Mr. Bonar Law, M.P., speaking at Edinburgh, said, with the example of Canada and Germany, there was no need to go abroad to see what retaliation means.

FACTORY WOMEN FOR CANADA.

The British Womens Emigration Society is endeavoring to raise £20,000 to send 300 women to Canadian factories.

USE OF RADIUM

Has Been Tried Successfully in Restoring Sight

Philadelphia, Feb. 1 — Charles H Sharpe testified today that he had been made totally blind by a fall from a trolley car and that his sight had been restored for the use of radium. He is suing the transit company for damages. He stated that doctors had told him the optic nerve was so seriously involved it could not be reached by treatment and he had resigned himself to blindness, when Dr. J. L. Borsch, an ophthalmologist, returned from Paris with a tube of radium. He bound the tube of radium over one of Sharpe's eyes and allowed it remain there several days. The result was a cure. Dr. Borsch corroborated the testimony of Sharpe. The suit was settled out of court.

AN IMPOSING FUNCTION

Ceremony in Honor of German Emperor's Birthday

Berlin, Feb. 1—At the Reichstag dinner tonight, given in honor of the emperor's birthday, Count Von Ballestrem president of the reichstag, related a recent conversation between himself and Emperor William during which, in response to Count Von Ballestrem's reference to the emperor having met the czar during his recent illness, his majesty said; "In case of there being anything serious the matter with me, I wished to leave my son in agreeable and neighborly relations."

A great crowd gathered in front of the palace early today both to salute Emperor William on his birthday and to get good places from which to see the members of the royal family and court and other officials offer their congratulations to the emperor. The latter, surrounded by generals, appeared before a window overlooking the square and acknowledged the acclamations. From that time onward carriages arrived containing those of rank sufficient to permit them offering their good good wishes, beginning with the members of the family and their suites, the cabinet ministers, the heads of the army and navy, visiting kings and princes and ambassadors, among them United States Ambassador Tower. The emperor received the callers in the pillar hall until midday.

MR. CHAMBERLAIN DEVELOPES PLAN

TARIFF COMMISSION APPEALS TO LABOR UNIONS AND FARMERS

ENGLISHMEN EXPECT WAR

Many Problems Exist Tending to Bring Britain Into Conflict

London, February 2.—The King will open Parliament today, with every state ceremony, but the one man with whom Parliament and the whole political world is most concerned, chooses the same day for the commencement of a holiday. Thus does Mr. Chamberlain announce that his policy has nothing to fear or gain from Toryism as now represented in the House of Commons. He leaves Mr. Balfour and the Ministry to fill in the interval at Westminster with army reform, or what they please, until he has completed his appeal over the head of Parliament to the electorate. But though Mr. Chmaberlain ignores Parliament he never ignores the political machine. His last act before his holiday was to summon the Liberal Unionist Association to declare once for all whether he or the Duke of Devonshire is to be their leader; imperial reciprocity or free imports their watchword.

CHAMBERLAIN DEVELOPS.

The eve of Parliament finds Chamberlain undergoing two other interesting developments. Mr. Chamberlain realizes that no policy can succeed in England without the votes of workingmen. No labour representative has been found to serve on his Tariff Commission. Presumably the labour unions are for the moment disposed to boycott the enquiry. Nevertheless, the commission has invited all the labour associations to assist the enquiry by answering questions and sending witnesses. The other development of the Chamberlain policy affects British agriculture. The British farmers have shown increasing uneasiness at the prospect of a preference in the British markets for their most active rivals in Canada and Australia. A special agricultural section of the commission has been formed, therefore, under the leadership of that old-time protectionist ex-Minister Chaplin. Of course, if British agriculturists and manufacturers had their way, the new protection would go far beyond Mr. Chamberlain's modest ten per cent. on foreign imports. Mr. Chamberlain's chief difficulty indeed, will be to keep their support without approaching the McKinley tariff levels.

ENGLISHMEN EXPECT WAR

Despite the pacific Russian assurances most Englishmen are driven to expect war in the Far East. For them it is a leap in the dark. The governing classes cling to the hope that the Anglo-Japanese treaty will tend to isolate the conflict, believing that the Czar would be unlikely to demand French assistance, wehn he knows that he thereby would bring the formidable British naval power against Russia, but war once begun has a habit of running its own course. As the Liberal journals point out, there are the questions of the Dardanelles, of coaling stations on the road to the Far East, and of the neutrality of the Suez Canal, on any one of which Japan, as Great Britain's ally, might expect her assistance and an outburst of public opinion might force the hand of the British Government. Finally, there is the chance that advantage might be taken of Russia's preoccupation to force a crisis in the Near East, with all its complications to Europe, hence the appeal which the more reflective journals already are making to English speakers and writers not to whip up so dangerous an element as public opinion against Russia.

THE PILGRIMS' DINNER.

Perhaps it is significant that, at this moment of anxiety, even pugnacious Tory journals like the Telegraph turn with relief to last night's Pilgrims' demonstrations of Anglo-American accord. The Telegraph congratulates itself that a century and a quarter after the two great halves of the English-speaking system were torn apart they are far nearer together in their social intercourse and mutual understanding than they were before the War of Independence.

THE NEGRO POPULATION.

The Spectator cordially approves the suggestion that negroes be imported into the Soundan from the Southern States of the union, as free men, of course, to teach gradually the thin population of the Soundan all the methods of cotton cultivation. It says; "The climate will exactly suit the negro, who, when well treated, is a decent citizen, anxious to make money, and accustomed to the ascendancy of the white man. The Soundar, in such circumstances will furnish the finest cotton field in the world."

WOMEN EQUAL TO MEN.

Dr. Forbes Winslow has this encouraging word for the women in The London Express;

"While, of course, it is true that many forms of manual labor are too severe for women, I hold that in any field of work where her strength will permit her to compete with men she can do as well as he can; while her general organization will be no hindrance to her success and continued exertions. The clerical profession is still closed to women, not only in England, but in every part of the world except America, where I had the pleasure of hearing a lady divine give a most eloquent address.

"Women at the present moment compete with men in every occupation and profession except divinity and law. There are lady secretaries, and on the Continent we even see the duties of railway porters and luggage carriers performed by women. It is a strange thing for an Englishman on landing at a foreign port to see the strong masculine women come on board and shoulder the luggage.

"Now, whatever may be said of the 'rights of women,' it is obvious that in Christian and civilized nations a certain mission exists—that of marriage. In England the proportion of women who are married during the year is one in every seventeen of the population, or, taking the census existing, there are more than two millions unmarried. We see, therefore, that these two millions are cut off from the great end of their existence. Their lot is, indeed, very various but the greater portion must necessarily have to labor for their very bread in one way or the other.

"Here is a great problem to solve. The order of nature seems to be that as maternal cares and household duties should occupy the women exclusively, the sustenance and protection of her children should also devolve upon the man. The order of society deprives millions of women of a mate, a protector and a breadwinner. We must naturally ask ourselves under the circumstances —How does she fare?

"The inquirer need not look far ahead for a response to the question, especially if he be a dweller in a populous city. Everywhere she is seen eagerly and successfully competing with man for a means of living, but until lately, with an instinctive selfishness, man has sadly limited the sphere of labor.

"Many women who are content with celibacy often perform a great work in religious duties. This takes the place of maternal cares and motherly instinct. In these cases an admirable character is produced. Self-denial, and humility, an expansive, ever active charity, candor and amiability, an unobtrusive goodness of heart, a love of social and domestic pleasures are a few of the qualities of these women, who have failed to fulfil the great physical end of their existence, but have sufficient head and heart to see that they have other moral duties to perform."

SWEEPING CHANGES ARE BEING MADE IN THE BRITISH WAR OFFICE.

The Office of Commander-in-Chief is to be Abolished and an Inspector-General to be Appointed, An Army Council Will Also be Appointed Very Soon.

London, February 2.—Sweeping changes in the British War Office are announced officially tonight. The Government has issued a blue book containing the report of the War Office Reconstituting Committee, with an accompanying declaration that the King has approved the report, and that in accordance with its recommendations the Government has decided to appoint an Army Council on the lines of the present Board of Admiralty. The Council will be created by Royal patent, and under it the office of Commander-in-Chief will cease to exist. In place of this officer an Inspector-Genera of the Army will be appointed, whose chief duty will be to report upon the efficiency of th eforces for home defence. The report covers all departments of the War Office organization. It is the result of three months' deliberations by three members, Viscount Esher, representing the civil administration; Col. Sir George Clarke, representing the army, and Admiral Sir John Fisher, representing the navy.

EARL ROBERTS TO RETIRE?

Surprise is expressed that the report is adopted as a complete operative scheme, without awaiting the endorsement of Parliament. The appointment of an Army Council and the abolition o fthe post of Commander-in-Chief by Royal patent points to the King's personal action in the matter. The report does not mention the names of the members of the new council. It is doubtful if the health of Earl Roberts, the present Commander-in-Chief is equal to allowing him to perform the duties of the first Inspector-General.

The report points out the necessity of greater permanence in the Defence Committee in order to insure a continuous policy, and it suggested the addition to the existing Defence Committee of a permanent secretary holding office for five years, two naval officers selected by the Admiralty, two military officers, chosen by the Viceroy of India, and if possible other colonial representatives, holding office for two years.

With regard to the War Office the commission suggests that the Secretary of State for War be placed in the same position as the first Lord of the Admiralty, directly responsible to the Crown and to Parliament. The constitution of the Army Council aims at decentralization of the individual members of the council being entrusted with different branches, such as armament, supply, finance, etc.

In this connection the report remarks significantly;—"New measures demand new men; we therefore attach special importance to the appointment of military members not hitherto closely connected with existing methods and who therefore are not likely to be embarrassed by the traditions of a system which is to be radically changed."

The commission considers the abolition of the post of Commander-in-Chief to be imperative, and it urges the divorce of the administrative from the executive department.

The Inspector-General is to be appointed for five years. He will report upon actual facts without expressing opinions on policies.

The report is most practical and business-like. It says it is "necessary to make a complete breach with the past, and endeavor to reconstitute the War Office with a single eye to the effective training and preparation of the military forces for war," and again it says "the object should be to secure for the British Empire, with the least possible derangement of the existing machinery the immense advantages which a general staff conferred upon Germany."

Contrasting the efficiency of the Admiralty with the inefficiency of the War Office, the report complains that the latter "has no thinking department."

Complete Change at Once.

All the morning newspapers give the utmost prominence to the report, and its recommendations, the subject ousting the Russo-Japanese dispute from the leading place.

The Morning Post declares that no more important administrative decision has been taken by any British Government in a century. There will be a complete change in the personnel of the War Office made immediately.

Some writers welcome the report as an indication that the new Secretary of State for War, Mr. H. O. Arnold-Forster, is really carrying out his programme of reform.

The Times calls the report one of the most important State documents issued in the present generation. Its thoroughness, conclusiveness, and precision are entirely different from the emasculated compromises of the ordinary report. It points out that this committee, with the Foreign Office added, will prevent the recurrence of any such grevious hiatus between political negociations and military preparations was was revealed in the South African War. The Times recommends the selection for the most important post of permanent secretary of Sir George Clarke, providing an adequate inducement be offered him to abandon his present position as Governor of Victoria. No one has made a closer study of the problem of imperial defence. He is an authority on naval and military strategy, and his recent Australian experiences will help him to keep colonial aspects closely before his eyes.

"The Premier having no Moltke," says The Times, "we recommend for the post of first military member of the War Office Lord Roberts, a general of profound insight, who turned the tide of the Boer War, or the Duke of Connaught, who is undoubtedly popular and successful."

RUSSIA DELAYS HER ANSWER TO JAPAN.

Both Powers Continue Their War Preparations The Attitude of China

London, Feb. 1—The correspondent of The Times at Shanghai says the native press publishes a memorial to the throne by the Viceroy of Hunan, who has asked the other Viceroys to support his views. They discussed China's neutrality in the event of war, and urged that, since it is Japan's aim to prevent the seizure of Chinese territory, such neutrality is impossible, the fate of the dynasty and its dependence upon the Chinese people being at stake. The power of Japan to resist Russian aggression is contrasted with the utter helplessness of China, due to the corrupt Administration. In conclusion it is urged that the throne give solemn pledges to introduce immediate reforms whereby the laws of the Government and the military forces of the empire will be raised to the standard of the western powers. The document shows patriotism and knowledge rarely revealed in the stereotyped utterances of Chinese officials.

A RUMOR DENIED.

London, Feb. 1—The correspondent of The Times at Tokio says. The rumor circulated in London that an inimical reply from Russia had reached Tokio through M. Kurino, the Japanese Minister at St. Petersburg, is baseless.

RUSSIAN AGENTS BUYING COAL.

London, Feb. 1— The correspondent of The Times at Pekin says Russian military agents are negotiating for the purchase of all the available coal at the Tongshan Collieries. One contract of 20,000 tons will be hurriedly shipped to Port Arthur, and other shipments amounting to 30,000 tons are being arranged.

London, Feb. 1 —(Associated Press Despatches) —Baron Hayashi, the Japanese Minister to Great Britain, informed the Associated Press last night that his Government did not know what Russia's answer would be, and that it was, therefore, impossible to say whether war was probable or not. The fact that the Russian reply had not been despatched showed, according to Baron Hayashi, that Russia's decision had not yet been taken, as it was hardly probable if a decision had been reached that the note would be delayed.

NAVAL RESERVE MOBOLIZED.

The correspondent of The Daily Mail at Chefoo cables he has learned that the Japanese naval reserve was mobolized last week and that the first army reserve was partly monolized with great secrecy, the troops arriving at their destinations disguised as coolies. Over one hundred transports have been requisitioned, the correspondent continues, and twenty-eight transports and thirty-eight warships are lying at Sancho. Forty transports filled with the Kumanato division are lying at Takeshiki harbor in Tsushima, ready to sail.

FIRED ON RUSSIAN VESSEL.

"The Russian and Japanese authorities," the same correspondent continues "profess ignorance of the Argun incident, but I learn that the Japanese cruiser Chiyoda signalled the Argun to stop and as no notice of this was taken fired across the bows of the Argun, whereupon the Russian steamer, which was beyond neutral waters, stopped, and the Chiyoda sent a search party on board."

On January 30, The London Daily Mail published a despatch from its Chefoo correspondent that a foreigner had reported that the Russian steamer Argun, upon which he was a passenger from Nagasaki to Port Dalny, had been fired at by a Japanese cruiser outside of Chemulpo harbor.

THE THIBET EXPIDITION

Col. Younghusband Does Not Expect to See Any Fighting

London February 2.—The correspondent of The Times at Chumbi, says that while rumors still prevail to the effect that an attack on Col. Younghusband and the British mission is likely unless the mission is withdrawn, no blows haev been struck. It is known that Thibetan reinforcements are rapidly increasing, and the genral of the Lhasa district, in an interview with Col. Younghusband asked him to withdraw, saying that otherwise the consequences the consequences would be serious. Col. Younghusband seems to be confident that there will be no conflict, but it is obvious that any overt act of hostility would wholly change the aspect of the political relations which the Government of India has consistently upheld.

THE MUNICIPAL ELECTION

Toronto Scandal May Include Some Big Companies

Toronto, February 2.—What promises to develop the most startling phase of civic scandal is the preparation being made to bring out during the early stages of the investigation an alleged corrupt bargain by which corporate influence was extensively used for the election of some of the controllers. Those handling the quo warranto proceeding state that Wm. Moore, the assistant president, Mackenzie; General Manager Keatin gand Superintent Gunn, of the Toronto Street Railway, will receive an opportunity to answer some leading questions as soon as the taking of evidence is commenced. The Consumers Gas Company also will be drawn into the hearing.

Letter of Condolence

The South African Veterans sent the following letter to the family of the late Albert Thompson:

To Mr. and Mrs. Robert Thompson and relatives of the late Albert Thompson;

We, the Peterborough comrades in arms of the late Private Albert Thompson, 5th Canadian Mounted Rifles wish to express our sympathy with the family and friends in the great loss sustained in the death of our honored comrade in whose departure the service has lost a brave and faithful soldier, the family a dutiful son and brother, we among his many friends, a valued companion, and, moreover, one who in all his associations in life did his duty as a soldier and as a citizen.

ALF. E. SHAW, Lieut.
3rd C.M.R.
V. F. LeBAR,

J. R. DUNDAS.

WEATHER NOTES

Tuesday—Very cold.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, [illegible] Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

trangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at [illegible] per month, and to outside points at [illegible] per year strictly in advance.

PETERBOROUGH, FEBRUARY 2, 1904

A SURPRISING DECLARATION

Governor James K. Vardaman, of Mississippi, has made a stir by declaring in his inaugural address that the educated negro is more inclined to criminality than the uneducated. Basing his recommendation upon this assertion, Governor Vardaman suggests that the State of Missippi amend its constitution so that the distribution of the common school fund shall be placed wholly within the power of the legislature. In view of this proposition it is to be assumed that the purpose of such an amendment is the cutting off from the negro the opportunity of obtaining school privileges by robbing him of such a portion of the State school funds as is now allowed him. In a word, the governor's theory is that the negro is deteriorating under the educational system, in that education develops a tendency to assault upon white women as a manifestation of the racial desire for social equality. In support of this theory Governor Vardeman asserts that the negro is more criminal as a free man than he was as a slave, and that in the decade from 1880 to 1890, according to the census, negro criminality increased one-third. According to the governor, the minimum illiteracy of negroes is found in New England, where it is 21.7 per cent., while the maximum of illiteracy is in the "black belt"—Louisiana, Mississippi and South Carolina—where it is 65.7 per cent. "And yet," says the governor, "the negro in New England is four and one-half more criminal, hundred for hundred, than he is in the black belt."

Mr. Vardaman is a governor, but we shall be surprised if it is found that he has governed his tongue in his talk about New England negroes. Our guess is that either his figuring or his statement is wrong.

SOME OPINIONS

Among the different views taken by Russian commentators on the British Indian expedition to Tibet, one is founded on the assumption that, if England really means to incorporate the Dalai Lama's dominions with India, that fact will inevitably prove to be the first step towards the eventual partition of China. This opinion is based on the theory that England's "aggressive procedure" would be immediately emulated by Germany and France, and possibly by one or two other western powers. In discussing this proposition, a military writer in a South Russian journal points out what he calls the significant fact of the German government having asked the Reichstag for a credit of one hundred and forty millions of marks for Kiao-Chau, and the maintenance of these cruisers at that German far eastern station. The possession of Tibet would, he remarks, place in the hands of England the key to the gate of central China, through the Yangtsze. Another Russian writer directs attention to the fact that many Buddhists in Siberia have always regarded the Dalai Lama as their spiritual chief, and that Tibet has always been regarded as one of the principal factors in the gravitation of Russia towards India. He points out also that while the Dalai Lama has held vigorously aloof from all contact with western Europe, he recently sent a special mission to St. Petersburg, a proof in itself that the Tibetans regard Russia as the co-protector with China of their country. It was only out of respect for China, he added, that a Tibetan mission was not then established in St. Petersburg.

These are great days for seeing sharks and things.

NEW HEAT AND LIGHT INVENTION

Those engaged in scientific research in France are usually to the fore in practical discoveries. While the world has been wondering over the X-Rays and the principles of Radium, other scientists have been busy in an endeavor to compete with electric force for the purposes of light, heat and power. In this respect some extraordinary developments have been affected of late, with the result that these can now be supplied to customers at much less cost than electricty from water-power, free from danger, and in any quantity desired. We trust shortly to lay more particulars before our readers.

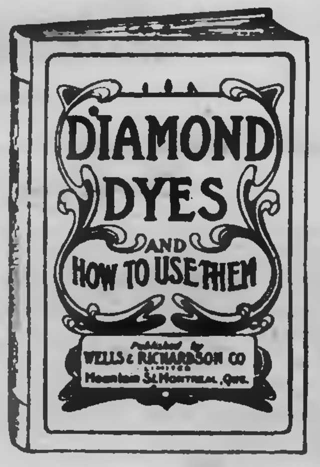
MAY HAVE PEACE

One Obstacle to Agreement Said to Have Been Removed

Paris, Jan. 29.—It is understood that the conferences between Foreign Minister Lamsdorf and M. Kurino, the Japanese Minister at St. Petersburg, have permitted the latter to advise his Government concerning the position Russia is likely to take in her forthcoming answer, but the officials here say this was merely an intermediary step towards adjusting the remaining differences, as the answer is subject to change until officially communicated.

It is further said that Russia will not answer until she feels reasonably assured that her answer will not have the effect of precipitating hostilities.

The officials here are gratified at an apparently authoritative statement that Japan does not intend to fortify the Straits of Corea. They say it will remove one of the main negotiations showed that Russia was unalterably opposed to the creation of any condition in Corea which would lead to closing that outlet from the State of Japan. A strong intimation had been made that the maritime nations of Europe and the United States would have taken up the question unless this declaration had been made.



THIS book should be in the hands of every woman who uses DIAMOND DYES. A list of "colors that harmonize," will prove interesting to all who trim their own hats and bonnets and make their own dresses. FREE to any address. The Wells & Richardson Co., Limited, 200 Mountain St., Montreal, P.Q.

RECALLS OLD THEBES.

(Concluded from Monday's Issue).

Rameses was no doubt a great man and a powerful fighter, but he exposed himself to criticism, also, because of the number of statues of himself which he erected in his own honor. We find them scattered all over Egypt; and when he allowed his own paid artists to proclaim him to posterity as "The Lord of the World, the Companion of the Gods, the Guardian of the Sun, and the Protector of the Earth," it sounds a trifle conceited. But we may excuse him on account of the wonderful architectural effects he has left us, for he was the greatest builder of all the Egyptian kings, and he reigned for sixty-seven years. A dozen cities which he built still lie under the desert sands; a thousand temples were erected for his own worship, priests offered prayers to him while he was still living, as he sat enthroned, and proclaimed him the Regent of the Deity. His ministers and attendants never addressed him except in such language as was used in the rituals for worship, and even his 400 wives, who ought to have known him thoroughly, are represented as adoring him. Every temple he erected was a monument to his own nobility, every statue of himself was intended to commemorate what he considered a worthy deed, no king before or after him ever had such colossal compliments, and yet, with his boundless power and his boundless pride, this viceroy of the gods went blind in his old age and died in misery by his own hand.

He was the Pharaoh who persecuted the children of Israel; he compelled them to make bricks for these temples; antiquarians fix the birth of Moses in the sixth year of his reign, when, according to the sweet old Bible story, his daughter found a pretty baby adrift among the bulrushes. According to the biblical story, fourscore years elapsed before Israel was released from bondage by his son and successor, Seti Menepthah, which corresponds with remarkable accuracy to the records carved upon the tombs.

* * *

This morning we got up early, crossed the river and wandered among the ruins of Thebes, and inspected the "Ramasuem," the palace in which this great king dwelt. It was one of the grandest buildings ever erected, and notwithstanding the thousands of years which have passed since it fell, it can still be traced. Near by are the Twin Colossi, two enormous monolithic statues, sitting fifty feet high without their pedestals, 18 feet and 3 inches across the shoulders, 22 feet 4 inches across the hips. Each foot is 11 feet long, and according to the calculations the solid contents of each statue amount to 887 tons, so that they must have been the largest blocks of granite ever quarried. How they were brought here, how they were carved and how they were overthrown are problems which antiquarians are still discussing. But there is no doubt that their intention was to glorify Rameses, the king of kings, for an inscription reads:

"If anyone would know how great I am, let him excel my works."

* * *

Compared with Karnak, the temple of Luxor is not of the greatest importance, and until recent years the larger part of its courts and chambers were buried under the accumulated rubbish of twenty centuries upon which a large number of houses stood. Excavations were made in the '80s by public subscription in England and the walls and columns have been strengthened with modern masonry so that they are not likely to collapse as did one of the most important of Karnak.

The original temple was 600 feet long and 180 feet wide, and was extended from time to time by other kings until it covered an area of several acres. Two obelisks, hewn out of granite, 82 feet high, once stood before the entrance. One of them remains there still, and the other now decorates the Place de la Concorde, Paris. Between these obelisks stood a row of colossal statues of Rameses II., the builder, who was not satisfied with one but must have six to satisfy his vanity.

The entrance to this temple, which was built in the Egyptian style, broader at the base than at the top, and called a pylon, was [illegible] feet high and [illegible] feet wide, and the stone was carved with a poetic narrative of the momentous events in the life of Rameses II. The columns of the portico are seventy-two in number, and each is 51 feet high and 11 feet in diameter. On the other side of the courtyard is another hall, containing thirty-two columns of similar size, and a series of temples was built on a similar plan and of similar dimensions.

* * *

And those at Karnak were even grander, there being not less than twelve separate temples, each succeeding the other, and they show by the inscriptions that they were built by different kings between 2433 and 312 B.C. It was considered a duty for each Pharaoh to keep the old temples at Karnak in repair or to build a new one if he could raise the funds, for the walls and columns of that ancient sanctuary, in the esteem of the Egyptians, constituted the holiest book of fame. In that way they grew from age to age, owing a colonnade to one king, an arch to another and a group of massive chambers to the next. This explains the variation in architecture and the great striking contrasts in the designs.

This place has often been written about and has often been painted, but no words and no brush can ever accurately or adequately portray the great hall at Karnak, with its 124 mighty columns that radiate into avenues whichever way you look among them, and are sculptured and painted with the histories of gods and kings.

I am always particular to inquire about the men who built these stupendous monuments, for I have friends in the architect business. We know who ordered them, and in whose honor they were erected. We know also that the work was done by slaves and that each of the majestic columns represented the sacrifice of many innocent lives. We know that they have been drenched by the blood and tears of millions of poor human creatures, but the men whose genius designed them and whose skill brought them from the quarries and raised them here have been usually overlooked.

Archaeologists believe that they at least who planned and executed the Great Hall at Karnak, which has often been pronounced the noblest architectural work ever designed by man. In a museum at Munich a statue dug up here sixty years ago is believed to be that of Bak-nen-khonsu and the inscription on it says that, having attained the dignity of high priest and first prophet of Ammon during the reign of King Seti, he became chief architect under Rameses the Great. His statue represents him robed, bearded and sitting upon the ground in the attitude of meditation.

Constipation

Causes Headache, Abdominal, Pains, Piles and in Severe Cases Insanity and Apoplexy

It is a common mistake to conclude that Constipation is not a dangerous condition. Although at first it is only accompanied by slight inconvenience and pain, yet if not corrected, it will inevitably lead to very dire results.

Great care should be used in selecting a remedy for constipation because if a violent purgative is employed, it is sure to set up pain, irritation and congestion, and result finally in piles.

The experience of those who have tested all the cures for constipation, seems to prove that Ferrozone is the most agreeable and satisfactory treatment. It makes the bowels so well ordered that natural and unassisted action is established. Nothing can equal the immediate sense of comfort it produces, and pains in the head, and stomach, and in the intestines, disappear almost at once.

Ferrozone is very mild and certain in its action, and never causes inconvenience or distress. Ferrozone can be taken early as long as required and in no way interferes with business or pleasure, and nothing may be feared from its use, however prolonged it may be.

For Constipation, Piles and Sick Headache, Ferrozone stands unrivalled. The driver of the City Express Company, who suffered from piles, says: — "Constant sitting on the wagon seat, produced a rectal irritation, which combined with constipated condition of the bowels, brought on a severe attack of piles. I used without benefit, different ointments, and other remedies; but got quick relief and most satisfactory results from Ferrozone. I can recommend Ferrozone to all who suffer from piles.

Ferrozone always cures, and can be purchased at any reliable drug store or 50 cts. a box or three boxes for $1.25. Sent to your address by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont.

DESPONDENT AND SHOT HIMSELF

Iroquois, Jan. 29.—Mr. William Harvey, a retired Hamilton merchant, committed suicide yesterday by shooting himself at the home of his son-in-law, Mr. A. D. Harkness, Irena. Within the last two or three years his wife and daughter died, and he had been despondent since.

Two sons and two daughters survive. The sons and one daughter live in or near Hamilton. A letter was found in his pocket in which he asked his children to forgive him for what he was doing, and saying that he could stand the strain no longer, but would go to join his wife and daughter in heaven, and that he hoped to be forgiven.

WONDERS OF RADIUM

Vienna, Jan. 29.—Prof. Gussenbauer, an eminent surgeon, has discovered that contraction of the gullet, caused by cancer can be alleviated in certain cases by the use of radium. The experiment was made of applying sixty milligrammes of radium in a rubber capsule contained in the end of a bougie to the affected part. The radium rays decomposed the cancerous growth, enlarging the gullet, and allowing food to be swallowed, thus obviating an operation for the introduction of food into the stomach.

The experiment is somewhat dangerous until further knowledge is obtained, inasmuch as too much radium will decompose the ulcer so rapidly that there is risk of perforating the gullet.

To some intellectual palates conscience is a matter of taste, remorse a mere condiment of life, while sin is as the perfume of a dying rose.—By. R. W. S. Hill.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough — necessity knows no law — the stock can't be moved or kept for another season.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS. Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possessed a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise.
KROHN BROS. Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS. Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS. Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

AN OBJECTION FROM MINISTRY.

TO CANADA DECLARING FOR HER CHAMPION, MR. CHAMBERLAIN

PLANS FOR EMIGRATION

Large Numbers Likely to Come From Great Britain and Belgium

London, February 1 — The Toronto correspondent of the Manchester Guardian says that a member of the Dominion Cabinet said he would consider it grossly indecent for any Canadian public man to go to Britain posing as a representative Canadian, and assure British audiences of the support and sympathy of the Dominion with one political party or the other.

EMIGRANTS FROM BELGIUM

The Canadian Government's Continental emigration agents have been in London to confer with Deputy Minister Smart. Mr. Decelio, the agent at Antwerp, is of the opinion that a large number of Belgians will emigrate to Canada during the coming summer. Mr. Smart starts on a tour of inspection of the Scotch and Irish officers of the department to-night.

NEW EMIGRATION PLAN.

General Booth's new emigration scheme is to take the unemployed in large numbers to Canada and Australia under conditions which would admit of their being sorted out, cared for and supervised till they were in a condition to stand alone and become good citizens.

THE BISLEY MEETING.

At the Bisley meeting in 1903 the number of entries for the competition was 41,443, and the amount taken entrance in fees, pools, and practice shots was £14,830.

CHILDREN WHO WORK

Winnipeg, Jan. 29— In the Legislative Committee yesterday the Manitoba Factories Act was amended, by which the age of child labor is fixed at fourteen for boys and fifteen for girls; a week's work is to consist of 54 hours, and in case of overtime, a maximum day's work may be 12 1-2 hours, instead 10 and 72 1-2 hours a week's work instead of 60.

THE C. P. R.'s ENTERPRISE

Bowmanville, Ont., February 1 — Mayor James has been informed that the Dominion Parliament will be asked next session to incorporate the Campbellford, Lake Ontario and Western Railway Company, to construct a railway through Hastings, Peterboro, and Northumberland, Durham, Ontario and York counties, connecting with the Canadian Pacific Railway. This is the outcome of the request made by a large delegation, which waited on Sir Thomas Shaughnessy in Montreal.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.22 ore 3 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.00 to $13,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

W. D. WALRATH,
NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

A Chophouse Tragedy.

Being a Tale of the Great American Drama.

"HOW old is Atwell, anyway?" asked the musical comedy tenor, shrugging his tailor-made shoulders to indicate that the subject, after all, did not greatly interest him.

"Nobody knows," answered the fat press agent, reaching for the bread, which was placed in the center of the round table, that all five of the diners might have an equal opportunity—as a matter of fact an inequitable arrangement, since the fat press agent inevitably got most of the loaf.

"He's been around the Rialto ever since I can remember," said young Forbes, the only son of a prosperous playwright.

"He's older than I thought," exclaimed another of the party, who had been listening in silence, an amused smile twitching the corners of his mouth at the press agent's inroads on the bread.

Young Forbes, whose round, boyish face and body, not yet quite set on the lags of a man, were, as the fat press agent once put it, as much of a fixture of Gray's Chophouse as the bar, took the fling good-naturedly. If his juvenile cordiality and enthusiasm for everything connected with the stage carried him constantly into the company of all sorts of actors and hangers-on of the drama he yet admired Appleton for his taciturn high-born culture and his alien air of breeding, in a shy, clumsy way even trying to win the older man's affection.

So the boy answered with a laugh "Anyway, I don't believe there was ever a time when Atwell wasn't writing a play," he said.

"There never was," chipped in the press agent, munching a fresh piece of bread. "He always has one play in his pocket and six more in his head, and they're never likely to get any nearer the stage than that. Poor Atwell! He's worn out enough shoe leather tramping up and down this street, always getting the cold shoulder, to keep a Roosevelt family in boots for a lifetime."

"By the way," said the fifth member of the party, a red-headed advance agent with a nasal voice and boundless enthusiasm for his own attraction, but none for the attractions of a rival manager, "Atwell's back on the Rialto. Saw him to-day. He's thrown up his job promoting the publicity of 'The Delaware Peach,' so he must have got another play out of his system. Saved up enough money to live on for a while, I suppose and is back here trying to sell 'the great American drama.'"

"Heavens!" cried the press agent. "Warn all the managers. To-morrow he'll begin his rounds. Ah, here comes the grub!"

With this heartfelt ejaculation he seized the last piece of bread and fell to on his dinner. The red-headed advance agent threw away his cigarette and pounded the table for beer. The tenor began to talk between mouthfuls about his part in a new musical comedy that had gone into rehearsal that afternoon, especially about the great beauty of the songs that fell to him to sing. No one listened to him but the advance agent who was reminded of a story by everything he said. Atwell was forgotten.

Appleton smiled and quietly ordered more bread from a passing waiter. Then he turned to young Forbes. "And how's your play getting on?" he asked.

"Jolly bad," said the boy. "You take my advice and stick to writing about the stage, not for it."

"Well, I'm not so sure but I ought to write for it," the other laughed.

"Why?" asked Forbes.

"Do you see that tall, thin chap two tables away?" asked Appleton.

"Yes; that's Colby. Used to be dramatic editor of the Baltimore 'Bee,'" the other answered.

"He did," said Appleton. "But he isn't. He's changed 'about' to 'for,' and last night he told me the plot of his play. It's to be 'the great American drama'—he told me so himself. And do you see that black-haired, black-eyed chap at the table by the door?"

"That's Morris Levi," said Forbes. "He's writing a play, I know."

"He is!" said Appleton. "He told me about it this afternoon. Wall street is to be dramatized at last, with a full grasp of its significance and tragedy. There'll be no 'Henrietta' superficiality about Levi's drama. It's to be the first truly great play of American life. Levi told me that. And he and Colby are only two out of how many hundred? Atwell for instance, has written our national masterpiece no less than ten times."

"Well?" said Forbes.

"Well," Appleton replied, "since I'm the only man who has not written 'the great American drama,' it must be that I am the only one left to write it. However, if I don't write about it, perhaps I will confer almost as much of a boon on the public. Now, tell me about your work."

"Oh," said Forbes, with a grunt of disgust, "I'm working now on a musical comedy! Between you and me, with the guarantee of father's revision, it's going to get produced. I hate writing such slop, but father says I've got to earn some money some way, so I do it. I'd rather write pale green imitations of Ibsen that nobody wants, any more than they want Atwell's great American dramas. But don't you just love Ibsen, though?" Forbes finished with a burst of boyish enthusiasm, looking eagerly up to Appleton's face.

The other man raised a warning finger. "You needn't be afraid of anyone at this table," he said. "They don't know anything about Ibsen. But you never can tell who may be at the next table, a manager, a critic, who knows a little about him, to overhear your dreadful remark. Forbes, in this country a man can be a vulgarian, a municipal grafter, a political thief; he can love Mammon, he can preach agnosticism, he can even worship Emerson, and yet remain an esteemed and accredited member of society. But let him beware that anybody knows he enjoys Ibsen!"

"Poor Atwell loves Ibsen, too," said Forbes. "Perhaps that's the matter with him. He goes around declaring that some day America will realize that the intellectual drama of the Norwegian is the style which must mould our national drama. The trouble with Atwell is, he hasn't——"

"Pass the salt, please," said the press agent, "and shut up on Ibsen."

"Yes," said the red-headed advance agent; "here comes Atwell. He'll do the talking now."

Everyone turned toward the door. The long, narrow room, hung with theatrical pictures and decorated with beer mugs on the ceiling beams, was alive with hurrying waiters and incoming or outgoing customers, jostling each other at the narrow entrance in the center. The air was heavy with tobacco smoke and noisy with the clatter of dishes and the roar of carriages from the street, for it was nearly the theater hour. Calm in the midst of the confusion, Atwell stood on the top step of the entrance and surveyed the room. He was tall, thin, stoop-shouldered, with black hair and large, black eyes that gave an un-Saxon

(To be continued.)

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.65 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.98 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $43.68 and $79.98 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet (as it comes against the [illegible]) to meet a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 600 feet of cross-cuts, upraises, etc.

All told, there is 4,850 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power, from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS

tell you, and I don't want you to feel badly."

Then she held up her hand in front of him.

"What do you mean?" again he asked.

"Do you not see, Henry, how the two middle fingers are getting out of shape."

Henry looked puzzled, and asked again:

"Elsie do you really mean that there is something the matter with your hand?"

"Yes, Henry; I have been to the doctors, and it has only been growing worse. It is rheumatism, and is coming in the other hand, too. They say it is in the joints, and this is the bitterest drop in the cup for me, that all your money and sacrifice have been thrown away."

"Now, Elsie, wait; this cannot all be as you think. Something can be done for it I am sure."

"No, they all say the same thing, and I have been just as careful as I possibly could. I have tried everything, but it has failed. I waited until I was sure before I told you. It increases slowly, but there is an increase all the time. I have not taken any lessons for two weeks. It is no use any more. I will be satisfied, Henry, if you will only bear the disappointment. I can stand anything now, since you are a Christian. This is only a part of what Christ suffered for us both."

"You are the bravest, best girl in the world, worth a dozen others, and I shall never regret any gift to you; but I believe there is hope yet. We will try every remedy before we give up."

Henry did not realize it, but it was rheumatism, and Elsie's worst fears were to come to pass. She never played the piano after that night. The disease continued its ravages until she was crippled for life, but she was a queen among women, because of her Christian fortitude and faith.

She set a bright example for all the world who knew her.

Patience and trust, the sweetest, rested in every feature of her face, and in every move of her crippled form.

What a strange day this had been for Henry, the first day after his conversion. No, it was not strange; it was only part of real life. The bridge was built. This was the weight to test it before the security was certain.

CHAPTER XI.

The Chasm Bridged.

One year and a part of the second has passed into the records of a Christian life, since Henry Fielding's conversion.

Never was there a more kingly attitude assumed in a man's relation to the Master of men than he carried into every part of his life. His spirit and courage won the admiration of all his fellow-workmen, and, during these short months, his influence had brought several of them into the Church.

Richard was one of the first to come under that power, which is almost beyond resistance—a manly, Christian character.

Henry did not talk it much, but how beautifully he lived it, and revealed the possibility in every workingman's life.

His constant effort was to bring the Church in the right light before the men and the union, and increase the solidity of the confidence in the minister, and his interest in them and their work.

This had grown upon them all, and David Dowling had come to be a potent factor in the organization. They no longer shivered in his presence, but now crowded up to his great warm heart, as to an open fireplace in a world's winter.

Henry Fielding's life had completely changed within a few short months. The change was almost as great as a move from earth to the planet Mars—perhaps greater, for, after all, would that be so great?

Time is the large element in life's changes, and in unraveling mysteries and revealing destiny. Yesterday and to-day are not all. That makes a puzzle without an answer.

Henry had learned to say "to-morrow," and to believe in the future of a conscientious and sacrificial life.

Only a short period of time had intervened between the present condition, under a starry sky, and the first moment when he looked into the face of Grace Chalmers, and saw what his eyes had never seen before, and no one else saw at that instant.

These are visions not to be described and feelings enveloped in too great a sanctity for exhibition.

But as no one knew what his eyes carried into the deeps of his soul, so no one knew the bitter condemnation of himself and the imagination that there was something wrong with his head as well as his heart.

He almost instantly saw a great chasm appear between himself and his ideal of woman.

As the days passed, that deep, wide and dark obstruction seemed to grow deeper and wider and darker, but there are bridges over such depths. The world is not made to doom men to disappointment and to cruelly mock him. Heroic honesty in life, and character, and purpose, is an architect almost divine.

Not all the reward of sacrifice is reserved for the upper world. In the plan and providence of God, the earth is good enough for some of it.

He had given himself in sublimest sacrifice for Elsie and others. He had unhesitatingly taken the bright star of hope from his own sky, and transferred it to hers. The money saved for himself and for the purchase of his ambitious dream, was lovingly laid in her hand. It was not lost. Even rheumatism could not be the robber. It was the most righteous and profitable investment. Dividends were never to be withheld.

The old home in Vermont had been sold, the indebtedness upon it paid, and the remnant of the money used to purchase a small, but beautiful home for them in the suburbs of the city.

The change from the crowded and unattractive third-story rooms into this new and comfortable place was one of the strands for the bridge over the chasm. It was not accident or chance. It was intended. It brought him and Grace Chalmers nearer together. There was distance and depth yet but it was not so great.

There was another cable for the bridge, when Henry was promoted to the position of foreman in his department. It was one of the greatest surprises of his life, and still no one was more worthy of it.

For years his fidelity had never been relaxed. His quick eye and hand learned with great rapidity. It was most appropriate now that his ability and loyalty should be recognized.

The foreman had lost his position through some disagreement with the men and his employers both, and no greater astonishment could have been met than that of Henry when he was summoned to the office, and asked to accept the position. His salary was multiplied by three.

That elevation brought him nearer to the young woman whom he had ventured in almost audacity to more than admire.

During the year her father, who had been ill for several months, had died. His pride, which would have

(To be continued.)

BRITISH GUNS MAY BOMBARD LHASSA

BRITAIN WILL PROBABLY ENGAGE IN WAR WITH THIBET

BRITAIN READY TO FIGHT

A War That Will Have a Far-Reaching Effect on the World

London, Feb. 1—The latest despatches from Chumbi, British India, indicate a very serious condition of affairs in Thibet. The Thibetan army is moving in force on the British under Col. Younghusband, and already a battle may be raging. The British occupy a strong position at Tuna, and will be able to hold their own against the forces of the Grand Llama.

RIGHTEOUS INDIGNATION.

If Great Britain and Thibet are destined to engage in one of those little wars for which the Empire is famous, the former country will enter into the fight with some sense of righteous indignation. Britain has nothing to be ashamed of in the matter of aggressions upon the Thibetans. That she is anxious to thrust her trade upon them may be admitted. In resorting to arms to accomplish this, she is only enforcing the terms of a treaty which the Dalai-Lama has flagrantly violated. Britain has asked for no more than her diplomacy has fairly won. If, when the smoke clears away, the Thibetans find themselves shorn of a large slice of territory, if their Lamas are no longer permitted to intrigue with St. Petersburg and Pekin, their punishment will about fit their crime. This and more they deserved in 1886, when they invaded British territory. They escaped for the time, because the Indian Government was not in a position to deal severely with them. Since then, say students of Indo-Chinese affairs, they have treated the British Government with open disrespect. Leniency was mistaken for weakness. The disinclination to make summary reprisals was interpreted as an admission of fear. The patience of the British Government, "long as a summer day," they have familiar with, but the vengeance, "long as a winter night," they know nothing of. And it now seems that they are about to be taught by Younghusband, of the Guides.

LHASSA, THE MYSTERIOUS.

The news of the expedition calls attention to that great city of which the outside world knows so little —Lhassa, the mysterious. Solitary and aloof, it has dwelt in the heart of the Himalayas for twelve centuries, and from its mountain heights has sent forth the sacred law to millions of the faithful, for the Grand Lama is the Pope of the Buddhist world. His authority is almost equal to that of a king, although Thibet has always been ranked as a Chinese province, and thrice a year the Lama has sent a tribute to Pekin. Outside of this perfunctory observance of an ancient custom, Thibet has been unmindful of politics, and international affairs. The people of the country have tilled their arid soil and tended their herds of sheep and yaks while the Grand Lama, and the lesser Church dignatories have been wrapped in the contemplation of their ancient religion. But this isolation must end, soon or late, for Thibet has become a pawn in the great game. The Bear is seeking an outlet to the south and the Lion keeps moving north. Thibet lies between. Its fate is inevitable. It must choose its master. No longer will it be permitted to remain neutral. The Lama realizes this fact, and, making a virtue out of a necessity, he despatched a mission to St. Petersburg, some months ago, and it is rumored, came to an understanding with the Czar. He was wise enough not to waste time by applying to Pekin for advice or assistance. This move forced the hand of Britain, and Col. Younghusband's mission is the result.

A DIFFICULT PROBLEM.

Travelling in Thibet has always been and must always be, difficult in the extreme. An armed expedition such as Britain is sending forth finds providing for its transport the most difficult problem. Mules and ponies are plentiful, but in those altitudes fodder is scarce. At this season of the year the trip is even more hazardous than usual. The Thibetans, however, will probably resist, and as they have lately supplied themselves with magazine rifles they may do terrible execution in a country which can furnish three ambuscades for every mile of road. Until a couple of years ago the Thibetans were armed with old flintlocks and spears but they learned from China what China had learned of Japan, and are now much better equipped to give battle than formerly. Should the expedition go to Lhassa (and that it will do so if Lhassa becomes an objective cannot be doubted), the probability is that a fierce fight will ensue. From what little is known of the city, it seems certain that it is a veritable fortress, set on a high hill. Never has it been put to the test of war, however, so that its actual strength is a matter of mere conjecture. The guns of the British are going to ask it a question.

PROSPECTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400,000. 80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President.
JOHN A THOMPSON, Investment Securities, New York City, 1st Vice-President.
GEORGE B. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President.
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer
WILLIAM O. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR B GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE B. WILCOX, RICHARD F. DOSSIE, WILLIAM GARLICK, ARTHUR B GARLICK, B F BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. *Tunnel is 5[illegible] feet and in 711 feet*—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the *Tunnel* in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs.) is as follows: Copper, *16.05 per cent.*; Gold 0.02 ozs.; Silver 92.40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254.31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need *milling*, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently *sold for* $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking *hold of all the old* mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine *of* Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

A HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State o Calfornia.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and superb experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

WHITAKER WRIGHT AND HIS REVOLVER

DID HE INTEND TO KILL INSTIGATORS OF PROSECUTION

ARNOLD WHITE'S STORY

He Declares That He Was Prepared to Duck Table in Court Room

London, February 1.—Arnold White the well known journalist, will publish in a Sunday morning paper a story to the effect that Whitaker Wright carried the loaded, cocked revolver which was found in his pocket, for the avowed purpose of killing the two principal instigators of the prosecution—Arnold White himself, and Sir Ernest Flower, if the jury should return a verdict of guilty. Indirectly from Arnold White, a press correspondent receives the following version of the forthcoming disclosure,

"Whitaker Wright stated to some of his most intimate friends several days before the conclusion of the trial, that he was prepared to wreck summary vengeance on Flower and myself the moment he should be convicted. He explained that he would be armed and would give the case a climax worthy of its general character. Information regarding Wright's proposed intention was communicated to Flower and myself. We had a tipstaff watch every movement he made. Several times while the jury was out I saw Wright place his hand in his hip pocket, as if to assure himself that his weapon was there. Each time I slid to the edge of the chair on which I was sitting, preparatory to ducking under the table.

"When sentence had been pronounced Wright made a final move as if to draw his pistol and turn, but the tipstaff interposed and removed him to the adjoining room. There is little doubt that he would have shot himself had he not recognized that the tipstaff was suspicious and ready to interfere. Wright had foreseen this possibility and had provided poison as an alternative means of suicide. The tipstaff did not suspect poison when Wright took something from his pocket and placed it in his mouth, because the promoter had been taking pastilles from time to time throughout the trial.

SUGGESTS THAT TREATY WITH CANADA BE MADE

ORMER CANADIAN TELLS THE YANKEES IT WOULD BE WISE TO ANTICIPATE GREAT BRITAIN

Jacob Gould Schurman of Cornell, a native of Canada, made a speech before the Manufacturers Association of Brooklyn on Thursday night. The Herald thus reports it; Advocating the adoption at once of a reciprocity treaty, with Canada, to checkmate the possibility of Great Britain following Jos. Chamberlain's lead into a policy of preferential relations with her colonies, and pointing out the dangers of this country arising from a concentration of industries into the hands of comparatively few men, thus tending to displace the old-time democracy with a plutocracy, Jacob Gould Schurman, president of Cornell University, was the chief speaker at the eleventh annual dinner of the Manufacturers Association which was held in the Union League Club, Brooklyn.

Mr Schurman said; Dr. Johnson, crusty conservative as he was once asserted that "an English merchant is a new species of gentlemen." This was a startling paradox to the eighteenth century. What a change the twentieth century shows in the standing of that class of economic producers who in the eighteenth century were still pleading for recognition from the landed proprietors, who then engrossed all social and political honors and sought to monopolize all wealth. Why, the lordly heirs of those aristocratic families now deign to marry the daughters of millionaire traders.

"Why the ablest, the most versatile and certainly by far the most interesting sovereign of Europe, with all the other titles he has inherited, has won for himself the title of the best commercial daughter in the world

"But even now trade is convulsing the politics of Englishmen and shaping the policies of the English government. Mr. Chamberlain has set out to overturn the long established system of British free trade by appeals and arguments addressed both to the pockets and to the patriotism of his countrymen. Whether his scheme will ultimately be adopted by the voters of the British empire, it is too early to say. But it is not too early for associations like yours to consider the effects of its adoption upon the export trade of the United States.

"It would inevitably reduce the volume of the agriculture, products you now send to Great Britain and the volume of the manufactured products you now send to Great Britain and the volume of the agricultural products you now send to Canada and other British colonies.

"I venture to ask whether, in view of the facts and the consequences I have mentioned, it would not be both both prescient and statesmanship and shrewd politics for us to negotiate without delay a treaty of reciprocity with the Dominion of Canada."

TO BOOM IMMIGRATION

Winnipeg, Jan. 29.—A party of leading Winnipeggers returned from St. Paul, where they attended the convention of land dealers and business men in Manitoba and the Western States. The result was the formation of a Western Canadian Immigration Association which, the returned delegates point out, cannot fail to be a powerful influence for the continuation of the movement of settlers to Western Canada. The work of the association will be directed by the ablest and most prominent United States land men engaged in the colonization of the West, together with shrewd business men from Winnipeg.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 195 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS.*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY, GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

SCAL AGENTS, 879-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY,

Sir James Watson

This eminent English physician is one of the greatest authorities on diseases of the respiratory organs

In a recent address Sir James Watson stated that the commonest of all disorders is Catarrh, and that not one person in ten thousand passes the winter without an attack of some sort.

Sir James advises local treatment very strongly, and says it is all nonsense trying to treat Catarrhal diseases by stomach medicines, ointments, douches and snuffs.

Local treatment is applied most scientifically by Catarrhozone, which is inhaled into the nose, throat and lungs, and drives the disease completely out of the system.

Catarrhozone is a rational common-sense treatment; it clears the air passages, makes breathing easy, and relieves at once. Physicians prescribe Catarrhozone with gratifying results, and pronounce it a specific for Catarrh in any part of the system.

Mr. Thos. Cox, one of the most prominent citizens of Minden, Ont., says: "I want to recommend Catarrhozone. It is a nice, clean cure for Catarrh. Cured me perfectly, and is well deserving of a trial from everyone at all affected by Catarrh or throat trouble."

Mr. G. F. Fadden, of Royan, Que., writes: "In my opinion Catarrhozone is the only cure for Catarrh. I had the disease in its worst form, but only got relief from Catarrhozone. It cured me quickly and permanently, and I have no fear of the Catarrh ever returning.

The foregoing brief extracts, like thousands of others that the proprietors of Catarrhozone have received, prove that the proper remedy to use is Catarrhozone. It is quite different from the ordinary Catarrh preparation, and is warranted to prove entirely satisfactory. If it fails your money will be refunded, so if not benefited you won't be out of pocket.

All druggists sell Catarrhozone. Complete outfit, hard rubber inhaler, liquid for recharging, etc., costs $1.00; trial size, 25 cents. By mail from N. C. Polson & Co., Kingston Ont.

LOST

Lost on the 11th of January, a full bred sheep collie dog. Very bright yellow and white; tusk out of the right side of lower jaw. Finder will please leave word at the Canadian Canoe Factory.

WM. ROBERTSON.

The Rockland Changes Hands

The many friends in Peterborough of Mr. Harvey Thompson will be pleased to learn that he has again assumed control of the Rockland House, Bobcaygeon Mr. Kenny having retired. The Rockland House has always flourished, but under Mr. Thompson's management is sure to continue to do so.

Death of an Old Resident

We regret to chronicle the death of Mrs. O'Brien, relict of the late Mr. Dennis O'Brien, who passed away on Saturday night, after a prolonged illness, aged 73 years. She formerly lived in Douro, where they settled 50 years ago. She removed to town twenty years ago. The deceased leaves eight children, as follows;—John and Maurice, of Duluth; Messrs. Patrick W. and D. J. of Chicago; and Messrs James and Michael of Peterborough, and two daughters, Lizzie at home, and Sister St. Michael, of St. Joseph's Convent. The deceased was greatly esteemed and dearly beloved by a large circle of friends. The funeral will take place this morning at 9 o'clock, from the family residence, 411 Downey street, to St. Peter's Cathedral and thence to the Roman Catholic Cemetery.

THE LOCK M'F'G CO.

Annual Meeting and Election of Directors for 1904

The annual meeting of the Peterborough Lock Manufacturing Company, was held yesterday afternoon, when reports showing the volume of business done during the year were presented and adopted. The reports showed that the year's business had been satisfactory, the volume being the largest in the history of the company.

A proposition was submitted, disclosing informally, plans for the erection of enlarged works, and discussed by the shareholders present.

The retiring Board of Directors was re-elected as follows;

President—Hon. J. R. Stratton.

Vice-President—Mr. R. B. McKee.

Directors—Messrs Aaron Cox, A. L Davis, and T. H. Fortye.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Quirk has returned from a visit among friends in Galt.

—Mr Harold Morrow, of Montreal, is in town on a short visit to his family.

—Mrs C. B. McAllister yesterday received two subscriptions of $25.00 and $10.00 for the Minto Hospital Fund.

—Miss Aileen Eyres and Master Charley Ayres leave this morning for Calgary, N.W.T., where they will join their father and reside in the future.

—Bandmaster Green and his brother Carlos, have been invited by the Salvation Army Headquarters, Toronto, to join the Canadian Staff Band, to represent Canadian Army Bands and take part in the great International Congress of the Salvation Army, at the Crystal Palace in London, England, in June.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

- St. Andrew's Young Mens' Guild met last night.

- The Brotherhood of St. Andrew of St John's church, will meet this evening at 7.45.

—"A joke with a point to it," is the inscription on a lead pencil sent to this g. f. j by some alleged humorist.

—On Friday evening in the Y.M.C.A. Hall, Mr T. W. Green will give an illustrated address on New Zealand and Australia.

—Drops of water, grain of sand,
Make the ocean and the land;
Snow and rain and cold intense
Makes us feel like 30c.

—It looks as if this winter would kill off the crop of beautiful snow poets.

- This great family journal received an order for the paper yesterday from Rome, Italy.

- The doubling of the grant to the Children's Aid Society by the County Council was an act that will be well appreciated by those connected with the work.

- Lindsay Post — The Peterborough Light and Power Company have just discovered that frozen water pipes can be thawed out by means of a live electric wire. Supt. Baillie, of the Lindsay waterworks, has been making use of the process here for about five years.

- At Zanesville a typhoid fever patient rushed naked into the open air, with the mercury at 4 below, and ran a mile before he was caught. A change for the better followed immediately. Still, this great remedy is hardly likely to become popular.

Local Sports

Toronto Star—The Marlboros are negotiating with Peterborough and Berlin for a game on Saturday night.

A game of hockey is being arranged for the latter end of the week with the senior St. George's of Toronto, and the Peterborough intermediates. This should prove a strong drawing card, as it will show Peterborough's chances in senior company.

By the Cults dropping out of the T.V. L. it leaves Keene and the T.A.S. a tie, the former team having lost a game here, but winning on their own ice. The deciding game will likely be played on neutral ice at an early date

It is contemplated that an exciting game of hockey will take place some evening next week —"Booze" vs. "Water."

The T.A.S. will play an exhibition game in Lindsay on Friday night.

Peterborough Business College hereby accept the challenge of the Peterborough Collegiate Institute to a game of hockey. Date and place to be announced later. F. A. Froude, Secretary.

The Late W. J. Maxwell

There passed away on Saturday an esteemed resident in the person of Mr. William John Maxwell, aged 62 years. He leaves a wife and one brother, Robert, to mourn his demise. The funeral will take place from his late residence this afternoon at one o'clock and proceed to the 5th line of Cavan Cemetery for interment.

WELL POSTED

A California Doctor With 40 Years Experience

"In my 40 years' experience as a teacher and practitioner along hygienic lines" says a Los Angeles physician "I have never found a food to compare with Grape-Nuts for the benefit of the general health of all classes of people. I have recommended Grape-Nuts for a number of years to patients with the greatest success and every year's experience makes me more enthusiastic regarding its use.

"I make it a rule to always recommend Grape-Nuts and Postum Food Coffee when giving my patients instructions as to diet, for I know both Grape-Nuts and Postum can be digested by anyone.

"As for myself, when engaged in much mental work my diet twice a day consists of Grape-Nuts and rich cream. I find it just the thing to build up gray matter and keep the brain in good working order.

"In addition to its wonderful effects as a brain and nerve food Grape-Nuts always keeps the digestive organs in perfect, healthy tone. I carry it with me when I travel, otherwise I am almost certain to have trouble with my stomach." Name given by Postum Co., Battle Creek, Mich.

Strong endorsements like the above from physicians all over the country have stamped Grape-Nuts the most scientific food in the world.

There's a reason.

Look in each pkg. for the famous little book, "The Road to Wellville."

TO SAVE THE EMPLOYEES

An Alleged Breach of the Lord's Day Act

Yesterday a case came up before Police Magistrate Dumble at the Police Court, which is exciting considerable interest. Edward Packenham, Theodore Knore and Charles Wood, millwrights employed by the American Cereal Company, were arraigned on the charge of working on Sunday, January 17th, the work, according to the prosecution, being neither one of charity nor of necessity. County Crown Attorney R. E. Wood conducted the prosecution, while Mr R. B. Denniston appeared for the defence. Several clergymen were present.

The defendants admitted doing work on the day in question, but claimed it was one of necessity, and was not a breach of the Lord's Day Observance Act. Packenham worked on the rolls from eight in the morning until Sunday noon. Knore was repairing pipes from eight o'clock in the forenoon until two o'clock in the afternoon; while Wood was engaged in fixing the package drivers from 8 o'clock until 6.30 o'clock.

Mr. Alexander Macdonald was the first witness called for the defence, and testified as follows;—I am the superintendent of the American Cereal Company's mills at Peterborough, and we have a large number of people employed at present about 450. The mill begins to run at 6 o'clock on Monday morning and works on until six o'clock Saturday night. To shut down the mill for an hour between that period would mean that our people would be idle for that particular time. The work that the defendants were doing could not have been done while the machinery was in operation. It was absolutely necessary that the work be done, and that the machinery should be overhauled at least once a week. Every mill that works from six o'clock on Monday morning until six o'clock on Saturday night has of necessity to do their tinkering on Sunday.

Cross-examined by Mr. Wood— These machines had not given out during the week but they had to be overhauled in order to ensure their running satisfactorily for the next week. If we did the work on Monday our employees would be out of work for that day, and it is decidedly to their interest if we get a few men to do the work on Sunday, and thus let our general employees put in their full time.

Judgment was reserved for one week.

INSTRUMENTS PRESENTED

To the Members of the Salvation Army Band Last Night

At the Salvation Army Barracks last night the new band instruments, which were on exhibition in the China Hall window for some time past, were formally presented to the Salvation Army Band by Mr. D. W. Dumble, in the presence of a number of clergymen and representative citizens.

Brigadier Turner, of Montreal, the first speaker, explained the method of securing the instruments, and thanked the citizens who had so generously come to their aid. He then introduced the chairman, Mr. R. R. Hall, who had kindly consented to take the chair.

A letter was read from Mayor Roger, who was unable to be present, in the course of which he expressed his regrets at being unable to attend, and wished the Band and Army every success.

Mr. R R. Hall, the chairman, next addressed the meeting, and expressed his pleasure at being present, and being called to act as chairman. He dealt with the work of the Salvation Army, not only in Peterborough, but in the world at large. He spoke of the good work done by them among the poor and needy, and was pleased to be of assistance to the Salvation Army. He then called for a selection by the band, which was excellently rendered.

Ald. Batten, Mr. Bennett, Ald. Edgecumbe, and Rev. J. A. Wilson also addressed the meeting and congratulated the Army on the good work they were doing. The speeches were interspersed with selections by the Band.

Mr Dumble, in presenting the instruments on behalf of the citizens, congratulated the Band, gave them some good advice, and wished them every success.

Brigadier Turner, on behalf of the Band, expressed appreciation for the kind sentiments expressed by the speakers, and again thanked the citizens for their aid in securing the instruments, and hoped that their highest expectations would be realized.

The meeting closed with the singing of the Doxology and prayer by Rev J. A. Wilson.

Y. M. C. A. GYMNASTICS

A Large Attendance Witnessed the Fine Exhibition

Ther was a very large attendance at the Y.M.C.A. gymnasium last night the occasion being the exhibition by the pupils of the gymnastic classes. The work of the boys was well carried out and showed great skill, and a lot of painstaking effort must have been made to reach such a state of excellence. A game of ring hockey was played, being the first one played in Canada, and excited a good deal of interest. It is not as interesting as the real game, but certainly makes a good substitute. At half time Mr. Aplin made a short address, dealing with his work and the encouragement he has received from his pupils, and said he was proud of the work done by the boys since he has instructed them. At the close everybody went away well satisfied with the evening's programme, and several were heard to exclaim that the next time the boys had a "show off" they would be there.

COAL SCARCE IN WEST

The Coal Famine Continues in Western Ontario

St. Catharines, February 1.—The coal famine in Western Ontario, due to the railways being unable to carry coal, is assuming grave proportions in Western Ontario. Half a dozen or so young men who are employed in factories in Berlin came to their homes here last night, because their factories had closed down owing to their being unable to procure coal. The men say that no less than seven large factories in Berlin have been closed down for want of fuel.

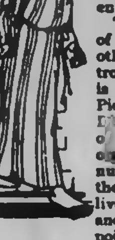
WERE NOT MASSACRED

Mombasa, British East Africa, February 1.—The reported massacre of a British expedition under the auspices of the East African syndicate by Turkhana tribesmen in the neighborhood of Rudolf Lake, the announcement of which was made January 24, now proves to have been incorrect. The expedition in question arrived at Teti, 140 miles west of Rudolf Lake, January 30, all well.

—Owing to there being no quorum the Board of Education did not meet last night.

ONE STEP MORE

Will be fatal to the sleep-walker. Will he draw back or will he take the final, fatal step? A great many people are in peril like the sleep-walker. They are diseased. The disease is progressing day by day. The time comes when one more step away from health is fatal. The man who has suffered from indigestion or gastric trouble goes some night to a dinner and returns home to find he has taken that last step from health which can never be taken back.



To neglect the cure of indigestion or some other form of stomach trouble is dangerous. It is also inexcusable. Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It purifies the blood, stimulates the liver, cures biliousness, and eliminates bilious poisons from the system.

"The praise I would like to give your 'Golden Medical Discovery' I cannot utter in words or describe with pen," writes Jas B. Ambrose, Esq., of 1205½ Mifflin St., Huntingdon, Pa. "I was taken with what our physicians said was indigestion. I doctored with the best around here and found no relief. I wrote you, and you advised me to use Dr. Pierce's Golden Medical Discovery. I took three bottles and I felt so good that I stopped—being cured. I have no symptoms of gastric trouble or indigestion now."

If you ask your dealer for "Golden Medical Discovery" because you have confidence in its cures, do not allow yourself to be switched off to a medicine claimed to be "just as good," but which you did not ask for and of which you know nothing.

You can get the People's Medical Adviser, 1008 pages, paper covers, *free* by sending 31 one-cent stamps, to pay expense of customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully.

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

RITISH PARLIAMENT OPENED BY THE KING

es of the World Will Watch the Proceedings in London

NY DIFFERENT FACTIONS IN THE HOUSE

Brilliant Affair—Intense Interest Being Taken in the Political Matters at Present

ondon Feb. 3—Parliament was open- esterday by King Edward in full . This session promises to be one e most interesting and important in history of the British Parliament. y nation in the world is materially erested in the divisions that will ly occur in the House of Commons upon their result the future policy of British Empire must largely depend. overnment of recent times has ever ced the Legislature under such ex- conditions. Since Parliament ad- ned in June last not only has the e been entirely reconstructed, but party lines have been completely en. Seven distinct factions have n seats in the House of Commons erday, namely, the followers of Pre- Balfour, who favors a policy of tar- retaliation, but who objects to pro- on, the Chamberlain party, who in- that protection is necessary to the y of the Empire; the out-and-out traders, who are opposed to any ering with the fiscal system. The going were all formerly known as onists.

e Liberals, though they were almost man free traders, are split up into different factions, one following Sir y Campbell-Bannerman, and insist- on Home Rule, and the other re- ding Lord Rosebery as their logical er, and refusing to make Home Rule plank of their platform.

e Labor party completes the triple sion of th Liberal free trade ranks, hn Redmond and the Irish party e the seventh faction.

A COMPLEX SITUATION

view of this complex state of af- s, the most astute politicians frankly em themselves to be at sea. So y Cabinet Ministers, including Jos- Chamberlain, Charles T. Ritchie, Lord George Hamilton were absent n their accustomed places on the nt benches, the oldest parliamen- hands will scarcely be able to dis- guish between the supporters and opponents of the Government in fis- question. The Duke of Devonshire, d Arebury, Mr. Goschen, Sir John , Lord George Hamilton, Lord h Cecil, Winston Spencer Churchill, many others identified with the pre- party in power, will be Mr. Bal- r's most bitter opponents the mom- the fiscal question is raised. That l come quickly, for John Morley in- ds introducing an amendment to King's speech on this point. It is ible, though hardly probable, that Morley may turn out the Govern- t. The debates are likely to take eral days. Strenuous efforts are w making to get the free trade Un- ist party members not only to ab- in from voting, but to openly join Liberal forces in the Opposition lob- However, even if this is accomplished, and the Duke of Devonshire's followers make common cause with the Liberals who regard Lord Rosebery as their leader, it would not constitute a solution of the differences of opinion which exist between Sir Henry Campbell Bannerman and the Liberal ex-Premier.

Some Amendments.

Besides the amendments by Messrs. Morley and Redmond, the Government will be attacked on the report of the war commission. This will be taken up by Wm. S. Robinson, Liberal.

Another amendment will be moved by David Lloyd-George, Liberal, denouncing the Government's Education Act, while the employment of Chinese labor in the Transvaal is likely to come in for severe criticism.

A few months ago these topics would have attracted intense interest, and might have driven the Government into a corner. Now they are almost forgotten in the question of the hour—free trade versus protection.

Many members of the House of Commons scarcely know their own mind as yet on the vital topic, and several are undecided on which side of the House to sit.

Chamberlain Questions.

Joseph Chamberlain's tariff commission has mailed to all manufacturers appearing in trade directors in the United Kingdom an enquiry form with regard to trade conditions as affected by foreign tariffs. The replies are designed to form the basis of further enquiry on which the commission intends to formulate a tariff bill which it will submit to the country.

The form contains eleven questions. The questions follow:

What is the proportion of your output for foreign markets?

What is the proportion of your output for colonial markets?

What branches of your home trade have suffered from competition?

Are any articles similar to those you manufacture imported into our country below your cost price?

Are such articles placed on the British market below the normal cost of production in the country of origin?

Is your trade suffering from the adverse competition of foreign countries owing to difference in wages, hours, etc.?

Has your export trade suffered in recent years owing to the tariff of any foreign country?

What reduction in the tariff of any foreign country would enable you to compete successfully within that country with commodities made therein similar to those you manufacture?

What is your experience with respect to foreign competition in the colonies?

In your trade do you suffer from the operation of patent laws or registration laws of other countries?

AN ENJOYABLE CONCERT

ven Last Evening in the Market Hall in Aid of Lady Minto Hospital Fund

Probably one of the best concerts at has ever been given here was e one last evening in the Market Hall aid of th Lady Minto Hospital Fund e Hall was comfortably filled with an appreciative audience, whose repeated plause showed their appreciation of e different numbers.

The artists were in excellent form and roduced a program which could not be celled. Mr. Homer Eaton delighted all ith his witty impersonations and evok- much enthusiasm. The singing of Mr Francis Firth and Miss Flora Higgins was a great success. In "Abide With Me" (Liddle) the pure and deep qualities f Miss Higgins' voice were brought out o good advantage. Mr. Blachford, one of the finest violinists in Canada, rendered Hubay's "Hyrekati," very sweetly; afterwards he gave "Mazurka," (Wieniawski) which received much applause.

During the evening Giddon's orchestra rendered several selections very acceptably.

Too much praise cannot be given Mrs. McAllister, who was instrumental in getting up this successful affair. The efforts put forth have been successful and a good sum was realized for this most worthy object.

PROGRAMME.

Part 1

Reading, selected
Mr. S. Homer Eaton.

Solo.
"Oh Hear the Wild Wind Blow...Mattei
Mr. W. Francis Firth.

Violin Selection
"Hyrekati" ...... Hubay

(b) "Mazurka" ...... Wieniawski
Mr. Frank Blachford.

Impersonation (Burlesque)
"The Prima Donna Solo" ...... Selected
Mr. Eaton.

Duet, in costume
From the Operas "Ernani" and "The Fencing Master."
Mr. Eaton as the Prima Donna and Mr. Firth as Chas. V.

Accompanist ...... Mrs. W. J. Morrow

The Heintzman Grand Piano was kindly loaned for the occasion.

ANNUAL MEETING

Of West Peterborough County Orange Lodge

The annual meeting of West Peterborough County Orange Lodge was held last evening in the Orange Hall, Simcoe street, there being a very large attendance of members. Every lodge was represented with the exception of Apsley Lodge, No. 1013, and another Lodge or two in the Lakefield district, which, considering the fact that Apsley is distant some forty miles, and without railroad communication with the town of Peterborough, and also the almost impassable condition of the county roads, it is not surprising that Apsley did not send in its quota.

It was decided to hold the demonstration in Peterborough on the coming 12th of July, providing the local lodge receives sufficient encouragement from the citizens to warrant them in doing so.

The following officers were elected for the ensuing year:—

Bro. W. A. Kindred	Co. M.
" Dr. J. A. Burgess	D. Co. M.
" J. C. Daddie	Co. Chap
" W. H. G. Armstrong	Co. Sec.
" Col. J. W. Miller	Co. Fin. Sec
" Ald. Jos. Batten	Co. Treas.
" Wm F. Elliott	D. of C.
" M. E. Weir	Lec.
" Geo. Bartley	Dep. Lec.
" T. C. Houlden	Dep. Lec.

The above officers were duly installed by Bro. J. B. McWilliams, Past Co. Master and Past Jr. Dep. Grand Master, Ontario East.

C. P. R. AND WINNIPEG

The Canadian Pacific Reaches Agreement with Winnipeg

Winnipeg, February 2.—At Saturday's session of the Manitoba Legislature, Premier Roblin gave notice of a motion which he will make on Wednesday next, "That this House strongly commends and endorses the policy advocated by the Right Hon. Joseph Chamberlain involving certain fiscal changes within the Empire, and is of opinion that the inaugurating and putting into practical effect of such a policy would be of paramount importance and benefit to the people of Manitoba."

EVERYBODY READS THE TIMES.

GREAT REVOLUTION IN BRITISH MILITARY ORGANIZATION.

The greatest revolution in British military organization since the abolition of the purchase of commissions thirty years ago has been accomplished as a result of the report of the three experts, Col. Sir G. S. Clarke, R.E., Admiral Sir John Fisher and Lord Esher, chairman. The War Office is to be cleaned out, the position of Commander-in-Chief abolished, and the control of the army entrusted to a board of experts, acting in co-operation with the Parliamentary [illegible] Secretary for War. The navy is admirably managed by such a Board, every member being an expert on some branch—finance, manning of ships, ordnance and so forth. It is believed that Sir George Clarke, who is the greatest student of "war preparation" in the United Kingdom, will resign the Governorship of Victoria, which he now holds, and become permanent Secretary of the War Board.

COUNCIL IN LATE SESSION

Reports of the Finance and Property Committees—Communications—Police Ask for Increase of Salary

At Monday night's Council, which convened at 9 o'clock and adjourned at 11, the following routine business was transacted.

COMMUNICATIONS.

From Dennistoun, Peck & Stevenson enclosing their account against the Village of Ashburnham, amounting to $41.—Referred to the Finance Committee.

From W. J. Green, secretary Peterborough Industrial Exhibition Association, pointing out the desirability of having the street railway south to the exhibition grounds and the river completed at an early a date as possible.—Received.

From S. R. Armstrong, saying that he had been instructed by the Board of Health to ask the Council to take action with respect to providing hospital accommodation for the treatment of infectious diseases, respecting which the Board communicated with the Council some time ago.—Referred to the Committee of the Whole.

From the Otonabee Power Company, asking the privilege of placing twelve poles on Rubidge street, from Sherbrooke to Rink, westward. Also one on Stewart, north of Simcoe, and four on Aylmer from London to Dublin streets, westward.—Referred to the Board of Works to be dealt with temporarily until Council shall have fixed terms for the continuation of the franchise.

From J. H. Hesslop, asking that the West ward be numbered.—Referred to the Board of Works.

From N. T. Laplante, saying that since the Town took it upon themselves to close up that part of Hunter street where there is likely to be danger to pedestrians by reason of ice, etc., resulting from the recent fire, it is the Town's duty to keep it closed till everything is made safe, and upon them rests all responsibility.—Referred to Legal committee.

From the Bell Telephone Company offering to send a representative to furnish any information required re installing an up-to-date fire alarm system, similar to installations made by this company at Chatham, St. Thomas, Lindsay, Sault Ste. Marie, Niagara Falls etc.—Referred to the Committee of the Whole.

From Dennistoun, Peck, Kerr and Stevenson, asking that J. J. Turner & Co.'s application for fixed assessment be referred to the Manufacturers or such other committee as the Council may think proper, for investigation. This legal firm also suggested that they have an opportunity of appearing before the committee to present the claims of their clients.—Referred to the Manufacturers committee.

An application from Constables Stewart and McGinty for an increase of salary was referred to the Supervision committee.

FINANCE REPORT.

Ald. Adams submitted the following.

Gentlemen,—Your Finance committee beg leave to report and recommend as follows.

1. That in accordance with the recommendation of the Central Charity Board the salary of the Relief Officer be increased to $200 per year, to date from Jan. 1, 1904.

2. That the Central Charity Board be given a grant of $1700 a year to date from January 1st, 1904, payable in monthly installments of $200 in the months of January, February, March, November and December, and of $100 in each of the other months of the year.

3. That a grant of $300 be made to the Children's Aid Society payable in equal monthly installments.

4. That the payment of $11 made by the Treasurer to the Clerk of the Legislative Assembly with respect to the Town's legislation be confirmed.

5. That the accounts of the Central Charity Board be audited by the Town Auditors in the same manner as other accounts of the Town.

6. That the Collector of Taxes for Ward No. 5 be instructed to deposit moneys received by him in the Ontario Bank to the credit of the Corporation of the Town of Peterborough, and to give the Town Treasurer a certificate or receipt from the Bank for the sums deposited.

7. That the following accounts be paid;

Fitzgerald & Co.	$ 4.75
Wm Hetherington	4.50
G. Walter Green	12.00
A. Comstock	10.50
Times Printing Co.	65.13
Peterborough Canoe Co.	4.85
The Dickson Co.	3.20
W. R. G. Higgins	13.85
Lindsay & [illegible]	41.28
Walter Stocker	13.00
B. Morrow	2.00
The Salisbury Co.	2.58
The Kingan Hardware Co.	4.27
Macfarlane, Wilson Co.	.30
Dominion Express Co.	.50
Adam Hall	1.02
J. & W. Metheral	8.40
C. N. Brown	4.50
W. E. McCall	37.50
Review Printing and Publishing Co.	96.11
A. H. Stratton & Co.	3.25
R. Gibbs	2.50
Alexander & Miller	33.23
Town Trust Commissioners	109.34
W. B. Hamilton	4.50
Bell Telephone Co.	140.00
Peterborough Hardware Co.	2.93
H. A. Littledale	1.00
R. H. Leary	2.75
Ormond & Walsh	5.25
Roland Denne	10.50

All of which is respectfully submitted.

The report was adopted as read.

PROPERTY REPORT.

In the absence of Ald. Batten, Ald Rush submitted the following.

Gentlemen,—Your Property committee beg leave to report and recommend as follows:

1. That the janitress of the town offices be paid at the rate of $8.00 per week.

2. That the chairman be authorized to offer the C.P.R. Co. $40 for the furnace in the office of the tax collector and town engineer, and if the offer is accepted that the Treasurer be authorized to issue a cheque to the Railway Co. for that amount.

3. That the chairman be authorized to purchase more chairs for the committee room.

All of which is respectfully submitted.

The report was adopted as read.

BY-LAWS.

A by-law to authorize a grant of $17,060 a year to the Central Charity Board as per clause 2 of Financial Report, passed it's several readings.

A by-law authorizing a grant of $300 to the Children's Aid Society passed its several readings.

PERSECUTING JEWS.

Cruel Massacres are Being Enforced at Moscow

London, Feb. 2—The correspondent of The Times at Moscow says the position of the Jews of Moscow has been peculiarly difficult during the past year. After the expulsion in 1891 of 30,000 Jewish workingmen, and artisans, only those Jews who were members of the first guild of merchants, and those academically educated, were allowed to remain. Recently the Governor of the city ordered strict inquiry into the domiciliary rights of those persons, and on the discovery of the slightest flaw, expulsion follows. A number of families whose grandfathers during the '50s obtained the hereditary freedom of the city, have been suddenly expelled. It came to light that the persons by whom the freedom was obtained had paid taxes as members of the first guild for eight years only. According to a recent law, the freedom of the city will not be granted unless such taxes were paid for ten years. This law is applied to dead Jews, and on the strength of it their descendants are being forced to leave Moscow. The police are carrying out the task imposed upon them with great zeal, ransacking the Jewish houses at all hours of the day and night. Those having means have been taken to the station and compelled to pay tickets for the first station within the districts assigned to Jews. The poor are forwarded "par etape," and often in the company of criminals.

HOW THE DOMINION GOT KNOCKED.

Britain Made Practically no Protest in Selection of American Commissioners

London, Feb. 2—A Parliamentary paper was issued today respecting the Alaska boundary award. It shows that Hon. Mr. Sifton, writing to Lord Lansdowne on Oct. 22, said:

"We are much indebted to Sir Robt. Finlay for his opening argument, which, in dignity, clearness, and mastery of detail, was in every respect worthy of the important character of the issues involved. Hon. E. H. Carson and Mr. Christopher Robinson fully maintained their high professional reputations. Their presentation of the case of His Majesty's Government was all that could be desired. They enjoyed the advantages of the assistance of Hon. Edward Blake, in preparing the case. Mr. Blake's withdrawal, owing to ill-health was a source of great regret."

Mr. Sifton also expressed appreciation of the efficient manner in which Messrs. Wade, Duff, Geoffrion, Rowlatt and Simon discharged their important duties. "Upon Messrs. Wade and Rowlatt fell the heaviest portion of the labor attending the preparation. I cannot speak too highly of the ability and judgment exhibited by both these gentlemen, who had the advantage of the services of King, the chief astronomer of Canada, whose scientific knowledge is of a high order. Mr. Pope's services were of great value."

Taffy From England.

Lord Lansdowne, replying on Oct. 30, said: "I have received the King's commands to signify to you and those who worked with you, His Majesty's approval of the ability with which you advocated the interests of the Empire in the question of great importance to this country and Canada. I ask you to offer the best acknowledgment of His Majesty's Government for the manner in which Messrs. Robinson, Blake, and others of the Canadian Bar, and the public service, who have taken part in the proceedings, have argued the British case before the Tribunal."

The paper shows that in July, 1899, Lord Salisbury wrote the American Ambassador, suggesting that the terms of the Anglo-Venezuelan arbitration treaty be applied to the Alaska question. In reply, the United States thought the terms inapplicable to the Alaskar controversy.

Canada Up Against It

Lord Onslow, replying on February 26, re Canada's objection to the American commissioners, said: "His Majesty's Ministers are as much surprised as the Canadian Ministers at the selection of the American members of the tribunal." "His Majesty's Government was convinced that it would be useless to press the United States to withdraw the names, but their was virtually nothing but to choose between breaking the negotiations altogether" "which would be a grave misfortune in the interests of Canada" or accepting the American nominations, and "appointing as their colleague representatives appropriate to the altered circumstances of the case."

UNCLE SAM AND BRAZIL

United States Secures Preference From Brazil

Washington, February 2.—Without the sacrifice of a single duty on products entering the United States, and, in fact, without any consideration at all, United States Minister Thompson has secured preferential rates on several lines of staple American products imported into Brazil. The details of the arrangement, as made public, are that Brazil gives preferential rates to the following products of the United States; To flour in barrels, 33 per cent.; to flour in sacks, manufactures of rubber, ~~with~~ wines, paints, varnishes, condensed milk, clocks and watches, 20 per cent.

Minister Thompson says that, with the exception of flour, none of these articles are being imported into Brazil from the United States in any quantity at the present time. As for flour, the imports, formerly 1,000,000 barrels per annum, about six or seven years ago, have fallen off to about 500,000 barrels per annum, owing to the excessive duty, which the present agreement will diminish.

WEATHER NOTES

Wednesday—Decidedly cold.

AN IMPOSING FUNCTION

Ceremony in Honor of German Emperor's Birthday

Berlin, Feb. 1—At the Reichstag dinner tonight, given in honor of the emperor's birthday, Count Von Ballestrem president of the reichstag, related a recent conversation between himself and Emperor William during which, in response to Count Von Ballestrem's reference to the emperor having met the czar during his recent illness, his majesty said; "In case of there being anything serious the matter with me, I wished to leave my son in agreeable and neighborly relations."

A great crowd gathered in front of the palace early today both to salute Emperor William on his birthday and to get good places from which to see the members of the royal family and court and other officials offer their congratulations to the emperor. The latter, surrounded by generals, appeared before a window overlooking the square and acknowledged the acclamations. From that time onward carriages arrived containing those of rank sufficient to permit them offering their good good wishes, beginning with the members of the family and their suites, the cabinet ministers, the heads of the army and navy, visiting kings and princes and ambassadors, among them United States Ambassador Tower. The emperor received the callers in the pillar hall until midday.

USE OF RADIUM

Has Been Tried Successfully in Restoring Sight

Philadelphia, Feb. 1—Charles H Sharpe testified today that he had been made totally blind by a fall from a trolley car and that his sight had been restored for the use of radium. He is suing the transit company for damages. He stated that doctors had told him the optic nerve was so seriously involved it could not be reached by treatment and he had resigned himself to blindness, when Dr. J. L. Borsch, an ophthalmologist, returned from Paris with a tube of radium. He bound the tube of radium over one of Sharpe's eyes and allowed it remain there several days. The result was a cure. Dr. Borsch corroborated the testimony of Sharpe. The suit was settled out of court.

NOT MORE THAN FIFTEEN DAYS LONGER OF PEACE

Reported View of the Russian Ministry of War--Japan Still Preparing

London, Feb. 2—A correspondent of The Times at St. Petersburg says a military officer of high position declares that war is inevitable. The Ministry of War is prepared to allow only fifteen days more of peace. The influence of Admiral Alexieff is still uppermost. He is strongly opposed to any essential concession, and adds that war is preferable.

Japan Fixes War Pay.

London, Feb. 2—The correspondent of The Times at Tokio says an ordnance was issued today fixing the war pay of the army and navy. It was also officially denied that any statement of the situation was recently made by Japan to the powers. Russia's answer is expected about the 5th inst. Meanwhile the public anticipates no concessions though there is an easier feeling in some circles. Japanese residents are withdrawing rapidly from the Liau-tung peninsula. There is no official intimation of the cessation of commercial traffic on the railways.

JAPAN CALMLY AWAITS ANSWER

DETERMINED THAT DELAY WILL NOT HURT HER CHANCES

RUSSIA VERY PERSISTENT

Recent Negotations Made it Plain That Her Pretentions Extend to Corea

Tokio, February 3.—That Japan will accept a technical victory in Manchuria while suffering a practical defeat should be regarded with suspicion. The Government and the country are determined that Russia's restoration of Manchuria to China shall be good in law and good in fact. The first principle of Japan's policy in this matter is to prevent Russia from having an excuse for effecting a military occupation of Chinese territory that would be perilous primarily to Corea and secondarily to Japan itself.

Persistence on Russia's part in perfecting a military and naval machine for the purpose of overshadowing Japan would be a cause of war regardless of the tone or trend of negotiations. The Mikado's advisers would be less unyielding in their opposition to Muscovite plans in Manchuria had not the St. Petersburg Government, in the course of discussion, disclosed the fact that its pretensions extended to Corea.

This discovery showed the Japanese the real nature of Russia's ambitions, and decided them to risk war rather than permit Russia to acquire a position whence it could realize those ambitions by force.

Japan calmly awaits the decision of the St. Petersburg Ministry fully determined that the delay shall not be protracted long enough to injure the Japanese chances. There is good authority for believing that the Mikado will strike first should such a course prove necessary for the defense of the nation's interests.

NEWS NOT REASSURING.

St. Petersburg, February 3—Despatches from Vladivostock announce that 30,000 men are expected there this month, to strengthen the garrison, while orders for the mobilization of the reserves in all the territories of the Far East are shortly expected.

Preparations are making for the mobilization of all the horses liable to Government requisition.

The Japanese, in alarm, are leaving the territory traversed by the Eastern Chinese Railway.

According to the Port Arthur Novy Krai, the Japanese are intriguing to create disturbances in Corea, so as to have an excuse for intervention. The Japanese reports of the intentions of the Seoul garrison to mutiny were, it is added, circulated with the object of inducing the Emperor of Corea to seek refuge in the Russian legation. The only result, however, was to determine the Emperor to place himself under the protection of the United States legation in case of necessity.

QUIET AT TOKIO.

London, February 2,—5.50 p.m.—A despatch to Reuter's Telegram Company from Tokio to-day says the Russian answer has not yet arrived there and that there is an absolute dearth of reliable news. But the despatch adds, well informed persons "continue indisposed to expect a satisfactory answer from Russia."

London ~~February 2~~.—The correspondent of The Times at Chumbi, says that while rumors still prevail to the effect that an attack on Col. Younghusband and the British mission is likely unless the mission is withdrawn, no blows have been struck. It is known that Thibetan reinforcements are rapidly increasing, and the general of the Lhasa district, in an interview with Col. Younghusband asked him to withdraw, saying that otherwise the consequences would be serious. Col. Younghusband seems to be confident that there will be no conflict, but it is obvious that any overt act of hostility would wholly change the aspect of the political relations which the Government of India has consistently upheld.

THE NEGRO POPULATION.

The Spectator cordially approves the suggestion that negroes be imported into the Soudan from the Southern States of the union, as free men, of course, to teach gradually the thin population of the Soudan all the methods of cotton cultivation. It says: "The climate will exactly suit the negro, who, when well treated, is a decent citizen, anxious to make money, and accustomed to the ascendancy of the white man. The Soudan is such circumstances will furnish the finest cotton field in the world."

MR. BONAR LAW.

Mr. Bonar Law, M.P., speaking at Edinburgh, said, with the example of Canada and Germany, there was no need to go abroad to see what retaliation meant.

FIRST FACTORY GIRLS ARRIVED

BRITISH WOMEN'S IMMIGRATION SOCIETY SENDS OUT WORK WOMEN

POSITIONS AWAITING THEM

Second Party Will Reach Montreal Very Shortly to Get Work in the City

Montreal, Feb. 2—Nine skilled and experienced workwomen have arrived from London to take positions in Montreal.

This is the first detachment of young workingwomen who are being sent out through the assistance of the British Women's Immigration Society, under the auspices of the Hon. Mrs. Joyce, to find work in Canada. Positions have already been obtained for these women who are all London Club girls, highly recommended as to character and general standing.

The young women came out by the steamship Canada, in charge of a matron, and arrived at Halifax on Sunday morning, coming on to Montreal by the Intercolonial Railway. They were met and taken to the Women's National Immigration Society, on Osborne street, where they will remain until suitable boarding places are found for them by the society. Most of them are skilled dressmakers.

The second party of factory girls will come on the Canada's next trip.

CHAMBERLAIN DEVELOPS.

The eve of Parliament finds Chamberlain undergoing two other interesting developments. Mr. Chamberlain realizes that no policy can succeed in England without the votes of workingmen. No labour representative has been found to serve on his Tariff Commission. Presumably the labour unions are for the moment disposed to boycott the enquiry. Nevertheless, the commission has invited all the labour associations to assist the enquiry by answering questions and sending witnesses. The other development of the Chamberlain policy affects British agriculture. The British farmers have shown increasing uneasiness at the prospect of a preference in the British markets for their most active rivals in Canada and Australia. A special agricultural section of the commission has been formed, therefore, under the leadership of that old-time protectionist ex-Minister Chaplin. Of course, if British agriculturists and manufacturers had their way, the new protection would go far beyond Mr. Chamberlain's modest ten per cent. on foreign imports. Mr. Chamberlain's chief difficulty indeed, will be to keep their support without approaching the McKinley tariff levels.

ENGLISHMEN EXPECT WAR

Despite the pacific Russian assurances most Englishmen are driven to expect war in the Far East. For them it is a leap in the dark. The governing classes cling to the hope that the Anglo-Japanese treaty will tend to isolate the conflict, believing that the Czar would be unlikely to demand French assistance, when he knows that he thereby would bring the formidable British naval power against Russia, but war once begun has a habit of running its own course. As the Liberal journals point out, there are the questions of the Dardanelles, of coaling stations on the road to the Far East, and of the neutrality of the Suez Canal, on any one of which Japan, as Great Britain's ally, might expect her assistance and an outburst of public opinion might force the hand of the British Government. Finally, there is the chance that advantage might be taken of Russia's preoccupation to force a crisis in the Near East, with all its complications to Europe, hence the appeal which the more reflective journals already are making to English speakers and writers not to whip up so dangerous an element as public opinion against Russia.

BACK TO THE LAND.

Mr. Chamberlain has written a letter to Edgar Wallace, approving of the scheme of replacing on the land agricultural laborers stranded in London.

FACTORY WOMEN FOR CANADA.

The British Women's Emigration Society is endeavoring to raise £10,000 to send 300 women to Canadian factories.

SIR EDWARD GREY.

Sir Edward Grey asked the Manchester Reform Club if they thought there was a case in which any country benefited by retaliation. Instead of protectionists being able to throw open Colonial markets to British goods, the Colonies would still further raise the duties.

COLONIES' BEST FRIEND

Lord Strathcona, speaking before the Newport Chamber of Commerce yesterday, said the Colonies regarded Mr. Chamberlain as their best friend, and he had done more for the Empire than any other.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg 208 Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once

Morning Times

paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

trangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month, and to outside points at $3 per year strictly in advance

PETERBOROUGH, FEBRUARY 3, 1904

THE COUNTY COUNCIL'S CLOSING SESSION

REPORTS OF THE VARIOUS COMMITTEES

The Members of the Council Appreciate Their Visit to the Cereal Works—A Lot of Business.

The County Council held its final session at 9 o'clock Saturday morning. There were present Warden Peck, and Councillors Crowe, Moloney, Hunter, Fitzgerald, Shaw, Menogue, Curtis, Buck and Johnston.

The minutes of previous meetings were read and confirmed.

A VALUABLE INDUSTRY.

Councillor Hunter moved, seconded by Councillor Crowe, That we, the members of this Council greatly appreciate the opportunity afforded us by the manager of the Cereal Company of visiting the works, and we acknowledge the courtesy shown us by the gentlemen connected with the Company, who accompanied us through the buildings and explained the machinery and process of manufacture.

We express our recognition of the great advantages this County is drawing from the establishment of this important industry, affording, as it does, not only employment for a large number of operatives, but also a ready sale of cereals at prices beyond those which the farmers of the county would, but for the operations of the Company, be likely to receive.—Carried.

COMMITTEE ON PETITIONS.

On motion, the Committee on Petitions reported as follows, through the chairman, Coun. Shaw;

The Committee on Petitions beg leave to report as follows;

1. Your committee recommend that a petition be sent to the Ontario Government praying that the matter of the collection of arrears of taxes be left as at present.

2. Your committee recommend that no action be taken on the petition from the County of Kent in reference to a House of Refuge.

3. Your committee recommend that no further action be taken at present upon the petitions from the Counties of Elgin, Kent, Northumberland and Durham, and Victoria, in reference to the proposed amendments to the Municipal Act as to the composition of County Councils, as this County has already taken action in the matter at the session held in November last.

5. That the matter of sending a delegation to wait upon the Ontario Government, to act in conjunction with a like delegation from the County of Victoria, in reference to the proposed amendments to the Municipal Act, be left in the hands of Messrs. Moloney, Hunter, the Warden and the chairman of this committee with power to act.

All of which is respectfully submitted.

ROBT. SHAW,
Chairman.

County Council Chamber, Peterborough, January 30th, 1904.

Mr. Shaw moved, and Mr. Fitzgerald seconded the adoption of the report. It was carried, Councillors Johnston and Buck voting nay.

PRINTING.

On motion the Committee on Printing reported as follows, through its chairman Coun. Buck;

The Committee on Printing beg leave to report as follows;

1. Your committee recommend that the County Clerk be instructed to grant to the Norwood Register, Lakefield News and Havelock Standard alternately the printing of the list of convictions and assessment schedules required to be published and printed, at the same price as last year.

2. Your committee recommend that all other printing be divided by the County Clerk in as equal a manner as possible between the Peterborough Examiner, Peterborough Review, Peterborough Times, save and except that the County Clerk shall apportion between the Lakefield News, Norwood Register and Havelock Standard, whatever printing of letter heads, posters, and other work he can conveniently give them.

All of which is respectfully submitted.

W. T. BUCK,
Chairman.

County Council Chamber, Peterborough, January 30th, 1904.

On motion of Coun. Buck, seconded by Coun. Shaw, the report was adopted.

SCHOOLS.

Councillor Curtis, chairman of Committee of Schools, presented the following report;

The Committee of Schools beg leave to report as follows;

1. Your committee recommend that no action be taken upon the communication from J. J. Hadley, of Anstruther, in reference to a new school section, as your committee are of the opinion that if matters stand as they are allowed to stand for a short time they will be adjusted satisfactorily by the Township Council.

2. Your committee recommend that the report of the Public School Inspector be received and printed with the minutes of this Council.

3. Your committee recommend that on looking over a draft of the proposed changes in the Public School course of study, we consider that book-keeping should be made a compulsory and not an optional subject for the fourth form, and that nature study, manual training and domestic science, while important, are not desirable subjects to be taught in rural schools and should not be made such prominent features in the course as to a great extent to overshadow the subjects that must be the staples of a public School education, namely Reading, Spelling, Writing, Arithmetic, Geography, Grammar, Composition and History, and that a certified copy of this resolution be forwarded to the Minister of Education at Toronto.

All of which is respectfully submitted.

W. T. CURTIS,
Chairman.

County Council Chamber, Peterborough, January 30th, 1904.

On motion of Councillor Curtis, seconded by Councillor Menogue, the report was adopted.

COUNTY PROPERTY.

The Committee on County Property was presented through its chairman, Councillor Moloney.

The Committee on County Property beg leave to report as follows;

1. Your committee recommend that the matter of repairs and supplies for the County Buildings as may be required from time to time be left in the hands of the chairman of this committee with power to act.

2. Your committee recommend that the matter of the lighting of the Court House and County Buildings be left in the hands of Mr. Johnston and the chairman of this committee with power to act.

All of which is respectfully submitted.

D. MOLONEY,
Chairman.

County Council Chamber, Peterborough, January 30th, 1904.

On motion of Councillor Moloney, seconded by Councillor Crowe, the report was adopted.

ROADS AND BRIDGES.

The Committee on Roads and Bridges reported as follows through their chairman Councillor Johnston.

The Committee on Roads and Bridges beg leave to report as follows,

1. Your committee recommend that Wm. O'Leary be authorized to purchase 300 lineal feet of cedar joists at two cents per foot for repairing the Mud Lake Bridge.

2. Your committee recommend that no action be taken upon the application of Mr. John Wilson for a grant of $25 to assist in repairing the road between Cardiff and Chandos, as this county has already expended $25 in repairing this road.

3. Your committee recommend that no action be taken upon the communication from the Western Ontario Good Roads Association.

4. Your committee recommend that the matter of the repairs to the Crowe River Bridge be left in the hands of Mr. Curtis and the chairman of this committee with power to act.

5. Your committee recommend that the matter of the repairs to the Sullivans Bridge be left in the hands of Mr. Moloney and the chairman of this committee with power to act.

6. Your committee recommend that the matter of the repairs to the Indian River Bridge be left in the hands of the chairman of this committee with power to act.

7. Your committee recommend that sealed tenders be asked for the sale of the old Gannon's Narrows' Ferry Scow and cable, that that the notices be published for three weeks in the Weekly Review and Weekly Examiner tenders to be received up to the 15th March next

8. Your committee recommend that the matter of the repairs to the Gannon Narrows bridge be left in the hands of Mr. Shaw with power to act.

9. Your committee recommend that a grant of $100 be given to the Township of Burleigh and Anstruther for the repairs to the Burleigh Road on condition that the Ontario Government grant $600 for the same purpose.

10. Your committee recommend that a special grant of $75 be given to the Municipalities of Harvey, the united Townships of Galway and Cavendish and the Township of Chandos, for repairs to roads and bridges therein, and that Mr. Shaw be commissioner for Harvey, Galway and Cavendish, and Mr. Monogue for Chandos, each to furnish a certified statement in detail of the manner in which such monies are expended.

11. Your committee recommend that lace Point Bridge and the caretaker of the salary for the caretaker of the Walthe Beaufort Bridge be $45 each per year from this county on condition that the united counties of Northumberland and Durham raise their portion of the salaries to the same amount.

12. Your committee recommend that a special grant of $100 be given to the Township of North Monaghan for repairs to roads and bridges therein, and that Mr. Hunter be commissioner for the expenditure of the same.

13. Your committee recommend that a special grant of $100 be given to the Township of Douro for repairs to roads and bridges therein on condition that the Ontario Government grant $300 for the same purpose, and that Mr. Moloney be commissioner for the expenditure of this same.

14. Your committee recommend that a special grant of $40 be given to the Township of Dummer for repairs to the Lakefield Road on the First concession line of the Township of Dummer, and that Mr. Crowe be commissioner of the same.

15. Your committee recommend that a special grant of $100 be given to the Township of Smith for repairs to the Communication Road therein, and that Mr. Fitzgerald be commissioner for the expediture of the same.

16. Your committee recommend that a special grant of $200 be given to the Township of Smith for repairs to the Communication Road therein, and that Mr. Fitzgerald be commissioner for the expediture of the same.

16. Your committee recommend that a special grant of $200 be given to the Township of Belmont and Methuen for repairs to the roads and bridges therein, and that Mr. Curtis be commissioner for the expenditure of the same.

17. Your committee recommend that a special grant of $100 be given to the Township of Asphodel for repairs to the boundary line between the Townships of Dummer and Asphodel, and that Mr. Buck be commissioner for the expenditure of the same.

18. Your committee recommend that a grant of $50 each be given to the Townships of Harvey and Galway for repairs to roads and bridges therein on condition that the Ontario Government grant $300 for the same purpose.

19. Your committee recommend that a special grant of $200 be given to the Township of Otonabee for repairs to the Norwood Road and that Mr. Johnston be commissioner for the expenditure of the same.

20. Your committee recommend that a special grant of $75 be given to the Township of Ennismore for repairs of the bridge on the road leading to Gannon's Bridge, and that Mr. Fitzgerald be commissioner for expenditure of the same.

All of which is respectfully submitted.

T. J. JOHNSTON,
Chairman.

County Council Chamber, Peterborough, January 30th, 1904.

On motion of Councillor Johnston, seconded by Councillor Shaw, the report was adopted.

USE OF RADIUM

Has Been Tried Successfully in Restoring Sight

Philadelphia, Feb. 1.—Charles H. Sharpe testified today that he had been made totally blind by a fall from a trolley car and that his sight had been restored for the use of radium. He is suing the transit company for damages. He stated that doctors had told him the optic nerve was so seriously involved it could not be reached by treatment and he had resigned himself to blindness, when Dr. J. L. Borsch, an ophthalmologist, returned from Paris with a tube of radium. He bound the tube of radium over one of Sharpe's eyes and allowed it remain there several days. The result was a cure. Dr. Borsch corroborated the testimony of Sharpe. The suit was settled out of court.

THE THIBET EXPIDITION

Col. Younghusband Does Not Expect to do Any Fighting

London February 2.—The correspondent of The Times at Chumbi, says that while rumors still prevail to the effect that an attack on Col. Younghusband and the British mission is likely unless the mission is withdrawn no blows have been struck. It is known that Thibetan reinforcements are rapidly increasing, and the genral of the Lhasa district, in an interview with Col. Younghusband asked him to withdraw, saying that otherwise the consequences would be serious. Col. Younghusband seems to be confident that there will be no conflict, (but it is obvious that any overt act of hostility would wholly change the aspect of the political relations which the Government of India has consistently upheld.

THE MUNICIPAL ELECTION

Toronto Scandal May Include Some Big Companies

Toronto, February 2.—What promises to develop the most startling phase of city scandal is the preparation being made to bring out during the early stages of the investigation an alleged corrupt bargain by which corporate influence was extensively used for the election of some of the controllers. Those handling the quo warranto proceeding state that Wm. Moore, the assistan president, Mackenzie; General Manager Keating and Supt. Gunn, of the Toronto Street Railway, will receive an opportunity to answer some leading questions as soon as the taking of evidence is commenced. The Consumers Gas Company also will be drawn into the hearing.

COAL SCARCE IN WEST

The Coal Famine Continues in Western Ontario

St. Catharines, February 2.—The coal famine in Western Ontario, due to the railways being unable to carry coal, is assuming grave proportions in Western Ontario. Half a dozen or so young men who are employed in factories in Berlin came to their homes here last night, because their factories had closed down owing to their being unable to procure coal. The men say that no less than seven large factories in Berlin have been closed down for want of fuel.

Billoius Dyspepsia

A DREADFUL COMPLAINT ACCOMPANIED BY HEADACHE, SICKNESS OF THE STOMACH, VOMITING THAT CAN BE PERMANENTLY AND QUICKLY CURED BY FERROZONE

Some persons have attacks of Billious Dyspepsia very frequently, and feel as if they were about to die. The whole system seems to collapse. The tongue becomes coated, the face a sallow pallor, and a bitter taste is always noticeable in the mouth. At times the bowels are very constipated, but occasional acute diarrhoea is caused by the accumulation of bile in the system.

It is highly dangerous to allow such a condition to imperil your life. It must be cured and the simplest and surest remedy is Ferrozone. It digests every particle of food eaten, and prevents the waste products from clogging up the system.

Ferrozone restores all deranged organs to a healthy, vigorous condition. It keeps the bowels well regulated, makes the kidneys eliminate all poisons from the blood, and supplies the necessary elements to build up and strengthen the entire body.

Mr. Louis Meehan, one of Peterborough's most enterprising and well known business men, during the past three years was an unceasing sufferer from Billious Dyspepsia. He was cured permanently by Ferrozone and is so anxious that all others may profit by his experience that he gives the following testimonial.

"About three years ago," says Mr. Meehan, "I had the Grippe which left me in a very run down condition that finally developed into Dyspepsia. I was unable to eat but a few things and had a craving for acid. I gave up treating with the doctors because they did not help me, and on the advice of a friend used Ferrozone. It not only cured by of Dyspepsia and Billiousness, but has built up my strength to what it was before I had the Gripps. I can recommend Ferrozone as an ideal restorative."

Ferrozone is capable of digesting all classes of food, and contains in a highly concentrated form the elements necessary for strengthening and reconstructing, and nourishing the stomach and other digestive organs. It is a builder of blood, muscle and fat, and makes sickly, weak, disheartened people strong and well. Ferrozone gives you force, energy, vim and spirit and cures every time. Sold by all druggists. Price 50c. per box or three boxes for $1.25. By mail from N. C. Polson & Co., Kingston.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to l etin the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.
If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.
If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

EGBERT CHAMBERLAIN, - - - - - - NEW YORK
Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 60 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

'Henry Fielding's Dream'

By CORTLAND MYERS.

been the greatest obstacle, was thus removed. He had spoken to Henry, and even engaged in short conversation with him at the church, but never dreamed of the great secret in his heart.

This was the most gigantic barrier of all and now the chasm was narrowing.

But the largest and strongest cable in the bridge was his own surrender to Christ. There was not anything in the world so powerful in winning Grace Chalmers as the might and attraction of character.

She had liked Henry Fielding before. That surface element was changing into something deeper now. Her religion was the most real part of her life. It was the best part of any other life, in her estimation.

Her father had left her a small fortune in her own right, but she did not think of that, like most rich girls, as being the real value and the wealth of the world. To her, that was secondary to the eternal values.

If many girls of her standing in society were frivolous, and recognized not the wealth of goodness, she was not alone in her position. There are many young women, with fortunes of their own, who are not all for society, and show, and sham. She was not the exception. She was only a representative of a number.

She often said, "I care not what others do. I am first going to serve God, and in order to serve Him, I must serve others. That is the only way I can be like Him, or show my love for Him. I must live for God, by living for others. There is no other way."

What a simple thought, and yet it is the sublimest philosophy of the world. It is Christianity— it only is Christianity.

Her own disposition and life was the greatest cable of all in the bridge. Reality could be in Henry Fielding's dream, because she was what she was.

Each day had added something to the strength of the unseen bridge, until the eventful and fateful night in December.

Henry ventured to step upon it, and cross to her side. To the deepest joy of his soul, and almost the deepest surprise, it did not break.

He had kept the precious secret for a whole day, and was making it known to Elsie the next evening, when suddenly there came a slight knock upon the door.

"I wonder why they don't ring the bell," said she, as she rose to go.

"Never mind, it is hard for you to get up. I will go," said Henry, and started for the door, without waiting for the bell.

What amazement as he looked out into the blinding snowstorm, now drifting all over the porch, to see a pale, emaciated, and almost frozen form in the doorway. A young man, so changed, but not beyond recognition. It was Will, their brother.

For an instant, Henry forgot his crime, and welcomed him as if nothing had happened. He seized him by the hand, and with the other hand upon his left arm, almost drew him across the threshold.

Elsie was near the two brothers in an instant, and threw her crippled arms about his neck and kissed him. She then flung herself into a chair and sobbed as if her heart would break.

He seemed speechless, and too cold to talk.

They warmed him, and fed him, and waited patiently for explanation.

He commenced several times to tell the awful tragedy of these months of his life, but Henry and Elsie both kept saying:

"Wait, now, until you get warm. We have time enough."

But at last it came, and in such pathos, that they all wept together, as he pleaded for forgiveness. He kept on saying: "I did not mean to do it. I did not know what I was doing. It was the poison that I had been drinking. Oh, God forgive me," he cried. "I have been in the place which they say is the doom of the lost. I know what it is. Remorse— remorse— remorse. No one can describe it. No one knows. I could not stand it longer. Now, I want to suffer the penalty. I am not only willing to, but I want to. I must."

He told them of the horror of that night in the old home. How he had fled, and walked, and ridden, all the way into Canada. There he concealed himself and his crime for months until conscience had driven him almost mad and made him feel that death was preferable to such a life. Neither a Hugo nor a Hawthorne ever made the picture of an awakened conscience too vivid. It is reality. It is suffering beyond all human agony. It had almost changed every feature of the man. It had forced its way into every drop of blood in his veins. It came as reality in the daytime, and as a ghost to frighten in the darkness. He could not escape. Conscience discovered his hiding-place, and forced him to seek another, only to instantly frighten and condemn him again.

"Oh," said he, "I wished I had done like George Roebling." He was one of their old neighbors, and went to school with them. They had been constant playmates in childhood.

"What did he do?" asked Henry.

"Why do you not know? He became a drunkard, too, but he did not strike his mother. He went away to the West to make his fortune, and gave great promises to his mother as to how he was going to come after her, and care for her all her life. But, instead of getting rich, he went into bad company, and, step by step, went down until he was the lowest of the low; a drunken tramp, and thus he wandered all the way back home to his mother, who had not seen him for years, or heard from him. She received him into the old home, and cared for him, and told him to stay until he had conquered his appetite and temptation.

"One morning she gave him some money to go over the mountain, to a town where they were holding temperance meetings, and many men were being saved. He went, and she told us how she kissed him good-by and waved her handkerchief to him as far as she could see him, and then went back in the house and prayed as she had never prayed before.

"When he reached the place rain was falling, with a mixture of snow. He had no overcoat or umbrella. He went to the church, and it was closed. He tried to find the speaker, and could not. It was only four o'clock in the afternoon—four hours still before the meeting was to be held. No door was open to him, except the door of a saloon. He went in, and wrote a note to his mother like this," and Will could hardly push the words across his lips: "'Dear Mother—I am cold and wet. The church is closed. Everything is closed except the saloon. I am in the same misery. The old appetite is back again. I have been drinking; there is no hope for me. I know you will forgive me. It is for your sake as well as my own. Forgive me. Your boy, GEORGE.'

"When he had written this note, he reached across the bar, and seized a revolver which was lying there, and sent a bullet crashing through his brain.

"God knows that story was sad enough, but how much worse is mine! Would to Heaven I had killed myself before I struck the best woman who ever lived, but now I must pay for the crime. I have paid in part, but now I will pay it all."

(To be continued.)

THE BEST FRIEND OF THE COLONIES

LORD STRATHCONA PAYS TRIBUTE TO HON JOSEPH CHAMBERLAIN

FACTORY WOMEN COMING

British Women's Immigration Society Plans to Send Out Three Hundred Shortly

London, February 2.--Mr. Smart, beseiged by reporters, said the average Briton did not fully appreciate the superior advantages of Canada over other countries. The emigration of British people would create a better feeling than any fiscal policy. In twelve years Canada could supply Great Britain with all she needed in wheat and flour.

SIR EDWARD GREY.

Sir Edward Grey asked the Manchester Reform Club if they thought there was a case in which any country benefited by retaliation. Instead of protectionists being able to throw open Colonial markets to British goods, the Colonies would still further raise the duties.

COLONIES BEST FRIEND

Lord Strathcona, speaking before the Newport Chamber of Commerce yesterday, said the Colonies regarded Mr. Chamberlain as their best friend, and he had done more for the Empire than any other.

BACK TO THE LAND.

Mr. Chamberlain has written a letter to Edgar Wallace, approving of the scheme of replacing on the land agricultural laborers stranded in London.

MR. BONAR LAW.

Mr. Bonar Law, M.P., speaking at Edinburgh, said, with the example of Canada and Germany, there was no need to go abroad to see what retaliation means.

FACTORY WOMEN FOR CANADA.

The British Womens Emigration Society is endeavoring to raise £20,000 to send 300 women to Canadian factories.

WOMEN EQUAL TO MEN.

Dr. Forbes Winslow has this encouraging word for the women in The London Express,

"While, of course, it is true that many forms of manual labor are too severe for women, I hold that in any field of work where her strength will permit her to compete with men she can do as well as he can; while her general organization will be no hindrance to her success and continued exertions. The clerical profession is still closed to women, not only in England, but in every part of the world except America, where I had the pleasure of hearing a lady divine give a most eloquent address.

"Women at the present moment compete with men in every occupation and profession except divinity and law. There are lady secretaries, and on the Continent we even see the duties of railway porters and luggage carriers performed by women. It is a strange thing for an Englishman on landing at a foreign port to see the strong masculine women come on board and shoulder the luggage.

"Now, whatever may be said of the 'rights of women,' it is obvious that in Christian and civilized nations a certain mission exists—that of marriage. In England the proportion of women who are married during the year is one in every seventeen of the population, or, taking the census existing, there are more than two millions unmarried. We see, therefore, that these two millions are cut off from the great end of their existence. Their lot is, indeed, very various but the greater portion must necessarily have to labor for their very bread in one way or the other.

"Here is a great problem to solve. The order of nature seems to be that as maternal cares and household duties should occupy the women exclusively, the sustenance and protection of her children should also devolve upon the man. The order of society deprives millions of women of a mate, a protector and a breadwinner. We must naturally ask ourselves under the circumstances —How does she fare?

"The inquirer need not look far ahead for a response to the question, especially if he be a dweller in a populous city. Everywhere she is seen eagerly and successfully competing with man for a means of living, but until lately, with an instinctive selfishness, man has sadly limited the sphere of labor.

"Many women who are content with celibacy often perform a great work in religious duties. This takes the place of maternal cares and motherly instinct. In these cases an admirable character is produced. Self-denial and humility, an expensive, ever-active charity, candor and amiability, an unobtrusive goodness of heart, a love of social and domestic pleasures are a few of the qualities of these women, who have failed to fulfil the great physical end of their existence, but have sufficient head and heart to see that they have other moral duties to perform."

BLOOD DISEASED MEN

If you ever contracted any blood disease you are never safe unless the virus or poison has been eradicated from the system. Have you any of the following symptoms? Sore throat, ulcers on the tongue or in the mouth, hair falling out, aching pains, itchiness of the skin, sores or blotches on the body eyes red and smart, dyspeptic stomach, sexual weakness—indications of the secondary stage. Don't ruin your system with the old fogy treatment—mercury and potash—which only suppresses the symptoms for a time only to break out again when happy in domestic life. Don't let quacks experiment on you. Our New Method Treatment is guaranteed to cure you. Our guarantees are backed by bank bonds, that the disease will never return. Thousands of patients have been already cured by our New Method Treatment for over 20 years. No names used without written consent.

Mr. E. A. C. writes: "Your remedies have done me more good than Hot Springs and all the doctors and medicines I had previously tried. I have not felt any of those pains or seen any ulcers or blotches for over seven years and the outward symptoms of the loathsome disease have entirely disappeared. My hair has grown in fully again and I am married and happy."

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-30-03.
Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.
Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS. Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 28, 1903.
Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise.
KROHN BROS. Cincinnati, O. Prescott, Ariz., July 30th, 1903.
Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-28-03
Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.
The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS. Cincinnati, O. Prescott, Ariz., July 31, 1903.
Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.
In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

ROBERT HARRISON
Manager.

A CHOPHOUSSE TRAGEDY

Being a Tale of the Great American Drama.

Concluded from Tuesday

aspect to his smooth shaven face. He might have been a man of thirty, or he might have been older. It all depended whether the wrinkles about his mouth were made by dissipation and strong emotion or by the slow chisel of time. He wore a brilliant new waistcoat, and swung a cane jauntily in his hand as he calmly took in the scene.

"Ye gods!" cried the advance agent. "He's got Shakespeare down and out this time, sure! He wears his apologetic look even when he's written a two hundred night success and bought a new vest on the strength of it. But this time he looks actually defiant, and he's got the new vest into the bargain!"

"He looks almost handsome," said Forbes.

"He looks almost successful!" said Appleton.

"He looks as if he'd buy a drink," said the fat press agent. "Hi! Atwell!" he called, raising his voice.

With a nod of recognition Atwell came down to them. He shook hands all around and pulled up a chair. "Back on the Rialto again, thank God!" he said.

"Yes, and we're all glad to see you!" said the red-headed advance man, with a wink at the others. What'll you have to drink?"

"Nothing," said Atwell.

"What?" came the astonished chorus. Even the expectant waiter looked incredulous.

"No!" Atwell continued, "nothing. I'm on the water wagon till my new play has been produced."

"My, how thirsty you'll get!" said the red-headed one, with another wink.

"On the contrary," said Atwell, with some asperity, but not without a sense of the dramatic effect his words would produce, "it has already been taken by Frothman for Richard Southfield's use. Southfield, in fact, was to read it this afternoon."

"The devil!" exclaimed the fat press agent, with quaint sincerity.

"That's about what I said when Frothman took it," laughed Atwell good-naturedly. "Of course Southfield is the only man who can play the lead. I wrote it with him in view. But I've been thrown down so many times by the big guns that I sent the piece to every manager in town before Frothman read it. It was the old story till I struck Frothman. I was pretty well down with the blues, I can tell you. But the contract is as good as signed now, and no more of this hand-to-mouth life for me! I'll make a name now and a fortune, not earn a living and the jeers of my 'friends.' I've been an advance agent for the last time. (A grunt from the red-headed one.) I'll make my pile and my reputation now, and do work that's worthy of a thinking man!"

"What's the play about?" asked Appleton, diplomatically heading off an evidently very red-headed retort from the slandered member.

"Well, I don't want to give it away too much before the production is settled," said Atwell, "but I can promise you it is a great play, a great play!"

"Humph!" said the advance agent.

"The scene is laid right here in New York," Atwell went on, in his mounting enthusiasm not heeding the interruption, "and it's no commonplace comedy-drama; it's a real picture of a life crushed out by this gigantic, heartless town. We have had New York plays in plenty, but never one like this, where the two contending forces are the will and ambitions of a man, a single, tiny man, and the great impetus of three million beings in a mass, hurtling headless against him. Of course the man goes down; he goes down with a struggle, a fight, that is the meat of the drama, to end his own life in a restaurant at the final curtain. It's a pitiful ending, with the noise and rattle of gay New York life, which we think is all of New York life, at any rate, in our drama, to furnish greater contrast. It's a splendid moment for an actor, too, that end. I know you'll like the last act, Appleton, when you see it."

"I'm sure I shall," said Appleton, politely.

"Oh, have a drink!" said the advance agent.

"Again, thank you, no," said Atwell. And he went on with his talk about the play, his eyes big with excitement, his body tilted forward over the table. "I've avoided, I'm sure," he said, "the faults which make Ibsen unpopular in this country, while keeping all his virtues. I know the time has come for the drama of the mind as well as of the heart, for the drama of psychology as well as of sensation. But it can't all be done by conversational means. There have got to be some bits of stirring action or your American audience won't recognise their great play when it comes. I've got the psychology and I've also got the action. The two are fused also. When that last moment comes the audience will know the man's brain was ripened for the suicidal idea, and though the physical act of self-slaughter, following on the heels of the messenger who brings word of the man's last failure, will startle and thrill them, it will come as the natural completion of the play, the last note of the great tragedy of New York. I tell you, gentlemen, I am going to make my hit at last; I am going to do the laughing now; I am going to turn the tables on all of you who——"

"Mr. Atwell?" asked a waiter, interrupting the speaker as he was almost rising to his feet in his excitement.

"I'm he," said Atwell, sinking down again. "What's wanted?"

"Mr. Hyatt, Mr Frothman's manager, you know, is outside in a cab, and he wanted to know if you were here, sir; I'll tell him. He said he'd come in if you were," the waiter explained, and went out of the door.

"Humph!" said the advance agent. "Make Hyatt come to you now, do you?"

"He usually comes only to show girls. Principals and playwrights have to go to him," said the tenor.

"I wonder what he wants," said Atwell, half to himself.

At that moment Hyatt entered the chophouse, his hulking body towering over the waiters, who bustled about, his glum face glummer than usual. "Can I have a word with you, Atwell?" he said, coming up to the table and pitching his head slightly forward by way of greeting to the others.

"Certainly," said Atwell. "Is it private? These are all my friends, so I don't mind hearing it here, if you don't."

"I don't care," the manager retorted, gruffly, sitting down. "Why should I? I'm going out of town in the morning, so Mr. Frothman wanted me to see you to-night, before I went. Southfield read your play this afternoon, and he can't see it. Says we'll have to call it off. And what he says pretty near goes."

"What!" cried Atwell, a sickly pallor coming over his face, the lines about his mouth suddenly drawing hard. "Oh, you don't mean that!"

"I'm sorry, but I do," said the manager.

"What's the matter with it? I'll go see Southfield now," Atwell almost shouted, springing up.

"No use, no use," the other replied, pushing him back again. "It's too late to see him to-night, and he won't see you to-morrow. He's made up his mind; so's Mr. Frothman. You'd better leave 'em alone."

"But I will know what's the matter," cried the playwright. "What did Southfield say? It was the play of his whole career!"

"Well," said the manager, "the play was too sad, in the first place. Mr. Frothman decided that before he sent it to Southfield. The public wouldn't have stood for it."

"Sad! Of course it is sad," shouted Atwell. "It's a tragedy, the tragedy of New York. Good——"

"Perhaps, but it wouldn't have gone with the public. Then Southfield read it. He declared the end was silly and preposterous, and Mr. Frothman agreed. The hero, or whoever it is, kills himself in a cafe with a steel meat knife, doesn't he? Pulls his coat and vest open and pricks himself between the ribs? Well, Southfield couldn't see that at all. People never do such things in real life——"

"That's what Brack says in 'Hedda Gabler,'" struck in young Forbes.

"Shut up!" said the manager. "Of course there was no contract signed," he continued, "but Mr. Frothman is willing to do more than the square thing. He'll give you $500."

"Can't the ending be rewritten?" suggested the fat press agent.

Atwell had been sitting in deadly calm for the last few moments. At this suggestion he rose to his feet. His eyes were burning, but his voice was level, under a tremendous control. Two or three waiters stopped in their passage to and fro at his first words, held by the sudden note of gravity in what they perhaps had supposed a drunken toast. Those at surrounding tables stopped their chatter. The big bearded German director of grand opera faced about from the bar, holding his beer mug in his hand, his excitable little eyes fixed in wonder on the speaker's face. The chophouse was suddenly still.

"No, Billy," Atwell began, "the ending cannot be rewritten. There is only one way a tragedy can end, and that is in death. Of course Mr. Frothman's dear public, the dear American public, would much rather have their tragedies end happily; but I'm not writing for them but of them. There's a difference, I find. Moreover, there is only one form of death artistically possible to any given tragedy—that form in mine is suicide with a table knife."

The room had become more silent as Atwell spoke. Curiosity had deepened into strained attention at the strange earnestness of his voice. A solitary laugh at his last words jarred harshly and was smothered. He turned on Hyatt, who was glowering uncomfortably in his chair, conscious that the dignity of the firm of Frothman was in danger by this public discussion.

"Tell Frothman from me," said Atwell, his voice rising, "that I don't want his $500, that I won't take it, that I can still earn a living as I have done. What do I want of money except as it comes from the public in proof of the mettle of my play? What I want is to see my play produced. I know it's a good play, a great play. Why shouldn't it be produced? You think it's a joke, all of you, my writing plays. For ten years I've written them and tramped up and down, up and down, that street out there, trying to sell them. Do you think I've enjoyed that? Do you think it has been easy to face the disappointment, the scorn, the laughter, to see my hopes go, my best years pass, my goal forever in the distance? Do you think, then, there's no truth in this play you say is too sad for the public, too preposterous for production? I've known myself, I tell you what it is to fight single-handed this monster we call New York, to struggle for a hearing where so many others are struggling, with as much right to be heard as they, to be filled with hopes and dreams and great ambitions, to be thrown back and recover and be thrown back again, till hopes and dreams and heart are gone. Tell Frothman that. Tell Southfield that. And tell Southfield that if he calls the ending of my play silly and preposterous it is because——"

Atwell stopped abruptly. His eyes rolled up suddenly and stared in horror to the far end of the chophouse. "Look!" he cried, pointing with his finger.

Everyone turned in the direction of his gaze. The German conductor, unnerved by the sudden transition, dropped his mug with a crash on the floor. Appleton was the first to grasp the situation. With a cry he faced around again and sprang upon Atwell. He was too late. Atwell's coat and waistcoat and shirt were ripped open, and the steel knife that had lain on the fat press agent's plate was in his heart.

Appleton caught the body as it lurched forward over the table.

"People don't do such things in real life," he said to Hyatt, who stood ghastly pale and still as the crowd surged up with a great, outrushing breath of horror. "Go quick for the police, will you?"

Everything comes to the Man who waits.

Country Rector's Wife (engaging manservant)—And can you wait at dinner?

Man—Aw, yes, mum; I'm never that hoongry but I can wait till you've done.

At the Photographer's.

"Have I the pleasant expression you need?" (Voice from under the cloth)—Perfectly, sir. "Then let her go quick, governor; it hurts my face."—"Life."

A Poor Fisherman.

"I'll never go fishing with that lunkhead, Smith, again." "Didn't catch anything, eh?" "No; and I don't say I caught anything, for fear that he will tell the truth about it."—Ex.

SEWING HINTS.

Always use double thread for gathering.

Always use as fine a thread and needle as the garment will allow.

When threading your needle make the knot on the end broken from the reel.

The rule for frilling is one and a quarter the length of the edge to be trimmed.

THE C. P.R.'s ENTERPRISE

Bowmanville, Ont., February 1 — Mayor James has been informed that the Dominion Parliament will be asked at next session to incorporate the Campbellford, Lake Ontario and Western Railway Company, to construct a railway through Hastings, Peterboro, and Northumberland, Durham, Ontario and York counties connecting with the Canadian Pacific Railway. This is the outcome of the request made by a large delegation, which waited on Sir Thomas Shaughnessy in Montreal.

MR. CHAMBERLAIN DEVELOPES PLAN

TARIFF COMMISSION APPEALS TO LABOR UNIONS AND FARMERS

ENGLISHMEN EXPECT WAR

Many Problems Exist Tending to Bring Britain Into Conflict

London, February 2.—The King will open Parliament today, with every state ceremony, but the one man with whom Parliament and the whole political world is most concerned, chooses the same day for the commencement of a holiday. Thus does Mr. Chamberlain announce that his policy has nothing to fear or gain from Toryism as now represented in the House of Commons. He leaves Mr. Balfour and the Ministry to fill in the interval at Westminster with army reform, or what they please, until he has completed his appeal over the head of Parliament to the electorate. But though Mr. Chamberlain ignores Parliament he never ignores the political machine. His last act before his holiday was to summon the Liberal Unionist Association to declare once for all whether he or the Duke of Devonshire is to be their leader; imperial reciprocity or free imports their watchword.

CHAMBERLAIN DEVELOPS.

The eve of Parliament finds Chamberlain undergoing two other interesting developments. Mr. Chamberlain realizes that no policy can succeed in England without the votes of workingmen. No labour representative has been found to serve on his Tariff Commission. Presumably the labour unions are for the moment disposed to boycott the enquiry. Nevertheless, the commission has invited all the labour associations to assist the enquiry by answering questions and sending witnesses. The other development of the Chamberlain policy affects British agriculture. The British farmers have shown increasing uneasiness at the prospect of a preference in the British markets for their most active rivals in Canada and Australia. A special agricultural section of the commission has been formed, therefore, under the leadership of that old-time protectionist ex-Minister Chaplin. Of course, if British agriculturists and manufacturers had their way, the new protection would go far beyond Mr. Chamberlain's modest ten per cent. on foreign imports. Mr. Chamberlain's chief difficulty indeed, will be to keep their support without approaching the McKinley tariff levels.

ENGLISHMEN EXPECT WAR

Despite the pacific Russian assurances most Englishmen are driven to expect war in the Far East. For them it is a leap in the dark. The governing classes cling to the hope that the Anglo-Japanese treaty will tend to isolate the conflict, believing that the Czar would be unlikely to demand French assistance, when he knows that he thereby would bring the formidable British naval power against Russia, but war once begun has a habit of running its own course. As the Liberal journals point out, there are the questions of the Dardanelles, of coaling stations on the road to the Far East, and of the neutrality of the Suez Canal, on any one of which Japan, as Great Britain's ally, might expect her assistance and an outburst of public opinion might force the hand of the British Government. Finally, there is the chance that advantage might be taken of Russia's preoccupation to force a crisis in the Near East, with all its complications to Europe, hence the appeal which the more reflective journals already are making to English speakers and writers not to whip up so dangerous an element as public opinion against Russia.

THE PILGRIMS' DINNER.

Perhaps it is significant that, at this moment of anxiety, even pugnacious Tory journals like the Telegraph turn with relief to last night's Pilgrims' demonstrations of Anglo-American accord. The Telegraph congratulates itself that a century and a quarter after the two great halves of the English-speaking system were torn apart they are far nearer together in their social intercourse and mutual understanding than they were before the War of Independence.

THE NEGRO POPULATION.

The Spectator cordially approves the suggestion that negroes be imported into the Soudan from the Southern States of the union, as free men, of course, to teach gradually the thin population of the Soudan all the methods of cotton cultivation. It says: "The climate will exactly suit the negro, who, when well treated, is a decent citizen, anxious to make money, and accustomed to the ascendancy of the white man. The Soudan in such circumstances will furnish the finest cotton field in the world."

AN IMPOSING FUNCTION

Ceremony in Honor of German Emperor's birthday

Berlin, Feb. 1—At the Reichstag dinner tonight, given in honor of the emperor's birthday, Count Von Ballestrem president of the reichstag, related a recent conversation between himself and Emperor William during which, in response to Count Von Ballestrem's reference to the emperor having met the czar during his recent illness, his majesty said: "In case of there being anything serious the matter with me, I wished to leave my son in agreeable and neighborly relations."

A great crowd gathered in front of the palace early today both to salute Emperor William on his birthday and to get good places from which to see the members of the royal family and court and other officials offer their congratulations to the emperor. The latter, surrounded by generals, appeared before a window overlooking the square and acknowledged the acclamations. From that time onward carriages arrived containing those of rank sufficient to permit them offering their good good wishes, beginning with the members of the family and their suites, the cabinet ministers, the heads of the army and navy, visiting kings and princes and ambassadors, among them United States Ambassador Tower. The emperor received the callers in the pillar hall until midday.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.70 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $42.88 and $79.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mines for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. G. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, dow 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore bod

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, know as the North Bonanza, Flowery and Kimbark. They are located in Six Mil Canon, less than four miles from Virginia City, Nevada, which is the neares railroad station.

Years ago, over three hundred thousand dollars of development work wa done upon the mines—so they are not mere "prospects" but actual mines. Thi work was done under the personal supervision of competent engineers, an was paid for by the owners of the mines themselves; thus giving double as surance that the work was well done and that the expenditure was jus tified.

The Main Shaft (triple compartment, 8x16 feet in the clear) is down seve hundred feet. From this shaft, running along the vein matter, east and wes are four drifts, at different levels, having a combined length (including th Rule winze and the tunnel) of 3,250 feet.

In addition to the above there are four small shafts, with a combined dept of about 800 feet; 525 feet of tunnels, and at least 500 feet of cross-cuts, up rises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and prac tical miners that there is developed an ore body of at least One Million Fiv Hundred Thousand Tons!

As a further evidence of the large amount of work done there is fro 75,000 to 100,000 tons of ore on the dumps at the different surface openings—or that, with modern cheapened processes, can be converted into gold bullio at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the Unite States government, while the title of the Kimbark is by location and posse sion.
